Semester Fall 2023

LECTURE WISE NOTES:

Short Questions File & MCQ's File

03126968553

COURSE: EDU406

MCQ's File For Final Exams

Lecture # 23

The Conscious-Competence Learning Model explains the process and stages of learning a new skill or behavior. What is another commonly used term for this model?

- A) Unconscious Incompetence
- B) Johari Window
- C) Reflective Practitioner

D) Conscious Competence Learning Model

Which stage of the Conscious-Competence Model involves being unaware of the existence or relevance of a skill?

- A) Conscious Competence

B) Unconscious Incompetence

- C) Conscious Incompetence
- D) Unconscious Competence

What is the primary aim of the Reflective Practitioner?

- A) Achieving unconscious competence
- B) Enhancing conscious incompetence
- C) Promoting conscious competence

D) Developing self-awareness and recognizing the need for learning

According to the Conscious Competence Matrix, which stage involves performing a skill reliably but still needing to concentrate and think to do so?

- A) Conscious Incompetence
- B) Unconscious Incompetence

C) Conscious Competence

- D) Unconscious Competence

What stage of the Conscious Competence Matrix involves being able to perform a skill without assistance, yet it is not yet 'second nature' or 'automatic'?

- A) Conscious Incompetence
- B) Unconscious Incompetence

C) Conscious Competence

- D) Unconscious Competence

The Conscious Competence Matrix suggests that individuals may regress to previous stages if they fail to practice their new skills. Which stages might someone regress from if they do not practice?

A) 4 to 3 or 3 to 2

- B) 1 to 2 or 2 to 3
- C) 3 to 4 or 2 to 1
- D) 1 to 3 or 4 to 2

What is the primary implication of stage 4 (Unconscious Competence) according to the text?

A) Vulnerability to complacency and ignorance of new methods

- B) Enhanced learning capacity
- C) Increased resistance to feedback
- D) Inability to teach others

Which of the following is NOT a quadrant of the Johari Window model?

- A) Open Area
- B) Blind Area
- C) Known Area**
- D) Hidden Area

What is the primary purpose of the Johari Window model?

- A) To improve understanding between individuals**
- B) To hide personal information from others
- C) To create barriers in communication
- D) To promote secrecy within teams

In the Johari Window model, which quadrant represents information that others know about you but you aren't aware of?

- A) Open Area**
- B) Blind Area
- C) Hidden Area
- D) Unknown Area

Which quadrant of the Johari Window represents information that others don't know about you?

- A) Open Area
- B) Blind Area
- C) Hidden Area**
- D) Unknown Area

What is the ultimate goal of the Johari Window model?

- A) To increase the size of the Blind Area
- B) To minimize the Open Area
- C) To enlarge the Open Area**
- D) To expand the Unknown Area

What does enlarging the Open Area in the Johari Window model entail?

- A) Sharing personal information without discretion
- B) Providing constructive feedback to others
- C) Increasing self-disclosure and openness while maintaining personal boundaries**
- D) Hiding personal issues from others

According to the Johari Window model, what are people with a large Open Area usually like?

- A) Difficult to talk to and closed off
- B) Honest, open, and easy to communicate with**
- C) Reserved and uncommunicative
- D) Untrusting and isolated

People with a large Blind Area in the Johari Window model may have issues that they have not identified or dealt with yet. What might these issues include?

- A) High self-esteem and confidence
- B) Low self-esteem or unresolved anger issues**
- C) Complete self-awareness and acceptance
- D) Lack of skill in communicating effectively

Which stage of the Conscious-Competence Model involves being aware of a skill's existence but not yet recognizing one's own deficiency in that skill?

- A) Conscious Competence
- B) Unconscious Incompetence
- C) Conscious Incompetence**
- D) Unconscious Competence

What does the Conscious Competence Learning Matrix primarily help teachers and learners understand?

- A) How to hide learning obstacles
- B) Why learners resist progression
- C) The progression of learners through different stages of learning**
- D) How to eliminate the need for individual assessment

According to the text, what is a potential weakness of individuals who achieve stage 4 (unconscious competence)?

- A) Lack of skill in teaching others
- B) Resistance to learning new methods or technologies**
- C) Inability to concentrate on complex tasks
- D) Reduced need for further development

What is the essential idea behind the Johari Window model?

- A) To promote secrecy and isolation
- B) To minimize self-disclosure
- C) To improve understanding through self-disclosure and feedback**
- D) To increase the size of the Hidden Area

Lecture # 24

What is a key characteristic of intelligence according to the composite definition provided in the text?

- A) Possessing high IQ scores
- B) Solving complex problems**
- C) Excelling in a single domain
- D) Memorizing information quickly

Which researcher is credited with proposing a theory of multiple intelligences?

- A) Howard Gardner**

- B) David Perkins
- C) Robert Sternberg
- D) Joseph Luft

According to Howard Gardner's theory, what is the key idea regarding intelligence?

- A) Intelligence is a single, general ability.
- B) Intelligence is measurable only through IQ tests.
- C) Intelligence encompasses diverse capabilities.**
- D) Intelligence is static and cannot be improved.

What is an example of bodily-kinesthetic intelligence provided in the text?

- A) Musicians
- B) Poets
- C) Athletes**
- D) Logicians

What is the primary characteristic of linguistic intelligence?

- A) Ability to communicate well**
- B) Skill in logical argumentation
- C) Aptitude for learning mathematics
- D) Insight into oneself

Which intelligence involves understanding patterns in nature and recognizing different species?

- A) Logical-mathematical
- B) Musical
- C) Naturalistic**
- D) Interpersonal

Who might possess interpersonal intelligence according to the examples provided?

- A) Musicians
- B) Salespeople**
- C) Mathematicians
- D) Biologists

What does intrapersonal intelligence primarily involve?

- A) Understanding oneself**
- B) Communicating effectively
- C) Solving complex problems
- D) Interacting with others

How might a teacher utilize Howard Gardner's theory of multiple intelligences in the classroom?

- A) By focusing exclusively on linguistic intelligence
- B) By encouraging students to work only within their areas of highest ability
- C) By diversifying tasks to accommodate different types of intelligence**
- D) By disregarding students' individual strengths and weaknesses

What is a potential benefit of understanding the concept of multiple intelligences for Reflective Practitioners?

- A) It highlights their limitations in certain areas.
- B) It allows them to focus solely on areas of expertise.
- C) It promotes self-awareness and professional development.**
- D) It encourages conformity rather than diversity.

What aspect of intelligence is emphasized in Howard Gardner's theory?

- A) A single, generalized ability
- B) A fixed capacity from birth
- C) A combination of diverse capabilities**
- D) A measurable quantity

According to the text, what is the significance of understanding multiple intelligences?

- A) It reinforces the idea of a single, general intelligence.
- B) It helps individuals identify their areas of expertise.
- C) It encourages teachers to focus solely on linguistic intelligence.
- D) It acknowledges the complexity and diversity of human abilities.**

How does bodily-kinesthetic intelligence differ from linguistic intelligence?

- A) Bodily-kinesthetic intelligence involves physical coordination, while linguistic intelligence involves communication skills.**
- B) Linguistic intelligence involves physical coordination, while bodily-kinesthetic intelligence involves communication skills.
- C) Bodily-kinesthetic intelligence is innate, while linguistic intelligence is acquired.
- D) Linguistic intelligence is static, while bodily-kinesthetic intelligence is dynamic.

What is the primary purpose of understanding the concept of multiple intelligences in education?

- A) To categorize students based on their IQ scores
- B) To emphasize competition among students
- C) To tailor teaching methods to individual strengths**
- D) To discourage students from pursuing diverse interests

What is an example of naturalistic intelligence provided in the text?

- A) Athletes
- B) Musicians
- C) Biologists**
- D) Logicians

How might a Reflective Practitioner use the concept of multiple intelligences to enhance their professional development?

- A) By focusing exclusively on areas of expertise
- B) By ignoring areas of weakness
- C) By identifying areas for improvement and growth**
- D) By avoiding tasks that challenge them

According to Howard Gardner's theory, how many distinct intelligences are there?

- A) 5
- B) 7
- C) 8**
- D) 10

What distinguishes interpersonal intelligence from intrapersonal intelligence?

- A) Interpersonal intelligence involves understanding oneself, while intrapersonal intelligence involves understanding others.
- B) Interpersonal intelligence involves understanding others, while intrapersonal intelligence involves understanding oneself.**
- C) Interpersonal intelligence is innate, while intrapersonal intelligence is acquired.
- D) Interpersonal intelligence focuses on physical coordination, while intrapersonal intelligence focuses on communication skills.

How might a teacher utilize Howard Gardner's theory of multiple intelligences to create effective learning environments?

- A) By ignoring students' individual strengths and weaknesses
- B) By standardizing teaching methods for all students
- C) By diversifying instructional strategies to accommodate different intelligences**
- D) By discouraging students from exploring diverse interests

What is the main takeaway from understanding the concept of multiple intelligences?

- A) Intelligence is a fixed, innate trait.
- B) Individuals excel in only one area of intelligence.
- C) There are diverse and multifaceted forms of intelligence.**
- D) Intelligence is solely determined by IQ test scores.

Lecture # 25

What is a primary aspect of knowledge highlighted in the text?

- A) Mastery of specific skills
- B) Integration of technology
- C) General education and subject matter expertise**
- D) Interpersonal communication

According to the text, what is a key component of communication skills for educators?

