Ivan Sechenov

The first among the Russian contributors was Ivan Sechenov. He was born on 1st August, 1829 and he died on 10th November 1905. He taught at Moscow University. Ivan was physiologist named by Ivan Pavlov as "The Father of Russian physiology". He authored major classic "reflexes of the Brain" introducing electrophysiology and neurophysiology into laboratories and teaching of medicine. Sechenov's major interest was neurophysiology (the structure of the brain). He showed that brain activity is linked to electric currents and was the first to introduce electrophysiology. His work laid the foundations for the study of reflexes, animal and human behavior, and neuroscience.

Sechenov explained psychological functions in terms of physiological responses. This means that all psychological responses of the brain have some physiological reason or basis. In other words, when the brain acts in a certain manner, it is in response to certain physiological changes that have taken place.

Sechenov said that the mind and soul are the functions of the brain and that there is no duality between soul and the body. Therefore, he rejected the prevailing view of soul and the body being separate and accepted the Aristotelian point of view of unity of body and soul.

Sechenov concluded that all psychological responses are the result of sensory stimulation and that all psychological responses manifest themselves in behavioral forms. In other words, whenever there is a
