BT406 quize 3 Updated

Warrior group of zoologist

Sir arslan

1. In non probability sampling the probability of any particular element of population is being choosen is ..... unknown
2. .....is the ability to generalize experimental findings to real life situations..... external validity.
3. Researcher read percentage tables to make .....comparisons.
4. One-shot case study design is also called .....one group pottest -only design ...
5. Stratified random sampling provide the assurance that the sample will accurately reflect the population on the basis of criteria used for ..... Stratification.
6. CAPI stands for .....computer assisted personal in interviewing.
7. Researcher combine parts of experimental together into a/an ..... experimental design .
8. ..... Is the process of checking and adjusting the data for omissions legibility and consistency ..... editing.
9. Cause and effect relationship can also be contaminated by the effects of the passage of time it is a/an ..... uncontrollable variable.
10. In ..... The findings from the study of the sample cannot be confidently generalized to the population .....non-probability sampling.....
11. When early reviewing if the data is not possible..... Is done .....in-house editing .
12. ..... Is a form. Of social Inquiry that focused on the way people interpret and make sense of the experiences and the world in they live in ..... qualitative research

13. Statistic is different from statistics in a sense that .....statistics refers to the field of study dealing with data collection and interpretation .
14. There are two basic rules for code construction first the coding categories should be .....Second the coding categories should also be ..... Exhaustive mutually exclusive.
15. The researchers have created numerous ..... And ..... To measure social phenomenon.....scales indexes.
16. The type of sampling method that begins with are /few and spreads out on the basis of links is called .....snowball sampling.
17. ...,..... allows researchers to reach a large audience to personalize individuals messages ..... electronic interactive media.
18. Protests and posttests are performed to measure. ..... variable during an experiment..... dependent .
19. If the research objective requires and extremely lengthy questionaire .....may be the only alternative..... personal interviews.
20. Quota sampling can be considered as a farm of .....proportionate satisfied sampling.
21. In experiments pretests and posttests measure ..... Variable.....y
22. ..... individuals selected for the sampling are the majore means to reducing non response error .....attempt to re contract
23. A ..... Is a measure in which the researcher captures the intensity direction level or potency of a variable con ...? .....scale.
24. Following are the factors affecting internal validity except ..... chemical loss
25. The purpose of experimental research is to allow the researcher to control the research situation so that causal relationship among..... May be eva..... variables.
26. In ..... The findings from the study of the sample cannot be confidently generalized to the population.... random sampling.
27. .... Involved assigning numbers or other symbols to answer so the responses can be grouped ..... coding.
28. In ..... One experimental group and one control group can be given the both pretest and the posttests and other two groups will be pottest ..... Solomon four group design.
29. Multiarea are sampling is ..... City block houses in the block individual in the house.

30. ..... Refers to making interference pertinent to the meaning and implications of the research investigation and drawing conclusions..... interpretation of data .
31. The process of using a small number of items or parts of a larger population to make conclusion about the whole population is called ..... sampling.....
32. Response of the ..... Are measured to the experimental treatment..... Tests unit .
33. ..... Is also called haphazard or accidental or grab sampling.....convinience sampling.
34. The final stage in the coding process is .....data cleaning.
35. A..... Is a subset or some parts of a larger whole..... sample.
36. ..... Is a unit about which information is collected and is the basis of analysis..... element.
37. When the elements of population are highly homogenous samples are highly representative of the ..... population.
38. Which of the following is an ethical issue in performing lab experiment.....all of the given options
39. ..... Is the summary description of a given variable in a population..... statistic.
40. Depending upon the type the researcher lays down the criteria for the subjects to the included in the sample this is Called .... purposive sampling.
41. Some common types of graphic presentation are .....histogram bar chart and ple chart .
42. ..... Refers to body of facts are In a format suitable for decision making whereas.....are simply recorded of certain.....Information data .
43. Network chain. Referral or reputational sampling is also called .....snowball sampling.
44. I. Probability sampling every element in the population has a known .....non zero probability of selection.
45. Consumer price index (CPI) is a measure of .... inflation.
46. Self administered questionaires printed on paper are. ..... Media ..... interactive.
47. The editor may have to ..some data ..... reconstruct
48. Classical experiment design entails pretest and posttests ...true.
49. Many research projects especially those in quality control testing required the ..... Of the items being tested.... destruction.
50. For the presentation of data tables are frequently constricted in research which of the following is not part of tables.....regression
51. Statistic is different form statistic in a sense that ..... Statistic refer to summary description of a variable in survey sample in numerical form
52. Sequential sampling is similar to purposive sampling with one difference.....to collect cases untill desired number of samples are collected .
53. The ..... Contingency table is widely used These tables are based on cross tabulation .....bivariate.

54. Target population may also be called ..... survey population
55. Target population may also be called ..... survey population
56. In some cases the responded may. Have answered only the second portion of a two part question this type of editing is. Called..... editing for completeeness.
57. The great strength of the survey as a primary data collecting approach is it's ..... versatility.
58. In a survey if answer to some questions are missing but jn some cases answer is necessary the editor put in the .....plug value.
59. Personal interviews conducted in shopping malls are refered to us .....small intercept interviews.a famous software used for data presentation known as SPSS stands for ..... statistical package for the social sciences.
60. A .... Is a set of rules stating that certain Numbers are assigned to variable attributes..... coding procedure
61. In experiments pretests and posttests measure..... Variable.....X.
62. People usually estimate the cost of personal interviews is usually..... Times higher than the mall survey....15.
63. Convenience samples are least reliable but.....and .....to conduct..... cheapest easiest.
64. The in house editor task is to ensure that inconsistent or contradictory responses are ..... adjusted