- A) Demonstrating empathy
- B) Proficiency in computer programming
- C) Familiarity with various communication media**
- D) Understanding of political issues

What is emphasized as an important skill for teachers in the domain of critical thinking?

- A) Memorization of facts
- B) Asking appropriate questions**
- C) Following a prescribed curriculum
- D) Replicating information without analysis

Which aspect of professional knowledge is mentioned as important for teachers?

- A) Ability to memorize vast amounts of information
- B) Passion for teaching and ongoing curiosity about the world**
- C) Strict adherence to established practices
- D) Isolation from home and community issues

What is an example of interpersonal skills mentioned in the text?

- A) Technical proficiency in a specific subject area
- B) Confidence to take risks and challenge norms
- C) Awareness of cultural diversity
- D) Ability to provide a caring atmosphere for learning

How does the text define integration of discipline in teaching?

- A) Focusing solely on one subject area
- B) Broadening the context and applicability of content across disciplines**
- C) Isolating subjects from one another
- D) Ignoring the relevance of practical/experiential knowledge

What does technology integration in classroom instruction involve?

- A) Teaching basic computer skills in a separate class
- B) Engaging students and facilitating their thinking using technology**
- C) Excluding technology from educational settings
- D) Restricting access to information

What is essential for effective organization and classroom management?

- A) Rigid adherence to established rules
- B) Utilization of punitive measures
- C) Supportive affective relationships and effective skills**
- D) Ignoring the needs of individual students

What are dispositions in the context of teaching?

- A) External behaviors observed in the classroom
- B) Internal values, beliefs, and attitudes reflected in professional behavior**
- C) Memorized facts and figures
- D) Technical skills in a specific subject area

What does scholarly inquiry involve for Reflective Practitioners?

- A) Strict adherence to established norms and practices
- B) Engagement in collaborative research and action within their academic disciplines**
- C) Isolation from current trends and issues
- D) Memorization of existing theories without questioning

How does reflection contribute to teaching effectiveness according to the text?

- A) By discouraging continuous learning

B) By promoting self-awareness and growth as a teacher

C) By limiting the scope of professional development

D) By avoiding collaboration with peers

What is emphasized regarding cultural awareness and acceptance in teaching?

A) Emphasis on differences rather than commonalities

B) Recognition of diversity as a deficit

C) Ability to work with diverse student populations and perceive diversity as a strength

D) Ignoring cultural backgrounds of students

What is a key aspect of practice-based learning for Reflective Practitioners?

A) Strict adherence to traditional teaching methods

B) Isolation from empirical evidence and theory

C) Engagement in continuous self-evaluation and lifelong learning

D) Avoidance of collaboration with colleagues

What is an essential skill for Reflective Practitioners related to self-identification and improvement?

A) Avoidance of setting learning and improvement goals

B) Resistance to incorporating feedback into daily practice

C) Ability to identify strengths, deficiencies, and limits in one's knowledge and expertise

D) Reliance solely on formative evaluation feedback

How does technology contribute to optimizing learning according to the text?

A) By restricting access to information

B) By limiting student engagement

C) By facilitating access, evaluation, and use of information

D) By isolating students from modern tools

What is a key responsibility of Reflective Practitioners regarding education of colleagues and professionals?

A) Isolation from collaborative activities

B) Avoidance of sharing knowledge and expertise

C) Participation in the education of colleagues and other professionals

D) Reliance solely on personal learning activities

What is a primary goal of Reflective Practitioners according to the text?

A) Memorization of information without analysis

B) Isolation from empirical evidence and theory

C) Engagement in continuous improvement based on self-evaluation and lifelong learning

D) Avoidance of setting learning and improvement goals

What is the main focus of critical thinking for teachers?

A) Memorization of facts

B) Asking appropriate questions and reasoning logically

C) Following a prescribed curriculum without questioning

D) Replicating information without analysis

How does the text define interpersonal skills in teaching?

- A) Technical proficiency in a specific subject area
- B) Ability to empathize and address individual needs**
- C) Rigid adherence to established rules
- D) Isolation from home and community issues

What is a primary aspect of communication skills emphasized for educators?

- A) Mastery of complex grammatical structures
- B) Understanding of nonverbal communication
- C) Rigid adherence to formal language usage
- D) Familiarity with various communication media**

Lecture # 26

What is the primary goal of the Socratic Method in reflective practice?

- A) To elicit factual information
- B) To promote productive discomfort and explore underlying beliefs**
- C) To intimidate colleagues with challenging questions
- D) To test values and opinions

What distinguishes the Socratic Method in reflective practice from other forms of questioning?

- A) Pre-determined goals for the discussion
- B) Intimidation of participants
- C) Surface-level exploration of facts
- D) Open-ended questioning with no predetermined outcome**

What is the main focus of the Socratic Method in reflective practice?

- A) Individual practitioners' statements
- B) Surface-level beliefs and assumptions
- C) Value systems underlying beliefs, actions, and decisions**
- D) Intimidating participants to examine their lives

Which type of question in the Socratic Method aims to uncover the meaning behind a statement?

- A) Probing assumptions
- B) Clarification**
- C) Probing reasons and evidence
- D) Viewpoint and perspectives

What is the purpose of probing assumptions in reflective practice?

- A) To reinforce existing beliefs
- B) To challenge underlying assumptions**
- C) To intimidate colleagues
- D) To avoid exploring alternative viewpoints

Which type of question in the Socratic Method focuses on the evidence supporting a belief or statement?

- A) Probing assumptions
- B) Probing reasons and evidence**
- C) Probing implications and consequences
- D) Questions about questions

What is the significance of questioning viewpoints and perspectives in reflective practice?

- A) To reinforce existing beliefs
- B) To avoid exploring alternative perspectives
- C) To understand implications and consequences
- D) To challenge implicit assumptions and implications**

What type of question in the Socratic Method explores the potential outcomes of a belief or action?

- A) Probing implications and consequences**
- B) Probing assumptions
- C) Questions about questions
- D) Clarification

What is the purpose of questions about questions in the Socratic Method?

- A) To avoid self-reflection
- B) To reinforce existing beliefs
- C) To challenge the relevance of the discussion
- D) To deepen understanding and inquiry**

Which step in applying Socratic questions to reflective practice focuses on seeking alternatives?

- A) Probing assumptions
- B) Probing reasons and evidence
- C) Viewpoint and perspectives**
- D) Probing implications and consequences

What type of question in the Socratic Method aims to challenge the validity of a belief?

- A) Clarification
- B) Probing assumptions
- C) Probing reasons and evidence
- D) Probing implications and consequences**

How does the Socratic Method contribute to reflective practice?

- A) By reinforcing existing beliefs
- B) By promoting critical self-reflection and exploration of underlying beliefs**
- C) By avoiding discomfort and uncertainty
- D) By discouraging open-ended questioning

What distinguishes the Socratic Method in reflective practice from traditional teaching methods?

- A) Pre-determined outcomes

- B) Surface-level exploration of facts
- C) Intimidation of participants
- D) Emphasis on open-ended questioning and exploration**

What is the primary focus of questions about questions in the Socratic Method?

- A) Avoiding self-reflection
- B) Reinforcing existing beliefs
- C) Challenging the relevance of the discussion
- D) Deepening understanding and inquiry**

How does the Socratic Method encourage exploration of underlying beliefs?

- A) By avoiding discomfort and uncertainty
- B) By reinforcing surface-level assumptions
- C) By promoting productive discomfort and open-ended questioning**
- D) By discouraging critical inquiry

What characterizes the reflective practice environment according to the Socratic Method?

- A) Intimidation and rigidity
- B) Openness to exploring complexity, difficulty, and uncertainty**
- C) Pre-determined outcomes and goals
- D) Avoidance of discomfort and challenge

What distinguishes the Socratic Method in reflective practice from testing values and opinions?

- A) Surface-level exploration of facts
- B) Intimidation of participants
- C) Promotion of productive discomfort and exploration of underlying beliefs**
- D) Pre-determined goals for the discussion

What is the main aim of the questioning process in the Socratic Method?

- A) To reinforce existing beliefs and assumptions
- B) To avoid discomfort and uncertainty
- C) To challenge underlying beliefs and assumptions**
- D) To intimidate participants

How does the Socratic Method contribute to professional growth and development?

- A) By avoiding self-reflection and inquiry
- B) By reinforcing surface-level assumptions
- C) By promoting critical self-reflection and exploration of beliefs**
- D) By discouraging collaboration and dialogue

What is the primary role of the initiator in the Socratic Method dialogue?

- A) To avoid asking questions
- B) To challenge the validity of participants' beliefs
- C) To lead by posing thought-provoking questions**
- D) To intimidate colleagues with challenging questions

Lecture # 27

What is the primary focus of a teacher's professional role?

- A) Enhancing personal interests
- B) Challenging cultural stereotypes
- C) Making a difference to pupils' learning and sense of self**
- D) Avoiding involvement in extracurricular activities

What is emphasized as the core belief underlying teacher professionalism?

- A) Resistance to change
- B) A strong sense of vocation**
- C) Indifference to students' life chances
- D) Avoidance of challenges

What aspect of professionalism does the use of language highlight?

- A) Reliance on authority
- B) Expectations and complexity of the teacher's role**
- C) Avoidance of collaboration
- D) Promotion of uniformity

In addition to academic focus, what dimension of the teacher's role is highlighted?

- A) Administrative responsibilities
- B) Integration of technology
- C) Pastoral care towards students**
- D) Financial management

What skill is emphasized for a teacher regarding their preferred mode of response?

