CS403P GRADED QUIZ 3 BY IQRA AZHAR

A table is in the 2nd Normal Form if there is no_____.Select the correct option

Reflexive dependency

Functional dependency

Transitive dependency

Partial dependency

Partial dependency.

If a relation is not in third normal form, then anomalies are due to _____.Select the correct option

Transitive dependency

Reflexive dependency

Full functional dependency

Partial dependency

Transitive dependency.

The anomalies caused by transitive dependency in a relation are removed by _____.Select the correct option

Changing primary key

Reducing number of columns

Reducing number of rows

Breaking down the relation

Breaking down the relation.

CS403P GRADED QUIZ 3 BY IQRA AZHAR

_____ is a step by step process to reduce data redundancy and improve data integrity to build a more efficient and accurate database design.Select the correct option

Normalization

Classification

Modeling

Integration

Normalization

The only time we are concerned about 2nd Normal Form is when _____.Select the correct option

Primary key contains non-unique values

Primary key contains redundant values

Primary key consists of single attribute

Primary key is composite

primary key is composite.

A relation is in second normal form if and only if _____ and all the non key attributes are fully functionally dependent on the key.Select the correct option

It is in first normal form

It has multivalued attributes

CS403P GRADED QUIZ 3 BY IQRA AZHAR

It is not in first normal form

It has inconsistent data

first normal form

From the following options, Choose the correct statement for the third normal form.Select the correct option

There is partial dependency in the relation

Non key attribute is dependent on another non key attribute

No non key attribute is dependent on another non key attribute

There is redundant data in the relation

No non-key attribute is dependent on another non-key attribute.

If the relation is not in 2nd Normal Form, then we need to remove_____.Select the correct option

Partial dependency

Transitive dependency

Reflexive dependency

Full functional dependency

Partial dependency.

A transitive dependency occurs when _____.Select the correct option

Non-key attribute is dependent on another non-key attribute

Part of the key is dependent on key attribute

CS403P GRADED QUIZ 3 BY IQRA AZHAR

Non-key attribute is not dependent on another non-key attribute

Primary key attribute is dependent on non-key attribute

a Non-key attribute is dependent on another non-key attribute.

Which of the following action is performed on a relation to remove the transitive dependency?Select the correct option Augmentation

Aggregation

Composition

Decomposition

Decomposition

The given dependencies in the relation are:

stId → stName, stAdr, prName, prCrdts

prName → prCrdts

the correct option is: Transitive dependency

A relation is in third normal form if _____.Select the correct optionIt has a transitive dependencyIt has a partial dependencyIt is already in second normal formIt has multivalued attributes

it is already in the second normal form

A table is in third normal form if it is in second normal form and there is no _____. Select the correct optionTransitive dependencyPartial dependencyConsistencyFull functional dependency

transitive dependency.
