

Virtual University Of Pakistan

Semester Fall 2023

LECTURE WISE NOTES: **Short Questions File & MCQ's File** **0312-6968553**

COURSE: ENG101 **MCQ's File**

LECTURE # 01

How many uses of a language dictionary are mentioned in the text?

- a) 7
- b) 8
- c) 9**
- d) 10

What information does a dictionary provide about a word according to the text ?

- a) Only its pronunciation
- b) Spelling, pronunciation, and meaning**
- c) Spelling, origin, and usage
- d) Only its origin

In the context of spelling, what does the text say about words like "catalogue" and "theatre"?

- a) They are misspelled words.
- b) They are not found in the dictionary.
- c) They have only one correct spelling.
- d) They have both BRE and AE/US spellings.**

What does the text recommend reading in a dictionary to improve pronunciation?

- a) Synonyms and antonyms
- b) Usage labels
- c) Pronunciation key/table**
- d) Origin of words

What does the term "part of speech" refer to in a dictionary ?

- a) The page number where the word can be found

- b) The number of syllables in a word
- c) Whether the word is commonly used as a noun, verb, etc.**
- d) The definition of the word

Why does the text suggest looking at multiple meanings of a word in a dictionary?

- a) To confuse the reader
- b) To improve vocabulary
- c) To find the one that best suits the context**
- d) To waste time

What information do usage labels in a dictionary provide ?

- a) The etymology of words
- b) The correct pronunciation of words
- c) The level of usage, such as formal or slang**
- d) Synonyms and antonyms

Which of the following words is most likely labeled as "colloquial" in a dictionary?

- a) Poetic
- b) Slang**
- c) Formal
- d) Plural

What do dictionaries provide for foreign words and phrases?

- a) Detailed explanations
- b) Synonyms in the same language
- c) English meanings and definitions**
- d) Pronunciation guides

In the text, what is described as a valuable section in some dictionaries that includes names of important persons, places, countries, and more?

- a) Pronunciation guide
- b) Usage labels
- c) General information**
- d) Synonyms and antonyms

What is the primary purpose of the first part of the lesson?

- a) Learning pronunciation
- b) Reading a story
- c) Exploring the origin of words
- d) Understanding the importance of the dictionary**

In the story "Raven and the Coming of Daylight," what does Gull keep locked in a cedar box?

- a) A thorn
- b) Daylight**
- c) A feather
- d) A pearl

Why does Gull initially refuse to release Daylight from the cedar box?

- a) He is too vain**
- b) He is afraid of Raven
- c) He doesn't know how to open the box
- d) He wants to keep it as a secret

How does Raven try to make Gull release the Daylight?

- a) By singing a song
- b) By threatening him
- c) By pushing a thorn into Gull's foot**
- d) By offering him a reward

What does Raven do after Gull releases a crack of light from the cedar box?

- a) He thanks Gull and leaves.
- b) He helps Gull remove the thorn.
- c) He pushes the thorn deeper into Gull's foot.**
- d) He flies away with the cedar box.

How is the release of Daylight described in the story?

- a) Like a molten fish slipping out of a box**
- b) Like a thunderstorm with lightning
- c) Like a sudden explosion of light
- d) Like a gentle sunrise

What lesson can be learned from the story "Raven and the Coming of Daylight"?

- a) The importance of keeping secrets
- b) The power of kindness
- c) The value of light and warmth**
- d) The danger of thorns

In the fable about the Country Mouse and the Town Mouse, what argument does the Town Mouse use to convince the Country Mouse to visit the town?

- a) The beauty of nature
- b) The dangers of the city
- c) The benefits of city life**
- d) The importance of simplicity

How does the Country Mouse react to the town life after the fear of the barking dogs?

- a) He enjoys it and wants to stay.
- b) He regrets his decision and wants to return to his hole.**
- c) He suggests they visit more houses.
- d) He suggests they go shopping in the city.

LECTURE # 02

What is the main concern for English language students when it comes to pronunciation?

- a) Vocabulary
- b) Grammar
- c) Spelling**
- d) Listening

In the first part of the lesson, what are students introduced to for indicating speech sounds?

- a) Special words
- b) Phonemic symbols**
- c) Punctuation marks
- d) Vowel sounds

How are phonemic symbols typically represented in a dictionary?

- a) In square brackets
- b) In slash brackets**
- c) In parentheses
- d) In quotation marks

What is the purpose of the second part of the lesson?

- a) Introducing new words
- b) Providing grammar exercises
- c) Presenting phonemic symbols
- d) Offering pronunciation exercises**

How are long vowels typically indicated using phonemic symbols?

- a) With a line over them
- b) With two small dots in front of them**
- c) With a special character at the end
- d) With an underline

Vowels and Consonants (Questions 6-10)

6. How many diphthong vowels are there in English?

- a) 5
- b) 7
- c) 8**
- d) 20

What is the term for sounds produced by the complete or partial stoppage of breath?

- a) Vowel sounds
- b) Diphthongs
- c) Consonant sounds**
- d) Phonemic symbols

What are the total number of vowel phonemes in English, including short vowels, long vowels, and diphthongs?

