Question # 2 of 5 (Start time: 06:11:09 PM, 22 July 2023)

Let $X = \{1, 2, 3, 4\}$ and $\{\emptyset, \{1\}, \{2\}, \{1, 2\}, X\}$ be a topology on X, then which of the following is NOT true ?

Select the correct option

○	Every element of X has uncountable local base.
○	(X, τ) be a first countable space.
○	(X, τ) be a topological space.
○	The local base of the element 4 is $\emptyset$.

MTH634 - Topology (Quiz No. 3)

Question # 4 of 5 (Start time: 06:13:29 PM, 22 July 2023)

Let X be a Hausdorff space and Y be a compact subspace of X. Which of the following statement is true?

Select the correct option

- ○ It depends on the topology of X.
- ○ Y is always closed in X.
- ○ Y is always open in X.
- ○ Y is neither open nor closed in X.

Question # 3 of 5 (Start time: 06:43:14 PM, 22 July 2023)

Which of the following statements is equivalent to the statement that a topological space X is separated?

Select the correct option

(B) Every pair of distinct points in X can be separated by closed sets.

(A) Every pair of distinct points in X can be separated by open sets.

Both (A) and (B) are equivalent

(C) X is Hausdorff.
