

When there is a need of generating new ideas for hypotheses or to interpret the results of some research, which one is the best research design?

- ▶ Experiment
- ▶ Surveys
- ▶ **Focus group discussion**
- ▶ Communication analysis

Which of the following is an example of deception in business research?

- ▶ The obtaining of company material without permission.
- ▶ The researcher wearing a disguise during an observation.
- ▶ **The researcher representing their research as being about a different**

topic

Which of the following is least likely to occur as an ethical problem with electronic research?

- ▶ Privacy could be invaded.
 - ▶ **People are not likely to be able to stop once they have begun**
- participating.**
- ▶ Debriefing could be avoided.
 - ▶ Informed consent cannot be completely monitored.

All of the following are unethical issues, EXCEPT;

- ▶ Invoicing irregularities
- ▶ Avoiding legal liability

- ▶ Misrepresenting results

- ▶ Seeking permission for entry

Which of the following is the difference between measures and indicators?

▶ Measures are unambiguous quantities, whereas indicators are devised from common sense understandings.

▶ Indicators have a more direct relationship to the underlying concept than measures.

▶ Measures are intuitively devised and then applied as if they were direct indicators of a concept.

▶ Indicators are unambiguous quantities, whereas measures are subjective and value-laden.

The extent to which a test provides scores that are meaningful, appropriate, or useful is referred to as;

- ▶ Reliability
- ▶ Accuracy
- ▶ Internal validity
- ▶ Validity

Which of the following functions is performed by the Ordinal scale?

- ▶ Categorize
- ▶ Distance
- ▶ Order

- ▶ Unique origin

What is the difference between interval/ratio and ordinal variables?

- ▶ Ordinal data can be rank ordered, but interval/ratio data cannot.
- ▶ **The distance between categories is equal across the range of interval/ratio data.**
- ▶ Interval/ratio variables contain only two categories.
- ▶ Ordinal variables have a fixed zero point, whereas interval/ratio variables do not.

Which of the following statement refers to cross-sectional design?

- ▶ **A comparison of two or more variables over a long period of time**
- ▶ The collection of data from more than one case at one moment in time
- ▶ One that is devised when the researcher is in a bad mood
- ▶ A study of one particular section of society, e.g. the middle classes

Which of the following is TRUE for research plan?

- ▶ It should be detailed.
- ▶ It should be given to others for review and comments.
- ▶ It sets out the rationale for a research study.
- ▶ **All of the given options**

Which of the following typically does NOT apply to observers in survey research studies?

- ▶ They observe predetermined activities.

► They are participant observers.

► They obtain information by watching rather than asking.

► They must be careful not to influence the activities they observe.

Which of the following is not an advantage of the self-completion questionnaire over the structured interview?

► It is cheaper to administer.

► It is quicker to administer.

► It is easier to prompt the interviewee.

► It is easier to remove interviewer effects.

Mr. X has coded his observations to hide the identity of each of the three participants in his study. He is ensuring;

► protection from harm

► confidentiality

► informed consent

► anonymity

The cover letter to a questionnaire study should contain all of the following, EXCEPT;

► A list of participants

► A self-addressed, stamped envelope

► Purpose of the study

► Reasons to respond

Teachers are advised to predict the results of student attitudinal questionnaires, because;

- ▶ It will help them decide if students answered truthfully.
- ▶ It gives them a point of comparison against which to judge actual responses.

- ▶ It will allow them to apply statistical procedures in analyzing results.
- ▶ It helps them familiarize themselves with the questionnaires.

In conducting an action research study of "student's organizational skills during class in a particular school", which of the following would NOT likely to provide useful data?

- ▶ Interviews with teachers
- ▶ Classroom observations
- ▶ Parent surveys
- ▶ Teacher's journal entries

Why it is helpful to keep a research diary or log book while you are conducting your project?

- ▶ To give you something to do in the early stages of your research when nothing is happening.
- ▶ Because funding councils generally demand to see written evidence that you were working every day during the period of the research.

► To keep a record of what you did and what happened throughout the research process.

► It can be added to your dissertation to ensure that you reach the required word limit.

Which of the following is likely to happen if clear instructions are not given as to how the respondent should answer the question?

► Respondents may delete inappropriate answers rather than select appropriate ones.

► Respondents may choose only one answer when they need to choose as many as apply.

► Respondents may complete questions that are not relevant to them.

► All of the given options

Which of the following is NOT a suitable topic for research using a diary?

► The amount of time managers spend on particular activities.

► The frequency with which managers undertake particular tasks.

► The locations in which a trade union representative has discussions with individual members.

► The volume of female managers in the retail industry.

Which of the following represents excellent advice for conducting an interview?

► Listen more and talk less

► Don't interrupt

- ▶ Don't be judgmental about the interviewee's beliefs or views

▶ **All of the given options**

Which of the following is an example of a dilemma that might face feminist business researchers conducting qualitative interviews with women?

- ▶ What role to adopt while interviewing male managers?
- ▶ How many female employees should be interviewed for a representative sample?