- a) 7
- b) 12
- c) 20**
- d) 24

What does a dictionary use to indicate the stress in a word?

- a) A special character at the beginning
- b) An asterisk
- c) A tiny mark on the top of the word**
- d) Capital letters

Which part of the word does stress refer to?

- a) The middle part
- b) The last part
- c) The first part**
- d) The entire word

Different Word Meanings (Questions 11-15)

11. In the example "rebel (n)," what does "n" indicate?

- a) Noun**
- b) Adjective
- c) Verb
- d) Adverb

What is the part of speech for "rebel (v)" in the given example?

- a) Noun
- b) Adjective
- c) Verb**
- d) Adverb

What is the meaning of "present" in the context of "The `present was lovely"?

- a) A gift
- b) A verb
- c) An adjective**
- d) An adverb

What part of speech is "present" in "Please pre`sented your work"?

- a) Noun
- b) Adjective
- c) Verb**
- d) Adverb

In the phrase "Mother table after," where is the stress placed?

- a) On "Mother"**
- b) On "table"
- c) On "after"
- d) On "Mother" and "table"

Computers in Our Daily Lives (Questions 16-20)

16. What is the main topic of the passage?

- a) Computers in daily life**
- b) The history of computers
- c) Computer programming
- d) The future of technology

What is used to identify items in a store and can be read by a scanner?

- a) Bar code**
- b) QR code
- c) Price tag
- d) Serial number

How are entries made in banks today, as mentioned in the passage?

- a) Manually in registers
- b) By computer**
- c) By phone
- d) By fax

What technology is used to scan the price of items in a store?

- a) Laser and bar code technology**
- b) RFID technology
- c) Magnetic stripes
- d) Barcode technology

In the context of the passage, what does "entries" refer to?

- a) Tickets
- b) Journal entries**
- c) Personal errands
- d) Bank transactions

Listening Exercise (Questions 21-26)

21. Which word was NOT mentioned in the list to be ticked in the listening exercise?

- a) Integral
- b) Machines
- c) Bureau**
- d) Flight

What should you do while listening to the passage?

- a) Write down the entire passage
- b) Tick only the words that you hear being read**
- c) Ignore the words on the screen
- d) Memorize the words on the screen

Which word in the list is NOT mentioned during the listening exercise?

- a) Games
- b) Libraries**
- c) Character
- d) Scanner

How many words should you tick while listening to the passage?

- a) All the words on the screen
- b) At least three words
- c) Only one word
- d) Only the words that you hear being read**

In the context of the listening exercise, what is the purpose of ticking words?

- a) To identify synonyms
- b) To practice handwriting
- c) To practice listening and identifying spoken words**
- d) To complete a crossword puzzle

What technology is used for scanning barcodes?

- a) Magnetic technology
- b) Barcode technology
- c) Scanner technology**
- d) RFID technology

Stress in Words (Questions 27-32)

27. What should you use a dictionary for in relation to the following words?

- a) To define their meanings
- b) To find their pronunciations**
- c) To count their syllables
- d) To find their origins

In the word "advertisement," where does the stress typically fall?

- a) On the first syllable**
- b) On the last syllable
- c) On the middle syllable
- d) On every syllable

What is the part of speech for "thick" in the list of words to find stress?

- a) Noun
- b) Adjective**
- c) Verb
- d) Adverb

What is the stress pattern for "transactions"?

- a) First syllable
- b) Second syllable**
- c) Third syllable
- d) No stress

In the word "manually," where does the stress typically fall?

- a) On the first syllable**
- b) On the last syllable
- c) On the middle syllable
- d) On every syllable

What is the part of speech for "technology" in the list of words to find stress?

- a) Noun**
- b) Adjective
- c) Verb
- d) Adverb

Vocabulary Exercise (Questions 33-36)

33. What is the main topic of the passage?

- a) The role of computers in education
- b) The history of technology
- c) The impact of technology on daily life**
- d) The importance of programming

What does a bar code consist of?

- a) A series of numbers

b) A pattern of lines and spaces

- c) A barcode scanner
- d) A QR code

What does the scanner do with the information it reads from a bar code?

- a) It translates it into a foreign language

b) It adds up the prices of items

- c) It prints a receipt
- d) It sends the data to the manufacturer

Which of the following is NOT mentioned as a place where computers are used in the passage?

- a) Grocery store
- b) Bank

c) Post office

- d) Travel agency

Pronunciation and Stress (Questions 37-40)

37. What causes confusion for English language students in terms of pronunciation?

- a) Grammar rules

b) Spelling of English words

- c) Punctuation marks
- d) Vocabulary

What is the purpose of the phonemic symbols used in the first part of the lesson?

- a) To indicate stress in words
- b) To provide grammar exercises

c) To indicate speech sounds

- d) To offer vocabulary exercises

How are long vowels typically represented with phonemic symbols?

- a) With an underline
- b) With a line over them
- c) With a special character at the end

d) With two small dots in front of them

How is stress typically indicated in a dictionary?

- a) With capital letters
- b) With bold text
- c) With an asterisk

d) With a tiny mark on the top of the word

LECTURE # 03

What is the most important skill needed for success in studies?

