Over a short period of time, we find it easier to remember the string of numbers “404 894 6743” because

- Numbers are easier to remember than arbitrary characters.
- The grouping of the numbers is significant
- Ten numbers is not that many to have to remember from working memory.
- None of these

Learnability, flexibility and robustness are three main usability principles that can be considered as general headings for standards and guidelines generation. Which of the following are also high level usability categories that can guide standards and guidelines generation? (i) Effectiveness (ii) Efficiency (iii) Fault tolerance (iv) Satisfaction

- (i) & (ii)
- (i), (ii) & (iv)
- (ii) & (iii)
- (ii) & (iv)

In an organization individuals may keep their own records, or there may be local gurus. This statement concerns with _____. (Page # 176)

- Paper work and computer work
- Spatial and temporal organizations
- Organizational memory
- None of these

Which are the most significant senses for the average person when it comes to interacting with a computer?

- Sight and hearing
- Hearing, touch and smell
- Hearing and touch
- Sight, hearing and touch

Which of the following does not count as one of the advantages of computers?

- Computers are enabling new discoveries
- Leading to efficiencies
- Making our life convenient
- Depending so much on computers may give fatal results

The gulf of execution refers to _____ (page no 122)

- The user’s difficulty in understanding the feedback from the system
- The system’s difficulty in presenting information in the output language
- The system’s difficulty in converting an input expression into the correct system state transition
- The user’s difficulty in formulating and articulating an intention to the system

Which of the given statements correctly defines efficiency in terms of one of the usability goals?

- It is a very general goal and refers to how good a system at doing what it is supposed to do.
- It refers to the way a system supports users in carrying out their tasks.
- It involves protecting the users from dangerous conditions
- It involves protecting the users from undesired situations

Which of the following is/are goal(s) of usability?

- Effectiveness
- Efficiency
- Safety
- All of the given

Which of the following is/are the main component(s) of color?

- Hue

Intensity
Saturation
All of the given

Which of the following is not one of the primary colors?
Red
Yellow
Blue
Green

PRIMARY COLORS
Red, yellow and blue
SECONDARY COLORS
Green, orange and purple
TERTIARY COLORS
Yellow-orange, red-orange, red-purple, blue-purple, blue-green and yellow-green

Which of the following is considered as the most complex species?
Humans
Computers
Animals
Birds

The colors, which are directly opposite to each other are said to be
Complementary colors
Analogous colors
Primary colors
Secondary colors

Which of the following is not true regarding “cones”?
A type of receptor in eye
more sensitive to light
Different types of cones are
Sensitive to different wavelengths of light
Eye has approximately 6 million cones

Formal methods are used to represent
Architectural aspects of software systems only
Procedural aspects of software systems only
Both architectural and procedural aspects of software systems
None of the given

Currently many common environments for interactive computing are examples of the _____ interface style, often simply called windowing systems.
Three-dimensional
WIMP
Point and click
None of these

Using icons on the desktop to represent operations is a type of _____constraint.
Physical
Logical
Cultural
None of these

_____ is a term used to refer to an attribute of an object that allows people to know how to use it.

Visibility
Affordance
Constraint
None of these

_____ minimizes errors.
Affordance
Visibility
Constraints
None of these

Which of the following is proportional to the amplitude of the sound; the frequency remains constant?
Pitch
Loudness
Timber
None of these

_____ plays a role to bridge up the gape between the interfaces of machines and human understanding.
Human
Computer
Human Computer Interaction
None of these

The persona's needs are sufficiently unique to require a distinct interface form and behavior is _____ type of Persona.
Primary
Secondary
Supplement
Negative

A _____is usually a collection of icons those are reminiscent of the purpose of the various modes.
Button
Pointer
Palette
Title bar

The persona is not an actual user of the product, but is indirectly affected by it and its use refers to _____ persona
Primary
Secondary
Served
Negative

During _____ phase, usage and workflow patterns discovered through _____.
Modeling, analysis
Analysis, modeling
Testing, modeling
Testing, Analysis

The Usability Engineering lifecycle was proposed by _____.
Deborah Mayhew
Webster
Barry Boehm.
Hartson

Waterfall model is basically a _____ model in which each step must be completed before the next step can be started

- Incremental
- Linear
- Iterative
- Analytical

Models are used in design to

- Generate the design
- Evaluate the design
- Generate and evaluate the design
- None of the given

What is a semantic network?

- A model of long-term memory
- A record of our memory of events
- the part of the brain which allows us to remember things
- a mechanism for improving memory

_____ is like the building name for a website.

- Site ID
- Navigation
- Section
- None of the given

_____ is particularly useful early in design. It is excellent technique to use with the prototype, because it provides a wealth of diagnostic information.

- Co-discovery
- Active intervention
- Splendid research
- None of the given

You can load a VCR tape the right way because of _____.

- Physical constraints
- Logical constraints
- Cultural constraints
- None of these

_____ are unintentional while _____ occur through conscious deliberation.

- Slips, mistakes
- Errors, slips
- Mistakes, errors
- Mistakes, slips

What is the main strength of the Problem Space Framework as a model of human problem solving?

- It operates within the constraints of the human processing system
- It explains what is involved in insight
- It allows ill-defined problems to be solved
- None of these

_____ is the process of selecting things to concentrate on, at a point in time, from the range of possibilities available.

- Perception and recognition
- Attention
- Learning
- None of these

The name of the document should be shown on the application's_____.

