

CS206 Network Design and Analysis

Quiz 1

1. Which file will be opened in first step to find the top talkers in Wire Shark?
 - a) tr-youtubebad.pcapng
 - b) tr-general.pcapng
 - c) tr-smbjoindomain.pcapng
 - d) tr-winsize.pcapng
2. Which file will be opened to build a basic IO graph in Wire Shark?
 - a) tr-general.pcapng
 - b) tr-youtubebad.pcapng
 - c) tr-smbjoindomain.pcapng
 - d) tr-winsize.pcapng
3. Which file will be opened to identify name Resolution Problems in Wire Shark?
 - a) tr-youtubebad.pcapng
 - b) tr-winsize.pcapng
 - c) tr-nameresolution.pcapng
 - d) tr-general.pcapng
4. _____ file is used to obtain the round-trip time (RTT) using Display Filter in Wire Shark.
 - a) tr-cnn.pcapng
 - b) tr-winsize.pcapng
 - c) tr-chappellu.pcapng
 - d) None of the given
5. Which one is first step to change the Dissector Behavior in Wire Shark?
 - a) Open tr-smbjoindomain.pcapng
 - b) Open tr-general.pcapng
 - c) Open tr-winsize.pcapng
 - d) Open tr-youtubebad.pcapng
6. Which file will be used to detect delays in UDP Conversations in Wire Shark?
 - a) tr-general.pcapng
 - b) tr-voip-extensions.pcapng
 - c) tr-winsize.pcapng
 - d) None of given
7. DNS (domain name system) is a request/response protocol which employs _____?
 - a) UDP
 - b) SMTP
 - c) FTP
 - d) TCP
8. To apply a MAC address filter in Wire Shark we will enter _____.
 - a) Host ether xx xx xx xx xx xx

- b) xx xx xx xx xx xx Host ether
 - c) ether host xx xx xx xx xx xx
 - d) xx xx xx xx xx xx ether host
9. If IPv4 _____ validation is disabled, there are no Expert Infos Errors in this trace file.
- a) CRC
 - b) Checksum
 - c) Parity bit
 - d) None of given
10. Which one is the first step to Create Filter Expression Buttons in Wire Shark?
- a) Open tr-general.pcapng
 - b) Open tr-winsize.pcapng
 - c) Open tr-twohosts.pcapng
 - d) Open tr-smbjoindomain.pcapng

Ethernet: Disable *Validate the Ethernet checksum* if possible

IPv4: Disable *Validate the IPv4 checksum* if possible

UDP: Disable *Validate the UDP checksum* if possible

TCP: Disable *Validate the TCP checksum* if possible

TCP: Disable *Allow subdissector to reassemble TCP streams*

TCP: Enable *Calculate conversation timestamps*

Quiz 2

1. Wire Shark allows a user to define up to _____ differently colored.
 - a) 5
 - b) 4
 - c) 3
 - d) 7
2. Microsoft mainly employs a file sharing protocol called _____ on its Windows-based networks.
 - a) File Transfer Protocol
 - b) Network File Service (NFS)
 - c) Server Message Block (SMB)
 - d) Apple File Protocol (AFP)
3. How Wireshark's detect a Packet loss _____?
 - a) TCP delay count process
 - b) TCP sequencing process
 - c) TCP re-transmission process
 - d) TCP recovery process
4. To hide any column from view using wireshark we do _____ click on column.
 - a) Single
 - b) Double

- c) Right
d) Left
5. Packet Loss Recovery Method maintains _____ for recovery of lost packet.
a) Sequence number Not Confirm
b) Timer
c) Acknowledgements
d) Window size
6. _____ are a sign that packet loss has occurred.
a) Fast re-transmissions
b) Acknowledgements
c) Delays
d) Congestions
7. Which of the following Internet based application(s) can tolerate data loss?
a) File transfer
b) Live audio calling
c) Stored video streaming
d) Instant messaging
e) Interactive gaming
i. a and b only
ii. b, c and e
iii. a, d and e
iv. c, d and e
8. Which of the following Internet based application(s) cannot tolerate data loss?
a) Email
b) Real time audio streaming
c) Interactive gaming
d) Web documents
e) Instant messaging
i. a and b only
ii. a, c and d
iii. a, d and e
iv. all of the given
9. Wire Shark creates a value called nextseq, which is determined by _____
a) The Sequence Number field value of each packet
b) The number of data bytes in the packet
c) Adding the Sequence Number field value of each packet to the number of data bytes in it
d) Adding the Sequence Number field value of previous packet to the number of data bytes in current packet not confirm
10. The SMB Header section contains smb.time field which exists _____
a) Only in SMB Request packets
b) Only in SMB Response packets
c) In both SMB Request/Response packets
d) Neither in SMB Request/Response packets