- A. Writing
- B. Speaking
- C. Reading**
- D. Listening

What happens if you read inaccurately?

- A. You miss information or ideas**
- B. You become a better reader
- C. Your writing skills improve
- D. You save time

What can happen if you read slowly?

- A. You become more accurate
- B. You improve your writing skills
- C. You save time
- D. Your other work will suffer**

What is the key to improving your reading skills?

- A. Taking breaks
- B. Speed reading
- C. Purposeful practice**
- D. Memorizing texts

How do you learn to read?

- A. By listening to others
- B. By studying grammar
- C. By reading**
- D. By speaking

What are the three parts of this lesson?

- A. Introduction, main idea, and conclusion
- B. Beginning, middle, and end
- C. Identify topic, pick main idea, recognize details**
- D. Easy, medium, and hard

Text 1: New species of plants:

7. What is the main topic of Text 1?

- A. the role of taxonomists
- B. new plant species**
- C. plant science

D. importance of classifying new plant species

Text 2: Groups in sociology:

8. What does the term "group" refer to in sociology?

- A. physical proximity
- B. face-to-face communication
- C. persons in communication**
- D. spatial contact

Text 3: Plant physiology:

9. What is the topic of Text 3?

- A. Photosynthesis
- B. Plant growth
- C. Plant physiology**
- D. Plant reproduction

Text 4: Development of speech in infants:

10. What speech sounds can an infant make by the age of six months?

- A. 12 consonant sounds
- B. 12 vowel sounds
- C. 12 recognizable syllables**
- D. 12 words

What happens during the first year of speech development in infants?

- A. More consonant sounds are produced
- B. Vowel sounds decrease**
- C. Words are formed
- D. The infant is mute

How do parents typically react to the first recognizable word a child produces?

- A. They ignore it
- B. They frown
- C. They smile or speak to the child**
- D. They scold the child

Text 5: Causes of famine:

13. What is one of the causes of famine mentioned in Text 5?

- A. Advances in medicine
- B. Increased agricultural technology
- C. Denser populations due to urban growth**
- D. Decreased population

What is the main subject of Text 5?

- A. Advances in medicine

B. Causes of famine

- C. Population control
- D. Agricultural technology

Text 6: Dealing with anxiety:

15. What is a common physical symptom of anxiety mentioned in Text 6?

- A. Temporary blindness

B. Increased heart activity

- C. Extreme physical responses
- D. A feeling of powerlessness

How does anxiety differ from fear, according to the text?

A. Anxiety is a response to real danger

- B. Fear results in physical symptoms
- C. Fear is a feeling of powerlessness
- D. Anxiety is a response to communication

What is the main topic of Text 6?

A. Coping with anxiety

- B. Overcoming fear
- C. Physical responses to anxiety
- D. Neurotic behavior

LECTURE # 04

What is the primary focus of this lesson?

- A. Identifying the topic of each paragraph
- B. Identifying supporting ideas

C. Identifying the main idea

How many paragraphs does the given text consist of?

- A. Four
- B. Five

C. Six

What is the main idea of paragraph 1?

- A. How computers process data
- B. The components of a computer

C. The basic idea of a computer

What is the supporting idea in paragraph 1?

A. The machine's intricate network of circuits

- B. The definition of a computer
- C. The primary focus of computers

What does paragraph 2 primarily discuss?

- A. Computer memory
- B. Processing of information**
- C. Computer communication

What is kept inside the computer in paragraph 2?

- A. Input devices
- B. Programs and data**
- C. Memory cards

What are the three basic capabilities of most computers, as discussed in paragraph 3?

- A. Arithmetic operations, decision-making, and communication**
- B. Communication, originality, and problem-solving
- C. Memory storage, mathematical operations, and display

According to paragraph 4, what are some common methods of inputting information into a computer?

- A. Punched cards, magnetic tape, and disks**
- B. Communication devices, screens, and printers
- C. Memory cards, data tapes, and terminals

What are the two common devices used for outputting information, as mentioned in paragraph 4?

- A. Screens and keyboards
- B. Printers and CRT display screens**
- C. Data tapes and terminals

What types of decisions can computer circuits make, as stated in paragraph 5?

- A. Complex social decisions
- B. Arithmetic and logical decisions**
- C. Philosophical decisions

According to paragraph 6, what is one of the advantages of using a computer for certain tasks?

- A. Originality
- B. Quick decision-making
- C. Vast numbers of logical operations**

What is the main idea of the entire passage?

- A. Computers have changed the way jobs are done.
- B. Instructions and data must be given to the computer.
- C. Computers are machines capable of processing and outputting.**
- D. Without computers, many tasks would take longer to do.

Why is choice 3 selected as the main idea of the passage?

- A. It provides the most details.
- B. It discusses the impact of computers on jobs.
- C. It summarizes the distinctive characteristics of computers.**
- D. It focuses on the importance of instructions and data.

True or False: A computer can store or handle any data even if it hasn't received information to do so.

Answer: **False**

True or False: All computers can perform arithmetic operations, make comparisons, and output information.

Answer: **True**

True or False: The information necessary for solving problems is found in the memory of the computer.

Answer: **True**

True or False: Not all computers can perform arithmetic operations, make decisions, and communicate with the user in some way.

