Cs302 Important Topics For Final Term;

- Boolean algebra and logic gates.
- Combinational logic circuits.
- Sequential logic circuits.
- Memory circuits.
- Arithmetic circuits.
- Microprocessors.
- Digital systems design.
- These topics are covered in detail in the CS302 course material.
- You can also find additional resources online and in libraries.

- Here are some specific questions that you can expect to be asked on the final exam:
- What is the truth table for a NAND gate?
- How do you design a half adder?
- What is the difference between a synchronous and asynchronous circuit?
- What is the function of a ROM?
- How do you design a 4-bit counter?
- What are the different types of microprocessors?
- What are the steps involved in digital systems design?
