my mth 202 subjective questions

Question no 4: Marx (5)

If relation R is transitive then shows that its inverse is also transitive???

Q:2 Suppose that R and S are reflexive relations on a set A. Prove or disprove

$R \cup S$

is reflexive.

Find the 5th term of the G.P. 3,6,12,...

Let f and g be the functions defined by

$f(x) = 2x+3$ & $g(x) = 3x+2$ then find

1. Composition of f and g.

2. Composition of g and f.

and lec 22 m say ek question aya tha :)

MCQ from paper

1

Check whether

$36 \equiv 1 \pmod{5}$

$33 \equiv 1 \pmod{10}$

- Both are equivalent
- First one is equivalent but second one is not
- Second one is equivalent but first one is not

2

The power set of a set A is the set of all subsets of A, denoted $P(A)$.

► **False**

► True

3

What is the output state of an OR gate if the inputs are 0 and 1?

► 0

► 1

► 2

► 3

4

A statement is also referred to as a

- ▶ proposition
- ▶ Conclusion
- ▶ Order
- ▶ None of these

5

Let g be the functions defined by
 $g(x) = 3x + 2$ then $g \circ g(x) =$

- ▶ $9x + 4$
- ▶ $6x + 4$
- ▶ $9x + 8$

Most of the questions were from past papers.

Question: $1, 10^2, 10^3, 10^4, \dots$

is

- ▶ Arithmetic series
- ▶ Geometric series
- ▶ Arithmetic sequence
- ▶ Geometric sequence

Arrangement of rows and columns that specifies the truth value of a compound proposition for all possible truth values of its constituent propositions is called

- ▶ Truth Table
- ▶ Venn diagram
- ▶ False Table
- ▶ None of these

Check whether

$$36 \equiv 1 \pmod{5}$$

$$33 \equiv 1 \pmod{10}$$

- ▶ Both are equivalent
- ▶ Second one is equivalent but first one is not
- ▶ First one is equivalent but second one is not

Null set is denoted by

- ▶ (ϕ) or $\{ \}$.
- ▶ A
- ▶ None of these

The statement describes $p \rightarrow q = (p \wedge \sim q) \rightarrow c$

Commutative Law

Implication Laws

Exportation Law

Reductio ad absurdum

Find the sum of the infinite G.P.

Exclusive OR is logically equivalent to:

Ans: $(p \vee q) \wedge (\sim p \vee \sim q)$

An argument is valid if _____ of its premises implies conclusion.

ANs: Conjunction

One question was about fog.

One question was related to matrix. I was asked to draw matrix of RoS, and then was supposed to take its transpose.

There was question, in which a Relation was given and I had to check whether it is an equivalence relation or not.

Q.No 1

A circuit with two input signals and one output signal is called

NOT-gate (or inverter)

AND- gate

None of these

Q.No2

$\{ \} = \{ \}$

True

False

Q.No3

1 then $(2f - 1g)x = +2x^2$ –If $f(x) = x+1$ and $g(x) =$

Q.N04

The statement “It is not raining if and only if roads are dry” is logically equivalent to

If roads are dry then it is not raining.

Roads are dry if and only if it is not raining

If it is not raining then roads are dry

None Of these.

Q.No5

An arrangement of rows and columns that specifies the truth value of a compound proposition for all possible truth values of its constituent propositions is called

Truth Table

Venn Diagram

False table

None of these

Q.No 6

$A \cap (B \cup C) = (A \cap B) \cup (A \cap C)$ is called

Distributivity of intersection over union

Distributivity of union over intersection

None of these

Distributivity Law

Q.No7

A circuit with two input signals and one output signal is called

NOT-gate
AND- gate
None of these

Q.No8

Let $A = \{1, 2, 3, 4\}$ and $R = \{(1, 1), (2, 2), (3, 3), (4, 4)\}$ then

R is anti symmetric.
R is transitive.
R is reflexive.
All given options are true

Q.No9

If $f(x) = x$ and $g(x) = -2x$ then $(f+g)x =$
 $3x$

$-x$

Q.No10

Let the real valued functions f and g be defined by
 $f(x) = 2x + 1$ and $g(x) = x^2 - 1$
Obtain the expression for $fg(x)$

Q.No11

Let $A = \{1, 5, 9\}$ and $B = \{6, 7\}$

Then find Cartesian product from A to B and from B to A . Is both are equal or not Also Justify.

Q.No12

Bake Yaad Nahi.....

Theory of Automata (CS402)

Assignment # 4(Graded)

Total marks = 20

Deadline Date = July 31, 2015

Please carefully read the following instructions before attempting assignment.

Rules for Marking

It should be clear that your assignment would not get any credit if:

The assignment is submitted after the due date.

The submitted assignment does not open or file is corrupt.

Strict action will be taken if submitted solution is copied from any other student or from the internet.

1) You should concern the recommended books to clarify your concepts as handouts are not sufficient.

2) You are supposed to submit your assignment in .doc format. Any other formats like scan images, PDF, zip, rar and bmp etc will not be accepted.

