Question No. 1	Marks (3)

As you know documentation helps in understanding the software systems in a better way and due to its' importance, it is considered a key topic in Software Engineering.

Following are some scenarios (screenshots) of Software Systems related to various document types. You are required to identify the exact documentation type as per the given scenarios. *(Just name it, no explanation required)*

Part (A)

Figure 8-1. A Class Diagram

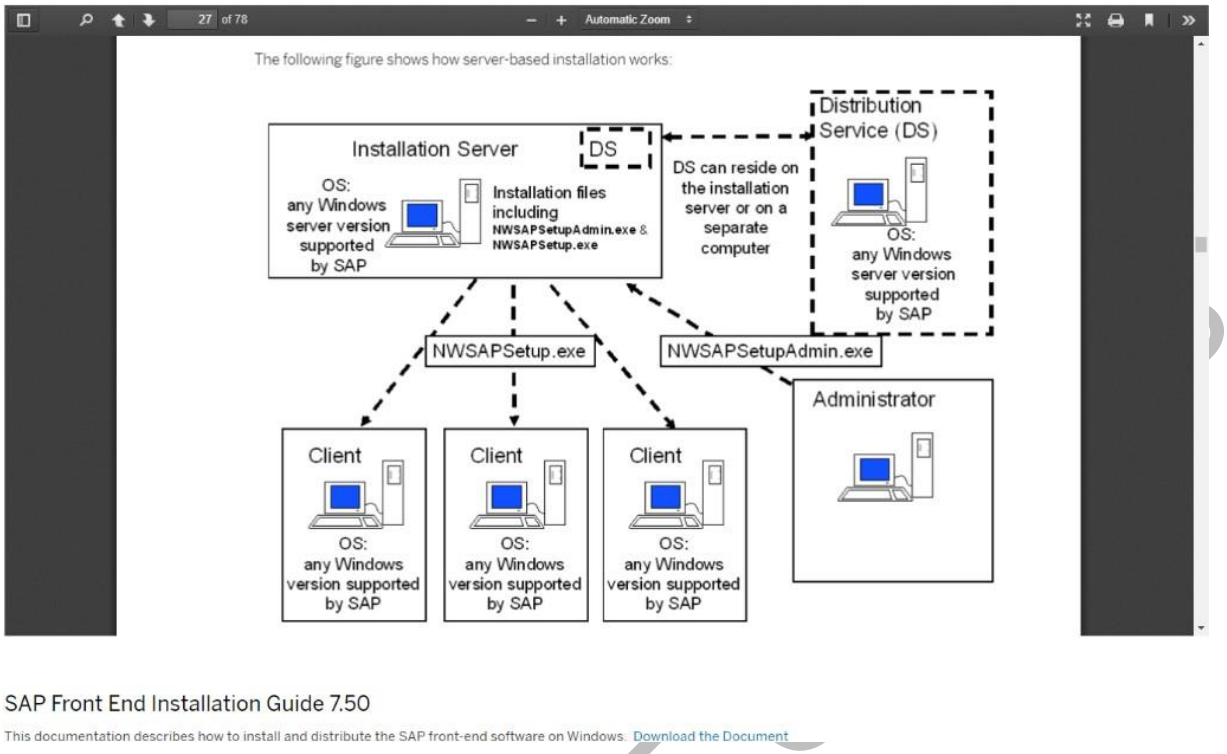

Class Diagram (taken from "The Unified Modelling Language User Guide" Booch - 2E)

