CS301 Solved Quiz NO-1 Fall 2012

Which one of the following is TRUE about recursion?
1. Recursive function calls consume a lot of memory.
2. **Recursion extensively uses stack memory.**
3. Recursion extensively uses stack memory.
4. Iteration is more efficient than iteration.

Which of the following is not a data structure ?
1. Linked list
2. Queue
3. stack
4. Memory cell

"+" is a _____operator.
1. Unary
2. Binary
3. Ternary
4. None of the above

When an executable program run, it is loaded in the memory and becomes a_____.
1. Thread
2. .h file
3. Process
4. None of the above

In array list the worst case of removing an element is
1. To remove an element from the end of the list
2. To remove an element from the middle of the list
3. To remove an element from the start of the list
4. =We cannot remove element from an array list

The tree data structure is a
1. Linear data structure
2. Graphical data structure
3. Non-linear data structure (Not Confirm)
4. Data structure like queue

To create a _____ we link the last node with the first node in the list.

1. Double linked list
2. Circularly-linked list
3. Linked list
4. None of the above

In_____, a programmer uses two pointers in the node, i.e. one to point to next node and the other to point to the previous node.

1. Linked list
2. doubly-link list
3. array
4. structure

Each operator in a postfix expression refers to the previous _____ operand(s)

1. one
2. two
3. three
4. four

Which of the following operations returns top value of the stack?

1. push
2. pop
3. top
4. First

Quiz No-2 Fall 2012

1.When an executable program run, it is loaded in the memory and becomes a_____.

Select correct option:

Thread
.h file
Process
None of the above

2.A kind of expressions where the operator is present between two operands called _____expressions.

Select correct option:
Infix
Postfix
Prefix
None of the above

3.Which of the following operations returns top value of the stack?
Select correct option:
push
pop
top
first

4.To create a _____ we link the last node with the first node in the list.
Select correct option:
Double linked list
Circularly-linked list
Linked list
None of the above

5.In the calling function, after the execution of the function called, the program continues its execution form the _____after the function call.
Select correct option:
Previous line
Next line
Beginning
None of the above

6.Doubly Linked List always has one NULL pointer.
Select correct option:
True
False
7. _____ only removes items in reverse order as they were entered.
Select correct option:
Queue
Stack
Both of these
None of these

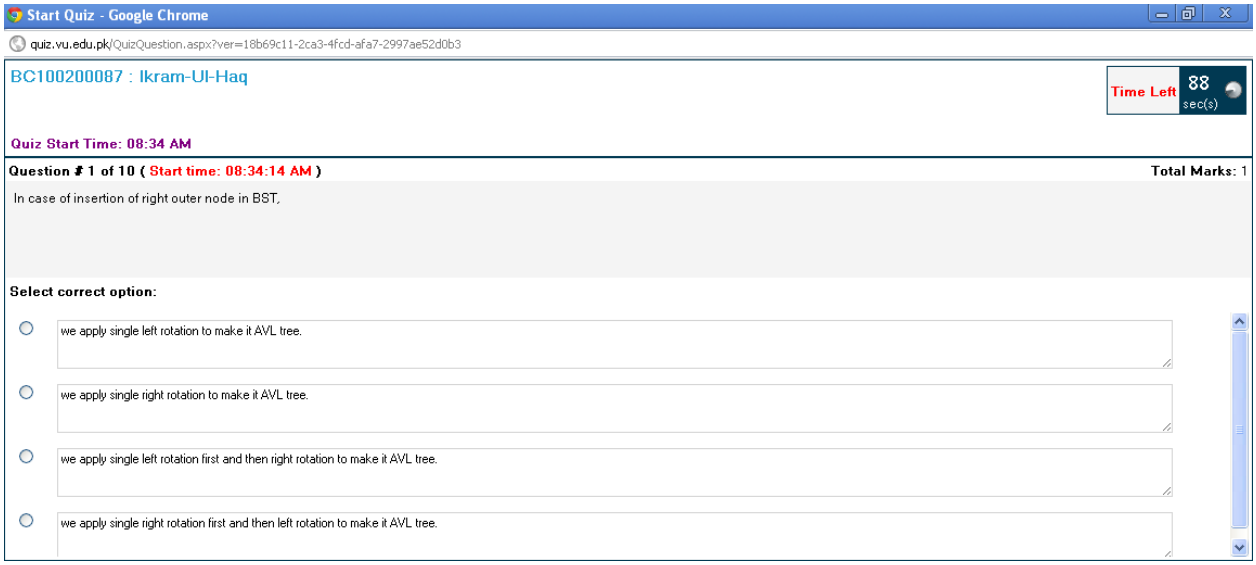

8.In the linked list implementation of the stack class, where does the push member function places the new entry on the linked list?
Select correct option:
After all other entries that are greater than the new entry.
At the head