- A) Rigidity
- B) Flexibility**
- C) Predictability
- D) Disengagement

How is professionalism-in-action described?

- A) Simplistic and one-dimensional
- B) Multifaceted and dynamic**
- C) Isolated from colleagues
- D) Static and unchanging

What is included in a teacher's professional role besides academic responsibilities?

- A) Engagement in personal hobbies
- B) Contributions to extra-curricular activities and school initiatives**
- C) Isolation from colleagues
- D) Avoidance of personal development

What is the significance of professional relations with pupils?

- A) Encouraging intimidation and fear
- B) Promoting a positive learning environment**
- C) Ignoring cultural backgrounds and interests
- D) Disregarding fairness and consistency

What is expected of teachers regarding their treatment of pupils?

- A) Conditional positive stance
- B) Avoidance of cultural understanding
- C) Consistency, fairness, and respect**
- D) Indifference to social backgrounds

What knowledge is essential for teachers in understanding pupils?

- A) Complete knowledge of pupils' backgrounds
- B) Partial knowledge of pupils' backgrounds**
- C) In-depth knowledge of academic achievements
- D) Superficial knowledge of cultural diversity

What is emphasized as vital besides subject expertise in teaching and learning?

- A) Mimicking students' behavior
- B) Imposing strict discipline
- C) Personable responses and fairness**
- D) Isolating oneself from students

What attributes are disliked by pupils in teachers?

- A) Treating students with respect
- B) Attempting to relate to students as peers**
- C) Showing consistent mood changes
- D) Encouraging fairness and equality

What is at the heart of appropriate professional relations for teachers?

- A) Indifference and avoidance
- B) Respect, listening, and honesty**
- C) Intimidation and coercion
- D) Prejudice and judgment

What does "in loco parentis" imply for teachers?

- A) Avoiding interactions with students
- B) Providing strict discipline
- C) Acting as a critical friend with wider perspectives**
- D) Disregarding students' arguments

What is expected of teachers regarding professional relations with colleagues?

- A) Encouraging gossip and rumors
- B) Revealing personal information about colleagues
- C) Maintaining professionalism and discretion**
- D) Ignoring conflicts and disagreements

How should teachers handle criticism of colleagues by students?

- A) Encourage students to spread rumors

- B) Join students in criticizing colleagues
- C) Discuss appropriate ways to address concerns with students**
- D) Ignore students' opinions about colleagues

What role should teachers play within various teams in the school?

- A) Promoting discord and disagreement
- B) Avoiding participation in team activities
- C) Being regarded as a team player and contributing conscientiously**
- D) Encouraging isolation and detachment

What does professionalism-in-action entail for teachers?

- A) Embracing unfailing agreement
- B) Resisting collaboration and dialogue
- C) Giving a fair hearing to colleagues and presenting counter-views**
- D) Ignoring conflicts of interest and intention

What is highlighted as the essence of being a reflective practitioner?

- A) Embracing prejudice and judgment
- B) Avoiding professional commitments and obligations
- C) Continuously learning and developing professional skills**
- D) Rejecting cultural understanding and diversity

What is emphasized as the heart of professionalism for teachers?

- A) Avoidance of complexity and challenge
- B) Making a difference in students' lives and values**
- C) Isolation from students and colleagues
- D) Imposing strict discipline and authority

Lecture # 28

According to Kurt Lewin's research in the 1930s, what approach did he use to study the forces affecting work groups?

- A) Behavioral analysis
- B) Force field analysis**
- C) Hierarchical observation
- D) Societal examination

What did McGregor list as important elements of effective groups in the 1960s?

- A) Strict rules and regulations
- B) Informal atmosphere and frequent criticism
- C) Task clarity and decision-making by consensus**
- D) Centralized leadership and competition

According to Likert, what characteristic is essential for effective teamwork?

- A) Resistance to change

B) Frequent criticism and disagreement

C) Harmony and mutual help

D) Struggle for power and control

What is the first dysfunction of a team according to Lencioni's pyramid model?

A) Absence of trust

B) Fear of conflict

C) Lack of commitment

D) Inattention to results

What are the four important areas for team effectiveness identified by Beckman?

A) Goals, processes, relationships, and rewards

B) Skills, resources, leadership, and communication

C) Goals, roles, processes, and relationships

D) Feedback, autonomy, collaboration, and recognition

According to Gladstein, what affects group effectiveness?

A) External environment only

B) Individual skills only

C) Group structures, process relationships, and effectiveness

D) Organizational hierarchy only

What are Parker's twelve characteristics of a good team?

A) Authoritarian leadership and rigid structure

B) Individual goals and competition

C) Open communication and distributed roles

D) Lack of participation and disagreement

According to Hackman, what criteria must effective teams meet?

A) Compliance with authority

B) Personal satisfaction only

C) Productive output, teamwork on future projects, and personal well-being

D) Leadership control and individual achievement

How have teachers been viewed in the last two decades?

A) As insignificant to education problems

B) As the sole cause of educational issues

C) As central to both educational problems and solutions

D) As irrelevant to educational outcomes

According to sociologists, what characterizes current school environments?

A) Abundance of rewards for professional work

B) Supportive structures for teacher growth

C) Isolation and lack of support for teachers

D) Collaborative teaching environments

What did many governments initiate in the 1980s to recruit, reward, and retain the best teachers?

A) Salary reductions

B) Career ladders and merit pay

- C) Mandatory retirement policies
- D) Reductions in funding for education

According to Johnson, what are the three theories of motivation and productivity used in teacher motivation measures?

- A) Cooperation theory, recognition theory, and accountability theory
- B) Expectancy theory, equity theory, and job enrichment theory**
- C) Achievement theory, hierarchy theory, and intrinsic theory
- D) Competition theory, punishment theory, and obedience theory

What concern has been raised regarding merit pay plans?

- A) Encouraging teachers to set high standards
- B) Teachers' reluctance to meet curriculum goals
- C) Potential negative impact on relationships with students**
- D) Enhancing teacher-student relationships

What is a criticism of individual merit and incentive pay schemes?

- A) They promote teamwork and collaboration
- B) They encourage cooperation among faculty members
- C) They often divide faculties and create conflicts**
- D) They have no effect on teacher motivation

What did Frase identify as the most gratifying reward for teachers?

- A) Financial compensation
- B) Accomplishing the goal of helping young people learn**
- C) Merit pay bonuses
- D) Career advancement opportunities

What are considered work context factors affecting teacher motivation?

- A) Opportunities for professional development and recognition
- B) Class size, discipline conditions, and availability of teaching materials**
- C) Achievement, empowerment, and authority
- D) Rewards for group performance and supervisory control

What factors are intrinsic to work content, according to Frase?

- A) Working conditions and salary
- B) Recognition and peer support
- C) Opportunities for professional development and autonomy**
- D) Financial incentives and career advancement

According to Frase and Sorenson, what is the factor most strongly related to job satisfaction?

- A) Feedback**
- B) Autonomy
- C) Collegiality
- D) Recognition

What does Lieberman argue for in terms of professional development?

- A) A return to traditional methods
- B) A radical rethinking that encourages teachers' growth**

- C) A focus on financial incentives
- D) A reduction in opportunities for teacher reflection

What does Monahan propose to embed within the tenure review process?

- A) Traditional staff development workshops
- B) Performance-based evaluations
- C) Collaborative curriculum design and peer supervision**
- D) External incentives for teacher retention

Lecture # 29

According to the text, effective mentoring should be tied to colleagues teaching the same subject or age group and should be _____.

- A) integrated into formal performance management systems
- B) conducted by external consultants
- C) removed from formal performance management systems**
- D) focused solely on evaluating mentees' performance

What are the two key concepts that a Reflective Practitioner mentor should focus on?

- A) Collaboration and competition
- B) Assessment and evaluation
- C) Legitimate peripheral participation and scaffolding**
- D) Reflection and articulation

According to Hobson and Malderez, what are some characteristics of good mentors?

- A) Critical judgment and evaluation
- B) Emotional detachment and criticism
- C) Acting as a good professional model and offering emotional support**
- D) Lack of involvement and disinterest

In the context of mentoring, what does "judge-mentoring" refer to?

- A) Providing constructive feedback
- B) Creating a safe and trusting relationship
- C) Evaluating and passing judgment on mentees**
- D) Fostering open communication and collaboration

According to the situated learning model, what can context be?

- A) Limited to the actual work setting
- B) Restricted to a virtual environment
- C) Anchored by a video or multimedia program
- D) All of the above**

What are some characteristics of learning environments according to the situated learning model?

- A) Isolated and artificial context

- B) Lack of access to expert performances
- C) Collaboration and construction of knowledge**
- D) Limited roles and perspectives

What is one critical characteristic of situated learning for reflective practice?

- A) Limited access to expert performances
- B) Isolated and inauthentic activities
- C) Absence of coaching and scaffolding
- D) Promotion of reflection for abstraction formation**

According to McLellan (1994), what are some key components of the situated learning model?

- A) Reflection and isolation
- B) Coaching and multiple practice**
- C) Articulation and collaboration
- D) Absence of context and authentic activities

What is the main goal of providing authentic activities in learning environments?

- A) To make learning abstract and detached from real-life situations
- B) To promote reflection and abstraction formation**
- C) To restrict access to expert performances
- D) To discourage collaborative construction of knowledge

What does the situated learning model emphasize regarding learning environments?

