Question No : 1 of 26

Consider the following code segment. What will be the output of following code?

```
int addValue (int *a){
int b = (*a) + 2;
return b ;
}
```

Answer (Please select your correct option)

- 6,8,6 — correct
- 6,6,8
- 6,8,8
- 6,6,6

Question No : 2 of 26

Here the code is given below. You have to identify the problem in the code.

```
while( (i < 10) && (i > 24))
```

Answer (Please select your correct option)

- the logical operator && cannot be used in a test condition
- the while loop is an exit-condition loop
- the test condition is always true
- the test condition is always false

correct
