MUHAMMAD ZAHID	BT102 Microbiology
Quiz 1	Fall 2020 (22 December 2020)

1. Rigid layer outside the plasma membrane is.....**Cell wall**
2. Capsule is responsible for .....**virulence**
3. Which of the following is the function of cell wall?..... **All of the given option**
4. Lipid bilayer is present in ___.....**Cell membrane**
5. Movement against the concentration gradient is known as .....**Active transport**
6. LPS stands for .....**Lapopolysachrides**
7. Cytoplasm contains _____ percent wat.....**80%**
8. Which of the following has high susceptibility to penicillin? .....**Gram Positive Bacteria**
9. Which of the following contain mycolic acid?..... **Mycobacterium & Nocardia**
10. Which of the following is used for attachment?..... **Both fimbriae & pili**
11. Which of the following is the most important structure in prokaryotes?..... **Cell Wall**
12. Which of the following is the smallest bacterium?..... **Mycoplasma**
13. Flagella is responsible for.....**Locomotion**
14. Which of the following is used for DNA Transfer?.....**Pili**
15. Flagella move ____ for forward thrust..... **Both counter clockwise& run/swim**
16. _____are used for twitching motility.....**Pili**
17. Which of the following is responsible for protein synthesis?.....**Ribosomes**
18. Which of the fallowing is the type of membrane protein?..... **Both peripheral & integral proteins**
19. Which of the following bacteria has atypical cell wall?.....**Mycoplasma**
20. After Gram staining, Gram positive bacteria appear_____.....**Purple**
21. Extrachromosomal DNA is known as. .....**Plasmid**
22. Gram Positive bacteria produce _____.....**Exotoxins**
23. Gram negative bacteria produce .....**Exotoxins and Endotoxins**
24. 70S ribosomes consist of two subunits, _____..... **50S, 30S**

Muhammad Zahid (Haveli Lakha)

25. Rod shaped bacteria are called_____.....**Bacilli**

26. Which of the following structure used for moving?..... **Flagella**

27. Lipid A is responsible for .....**All of the given option**

28. Which of the following disease caused by spirochetes?.....**All of the given option**

29. _____ is composed of pilin..... **Both Pili & Fimbriae**

30. Which of the following is responsible for destruction of cell membrane?.....**All of the given options**

31. The basal body of flagellum of Gram-positive bacteria consist of _____ ring.....**2**

32. The basal body of flagellum of Gram-negative bacteria consist of _____ring.....**4**

33. Integral proteins are _____ the cell membrane and are ____ in water..... **Imbedded in, insoluble**

34. Hair like small appendages on G-neg. cells are known as.....**Fimbriae**

35. Which of the following is not present in bacteria?.... **both histone & nuclear membrane**

36. Facilitated diffusion is done with the help of..... **Integral protein**

37. Spirochetes bacteria move by.....**Axial filaments**

38. Long filamentous structure that propels bacteria is known as..... **Flagella**

39. When cocci join in chain like structure then the shape is known as .....**Streptococci**

40. Which of the following structures is involved in the locomotion of bacteria.....**Flagella**

41. Which of the following condition in which water moves into the cell?..... **Hypotonic**

42. Teichoic acid is made up of.....**All of the given option**

43. Energy is required in..... **Active movement**

44. Which of the following is used for mating?..... **both Pili & Fimbriae**

45. Which of the following is not part of the flagella?.....**None of the given option**

46. When two round shape bacteria join then it is known as ..... **Diplococci**

Muhammad Zahid (Haveli Larka)