- A) Isolation and individual practice
- B) Collaboration and authentic context**
- C) Lack of coaching and scaffolding
- D) Absence of reflection and articulation

How does the text suggest mentors should assist mentees in the process of making their own conclusions and decisions?

- A) By providing direct answers and solutions
- B) By withholding information to encourage independence
- C) Through scaffolding, offering pedagogical assistance**
- D) By avoiding interaction and guidance

What is the potential consequence of ineffective mentoring according to the text?

- A) Enhanced professional development for mentees
- B) Limitation of mentees' professional development**
- C) Increased trust and collaboration between mentors and mentees
- D) Facilitation of a safe and trusting relationship

According to Hobson and Malderez, what is one of the most damaging failings of mentoring?

- A) Providing emotional support
- B) Facilitating collaborative learning
- C) Judge-mentoring, involving evaluation and judgment**
- D) Offering opportunities for professional growth

What does the situated learning model emphasize regarding the learning environment?

- A) Restricted access to authentic context
- B) Promotion of isolated learning
- C) Encouragement of authentic activities and collaboration**
- D) Absence of expert performances and coaching

Answer: C) Encouragement of authentic activities and collaboration

What is the role of mentors according to Hobson and Malderez?

- A) To evaluate and judge mentees' performance
- B) To create a safe and trusting relationship with mentees**
- C) To isolate mentees from the school community
- D) To discourage mentees from seeking help or acknowledging difficulties

Lecture # 30

What is emphasized as being at the core of teacher education and development?

- A) Group discussions
- B) Peer evaluations
- C) Reflective practice**
- D) Checklists and video recordings

According to researchers, what role does dialogue play in reflective practice?

- A) It is unnecessary and time-consuming.
- B) It is a solitary process without interaction.
- C) It encourages collaboration and co-construction of meaning.**
- D) It restricts the scope of reflective practices.

How do researchers suggest facilitating reflective dialogue?

- A) Through individual self-reflection only
- B) By using only written journals
- C) By incorporating checklists and video recordings
- D) Through peer review and interactive online tools**

What is demonstrated in the dialogue between Teacher 1 and Teacher 2?

- A) Conflict and disagreement
- B) Cooperation and support**
- C) Solitary reflection
- D) Competition and rivalry

How does Teacher 1 support Teacher 2 in the dialogue?

- A) By dismissing Teacher 2's concerns
- B) By providing direct answers
- C) By encouraging critical engagement and processing**
- D) By avoiding interaction

Which statement best describes the role of Teacher 1 in the dialogue?

- A) Teacher 1 dominates the conversation.

B) Teacher 1 becomes a facilitator who supports and encourages Teacher 2.

C) Teacher 1 remains silent throughout.

D) Teacher 1 challenges and criticizes Teacher 2's teaching methods.

How does the dialogue contribute to reflective practice?

A) By discouraging dialogue and collaboration

B) By limiting the scope of reflection

C) By encouraging critical analysis and consideration of alternative approaches

D) By promoting solitary reflection without external input

What strength of the dialogic process is highlighted in the dialogue?

A) The avoidance of critical engagement

B) The limitation of discussion points

C) The co-construction of insights and meaning

D) The restriction of roles

In the dialogue, what does Teacher 1's questioning encourage?

A) Limited reflection

B) Independent decision-making by Teacher 2

C) Further critical engagement and processing by Teacher 2

D) Avoidance of reflection

What aspect of the reflective process is demonstrated when Teacher 2 ponders alternative ways to end her lesson?

A) The importance of closed-ended questions

B) The significance of predetermined outcomes

C) The encouragement of exploration and critical thinking

D) The avoidance of dialogue and collaboration

What is the primary challenge that teachers often face in engaging in reflective practice?

A) Lack of time

B) Lack of interest

C) Lack of resources

D) Lack of support

What approach do researchers suggest to address the struggle with reflective practice?

A) Individual self-reflection only

B) Incorporating dialogue and collaboration

C) Ignoring the need for reflection

D) Focusing solely on written journal entries

According to researchers, what are invaluable tools for facilitating reflective dialogue?

A) Checklists and video recordings

B) Individual self-reflection

C) Solitary journal entries

D) Peer evaluations

How do interactive online tools contribute to the dialogic process?

- A) They discourage collaboration
- B) They limit the scope of reflection
- C) They provide additional opportunities for dialogue and interaction**
- D) They hinder critical engagement

What role does dialogue play in the reflective process, according to researchers?

- A) It restricts critical thinking
- B) It encourages solitary reflection
- C) It promotes collaboration and co-construction of meaning**
- D) It limits the exploration of alternative approaches

How does Teacher 1 support Teacher 2 in the dialogue?

- A) By dismissing Teacher 2's concerns
- B) By providing direct answers
- C) By encouraging critical engagement and processing**
- D) By avoiding interaction

What does the dialogue illustrate about the reflective process?

- A) The importance of avoiding critical analysis
- B) The significance of closed-ended questions
- C) The value of interaction and collaboration**
- D) The necessity of solitary reflection

In the dialogue, how does Teacher 1 contribute to Teacher 2's reflection process?

- A) By dominating the conversation
- B) By providing direct solutions
- C) By facilitating critical thinking and exploration**
- D) By discouraging further discussion

What is highlighted as a strength of the dialogic process in the reflective dialogue?

- A) Avoidance of critical engagement
- B) Limitation of discussion points
- C) Co-construction of insights and meaning**
- D) Restriction of roles

How does the dialogue contribute to the reflective process?

- A) By discouraging dialogue and collaboration
- B) By limiting the scope of reflection
- C) By encouraging critical analysis and consideration of alternative approaches**
- D) By promoting solitary reflection without external input

Lecture # 31

What is the primary purpose of peer observation?

- A) To evaluate teaching effectiveness

B) To provide formative feedback for improving practice

- C) To determine merit, promotion, and tenure decisions
- D) To compare teaching methods

Who guides the peer observation process?

- A) Administrators
- B) Students
- C) Teachers themselves**
- D) External consultants

What is the difference between formative and summative peer observation?

- A) Formative is for merit decisions, while summative is for teaching improvement.
- B) Formative focuses on evaluation, while summative is for feedback.
- C) Formative assists in improvement, while summative is evaluative for merit, promotion, and tenure decisions.**
- D) Formative involves self-assessment, while summative involves external evaluation.

What is one strength of peer observation?

- A) Reinforcing biases
- B) Providing new perspectives on teaching**
- C) Decreasing teaching ability
- D) Limiting professional growth

What is one weakness of peer observation?

- A) Bias from observer beliefs**
- B) Limited opportunities for observation
- C) Lack of observer training
- D) Inability to provide constructive feedback

What is necessary if peer observation is used for summative purposes?

- A) Observer anonymity
- B) Systematic observer training**
- C) Pre-determined evaluation criteria
- D) Minimal interaction between teachers

What is the purpose of a pre-observation conference?

- A) To assess teaching effectiveness
- B) To provide immediate feedback
- C) To review the teacher's teaching plan**
- D) To finalize summative evaluation

According to guidelines, when should the post-observation conference be scheduled?

- A) Within a month of the observation
- B) Within a week of the observation**
- C) Within a day of the observation
- D) Within a semester of the observation

What is a recommended characteristic of effective teachers, based on observable behavior?

- A) Ignoring student questions
- B) Creating a tense classroom environment
- C) Holding attention and respect of students**
- D) Providing vague instructions

What is an observable characteristic of effective teachers related to feedback?

- A) Rarely providing feedback
- B) Providing ambiguous feedback
- C) Offering frequent and immediate feedback**
- D) Only praising student answers

Lecture # 32

What does "grounded theory" refer to?

- A. Theory developed deductively from grand theory
- B. Theory derived from a body of data**
- C. Theory without any data support
- D. Theory based on variable perspective

Grounded theory contrasts with deductive theory by:

- A. Fitting multiple datasets perfectly
- B. Being developed without any data**
- C. Taking a variable perspective
- D. Having no specific steps for execution

What perspective does grounded theory take?

- A. Case-oriented**
- B. Variable-oriented
- C. Deductive
- D. Hypothesis-driven

Which method is primarily used for understanding research situations in grounded theory?

- A. Experimentation
- B. Observation, conversation, and interview**
- C. Literature review
- D. Survey

What is the heart of the grounded theory process?

- A. Data collection
- B. Constant comparison**
- C. Literature review
- D. Hypothesis formation

What is the purpose of coding in grounded theory?

- A. To identify categories and their properties**
- B. To validate existing theories

- C. To analyze quantitative data
- D. To conduct literature review

When does sorting occur in grounded theory?

- A. At the beginning of data collection
- B. When all categories are saturated**
- C. After memoing
- D. Before note-taking

How is literature treated in grounded theory?

- A. Given special treatment at the beginning
- B. Ignored completely
- C. Accessed as it becomes relevant**
- D. Used as the sole basis for theory development

What do sorted memos provide in grounded theory?

- A. Final conclusions
- B. Theoretical framework**
- C. Data collection techniques
- D. None of the above

What occurs simultaneously from the beginning in grounded theory?

- A. Writing and sorting
- B. Data collection, note-taking, coding, and memoing**
- C. Constant comparison and literature review
- D. None of the above

What is the primary focus of a Reflective Practitioner in grounded theory research?

- A. Testing hypotheses
- B. Identifying variables
- C. Understanding research situations and role management**
- D. Conducting experiments

Which term is used to describe the process of identifying similarities and differences between data sets in grounded theory?

