CS502 Quiz MCQs by imran jee (Dated:12-11-2010)

by **Imrangee**

CS502 DESIGN AND ANALYSIS OF ALGORITHMS

FALL 2010 QUIZ #2 HELD ON 12 NOV 2010

Question # 1 of 10 Total M - 1

Memorization is?

1. To store previous results for future use

2. To avoid this unnecessary repetitions by writing down the results of recursive calls and looking them up again if we need them later

3. To make the process accurate

4. None of the above

Question # 2 of 10 Total M - 1

Which sorting algorithm is faster

1. O (n log n)

2. O n^2

3. O (n+k)

4. O n^3

Question # 3 of 10 Total M - 1

Quick sort is

1. Stable & in place

2. Not stable but in place

3. Stable but not in place

4. Some time stable & some times in place

Question # 4 of 10 Total M - 1

One example of in place but not stable algorithm is

1. Merger Sort

2. Quick Sort

3. Continuation Sort

4. Bubble Sort

Question # 5 of 10 Total M - 1

In Quick Sort Constants hidden in T(n log n) are

1. Large

2. Medium

3. Small

4. Not Known

Question # 6 of 10 Total M - 1

Continuation sort is suitable to sort the elements in range 1 to k

1. K is Large

2. K is not known

3. K may be small or large

4. K is small

Question # 7 of 10 Total M - 1

In stable sorting algorithm.

1. If duplicate elements remain in the same relative position after sorting
2. One array is used
Imrangee
3. More than one arrays are required
4. Duplicating elements not handled
Question # 8 of 10 Total M - 1
Which may be a stable sort?
1. Merger
2. Insertion
3. Both above
4. **None** of the above
Question # 9 of 10 Total M - 1
An in place sorting algorithm is one that uses ___ arrays for storage
1. Two dimensional arrays
2. More than one array
3. No Additional Array
4. None of the above
Question # 10 of 10 Total M - 1
Continuing sort has time complexity of ?
1. O(n)
2. O(n+k)
3. O(nlogn)
4. O(k)

CS614 DATA WAREHOUSING
FALL 2010 QUIZ # 1 HELD ON 12 NOV 2010

Question # 1 of 10 Total M - 1
Node of a B- Tree is stored in memory block and Traversing a B-tree involves ____ page faults?
O (n^2)
O (n)
O (n log n)
O (log n)
Question # 2 of 10 Total M - 1
The growth of master files and magnetic tapes exploded around the mid
1960
1970
1980
1990
Question # 3 of 10 Total M - 1
Is an application of information & data
Intelligence
Education
Knowledge
Power
Question # 4 of 10 Total M - 1

Need to synchronize data upon updation is called?
Data Limitation
Data Manipulation
Data Coherence
Data Replication
Question # 5 of 10 Total M - 1
Suppose the amount of data recorded in an organization is doubled every year, this is called?
Linear
Quadratic
Exponential
Logarithmic
Imrangee
Question # 6 of 10 Total M - 1
Relational databases allow you to navigate the data in _____ direction that is appropriate using the primary, foreign key structure?
Forward
One
Backward
Any
Question # 7 of 10 Total M - 1
The input to the data warehouse can come from OLTP or transactional systems or other third party databases.
True
False
Question # 8 of 10 Total M - 1
Naturally Evolving Architecture occurred when an organization had a _____ approach to handling the whole process of hardware and software architecture?
Good
Relaxed
Not Relaxed
None
Question # 9 of 10 Total M - 1
____ modeling technique is more appropriate for data warehousing
Dimensional
Physical
Entity Relationship
None
Question # 10 of 10 Total M - 1
_____ gives total view of an organization?
OLTP
OLAP
Data warehousing
Database