Answer: **False**

True or False: Computers can still be useful machines even if they can't communicate with the user.

Answer: **False**

True or False: There are many different devices used for feeding information into a computer.

Answer: **True**

True or False: Computers can make any type of decision they are asked to.

Answer: **False**

Every computer has circuits for performing arithmetic operations, operating _____ or magnetized _____.

- A. switches, core**
- B. circuits, device
- C. terminal, data

A _____ with a screen is normally referred to as a _____ unit.

- A. memory, device
- B. CRT display, switch

C. terminal, display

A computer is a _____ that processes information in the form of _____ and _____ and can store this information in a _____.

- A. device, core, switches, terminal
- B. circuit, data, instructions, medium

C. memory, instructions, data, device

Card readers, tape drives, or disk drives are different _____ for inputting information.

- A. CRT display
- B. memory

C. device

LECTURE # 05

What are references in a text?

- A. Pronouns used to confuse the reader

B. Words or phrases linking ideas within a sentence

- C. Transitions between paragraphs

What can references be in a text?

- A. Only relative pronouns

B. Pronouns, adverbs, or demonstrative pronouns

- C. Only conjunctions

Why are references important in a text?

- A. To confuse the reader
- B. To make the text harder to understand

C. To connect and clarify ideas in the text

What is the purpose of connectives in a text?

- A. To create confusion
- B. To slow down reading speed

C. To link ideas and create a smoother reading experience

Which of the following is an example of a reference word in a sentence?

- A. "and"

B. "it"

- C. "therefore"

In the sentence, "Mr. Salman bought a new car. His children haven't seen it yet," what does "it" refer to?

- A. The children
- B. Mr. Salman
- C. The new car**

Which of the following is an example of a connective word indicating a contrast?

- A. "thus"
- B. "but"**
- C. "therefore"

In the sentence, "Ben Johnson, for example, never doubted the authenticity of the plays," what is the connective indicating?

- A. Result
- B. Comparison
- C. Example**

In the sentence, "The former refers to the actual machinery, whereas the latter refers to the programs," what do "former" and "latter" refer to?

- A. Hardware and software**
- B. Machinery and programs
- C. Electronic machines and data processing

Which word signals a result in the connective word list provided?

- A. "but"
- B. "because"**
- C. "however"

In the sentence, "Floppies are very cheap, so they are slow and have a limited capacity," what does "so" indicate?

- A. Cause and effect**
- B. Contrast
- C. Addition

Which of the following is NOT mentioned as a type of storage medium in the provided paragraphs?

- A. CD-ROM disks
- B. Hard disks
- C. Floppies
- D. Magnetic tape**

In the sentence, "They accept data and instructions as input, and after processing it they output the results," what do "it" and "they" refer to?

A. Data and instructions

B. Machines and results

C. Electronic machines

What is the purpose of references and connectives in a text?

A. To confuse the reader

B. To create a smoother reading experience and connect ideas

C. To emphasize key points

Which type of computer is mentioned as having a large capacity in the provided paragraphs?

A. Minicomputer

B. Microcomputer

C. Mainframe

In the sentence, "Magneto-optical disks are like CD-ROMs, you can write data on to them," what does "them" refer to?

A. Magneto-optical disks

B. CD-ROMs

C. Computers

Which of the following is an example of a connective indicating addition?

A. "however"

B. "because"

C. "and...too"

What is the primary purpose of the paragraph about storage media?

A. To compare different types of storage media

B. To explain how computers store data

C. To describe the benefits of magnetic tape

Which of the following is NOT an example of a reference in the provided paragraphs?

A. "it"

B. "they"

C. "because"

What is the main focus of this text?

- A. The future of computers
- B. The history and development of computers**
- C. The different types of computer chips

What is the primary purpose of the Glossary mentioned in the text?

- A. To explain the author's intentions
- B. To provide translations of computer terms
- C. To define and explain unfamiliar words in the text**

In the history of computing, what was the first calculating device used by humans?

- A. The abacus**
- B. The computer chip
- C. Logarithm tables

How did people perform calculations using the abacus?

- A. By moving beads from left to right**
- B. By pressing buttons on a keyboard
- C. By using advanced algorithms

Who devised a mechanical way of multiplying and dividing, which is how the modern slide rule works?

- A. Sir Isaac Newton
- B. Henry Briggs**
- C. J. Napier

Which mathematicians independently invented calculus?

- A. Sir Isaac Newton and J. Napier**
- B. Henry Briggs and Leibnitz
- C. Charles Babbage and J. Mauchly

What was the first real calculating machine based on in 1820?

- A. Vacuum tubes
- B. Toothed gear wheels**
- C. Integrated circuits

Who designed "The Analytical Engine" in 1830, an early computer-like device?

- A. Charles Babbage**
- B. Henry Briggs
- C. Sir Isaac Newton

What was the first analog computer used for?

A. To help aim guns in World War II

B. To calculate logarithms

C. To develop calculus

What was the name of the first digital computer, completed in 1944?

A. ENIAC

B. Univac I

C. Mark I

In 1946, what replaced vacuum tubes in the construction of digital computers?