- A. Constant comparison**
- B. Variable comparison
- C. Data validation
- D. Hypothesis testing

What is the significance of saturation in grounded theory?

- A. It indicates the end of data collection
- B. It suggests the need for more data
- C. It signals that no new information is emerging for certain categories**
- D. It marks the beginning of sorting

Which term is used to describe the process of grouping memos based on similarity in grounded theory?

- A. Memoing

B. Sorting

- C. Coding
- D. Data collection

What is the primary outcome of grounded theory research?

- A. Development of hypotheses
- B. Identification of variables
- C. Creation of a theoretical framework**
- D. Data analysis

How is theory developed in grounded theory research?

- A. Deductively from pre-existing concepts
- B. Inductively from a body of data**
- C. Through experimental design
- D. By relying solely on literature review

What is the role of note-taking in grounded theory?

- A. To document key issues after data collection**
- B. To develop hypotheses
- C. To conduct literature review
- D. To validate existing theories

Which aspect of grounded theory emphasizes the importance of understanding how variables interact to produce outcomes?

- A. Constant comparison
- B. Case orientation**
- C. Literature review
- D. Hypothesis testing

How is the quality of a theory evaluated in grounded theory research?

- A. By the number of data sets it fits perfectly
- B. By the process of theory construction**
- C. By the complexity of variables identified
- D. By the extent of literature review conducted

What distinguishes grounded theory from theory derived deductively?

- A. Grounded theory relies on pre-existing concepts
- B. Grounded theory fits one dataset perfectly**
- C. Deductive theory is based on case orientation
- D. Deductive theory involves constant comparison

Lecture # 33

What does "tacit knowledge" refer to?

- A. Knowledge that is written down and formally expressed
- B. Knowledge that cannot be articulated but is essential for effective operation**
- C. Explicit propositional knowledge

D. Knowledge that is openly shared and discussed

How is tacit knowledge different from explicit propositional knowledge?

- A. Tacit knowledge is learned through formal education
- B. Tacit knowledge can be written down, while explicit knowledge cannot
- C. Tacit knowledge cannot be articulated, while explicit knowledge can**
- D. Tacit knowledge is easily transferable, while explicit knowledge is not

What is an example of tacit knowledge mentioned in the text?

- A. Memorized facts
- B. Recognizing the face of a friend**
- C. Mathematical formulas
- D. Historical events

According to Senge, what is the key to personal mastery?

- A. Memorization of facts
- B. Constant state of learning and enhancing vision**
- C. Mastery of complex systems
- D. Formal education

What does "mental models" refer to in the context of the learning organization?

- A. Deeply ingrained assumptions that influence actions and understanding**
- B. Concrete models used for physical learning
- C. Social learning techniques
- D. Visual representations of organizational structures

What is the significance of "collaboration" in the context of the learning organization?

- A. It promotes competition among team members
- B. It inhibits creativity and innovation
- C. It fosters openness, trust, and cooperation among team members**
- D. It leads to individual mastery

What does "environmental scanning" involve in schools as learning organizations?

- A. Reviewing and evaluating programs and practices
- B. Collaborating with other schools
- C. Broadening the scope of information, policy, theory, and practice**
- D. Recognizing and reinforcing effort and achievement

What is the purpose of "taking initiatives and risks" in schools as learning organizations?

- A. To maintain the status quo
- B. To discourage experimentation
- C. To promote change and improvement**
- D. To limit professional growth

What does "continuing professional development" refer to in schools as learning organizations?

- A. Encouragement and opportunity for all staff to learn and develop**

- B. Limited opportunities for staff growth
- C. Static professional skills
- D. Lack of resources for professional development

How does implicit learning relate to tacit knowledge?

A. Tacit knowledge is about the process of learning, while implicit learning is about the content.

- B. They are unrelated concepts.
- C. Tacit knowledge refers to explicit learning, while implicit learning refers to informal learning.
- D. Tacit knowledge and implicit learning are synonymous terms.

What is the primary characteristic of tacit knowledge?

- A. It is openly shared and discussed
- B. It can be articulated and written down
- C. It is essential but not formally expressed**
- D. It is easily transferable between individuals

According to Senge, what is one of the key elements for the Reflective Practitioner concerning systems thinking?

- A. Short-term focus
- B. Recognizing simplicity in the organization
- C. Recognizing the complexity of the organization**
- D. Focusing solely on individual mastery

What is the significance of "shared vision" in the learning organization?

- A. It ensures individual focus on personal goals
- B. It motivates individuals to work toward common goals**
- C. It limits creativity and innovation
- D. It leads to conflicts and disagreements

Which dimension of schools as learning organizations involves sincere recognition and valuing of effort, initiative, and achievement?

- A. Collaboration
- B. Taking initiatives and risks
- C. Recognition and reinforcement**
- D. Continuing professional development

How does storytelling contribute to building shared vision in the learning organization?

- A. By imposing a vision on others
- B. By encouraging open dialogue and enthusiasm**
- C. By dictating actions to team members
- D. By limiting creativity and innovation

Lecture # 34

What is action research primarily aimed at?

- A. Increasing administrative oversight
- B. Empowering practitioners to improve their actions**
- C. Simplifying complex educational problems
- D. Standardizing teaching practices

How does action research benefit teachers?

- A. By isolating them from the challenges of teaching
- B. By providing solutions to complex educational problems**
- C. By reducing the need for collaboration among teachers
- D. By increasing respect for teachers in society

What is the first step in the action research process?

- A. Reporting results
- B. Collecting data
- C. Selecting a focus**
- D. Clarifying theories

How do teachers ensure validity and reliability in action research data collection?

- A. By relying on a single source of data
- B. By avoiding triangulation
- C. By making sure data align with classroom characteristics**
- D. By excluding unique characteristics of their classroom

What is the significance of triangulation in action research?

- A. It involves using only one source of data
- B. It ensures the collection of diverse data sources**
- C. It limits the validity and reliability of findings
- D. It decreases the complexity of data analysis

How do teachers analyze action research data?

- A. By conducting complex statistical calculations
- B. By using relatively user-friendly procedures**
- C. By excluding data that do not align with their beliefs
- D. By relying solely on anecdotal evidence

In what setting does the reporting of action research most often occur?

- A. Scholarly conferences
- B. Informal settings such as faculty meetings**
- C. Professional journals
- D. Government agencies

What is the final step in the action research process?

- A. Analyzing data
- B. Reporting results
- C. Taking informed action**
- D. Identifying research questions

How does action research contribute to the professionalization of teaching?

- A. By promoting isolated work
- B. By discouraging collaboration**
- C. By making teaching more like blue-collar work
- D. By involving practitioners in decision-making

What effect does integrating data into teaching have on teacher motivation?

- A. It decreases motivation due to increased workload
- B. It has no effect on motivation
- C. It increases motivation by providing evidence of impact**
- D. It decreases motivation by revealing failures

What distinguishes action research from traditional research methods?

- A. It focuses solely on theoretical perspectives
- B. It involves practitioners in improving their own actions**
- C. It relies on complex statistical analyses
- D. It excludes data collection from practitioners

Why is selecting a focus considered vitally important in action research?

- A. To ensure conformity with traditional research methods
- B. To make the research process more complex
- C. To align with administrative priorities
- D. To ensure relevance and effectiveness in improving teaching practices**

How do teachers benefit from sharing action research findings with colleagues?

- A. By creating competition among colleagues
- B. By fostering a collaborative learning environment**
- C. By increasing isolation within the profession
- D. By imposing rigid standards on teaching practices

What role does data collection play in action research?

- A. It is unnecessary due to the abundance of existing data
- B. It serves to complicate the research process
- C. It provides valid and reliable evidence for decision-making**
- D. It is limited to anecdotal evidence

How does action research contribute to meeting the needs of a diverse student body?

- A. By prescribing a single intervention for all students
- B. By encouraging teachers to ignore student differences
- C. By addressing the unique needs of individual students**
- D. By standardizing teaching practices

What is the conventional approach to problem-solving mentioned in the passage?

- A. Focusing on positives and building on strengths
- B. Exploring new possibilities with an open mind
- C. Emphasizing the things that aren't working**
- D. Seeking creative and innovative solutions

Who pioneered the method of problem-solving known as Appreciative Inquiry?

- A. David Cooperrider**
- B. Peter Senge
- C. Case Western Reserve University
- D. The Reflective Practitioner

What is the primary focus of the "Discovery" phase in Appreciative Inquiry?

- A. Identifying weaknesses and failures
- B. Dreaming of future possibilities
- C. Exploring past successes and what is working well**
- D. Defining the problem clearly

What is the significance of defining the problem positively in Appreciative Inquiry?

- A. It limits the exploration of possibilities
- B. It encourages a negative mindset
- C. It helps focus on the positive aspects and potential solutions**
- D. It leads to bland and conventional problem-solving

What is the purpose of the "Design" phase in Appreciative Inquiry?

- A. Identifying past successes
- B. Dreaming of future possibilities
- C. Planning the practicalities needed to support the vision**
- D. Implementing the dream or vision

What is the last step in the Appreciative Inquiry process often referred to as?

- A. Dream Phase
- B. Define Phase
- C. Deliver Phase**
- D. Discovery Phase

Which term refers to the spirit of seeking to better understand and being open to new possibilities?

- A. Appreciation
- B. Inquiry**
- C. Dreaming
- D. Discovery

What is the first step in the Appreciative Inquiry process, as described by the Reflective Practitioner?