After all other entries that are smaller than the new entry.
At the tail

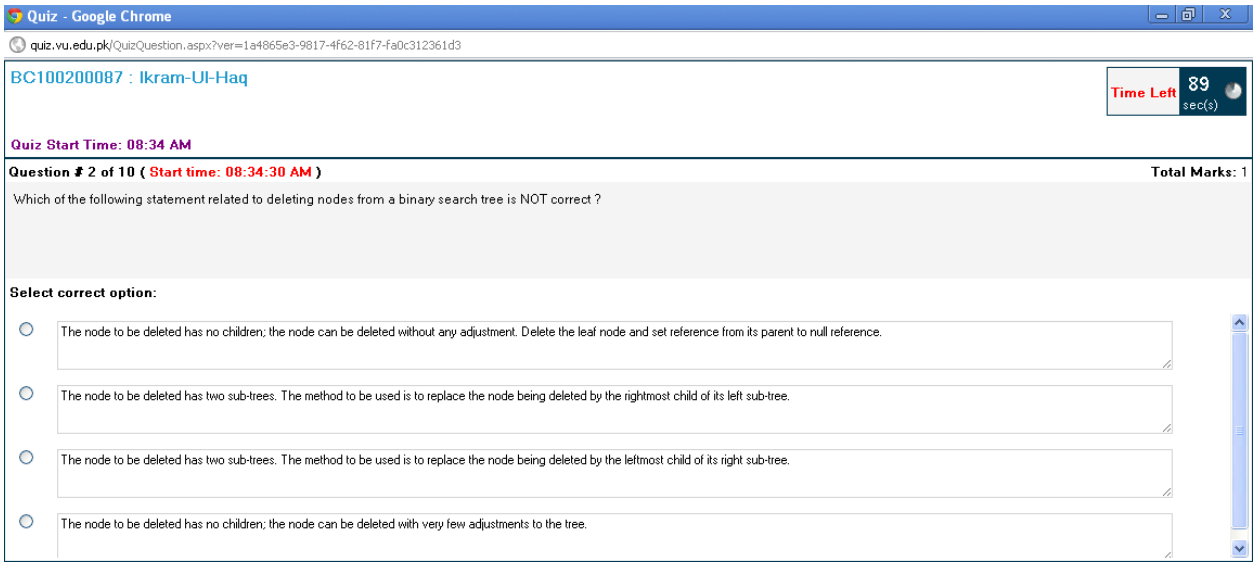

9.Which of the following is known as "Last-In, First-Out" or LIFO Data Structure?
Select correct option:
Linked List
Stack
Queue
Tree

10.Which boolean expression indicates whether the numbers in two nodes (p and q) are the same. Assume that neither p nor q is null.
Select correct option:
p == q
p.data == q.data
p.nextNode == q. nextNode
p.data ==

Question # 2 of 10 (Start time: 08:34:30 AM) **Total Marks:** 1

Which of the following statement related to deleting nodes from a binary search tree is NOT correct ?

Select correct option:

- The node to be deleted has no children; the node can be deleted without any adjustment. Delete the leaf node and set reference from its parent to null reference.
- The node to be deleted has two sub-trees. The method to be used is to replace the node being deleted by the rightmost child of its left sub-tree.
- The node to be deleted has two sub-trees. The method to be used is to replace the node being deleted by the leftmost child of its right sub-tree.
- The node to be deleted has no children; the node can be deleted with very few adjustments to the tree.