A. Transistors

B. Toothed gear wheels

C. Abacus beads

Who developed the idea of keeping instructions inside the computer's memory?

A. Charles Babbage

B. J. Ecker and J. Mauchly

C. John von Neumann

What characterized the first generation of computers developed in 1950?

A. Use of vacuum tubes

B. Smaller size and greater dependability

C. Use of transistors

How much faster were the second-generation computers in the 1960s compared to their predecessors?

A. Five times faster

B. Ten times faster

C. A hundred times faster

How did the third-generation computers differ from the second generation?

A. They used vacuum tubes.

B. They were smaller and more dependable.

C. They used tiny integrated circuits.

What was the key advancement in fourth-generation computers?

A. Microminiaturization

B. The use of vacuum tubes

C. Large circuitry

What is a "chip" in the context of computers?

A. A snack for computer engineers

B. A small piece of silicon with integrated circuits

C. A type of computer program

How much faster are fourth-generation computers compared to third-generation computers?

A. 10 times faster

B. 50 times faster

C. 1000 times faster

What prediction is made about the future of computer technology in the text?

A. It will slow down significantly.

B. It will remain largely the same.

C. It will continue to develop rapidly.

According to the text, if transport technology had developed at the same rate as computer technology, what would be the result?

A. A trip across the Atlantic Ocean would take a few seconds.

B. Computers would be obsolete by 1990.

C. Computers would not have been invented.

In the provided paragraphs, which is the first device mentioned as a calculating tool?

A. The abacus

B. Charles Babbage's Analytical Engine

C. The ENIAC computer

Who is credited with designing "The Analytical Engine" in 1830?

A. J. Ecker

B. Sir Isaac Newton

C. Charles Babbage

Which generation of computers came out in 1950 and used vacuum tubes?

A. First generation

B. Second generation

C. Third generation

What is the main reason behind the increased speed and dependability of second-generation computers?

A. The use of transistors

B. The reduction in size

C. The switch to integrated circuits

What major advancement characterizes fourth-generation computers?

- A. The use of vacuum tubes
- B. Large circuitry

C. Microminiaturization

How many instructions per second can fourth-generation computers complete?

- A. Approximately 10,000 instructions per second
- B. Approximately 100,000 instructions per second

C. Approximately 1,000,000 instructions per second

What is the likely outcome for today's computers according to the text?

- A. They will remain unchanged for a long time.
- B. They will soon become obsolete.

C. They will continue to evolve and change rapidly.

What is the hypothetical scenario presented in the text regarding transport technology?

A. A trip across the Atlantic Ocean would take a few seconds if transport technology had developed as rapidly as computer technology.

- B. A trip across the Atlantic Ocean is already very fast due to computer technology.
- C. Transport technology has developed at a slower rate than computer technology.

In the provided paragraphs, what type of item does the word "chip" refer to?

- A. A tasty snack

B. A small piece of silicon with integrated circuits

- C. A computer program

Who developed the idea of keeping instructions inside the computer's memory?

- A. Charles Babbage
- B. J. Ecker and J. Mauchly

C. John von Neumann

What did the first analog computer built by Vannevar Bush in 1930 help aim?

A. Guns

- B. Rockets
- C. Artillery

Which generation of computers used transistors instead of vacuum tubes for enhanced speed?

- A. Second generation

B. Third generation

- C. Fourth generation

What change led to the increased speed and dependability of second-generation computers?

- A. The use of vacuum tubes
- B. The switch to integrated circuits
- C. The use of transistors**

According to the text, how much faster are fourth-generation computers compared to third-generation computers?

- A. 10 times faster
- B. 50 times faster**
- C. 1000 times faster

In the hypothetical scenario mentioned in the text, what would happen if transport technology had developed as rapidly as computer technology?

- A. A trip across the Atlantic Ocean would take a few seconds.**
- B. Computers would become obsolete by 1990.
- C. Computers would not have been invented.

Which generation of computers is mentioned as using vacuum tubes in the text?

- A. First generation**
- B. Second generation
- C. Third generation

What are the key characteristics of second-generation computers mentioned in the text?

- A. They were larger and slower.
- B. They used vacuum tubes and were less dependable.
- C. They used transistors and were smaller, faster, and more dependable.**

What major technological advancement characterizes fourth-generation computers?

- A. The switch to vacuum tubes
- B. The reduction in size of integrated circuits
- C. Microminiaturization and fitting circuits onto a single chip**

According to the text, what might happen to today's computers in the future?

- A. They will remain unchanged for a long time.
- B. They will soon become obsolete.
- C. They will continue to evolve and change rapidly.**

In the hypothetical scenario presented in the text, what is suggested about transport technology?

A. Transport technology has developed at a faster rate than computer technology.
B. A trip across the Atlantic Ocean would take a long time due to transport technology.

C. A trip across the Atlantic Ocean would be extremely fast if transport technology had developed as rapidly as computer technology.

LECTURE # 07

What are the three parts that make up an English word according to the text?

A. Prefix, Stem, Suffix

B. Root, Base, Ending

C. Preposition, Noun, Verb

Which part of an English word comes before the stem?

A. Suffix

B. Prefix

C. Base

What does the prefix "pre-" mean as mentioned in the text?