- A. Discovery Phase
- B. Define Phase**

- C. Design Phase
- D. Dream Phase

In Appreciative Inquiry, what is the focus of the "Dream" phase?

- A. Exploring past successes and what is working well
- B. Defining the problem clearly
- C. Planning the practicalities needed to support the vision
- D. Dreaming of future possibilities**

What is the primary focus of the "Discovery" phase in Appreciative Inquiry?

- A. Identifying weaknesses and failures
- B. Dreaming of future possibilities
- C. Exploring past successes and what is working well**
- D. Defining the problem clearly

What is the overarching goal of Appreciative Inquiry?

- A. To focus on problems and weaknesses
- B. To appreciate and build upon strengths**
- C. To avoid change and maintain the status quo
- D. To criticize and blame individuals for failures

Who developed the concept of Appreciative Inquiry?

- A. Peter Senge
- B. David Cooperrider**
- C. The Reflective Practitioner
- D. Case Western Reserve University

What is the purpose of the "Design" phase in Appreciative Inquiry?

- A. Identifying past successes
- B. Dreaming of future possibilities
- C. Planning the practicalities needed to support the vision**
- D. Implementing the dream or vision

Which term refers to recognizing and valuing the contributions or attributes of things and people around us?

- A. Appreciation**
- B. Inquiry
- C. Dreaming
- D. Discovery

What is the significance of defining the problem positively in Appreciative Inquiry?

- A. It limits the exploration of possibilities
- B. It encourages a negative mindset
- C. It helps focus on the positive aspects and potential solutions**
- D. It leads to bland and conventional problem-solving

According to John Dewey, what is an experience?

- A. A solitary activity disconnected from the environment
- B. An interaction between the individual and the environment**
- C. A passive observation of external stimuli
- D. A continuous process of learning without prior knowledge

In Dewey's work, what is the primary role of reflection in learning?

- A. To passively absorb information
- B. To engage in impulsive and routine actions
- C. To transform unclear situations into clear and coherent ones**
- D. To avoid questioning beliefs and assumptions

According to Dewey, what is the first aspect of reflective activity?

- A. Taking action
- B. Perplexity**
- C. Comparing hypotheses
- D. Elaboration

What are the three attitudes that reflective thinking fosters according to Dewey?

- A. Critical thinking, skepticism, and indifference
- B. Close-mindedness, apathy, and detachment
- C. Open-mindedness, wholeheartedness, and responsibility**
- D. Prejudice, disinterest, and irresponsibility

According to Dewey, what follows reflective thinking?

- A. Blind and impulsive action
- B. Informed action and further inquiry**
- C. Ignorance and confusion
- D. Indifference and complacency

How does Dewey describe reflective thinking?

- A. A linear process with defined steps
- B. A sporadic and unstructured activity
- C. A cycle involving aspects of reflective activity**
- D. A passive absorption of external stimuli

What is the main focus of reflective practice?

- A. Short-term learning from single experiences
- B. Long-term, developmental process of learning**
- C. Memorization of facts and information
- D. Repetitive and routine actions

How does Dewey describe the process of professional development?

- A. A stagnant and unchanging process
- B. A random and chaotic series of events
- C. A spiral where learning from one cycle stimulates the next**
- D. A linear progression without revisiting prior experiences

What term does Dewey use to refer to a situation that raises difficulties or dilemmas?

- A. Problematic occurrence
- B. Felt difficulty**
- C. Reflective instance
- D. Conceptual dilemma

What is the ultimate goal of reflective practice according to Dewey?

- A. Achieving perfection and infallibility
- B. Avoiding challenges and complexities
- C. Developing well-grounded professional knowledge and skills**
- D. Maintaining the status quo and resisting change

How does John Dewey define an educative experience?

- A. A passive observation of external stimuli
- B. An isolated activity without prior knowledge
- C. An interaction between the individual and the environment**
- D. A continuous flow of knowledge unrelated to past experiences

According to Dewey, what is the primary characteristic of reflective thinking?

- A. Passivity and indifference
- B. Blind and impulsive action
- C. Active, persistent, and careful consideration**
- D. A disconnection from prior beliefs and assumptions

What does Dewey emphasize as the starting point of reflective thought?

- A. Complacency and satisfaction
- B. Perplexity and doubt**
- C. Blind acceptance of beliefs
- D. Avoidance of challenging situations

What does reflective thinking impel individuals to do, according to Dewey?

- A. Engage in impulsive and routine activities
- B. Avoid questioning beliefs and assumptions
- C. Conform to societal expectations
- D. Engage in inquiry and further reflection**

In Dewey's view, what does reflective thinking contribute to an individual's actions?

- A. Blind and impulsive responses
- B. Enhanced control and intelligent action**
- C. Apathy and disinterest
- D. Random and chaotic behavior

Lecture # 37

According to Boud, Keogh, and Walker (1985), what is the first stage in their three-stage model of reflection?

- A. Discharging negative feelings
- B. Re-evaluating the experience
- C. Reflecting on the experience non-judgmentally**
- D. Integrating new relationships between data

What is the primary purpose of journal writing in reflective practice, according to David Boud?

- A. Promoting critical thinking and questioning attitude**
- B. Strengthening passive observation of experiences
- C. Encouraging memorization of factual knowledge
- D. Fostering conformity to societal norms

What aspect of reflection does the model proposed by Boud, Keogh, and Walker (1985) tend to emphasize?

- A. Reflection-in-action
- B. Reflection-on-action**
- C. Reflective dialogue in a social arena
- D. Active participation in learning

What is one limitation of the model proposed by Boud, Keogh, and Walker (1985), according to the text?

- A. It encourages reflection-in-action.
- B. It overlooks the importance of individual emotions.
- C. It focuses solely on external validation and feedback.
- D. It does not guide the translation of learning back into experience.**

How do mentors and supervisors contribute to the reflective process, based on the text?

- A. By discouraging reflective dialogue
- B. By focusing solely on individuals' mental activity
- C. By providing external validation and positive feedback**
- D. By minimizing the complexity of the reflective process

According to David Boud, what is reflection considered as?

- A. A process of ignoring experience
- B. A way of turning experience into learning**
- C. A method of memorizing factual knowledge
- D. A way to avoid questioning attitudes

How does Boud describe the nature of experience in relation to learning?

- A. Confusing and meaningless
- B. Clear and straightforward
- C. Dynamic and sometimes messy**
- D. Static and predictable

What is one benefit of reflective journaling mentioned in the text?

- A. Limiting the exercise of voice
- B. Hindering the development of a professional identity
- C. Strengthening active involvement in learning**
- D. Encouraging passive observation of experiences

What is a criticism of the model proposed by Boud, Keogh, and Walker (1985)?

- A. It lacks complexity in addressing emotions and cognition.
- B. It emphasizes reflection-in-action over reflection-on-action.
- C. It encourages passive observation of experiences.
- D. It restricts reflection to a retrospective role.**

How do emotions and cognition interact in the reflective process, as discussed in the text?

- A. Emotions have no impact on reflection.
- B. Positive emotions hinder the reflective process.
- C. Learners with positive emotions are less likely to engage in reflective activities.
- D. Positive emotions can enhance engagement in reflective activities.**

Lecture # 38

According to Gibb's reflective cycle, which stage involves explaining the incident being reflected upon?

- A) Feelings
- B) Evaluation
- C) Description**
- D) Analysis

What aspect should be avoided in reflective writing to ensure relevance and clarity?

- A) Elaborating on emotions
- B) Providing excessive details**
- C) Including theoretical references
- D) Discussing potential actions

Which stage of Gibb's model involves discussing the emotions and thoughts experienced during the incident?

- A) Evaluation
- B) Analysis
- C) Feelings**
- D) Conclusion

In reflective writing, which section provides an opportunity to compare personal experience with existing literature?

- A) Evaluation
- B) Conclusion
- C) Action plan
- D) Analysis**

According to the provided text, which author's work emphasizes the importance of integrating theory with personal experience in reflective writing?

- A) Greene (2006)
- B) Jones (2000)
- C) Parbold (1998)
- D) Cooper (2001)**

What is the primary purpose of the conclusion in reflective writing according to Gibb's model?

- A) Providing an overview of emotions
- B) Offering potential solutions
- C) Reflecting on lessons learned**
- D) Summarizing theoretical concepts

Which action should have been taken immediately after the incident, according to the reflection?

- A) Discussing with placement supervisor
- B) Seeking advice from fellow trainees
- C) Confronting the class teacher**
- D) Refraining from further interaction

What is identified as a key skill for successful placement according to Jackson (1999)?

- A) Building professional relationships**
- B) Demonstrating assertiveness
- C) Enhancing presentation skills
- D) Seeking immediate resolution

What potential consequence is highlighted if incidents are not dealt with immediately and personally?

- A) Strengthening teacher-trainee relationships
- B) Enhancing understanding among colleagues
- C) Leading to future conflicts**
- D) Facilitating reflective practice

According to Gibb's model, what should be included in the action plan?

- A) Detailed description of the incident
- B) List of theoretical references
- C) Strategies for improvement**
- D) Emotional reactions

What is the primary focus of the action plan according to the provided text?

- A) Identifying personal shortcomings
- B) Seeking external validation
- C) Implementing strategies for improvement**
- D) Reflecting on theoretical frameworks

What is the significance of attending a presentation skills workshop, as mentioned in the action plan?