Note:

No assignment will be accepted after the due date via email in any case (whether it is the case of load shedding or internet malfunctioning etc.). Hence refrain from uploading assignment in the last hour of deadline. It is recommended to upload solution file at least two days before its closing date.

For any query, feel free to email at:

cs402@vu.edu.pk

Q. Prove the equivalence of the given two FAs by computing $(L1 \cap L2)^c = (L1^c \cap L2^c)$.

Note: All transition tables are required.

Best of luck!

mera math202 ka papar tha bohat easy tha . all mcs almost from first 10 leactr main sy thy or subjective ye tha

$A = \{1,5,9\}$ and $B = \{6,7\}$

prove karna tha cross product

$A \times B = B \times A$

Q no

A.P series main sy tha if $a = 3$ $d = 7$ and $a_n = 59$ then find n

Q no

$f(x) = x^3 + 1$ is it a onto fuctions

q no

$a_k = a_{k-1} + 3$ where $k \geq 1$ and $a_n = 3 + 1$ where $n \geq 0$

show karna tha thy are same sequence

bohat asan paapr tha best of luck

Most msq and subjective are from

MTH202final_term_solved_papers_with_references_by_Hina

and Final term Moaz files

Subject:-

Possible relation set of $m \times n$

ans m^n

$m=2, n=3$

2^3

$f(x)=x^2+1$

$g(x)=x+2$

$(3f - 2g)(x)=?$

$f(n)=0$

$$4f(n)+2=?$$

$$g(x)=3x^2-2x-1$$

$$g \circ g(x)=? = 9x+8$$

$$a=\{1,2,3,4\}$$

$$R=\{(1,1),(2,2),(3,3),(4,4),(2,3),(3,2),(4,2)\}$$

Is reflexive ?

Is symmetric?

is Anti transitive?

$$f(x)=2x+3$$

$$g(x)=3x+2$$

$$f \circ g(x)=?$$

$$g \circ f(x)=?$$

$$\{(a,a),(b,b),(c,c),(a,b),(b,c),(c,a)\}$$

Is reflexive ?

Is symmetric?

is Anti Symmetric?

is transitive?

$$Q(a,b)=\begin{cases} 5 & \text{if } a < b \\ \end{cases}$$

$$\begin{cases} Q(a-b),(b+2) & \text{if } b \geq a \end{cases}$$

find $Q(2,7)$ // type is correct .. any figure might wrong

Best of luck

math202 ka paper tha. 90% mcqs past papers main sy ay thy.

2 marks k question ek question main domain range btani the ek recursion waly lec sy function wala question.

Ek question ko prove krna tha k ye onto function hy k nae,

Ek question arithmetic sequence sy 11th term find krni the 9th or 4th term btai hui the.

Ek question mjy nae ata tha.

Or ek five marks ka recursion waly lec sy aya tha.

Thats it.

math202 ka paper tha bohat easy tha . all mcs almost from first 10 leactr main sy thy or subjective ye tha

$$A = \{1,5,9\} \text{ and } B = \{6,7\}$$

prove karna tha cross product

$$A \times B = B \times A$$

Q no

A.P series main sy tha if $a = 3$ $d = 7$ and $a_n = 59$ then find n

Q no

$$f(x) = x^3 + 1 \text{ is it a onto fuctions}$$

q no

$$a_k = a_{k-1} + 3 \text{ where } k \geq 1 \text{ and } a_n = 3 + 1 \text{ where } n \geq 0$$

show karna tha thy are same sequence

bohat asan paapr tha best of luck

IN TODAYS PAPER in question 1 nth term of a sequence was given and u have to give 1st 4 terms.

question 2: 5th and 9th term of sequence were given and u have to write the sequence.

question 3: a relation was given and u have to tell that it is bijective or not

question 4: a relation was given and u have to tell that it is partial ordering or not.

question 5: matrix of relations R and S were given and u have to write matrix of $S \circ R$.

question 6: was about finding points $Q(14,3)$ with conditions 5 if a is less than or equal to b . $Q(a-b, b+2) + a$ if b is less than or equal to a

Determine the matrix of the following?

Find the Infinite G.P of $2, 2^{1/2}, 1$?

Explain gof is one to one if and only if $g(x)$ is one to one function?

$F(x) = 2x+3$ and $g(x) = 3x-1$ find fog and gof composition?

Let R be the relation from A to B as $R = \{(1,1), (2,2), (3,3), (4,5), (4,4)\}$

Explain it is reflexive or not? and also find its ordered pair?

Let $A = \{1, 2, 3, 4\}$ find the binary relation of $A \times A$ and R is $\{(1,1), (2,2), (3,3), (4,4), (2,1), (2,3)\}$

Find is it equivalent or not?

My today paper is.....

1. R not S find for given matrix and also find transpose of it. 3 marks
 2. find $A \times B$ for given sets. Is $A \times B$ is equal to $B \times A$? 5 marks
 3. find Domain and range for given set 2 marks
 4. sum the given Arithmetic series to n th term. 5 marks
 5. One question from recursion 2 marks