A. "Reduce"

B. "Before"

C. "After"

What is the suffix "-er" used for in words like "programmer"?

A. Denoting a verb

B. Denoting a person who

C. Denoting a place

How does a prefix typically change the meaning of a word?

A. It makes the word longer.

B. It reverses the meaning.

C. It emphasizes the meaning.

In the word "measurable," what does the prefix "im-" indicate?

A. "Not capable of being measured"

B. "Highly capable of being measured"

C. "The opposite of being measured"

What type of words do suffixes like "-able" typically transform verbs into?

- A. Nouns
- B. Adjectives**
- C. Adverbs

What part of speech does the suffix "-able" usually change verbs into?

- A. Nouns
- B. Adjectives**
- C. Adverbs

According to the text, how does the suffix "-ible" affect words?

- A. It makes them longer.
- B. It makes them more complex.
- C. It indicates possibility or capability.**

What does the term "microminiaturization" refer to in the context of word formation?

- A. Making words shorter
- B. Reducing words to a tiny size**
- C. Creating miniature electronic components

What is the purpose of learning prefixes and suffixes, according to the text?

- A. To make English words shorter
- B. To impress others with your vocabulary
- C. To understand the meanings of many English words**

According to the text, what type of words are formed using the method of word formation mentioned?

- A. Words with Latin origins
- B. Words used in scientific contexts**
- C. Words used in everyday conversation

What word stem is used to form words like "act," "action," and "actor" in the text?

- A. Perform**
- B. Operation
- C. React

What is the meaning of the suffix "-ance" as explained in the text?

- A. State**
- B. Person who
- C. Quality of

What part of speech do the suffixes "-er" and "-or" typically denote, as mentioned in the text?

A. Adjectives

B. Nouns referring to a person who

C. Adverbs

According to the text, what does the suffix "-y" change to when a suffix is added to a base word ending in "y"?

A. It remains the same.

B. It changes to "ie."

C. It changes to "i."

What word changes from "harmony" to "harmonious" when the suffix "-ous" is added?

A. Synchrony

B. Melody

C. Harmony

In the text, what type of words are indicated by the suffix "-ize"?

A. Adjectives

B. Nouns referring to a place

C. Verbs

How does the suffix "-ful" affect words, according to the text?

A. It makes them longer.

B. It adds a negative meaning.

C. It characterizes them.

What is the primary purpose of the examples provided in the text for different suffixes?

A. To confuse the reader

B. To demonstrate the author's vocabulary

C. To illustrate the meanings of various suffixes

In the provided paragraphs, what happens to a base word ending in "e" when a suffix is added?

A. The "e" becomes "ie."

B. The "e" is dropped.

C. The "e" is emphasized.

When a base word ends in "y" and a suffix is added, what typically happens to the "y"?

A. It becomes a consonant.

B. It remains unchanged.

C. It changes to "z."

What spelling changes can base words undergo when suffixes are added, as mentioned in the text?

A. They become longer.

B. Their spellings typically change.

C. They lose their meanings.

According to the text, what is the effect of adding the suffix "-ation" to the base word "calculate"?

A. The word becomes longer.

B. The "c" is dropped from the word.

C. The word undergoes spelling changes.

In the text, what does the phrase "up-to-date" describe?

A. A summary

B. An installation

C. A computer job

How are the words "acceptance" and "accepted" related based on the text?

A. They have the same meaning.

B. "Accepted" is the past tense of "acceptance."

C. "Acceptance" is the noun form, and "accepted" is the past participle.

What part of speech does the suffix "-able" usually transform words into?

A. Nouns

B. Adjectives

C. Adverbs

In the text, what is "necessitate" associated with?

A. Spelling changes

B. Making words longer

C. Making words necessary

According to the text, what is the role of a computer operator in front of a screen?

A. To make coffee for everyone

B. To summarize computer jobs

C. To fix any technical issues

What part of speech does the suffix "-y" typically denote in words like "technology"?

A. Nouns

B. Adjectives

C. Adverbs

In the text, what does the suffix "-ed" indicate in words like "calculated"?

A. Future tense

B. Past tense or past participle

C. Present tense

How does the suffix "-ity" typically affect words, according to the text?

A. It makes words longer.

B. It emphasizes their meanings.

C. It denotes a state or quality.

What word stem is used to form words like "calculate" and "calculator" in the text?

A. Math

B. Count

C. Compute

According to the text, what part of speech does the suffix "-ment" usually denote in words like "measurement"?

A. Nouns

B. Adjectives

C. Verbs

How does the suffix "-dom" typically affect words, according to the text?

A. It emphasizes their meanings.

B. It indicates a state or condition.

C. It denotes a domain or condition.

What part of speech does the suffix "-ary" typically denote in words like "binary"?

A. Nouns

B. Adjectives

C. Adverbs

What word stem is used to form words like "dependence" and "dependent" in the text?

A. Depender

B. Dependable

C. Depend

According to the text, what type of words do suffixes like "-less" typically transform words into?

- A. Nouns
- B. Adjectives**
- C. Adverbs

How does the suffix "-ism" affect words in terms of meaning, as explained in the text?