Question # 4 of 10 (Start time: 08:34:54 AM) **Total Marks:** 1

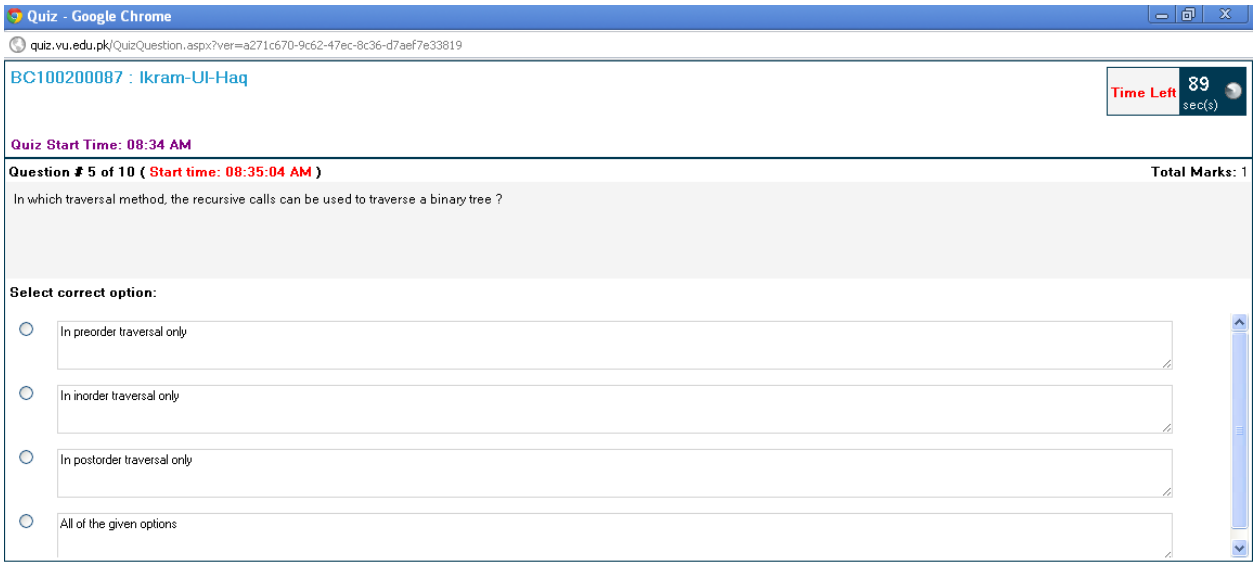

In case of insertion of right inner node in BST,

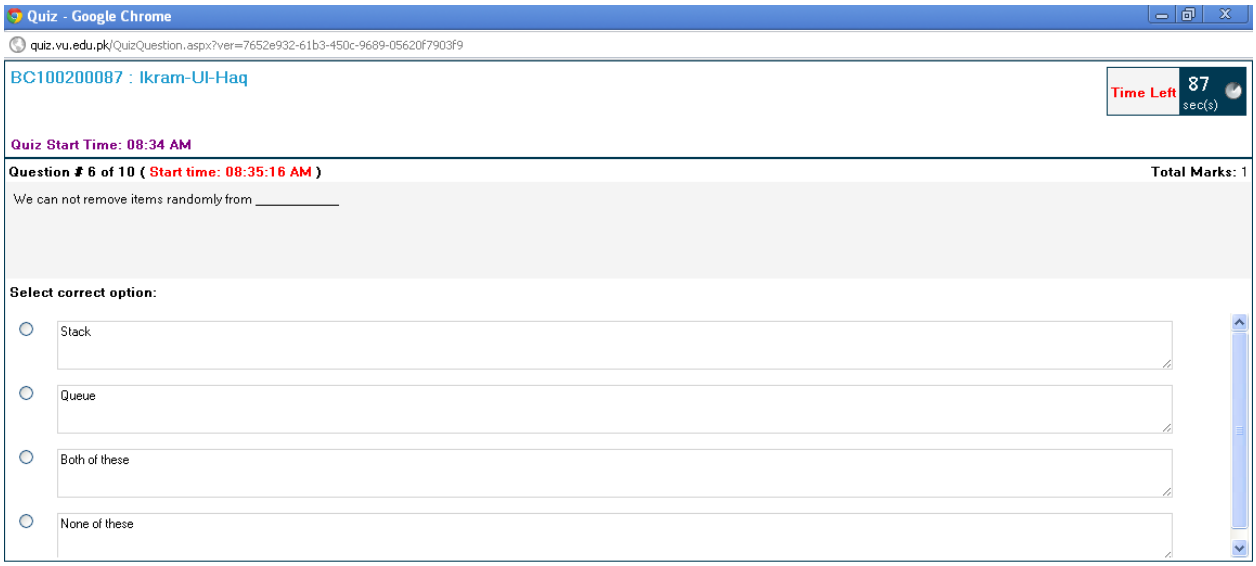

Select correct option:

- we need to apply single left rotation to make it AVL tree.
- we need to apply single right rotationto make it AVL tree.
- single left rotation first and then single right rotation to make it AVL tree.
- single right rotation first and then single left rotation to make it AVL tree.