- A) Overcoming personal fears**
- B) Expanding theoretical knowledge
- C) Establishing professional relationships

D) Demonstrating assertiveness

What realization does the trainee make regarding nervousness in public speaking after reflecting on the incident?

A) It is a unique experience

B) It is a common reaction

C) It indicates incompetence

D) It requires immediate intervention

What approach does the trainee plan to adopt with colleagues to alleviate nervousness?

A) Seeking external validation

B) Practicing assertiveness

C) Building professional relationships

D) Avoiding further interactions

Which stage of Gibb's reflective cycle involves discussing the effectiveness of personal actions during the incident?

A) Analysis

B) Conclusion

C) Evaluation

D) Action plan

According to the provided text, what should reflective writing avoid to maintain academic integrity?

A) Emphasizing personal emotions

B) Using informal language

C) Including theoretical frameworks

D) Focusing solely on actions taken

What aspect of the incident does the trainee reflect upon in the evaluation stage?

A) The reaction of fellow trainees

B) The teacher's response

C) The theoretical background

D) The content of the lesson

What realization does the trainee have regarding the importance of immediate resolution of incidents?

A) It enhances theoretical understanding

B) It fosters a supportive environment

C) It prevents future conflicts

D) It improves personal assertiveness

What learning outcome does the trainee derive from the incident?

A) The importance of self-isolation

B) The necessity of seeking external validation

C) The significance of building professional relationships

D) The effectiveness of avoiding confrontations

What approach does the trainee plan to adopt to address personal shortcomings identified in the reflection?

- A) Seeking immediate resolution
- B) Building professional relationships
- C) Implementing strategies for improvement**
- D) Avoiding further interactions

Lecture # 39

Which model of structured reflection is discussed in the provided paragraph?

- A) Johns' Model**
- B) Gibbs' Model
- C) Dewey's Model
- D) Schön's Model

According to Johns' Model, what is recommended in addition to guided reflection for students?

- A) Group discussions
- B) Reflective diary**
- C) Formal assessments
- D) Practical demonstrations

Which of the following is not one of Carper's patterns of knowing as extended by Johns?

- A) Aesthetics
- B) Personal
- C) Empirics
- D) Engineering**

What is criticized by Rolfe et al. regarding the reflexive pattern of knowing in Johns' Model?

- A) Lack of theoretical foundation
- B) Inadequate consideration of ethics
- C) Limited applicability to ongoing situations**
- D) Absence of structured guidelines

Which stage of Johns' Model involves describing the event or experience being reflected upon?

- A) Stage 1: Describe the event/experience**
- B) Stage 2: Thinking and feeling
- C) Stage 3: Evaluation
- D) Stage 4: Analysis

According to Johns' Model, what should practitioners consider during the "Thinking and feeling" stage?

- A) Ethical implications

B) Personal biases

- C) Desired outcomes
- D) Philosophical theories

In which stage of Johns' Model are practitioners prompted to evaluate the consequences of their actions?

A) Stage 3: Evaluation

- B) Stage 4: Analysis
- C) Stage 5: Conclusion and action plan
- D) Stage 6: Reflective practice

What aspect of the situation is analyzed in Stage 4 of Johns' Model?

- A) Emotional responses
- B) Ethical dilemmas

C) Cognitive processes

- D) Practical outcomes

What is the purpose of Stage 5 in Johns' Model?

- A) Summarize the reflection process

B) Outline an action plan for improvement

- C) Provide theoretical background
- D) Evaluate the effectiveness of actions

According to Johns' 10 C's of Reflection, what attitude does a reflective practitioner demonstrate by accepting responsibility and being open to change?

A) Commitment

- B) Contradiction
- C) Conflict
- D) Challenge

What does Johns suggest should be harnessed to take appropriate action in reflective practice?

- A) Connection

- B) Catharsis

C) Challenge

- D) Congruence

According to Johns' 10 C's of Reflection, what should a reflective practitioner confront in a non-threatening way?

A) Conflict

- B) Catharsis

- C) Creation

- D) Connection

What is the purpose of "Caring" in Johns' 10 C's of Reflection?

- A) To work through negative feelings

- B) To connect new insights in the world of practice

C) To realize desirable practice

- D) To confront typical actions and attitudes

What is the significance of "Constructing" in Johns' 10 C's of Reflection?

- A) To connect new insights in the world of practice
- B) To build personal knowledge in practice**
- C) To confront typical actions and attitudes
- D) To accept responsibility and be open to change

According to Johns' Model, what is the purpose of "Connection"?

- A) To confront typical actions and attitudes
- B) To work through negative feelings
- C) To connect new insights in the world of practice**
- D) To realize desirable practice

Which stage of Johns' Model involves reflecting on the significant aspects of the experience to the practitioner?

- A) Stage 1: Describe the event/experience
- B) Stage 2: Thinking and feeling**
- C) Stage 3: Evaluation
- D) Stage 4: Analysis

In Johns' Model, what is the focus of Stage 3: Evaluation?

- A) Describing the event or experience
- B) Reflecting on thoughts and feelings
- C) Assessing the consequences of actions**
- D) Making sense of the situation

According to Johns' Model, what factors should practitioners consider during the analysis stage?

- A) Emotional responses and philosophical theories
- B) Ethical dilemmas and practical outcomes
- C) Cognitive processes and sources of knowledge**
- D) Desired outcomes and theoretical background

What is the ultimate goal of Stage 5: Conclusion and action plan in Johns' Model?

- A) Summarize the reflection process
- B) Evaluate the effectiveness of actions
- C) Outline an action plan for improvement**
- D) Provide theoretical background

Which attitude, according to Johns' 10 C's of Reflection, involves reflection as a mirror for caring?

- A) Connection
- B) Caring**
- C) Congruence
- D) Constructing

What does reflective practice in education involve?

- A) Evaluating student performance
- B) Assessing classroom resources
- C) Studying teaching methods and their effectiveness**
- D) Implementing standardized tests

According to the passage, what is the appeal of reflective practice for teachers?

- A) Simplifying teaching approaches
- B) Standardizing classroom procedures
- C) Improving teaching practices through reflection**
- D) Reducing accountability in teaching

How does Schon's reflection-in-action assist teachers?

- A) By emphasizing theoretical knowledge
- B) By making professional knowledge explicit in decision-making**
- C) By minimizing the importance of classroom experience
- D) By discouraging self-reflection

According to Paterson and Chapman (2013), what is key to maintaining and developing aptitude throughout practice?

- A) Avoiding reflection
- B) Emphasizing theoretical knowledge
- C) Reflecting and learning from experience**
- D) Disregarding ethical consequences

What is the significance of reflection for practitioners according to the passage?

- A) It enhances emotional responses
- B) It provides theoretical insights
- C) It allows for objective analysis of actions
- D) It promotes personal and professional growth**

What aspect of teaching does reflective practice hold practitioners accountable to, according to the passage?

- A) Student performance
- B) Classroom management
- C) Professional standards and commitments**
- D) Administrative tasks

What is emphasized as a vital aspect of learning from past experiences in reflective practice?

- A) Memorization of classroom procedures
- B) Continuous professional development**
- C) Compliance with standardized teaching methods
- D) Adoption of hierarchical leadership styles

What does engaging in reflective practice signify about a teacher's commitment?

- A) A willingness to learn from mistakes**
- B) A resistance to change
- C) A focus on maintaining control
- D) A disregard for student feedback

According to the passage, what does reflective practice enable teachers to modify?

- A) Classroom resources
- B) Professional standards
- C) Teaching skills to suit specific contexts**
- D) Ethical principles

What is one of the goals of implementing a process of reflective practice for teachers?

- A) Maintaining a classroom culture of control
- B) Establishing hierarchical leadership structures
- C) Moving beyond existing theories in practice**
- D) Standardizing teaching approaches

According to the passage, what should teachers resist establishing in the classroom culture?

- A) Reflective practice
- B) Standardized testing
- C) A culture of control**
- D) Professional development

What is reflective practice associated with in terms of personal and professional growth?

- A) Decreased quality of care
- B) Stimulating clinical problems
- C) Increased self-awareness and skill acquisition**
- D) Promoting theoretical confusion

What does Mann (2009) suggest stimulates reflection in practicing professionals?

- A) External evaluation
- B) Anticipation of challenging situations**
- C) Routine procedures
- D) Theoretical frameworks

According to Davies (2012), what are some limitations of reflective practice?

- A) Increased learning and promotion of deep learning
- B) Confusion about which situations to reflect upon and potential time constraints**
- C) Identification of personal strengths and areas for improvement
- D) Acquisition of new knowledge and skills

What does Brookfield (1995) suggest is necessary for teachers to have towards their practice?

- A) A sense of superiority
- B) A critically reflective stance**
- C) A hierarchical leadership style
- D) A disregard for student needs

What does Brookfield identify as challenging in teaching?

- A) Simplifying the educational process

B) Understanding the power dynamics in the classroom

- C) Avoiding reflection on teaching methods
- D) Focusing solely on student evaluations

What does Brookfield suggest is necessary for teachers to challenge in their own practice?

- A) Student learning outcomes
- B) Their own untested hegemonic assumptions**
- C) External evaluation
- D) Classroom procedures

What is reflection associated with in terms of learning from experiences?

- A) Passive absorption of information
- B) Conscious understanding and sense-making**
- C) Memorization of theoretical concepts
- D) External evaluation and judgment

According to the passage, what does reflection challenge?

- A) Compliance with standardized procedures
- B) Existing beliefs, attitudes, and values**
- C) Personal and professional growth
- D) Theoretical frameworks

What is highlighted as the final stage of reflection according to the passage?