- A. It emphasizes the meaning.
- B. It makes words shorter.
- C. It denotes a condition or state.**

What part of speech does the suffix "-ship" typically denote in words like "relationship"?

- A. Nouns**
- B. Adjectives
- C. Verbs

LECTURE # 08

What is a prefix?

- A. A letter at the end of a word
- B. A letter or group of letters added to the beginning of a word**
- C. A letter within a word

In the word "untrue," what is the prefix?

- A. un-**
- B. true
- C. -true

What does the prefix "il-" typically mean?

- A. "Over"
- B. "Under"
- C. "Not"**

What does the word "illimitability" mean, as explained in the text?

- A. Having limited possibilities
- B. Without limits or restrictions**
- C. A very long word

How does the prefix "im-" affect the meaning of a word?

- A. It adds emphasis.
- B. It reverses the meaning.**
- C. It makes the word longer.

In the word "illegal," what does the prefix "il-" mean?

- A. "Legal"
- B. "Not"**
- C. "Over"

What part of speech does the suffix "-able" typically transform words into?

- A. Nouns
- B. Adjectives**
- C. Adverbs

What is the effect of adding the suffix "-ness" to a word, as mentioned in the text?

- A. It emphasizes the meaning.
- B. It makes the word shorter.
- C. It denotes a state or quality.**

What part of speech do the suffixes "-er" and "-or" typically denote?

- A. Adjectives
- B. Nouns referring to a person who**
- C. Adverbs

What part of speech does the suffix "-ly" usually denote in words like "quickly"?

- A. Nouns
- B. Adjectives
- C. Adverbs**

What does the term "semiconscious" refer to in the context of word formation?

- A. Being fully conscious
- B. Being partly conscious**
- C. Being unconscious

According to the text, how can understanding synonyms help enhance your vocabulary?

- A. By providing more variations of a word's meaning**
- B. By helping you use obscure words effectively
- C. By finding words with completely different meaning

What is the primary characteristic of synonyms mentioned in the text?

- A. They have exactly the same meaning.
- B. They have different meanings.
- C. They have similar meanings in one sense.**

In the example "blame" and "denounce," how do these synonyms differ in meaning, as explained in the text?

- A. Blame is stronger than denounce.
- B. Denounce is more general than blame.
- C. Blame fixes responsibility, while denounce indicates severe public disapproval.**

What type of word should you encircle to find synonyms in the given exercise?

- A. The word with the fewest letters
- B. The word in boldface type in the introductory phrase**
- C. The last word in each sentence

LECTURE # 09

What do the internal manipulative operations represent in a computer system?

- A. Input
- B. Output
- C. Processing**
- D. Storage

In the second paragraph, what is the main idea?

- A. Computers' versatility
- B. The cost of early computers**
- C. The size of modern computers
- D. The development of electronic computers

What does the author mean by "computing power has become portable" in the second paragraph?

- A. Computers can be carried around easily**
- B. Computers are now available for purchase
- C. The power of computers has decreased
- D. Computers are used in different locations

What has changed in the way work is performed due to computers?

- A. Routine and boring tasks have increased
- B. Computers have made work more challenging
- C. Computers have eliminated creative work
- D. Computers have removed routine and boring tasks**

What is the main idea of the paragraph discussing railway computer systems?

- A. The rapidity of computer reservations
- B. The use of computer systems in railways**
- C. The variety of jobs performed by railway computers
- D. The impact of computer systems on personnel

What does "computer ticket reservation system" refer to in the paragraph?

- A. The operation of a computer system
- B. Reservations made by computers
- C. A system used to reserve computer tickets
- D. A system used for making railway ticket reservations**

In the paragraph about railway computer systems, which function is NOT mentioned?

- A. Train schedules
- B. Freight and cargo loading
- C. Meal planning
- D. Ticket reservations**

In the paragraph discussing railway computer systems, what is the primary function of the computer system?

- A. Ticket reservations**
- B. Freight and cargo loading
- C. Personnel availability
- D. Meal planning

What do major details in a paragraph typically provide?

- A. Context for minor details
- B. Information about the main idea**
- C. Minor details' definitions
- D. Examples of minor details

In the second paragraph, what is the main idea?

- A. Computers' role in the newspaper industry
- B. The use of private telephone lines in railways
- C. The rapidity of computer reservations
- D. The value of computers in business**

What are the major details in the second paragraph?

- A. The use of computer systems in business
- B. The importance of telephone lines in railways
- C. The valuable role of computers in the newspaper industry**
- D. The process of ticket reservations through railway terminals

What are minor details in the second paragraph?

- A. The role of computer systems in business**
- B. The history of railway reservations
- C. The storage capacity of railway computers
- D. The computer's role in the newspaper industry

What does "computing power has become portable" mean in the second paragraph?

- A. Computers can be carried around easily**
- B. The power of computers has decreased
- C. Computers are now available for purchase
- D. Computers are used in different locations

In the paragraph discussing railway computer systems, which function is NOT mentioned?

- A. Train schedules
- B. Freight and cargo loading
- C. Meal planning**
- D. Ticket reservations

What is the primary function of the computer system in railways?