▶ **How to overcome the issue of false consciousness?**

- ▶ What data to use while publishing findings?

Which of the following sampling strategies was used when the three students with the highest GPAs were selected?

▶ **Extreme case**

- ▶ Snowball
- ▶ Maximum variation
- ▶ Normal case

Which type of sampling strategy is exemplified by selecting two types of individuals: those who are extremely happy and those who are extremely sad?

- ▶ Snowball

▶ **Intensity**

- ▶ Homogeneous
- ▶ Purposive

The logic of purposive sampling is:

- ▶ To use participants because the researcher has access to them.
- ▶ That a random sample can generalize to a population
- ▶ **That a few information-rich participants studied in depth yield many insights about a topic.**
- ▶ To include all participants, even though they are not all relevant to the problem.

Using a sample of 30 participants, a researcher finds a correlation of 0.30 between two variables. The relationship is not statistically significant. If the researcher were to triple her sample size, which of the following is most likely?

- ▶ **The correlation would be statistically significant.**
- ▶ The correlation would be larger.
- ▶ The correlation would be smaller.
- ▶ Nothing is likely to change.

Which of the following steps begins the analysis of qualitative data?

- ▶ Reading and memoing
- ▶ Describing the content and participants
- ▶ Classifying and interpreting
- ▶ **Data management**

Which of the following represents the most general conceptualization in qualitative data analysis?

- ▶ Word
- ▶ Topic
- ▶ Category
- ▶ **Pattern**

Which of the following BEST differentiates data analysis from interpretation?

▶ **Interpretation requires more conceptual and integrative thinking than data analysis.**

- ▶ Interpretation involves computerized analysis of data.
- ▶ Data analysis is explanatory and interpretation is conceptual.
- ▶ Data analysis involves conceptualization but interpretation does not.

The statistic used to determine the relationship between two variables is:

- ▶ Analysis of covariance
- ▶ Chi square
- ▶ Standard deviation
- ▶ **Pearson "r"**

Which of the following is NOT a control procedure used in causal-comparative research?

- ▶ Matching.
- ▶ Subgroups.
- ▶ **Chi square.**
- ▶ Analysis of covariance.

Which of the following best describes qualitative data coding?

- ▶ Adding all of the scores together and describing them statistically.
- ▶ Identify data segments that contain general episodes.
- ▶ Numerically representing the concepts identified by the participants.
- ▶ **Dividing data in parts that represent single thoughts.**

The bivariate tables derived from trivariate table are called;

- ▶ Sub table
- ▶ Bivariates
- ▶ **Partial**
- ▶ Correlational tables

Quasi-experimental research is used because:

- ▶ Random selection is not possible
- ▶ Neither random selection nor random assignment is possible
- ▶ **Random assignment is not possible**
- ▶ There are no comparison groups available

A researcher believes that the effects of a treatment will be different for males and females. Which one is the best method to test this possible interaction?

- ▶ Single-subject design
- ▶ **Factorial design**
- ▶ Time-series design
- ▶ Quasi-experimental design

The influence of the researcher's background, personal experiences, preferences, or attitude on an interview or observation is technically defined as:

- ▶ Participant bias
- ▶ **Observer bias**
- ▶ Observer effect
- ▶ Nonparticipant effect

On which component of his field notes did Mr. Majid focused when he expressed in his notes his thoughts and ideas about what he observed?

- ▶ Description
- ▶ **Reflection**
- ▶ Protocol
- ▶ Formal data

Which of the following is linked with an abstract model of underlying relations or causal mechanism?

- ▶ **Historical comparative research**
- ▶ Social research
- ▶ Action research
- ▶ Experimental research

In which section is the researcher allowed greater flexibility to express opinions, discuss implications for educational practice, and suggest additional research?

- ▶ Review of the literature

- ▶ Significance of the study
- ▶ Results
- ▶ **Discussion**

Which of the following can be referred as Haphazard Sampling?

- ▶ **Convenience Sampling**
- ▶ Purposive Sampling
- ▶ Snowball Sampling
- ▶ Quota Sampling

An important issue in index construction is to-----items.

- ▶ Reconstruct
- ▶ Codify
- ▶ Measure

▶ **Weight**

Which of the following elements of Observation is/are included in Non Reactive research?

- ▶ External Appearance
- ▶ Count Behaviors
- ▶ Time Duration
- ▶ **All of the given options**

Questions:

1. How would you differentiate between History Effect and Mechanical Loss in Experimental research?
2. Write a note on any three varieties of non reactive observations.
3. Defend the use of the term inductive to describe qualitative data analysis and interpretation.
4. Briefly discuss the Solomon s Four Group Design in experimental research with the help of example?
5. Involvement with deviants is the Ethical dilemma of field Research how would explain.
6. How Researchers locate evidence in historical comparative research
7. Does historical comparative Research follow scientific approach or not Discuss
8. Briefly explain the important of measurement and coding in non Research with the help of example
9. What are the advantages of cluster sampling.
10. Do u explain inferences from non-reactive data by using secondary survey data.