Answer: System Documentation

Abdul Hadi E Services

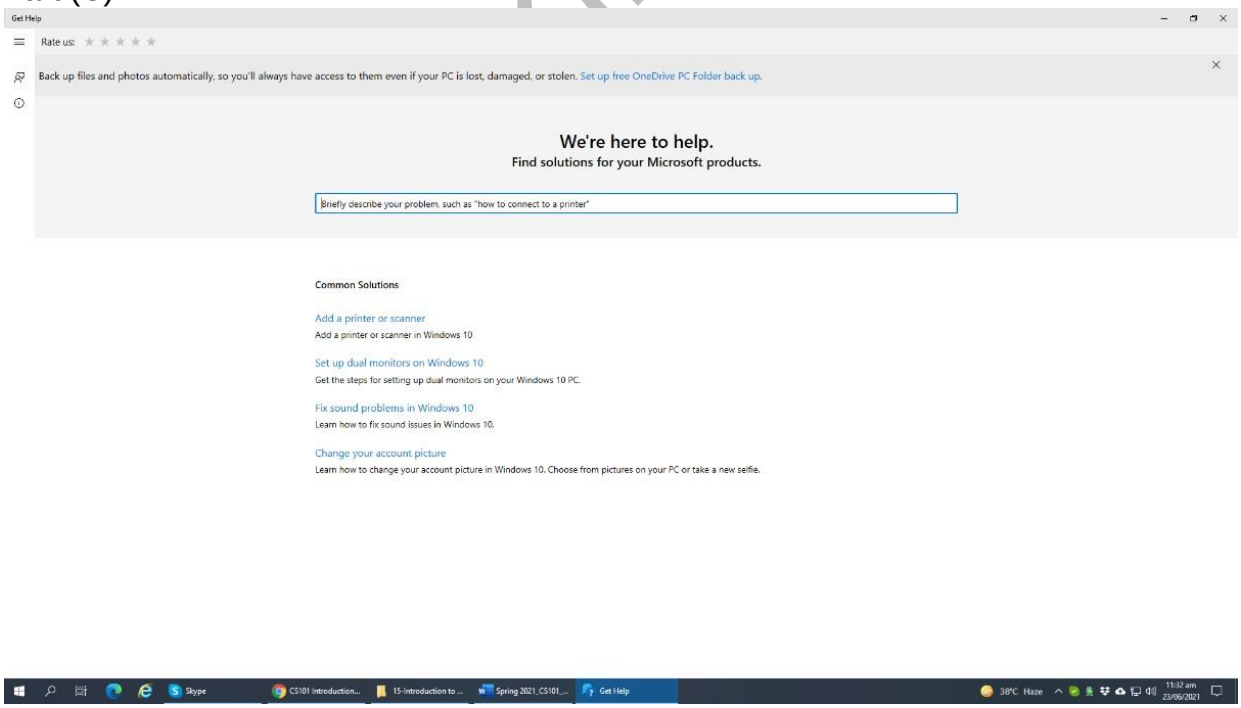

Part (B)

SAP Server-based Installation (taken from Official Website SAP.com)

Answer: Technical Documents

Part (C)

Microsoft Windows 10 Help

Answer: User Documentation

Question No.2 **[Marks: 2*6= 12]**

XYZ force has announced the new vacancies in their various departments. Many candidates have applied for vacant posts in different departments. Candidates will be selected based on their age, degree, and experience.

Analyze the given tables showing the information of different candidates and departments. You are required to write the queries for given statements.

Candidates						
CandID	FirstName	LastName	City	Age	Degree	Experience
1	Ali	Umar	Lahore	22	BSCS	0
2	Aslam	Iqbal	Karachi	27	MBA	5
3	Adnan	Ahmed	Multan	24	BBA	2
4	Balaj	Khan	Okara	23	BSIT	1
5	Burhan	Idrees	Lahore	20	MSc GIS	1
6	Hamza	Malik	Sialkot	28	MSCS	6
7	Farhan	Saeed	Peshawar	21	MCS	0
8	Ubaid	Khalil	Karachi	30	M.Com	8
9	Wahaj	Sheikh	Lahore	19	B.Com	0
10	Zahid	Ahmed	Quetta	24	BSIT	2

Departments				
DeptID	DeptName	JobTitle	Vacancies	Location
1	IT	Full Stack developer	5	Lahore
2	Management	Project manager	1	Karachi
3	Accounts	Accountant	6	Multan
4	QA	QA Engineer	2	Lahore
5	GIS	GIS Analyst	5	Lahore

1. **Write a query to select the departments with 5 vacancies from the Department table.**

   SELECT *FROM Departments WHERE Vacancies =5;

2. **Write a query to select the candidates with a degree of BSIT from the Candidates table.**

   SELECT *FROM Candidates WHERE Candidates.[Degree]="BS IT";

3. **Write the query to show all the candidates with no experience from table Candidates.**

   SELECT *FROM Candidates WHERE Candidates.[experience]=0;

4. **Write the query to identify all the posts offered in Lahore from column Location**

in the Department table.

```
SELECT *FROM Departments WHERE Departments. [Location]="Lahore";
```

5. **Write a query to display all the information under department name and job title from the Department's table.**

```
SELECT Departments. [DeptName], Departments. [JobTitle] FROM Departments;
```

6. **Write a query to display all the information under department name and vacancies from the Department's table.**

```
SELECT Departments. [DeptName], Departments. [Vacancies] FROM Departments;
```