Menu bar

Title bar

Title bar and menu bar

Not Title bar and not menu bar

Interpretation inquiry, according to Beyer and Holtzblatt, is based on a master-apprentice model of learning.

True

False

Contextual inquiry, according to Beyer and Holtzblatt, is based on a master-apprentice model of learning

_____ is a powerful, multipurpose design tool that helps overcome several problems that currently plague the development of digital products.

Scenario

Persona

Prototype

The difference between the intentions and allowable actions is the:

Gulf of Execution

Gulf of Evaluation

None of these

Attention is the process of selecting things to concentrate on, at a point in time, from the range of

Possibilities available

Time Available

None of these

The goals of HCI are:

Usability and User Experience

Learn ability and Comfort

Tasks and Goals.

WYSIWYG stands for _____.

Where you see is where you get

What you see is what you get

When you see it when you get

_____ is proportional to the amplitude of the sound.

Pitch

Loudness

Timber

Persona is not context specific, so it can be reused easily.

True

False

_____ are individual and isolated regions within display that can be selected by the user to invoke specific operations.

Buttons

Pointers

Menus

Windows

User personas that are not primary or secondary are _____ personas.

Served

Negative

Customer
Supplemental

Which of the following is the comparison of what happened in the world with what we wanted to happen?

Action
Evaluation
Execution
None of these

The size and shape of a compact disk, is a type of _____ constraint.

Physical
Logical
Cultural
None of these

_____ Research can tell you about what, how, many and why in rich, multivariate detail

Quantitative
Qualitative
SME
None of these

Which of the given statements correctly defines effectiveness in terms of one of the usability goals?

It is a very general goal and refers to how good a system at doing what it is supposed to do.
It refers to the way a system supports users in carrying out their tasks.
It involves protecting the users from dangerous conditions
It involves protecting the users from undesired situations

Which of the following requires less cognitive effort than others?

Listening
Speaking
Hearing
None of the given

We are deficient in our development _____, not in our development _____ (respectively).

Process, Tools
Tools, Process
Tools, Methodology
None of these

Which of the following is not true?

Utility refers to the functionality of a system
Usability is concerned with adding complexity to the system
Usability is concerned with making systems easy to use
poorly designed computer system can be extremely annoying to users

The command line interface is used because

It is easy to understand
It is demanded by DOS
It is offered by UNIX systems
It is powerful and flexible

Which of the following is concerned primarily with understanding human behavior and the mental processes that underlie it?

Cognitive Psychology
Sociology
Statistics

Computer Science

HCI deals with

Design of interactive system only

Evaluation of interactive system only

Implementation of interactive system only

All of the given choices

Human beings interact with outside world, using their

input channels

output channels

sense of sight

All of the given

Visually impaired persons can interact with outside world using their

Sense of sight

Sense of hearing

Both sense of touch and sense of hearing

Sense of touch

_____ refers to the relationship between controls and their effects in the world.

Visibility

Affordance

Mapping

_____ is a very general goal of Usability and refers to how good a system at doing what it is supposed to do.

Effectiveness

Efficiency

Utility

_____is what goes on in out heads when we carry out our everyday activities?

Cognition

Learnability

Memorability

_____ is the process by which we use the knowledge we have to draw conclusions or infer something new about the domain of interest.

Decision Making

Reasoning

Problem Solving

_____research helps us understand the domain, context and constraints of a product in different, more useful ways than _____research do.

Qualitative, Quantitative

Quantitative, Qualitative

None of them

_____ refers to the way a system supports users in carrying out their tasks.

Efficiency

Effectiveness

Utility

_____ are GUIs that consists of electronic counterparts to physical objects in the real world to match the knowledge requirements of users.

User Interaction Models

Conceptual Models

Interface Metaphors

_____language tends to be grammatical while _____ language is often Ungrammatical.

Written, spoken

Spoken, written

None of the given choices

Aspect gives us hints and tips about using and creating user interface idioms.

Strategic

Tactical

None of the given choices

Ali wants to develop an application that incorporates print, audio video media and software applications on a single place. Which of the following will help in this regard?

MS World

Worldwide Web

Television Newspaper

Ali is looking at how interface designers went about their work. He identified two different modes of activity one is _____ and other is _____.

Analytic mode, synthetic mode

Evaluation mode, testing mode

Analyze mode, feedback mode

Implementation mode, task mode

Scenario content and context are derived from information gathered during the _____ phase and analyzed during the _____ phase (respectively)

Modeling, Implementation

Modeling, Research

Research, Implementation

Research, Modeling

_____ are dragged down from the title at the top of the screen.

Pull Down Menus

Main Menus

Icons

Buttons

When you engaged in a conversation you are more attentive what the other person is saying. It is called?

Focused Attention

Voluntary Attention

Involuntary attention

Divided Attention

Drive a vehicle while holding a conversation with a passenger is the example of _____

Focused Attention

Voluntary Attention

Involuntary attention

Divided Attention

GOMS stands for

Goals operation methods and selection rules

Goals objects models and selection rules

Goals operations methods and state rules

Goals operations models and state rules

_____ represent the user's expectations of the tangible outcomes of using a specific product.

Non-user goals
End goals
Experience goals
Life goals

_____ are perhaps the least-documented patterns, but they are nonetheless in widespread use.

Postural
Structural
Behavioral
Mnemonic