Quiz 2

1. To hide any column from view using wireshark we do _____ click on column.
 - a) Single
 - b) Double
 - c) Right
 - d) Left
2. How Wireshark's detect a Packet loss _____?
 - a) TCP delay count process
 - b) TCP sequencing process
 - c) TCP re-transmission process
 - d) TCP recovery process
3. _____ are a sign that packet loss has occurred.
 - a) Fast re-transmissions
 - b) Acknowledgements
 - c) Delays
 - d) Congestions
4. In wireshark "Expert Infos" button shows warnings in _____ color.
 - a) Red
 - b) Blue
 - c) Yellow
 - d) Green
5. Microsoft mainly employs a file sharing protocol called _____ on its Windows-based networks.
 - a) File Transfer Protocol
 - b) Network File Service (NFS)
 - c) Server Message Block (SMB)
 - d) Apple File Protocol (AFP)
6. Expert Infos in wireshark are only a hint and help both for novice and expert users to find probable _____.
 - a) Network information
 - b) Network traffic
 - c) Network congestion
 - d) Network problem
7. Fast re-transmissions are triggered when _____ identical acknowledgements arrive at a receiving host.
 - a) 1
 - b) 2
 - c) 3
 - d) 4
8. Wire Shark creates a value called nextseq, which is determined by _____.
 - a) The Sequence Number field value of each packet
 - b) The number of data bytes in the packet
 - c) Adding the Sequence Number field value of each packet to the number of data bytes in it

- d) Adding the Sequence Number field value of previous packet to the number of data bytes in current packet **not confirm**
9. The SMB Header section contains smb.time field which exists _____
- a) Only in SMB Request packets
 - b) Only in SMB Response packets**
 - c) In both SMB Request/Response packets
 - d) Neither in SMB Request/Response packets
10. Which of the following Internet based application(s) can tolerate data loss?
- a) File transfer
 - b) Live audio calling
 - c) Stored video streaming
 - d) Instant messaging
 - e) Interactive gaming
- i. a and b only
 - ii. b, c and e**
 - iii. a, d and e
 - iv. c, d and e

Quiz 2

1. Fast re-transmissions are triggered when _____ identical acknowledgements arrive at a receiving host.
- a) 1
 - b) 2
 - c) 3**
 - d) 4
2. Wire shark allow a user to define up to _____ differently colored.
- a) 5**
 - b) 4
 - c) 3
 - d) 7
3. Which of the following Internet based application(s) can tolerate data loss?
- a) File transfer
 - b) Live audio calling
 - c) Stored video streaming
 - d) Instant messaging
 - e) Interactive gaming
- i. a and b only
 - ii. b, c and e**
 - iii. a, d and e
 - iv. c, d and e
4. Wire Shark creates a value called nextseq, which is determined by _____
- a) The Sequence Number field value of each packet

- b) The number of data bytes in the packet
 - c) Adding the Sequence Number field value of each packet to the number of data bytes in it
 - d) Adding the Sequence Number field value of previous packet to the number of data bytes in current packet not confirm
5. Packet Loss Recovery Method maintains _____ for recovery of lost packet.
- a) Sequence number Not Confirm
 - b) Timer
 - c) Acknowledgements
 - d) Window size
6. To hide any column from view using wireshark we do _____ click on column.
- a) Single
 - b) Double
 - c) Right
 - d) Left
7. Wire shark allow a user to define up to _____ differently colored.
- e) 5
 - f) 4
 - g) 3
 - h) 7
8. Expert Infos in wireshark are only a hint and help both for novice and expert users to find probable _____.
- a) Network information
 - b) Network traffic
 - c) Network congestion
 - d) Network problem
9. To hide any column from view using wireshark we do _____ click on column.
- e) Single
 - f) Double
 - g) Right
 - h) Left
10. How Wireshark's detect a Packet loss _____?
- a) TCP delay count process
 - b) TCP sequencing process
 - c) TCP re-transmission process
 - d) TCP recovery process
11. Expert Infos button in wireshark define network problem in _____ categories.
- a) 2
 - b) 4
 - c) 6 not confirm
 - d) 7
12. Packet Loss Recovery Method maintains _____ for recovery of lost packet.
- a) Sequence number Not Confirm
 - b) Timer

- c) Acknowledgements
 - d) Window size
13. Which of the following Internet based application(s) cannot tolerate data loss?
- f) Email
 - g) Real time audio streaming
 - h) Interactive gaming
 - i) Web documents
 - j) Instant messaging
 - v. a and b only
 - vi. a, c and d
 - vii. a, d and e
 - viii. all of the given
14. In wireshark "Expert Infos" button shows warnings in _____ color.
- a) Red
 - b) Blue
 - c) Yellow
 - d) Green
15. Expert Infos button in wireshark define network problem in _____ categories.
- a) 2
 - b) 4
 - c) 6
 - d) 7