- A) Action**
- B) Contemplation
- C) Evaluation
- D) Critique

Lecture # 41

What does becoming a critically reflective teacher involve?

- A) Focusing solely on theoretical concepts
- B) Critical inquiry and self-reflection**
- C) Memorization of teaching methods
- D) Avoiding ethical considerations

According to the passage, what does critical inquiry involve for teachers?

- A) Routine evaluation of student work
- B) Examination of personal values and beliefs**
- C) Application of standardized procedures
- D) Ignoring ethical dilemmas

How does self-reflection differ from critical inquiry?

- A) Self-reflection focuses on external factors.
- B) Self-reflection involves questioning classroom practices.
- C) Self-reflection examines personal values and beliefs.**
- D) Self-reflection disregards ethical implications.

What does shedding a dearly-held belief in teaching signify?

- A) Enhanced confidence in teaching effectiveness
- B) Revealing uncertainty and vulnerability**
- C) Maintaining control over classroom dynamics
- D) Avoiding self-reflection

According to Senge et al. (1994), what distinguishes operating values from professed beliefs?

- A) Their alignment with standardized practices
- B) Their influence on daily behavior**
- C) Their susceptibility to proof
- D) Their connection to theoretical frameworks

What do operating values guide teachers in pursuing?

- A) Theoretical goals
- B) Educational outcomes**
- C) Administrative tasks
- D) Ethical dilemmas

How does critical reflection impact commonly-held beliefs?

- A) It reinforces existing convictions.
- B) It challenges and questions them.**
- C) It disregards ethical implications.
- D) It minimizes personal values.

What is one essential aspect of Bloom's Taxonomy for teachers?

- A) Memorization of lower-order skills
- B) Identification of standardized procedures
- C) Incorporating higher-order skills like analysis and evaluation**
- D) Ignoring critical thinking instruction

What does Bloom's Taxonomy emphasize regarding critical thinking instruction?

- A) Fundamental shifts in educational philosophy
- B) Adoption of standardized teaching methods
- C) Asking questions that call for analysis, synthesis, and evaluation**
- D) Memorization of theoretical concepts

According to the passage, what is the primary requirement for teachers to incorporate critical thinking in the classroom?

- A) Fundamental shifts in educational philosophy
- B) Deep alteration of teaching methods
- C) The ability to generate a variety of question types**
- D) Memorization of instructional frameworks

What is the purpose of the 40 Critically Reflective Questions provided in the passage?

- A) To assess student performance
- B) To promote memorization of subject matter
- C) To facilitate reflection on teaching, subject, and student**
- D) To standardize classroom procedures

What category of reflective questions involves examining personal feelings about a piece of work?

- A) Forward-Looking
- B) Inward-Looking**
- C) Outward-Looking
- D) Backward-Looking

What is one question aimed at assessing students' satisfaction with their work or process?

- A) "How much did you know about the subject before we started?"
- B) "How do you feel about this piece of work?"**
- C) "Did you do your work the way other people did theirs?"
- D) "What would you change if you had a chance to do this piece over again?"

According to the passage, what is the goal of asking reflective questions about standards and goals?

- A) To reinforce existing beliefs
- B) To avoid self-reflection
- C) To encourage critical examination of performance**
- D) To minimize ethical considerations

What category of questions involves considering potential improvements for future work?

- A) Backward-Looking
- B) Inward-Looking
- C) Forward-Looking**
- D) Outward-Looking

What question is aimed at identifying changes in students' ideas over time?

- A) "What were your goals for meeting this piece of work?"
- B) "Have you changed any ideas you used to have on this subject?"**
- C) "How did those changes come about?"
- D) "What might you want next year's teacher to know about you?"

According to the passage, what does reflection challenge in teachers' beliefs?

- A) Their theoretical knowledge
- B) Their instructional frameworks
- C) Their assumptions and values**
- D) Their compliance with standards

What is emphasized as the final stage of reflection according to the passage?

- A) Contemplation
- B) Evaluation
- C) Action**
- D) Critique

What is the primary aim of incorporating reflective questions in teaching?

- A) To enforce standardized procedures
- B) To facilitate critical examination of beliefs and practices**

- C) To discourage student engagement
- D) To prioritize memorization over understanding

What does Brookfield (1995) suggest is necessary for teachers to have towards their practice?

- A) A sense of superiority**
- B) A critically reflective stance
- C) A hierarchical leadership style
- D) A disregard for student needs

Lecture # 42

What are the three essential practices for becoming a reflective practitioner according to the passage?

- A) Following standardized procedures, enforcing control, and avoiding questioning
- B) Solving problems, memorizing facts, and maintaining routine
- C) Making time for solitary reflection, becoming a perpetual problem-solver, and questioning the status quo**
- D) Dismissing students' perspectives, adhering to institutional norms, and avoiding self-reflection

Why is making time for solitary reflection emphasized in developing as a reflective practitioner?

- A) To enforce control over students' behavior
- B) To avoid confronting dilemmas and uncertainties
- C) To foster critical inquiry into the impact of teachers' actions**
- D) To encourage adherence to standardized procedures

What is suggested as a vehicle for ensuring time is set aside for daily reflection?

- A) Hosting group discussions
- B) Maintaining strict adherence to schedules
- C) Keeping a reflective journal**
- D) Ignoring personal biases and prejudices

According to the passage, what is a primary benefit of keeping a reflective journal for teachers?

- A) Reinforcing cultural biases
- B) Providing a space for daily frustrations
- C) Avoiding systematic inquiry into teaching decisions
- D) Recognizing and examining personal biases**

What does becoming a perpetual problem-solver entail for teachers?

- A) Maintaining preset standards of operation
- B) Avoiding systematic inquiry into teaching decisions
- C) Confronting issues of power and control in the classroom**
- D) Ignoring students' perspectives and concerns

According to the passage, what is a characteristic of critically reflective teachers?

- A) Viewing life in the classroom as beyond their control

B) Infusing their practice with a sense of vision and purpose

C) Avoiding systematic inquiry into teaching decisions

D) Disregarding the impact of their actions on students

How does questioning the status quo impact teachers' practice?

A) It reinforces institutional norms and policies

B) It encourages adherence to conventional wisdom

C) It prompts a critical examination of assumptions and practices

D) It minimizes teachers' involvement in decision-making

What is suggested as a way to minimize risks when questioning the status quo?

A) Avoiding any form of confrontation

B) Engaging others in non-threatening ways

C) Dismissing commonly-accepted assumptions

D) Refusing to challenge institutional norms

What does self-reflection involve for teachers according to the passage?

A) Assigning blame for classroom conflicts

B) Becoming aware of personal biases and prejudices

C) Ignoring students' perspectives and concerns

D) Enforcing strict adherence to institutional norms

Why is self-reflection considered essential for effectively managing diverse classrooms?

A) To reinforce teachers' cultural biases

B) To ignore the interdependence between teacher and student responses

C) To challenge teachers' familiar behavior patterns

D) To maintain a hierarchical power structure in the classroom

What is the purpose of the term "repositioning" as mentioned in the passage?

A) To reinforce teachers' existing perspectives

B) To avoid questioning institutional norms

C) To maintain a limited perspective in the classroom

D) To change how teachers interpret classroom situations

According to the passage, what does repositioning allow teachers to do?

A) Assign blame for negative events

B) Reinforce their cultural biases

C) Discover the positive potential in a situation

D) Ignore students' perspectives and concerns

How does self-reflection contribute to teachers' understanding of classroom situations?

A) By reinforcing past behavior patterns

B) By promoting adherence to standardized procedures

C) By challenging teachers' interpretation of events

D) By minimizing teachers' involvement in decision-making

Why is making time for solitary reflection considered important for teachers?

A) To avoid confronting uncertainties and dilemmas

- B) To enforce control over students' behavior
- C) To foster critical inquiry into teaching decisions**
- D) To discourage systematic inquiry into teaching practices

According to the passage, what is one purpose of keeping a reflective journal?

- A) To reinforce cultural biases
- B) To promote adherence to standardized procedures
- C) To recognize and examine personal biases**
- D) To ignore students' perspectives and concerns

What does becoming a perpetual problem-solver entail for teachers?

- A) Avoiding confrontation and challenges in the classroom
- B) Confronting issues of power and control in the classroom**
- C) Enforcing preset standards of operation without questioning
- D) Ignoring students' perspectives and concerns

Why is questioning the status quo considered important for teachers?

- A) To reinforce institutional norms and policies
- B) To avoid challenging conventional wisdom
- C) To prompt a critical examination of assumptions and practices**
- D) To minimize teachers' involvement in decision-making

According to the passage, what is one way to minimize risks when questioning the status quo?

- A) Engaging in confrontational approaches
- B) Avoiding any form of engagement with colleagues
- C) Dismissing commonly-accepted assumptions without discussion
- D) Engaging others in non-threatening ways**

What is one characteristic of critically reflective teachers according to the passage?

- A) Viewing life in the classroom as beyond their control
- B) Infusing their practice with a sense of vision and purpose**
- C) Avoiding systematic inquiry into teaching decisions
- D) Disregarding the impact of their actions on students

How does self-reflection contribute to effectively managing diverse classrooms?

- A) By reinforcing teachers' cultural biases
- B) By maintaining a hierarchical power structure
- C) By challenging teachers' familiar behavior patterns**
- D) By ignoring the interdependence between teacher and student responses