- A. Ticket reservations**
- B. Freight and cargo loading
- C. Personnel availability
- D. Meal planning

What does the author mean by "computer ticket reservation system" in the paragraph?

- A. The operation of a computer system
- B. Reservations made by computers
- C. A system used to reserve computer tickets
- D. A system used for making railway ticket reservations**

In the first paragraph, what does "processing" refer to?

- A. The input of data into the computer
- B. Sorting data in the computer**
- C. Electronic circuits within a computer
- D. The final output of the computer

What is a major detail in the first paragraph?

- A. Major details are more important than minor details.
- B. Main ideas serve the need for details.
- C. Minor details often have major details growing out of them.**

D. Breaking up a paragraph into components helps understand and remember it.

LECTURE # 10

What is the primary focus of the text?

- A. The development of hybrid computers
- B. A comparison between digital and analog computers**
- C. The history of computer technology
- D. The efficiency and costs of computer installations

Which type of computer makes up about 90 percent of large computers in use ?

- A. Analog computer
- B. Mainframe computer
- C. General-purpose computer**
- D. Hybrid computer

What is the primary function of digital computers in electronic data processing?

- A. Scientific calculations
- B. Business and statistical purposes**
- C. Simulating measurements
- D. Managing main memories

In the context of computer types, what is a "code consisting of digits"?

- A. A password
- B. A computer program
- C. A measurement unit
- D. A sequence of numbers**

What is the analogy used to describe the analog computer's operation?

- A. Car dashboard
- B. Cash register
- C. Speedometer**
- D. Refrigeration system

What is the key difference between the digital and analog computers?

- A. Digital computers are smaller.
- B. Analog computers perform calculations in steps.**
- C. Digital computers are less expensive.
- D. Analog computers are used for business purposes.

What is the primary focus of the hybrid computer?

- A. Business data processing
- B. Scientific research**
- C. Simulating measurements
- D. Data and program storage

What type of computers are often associated with speed and accuracy?

- A. Digital computers**
- B. Mainframe computers
- C. Analog computers
- D. Hybrid computers

What should be done with the area used for computer installations due to the bulkiness of computer equipment?

- A. Measure it**
- B. Ignore it
- C. Permit it
- D. Associate it

What factor has been a weak link in computer systems from the point of view of efficiency and reliability?

- A. Mechanical devices**
- B. Digital computers
- C. Price
- D. Peripherals

What type of computer has combined the features of digital and analog computers into one system?

- A. General-purpose computer
- B. Mainframe computer
- C. Hybrid computer**
- D. Scientific computer

What are the electronic components typically associated with in powerful computer installations?

- A. Efficiency
- B. Weakness
- C. Power consumption
- D. Bulk**

Which type of computer technology is described as essentially used for problems involving measurements?

- A. Digital computer
- B. Mainframe computer
- C. Analog computer**
- D. Hybrid computer

What do "code consisting of digits" refer to in the text?

- A. Software programs
- B. Passwords
- C. Single-character numbers**
- D. Business documents

What is the key difference in the way analog computers perform calculations compared to digital computers?

- A. Analog computers work continuously.**
- B. Digital computers use code consisting of digits.
- C. Analog computers are more expensive.
- D. Digital computers are used for business purposes.

What is the primary function of the hybrid computer in scientific research?

- A. Business data processing
- B. Simulating measurements**
- C. Data storage
- D. Electronic components

Which type of computers is often associated with speed and accuracy in performing calculations?

- A. Mainframe computers
- B. Analog computers
- C. Digital computers**
- D. Hybrid computers

What needs to be done with the area used for computer installations due to the bulkiness of computer equipment?

- A. Permit it
- B. Ignore it
- C. Measure it**
- D. Associate it

What has been a weak link in computer systems from the perspective of efficiency and reliability?

- A. Electronic components
- B. Weakness
- C. Peripherals
- D. Mechanical devices**

What type of computer has combined features of both digital and analog computers?

- A. Scientific computer
- B. Mainframe computer
- C. Hybrid computer**
- D. General-purpose computer

What are the electronic components primarily associated with in powerful computer installations?

- A. Power consumption
- B. Efficiency
- C. Bulk**
- D. Weakness

What is the analog computer primarily used for?

- A. Business data processing
- B. Electronic data programming
- C. Scientific research
- D. Simulating measurements**

What does the term "code consisting of digits" refer to in the context of computer data?

- A. Passwords
- B. A sequence of numbers**
- C. Software programs
- D. Business documents

In the text, what is the analogy used to describe the operation of analog computers?

- A. Speedometer**
- B. Cash register
- C. Car dashboard
- D. Refrigeration system

Which type of computer is easier to program and cheaper to operate in the text?

- A. Analog computer
- B. Digital computer**
- C. Mainframe computer
- D. Hybrid computer

In the text, what is described as often taking up more space than electronic components in powerful computer installations?

- A. Power consumption
- B. Mechanical devices
- C. Peripherals**
- D. Efficiency

What is associated with speed and accuracy in the context of computer types?

- A. Analog computers
- B. Digital computers**
- C. Mainframe computers
- D. Hybrid computers

What is the primary function of digital computers in electronic data processing for business or statistical purposes?

- A. Business data programming
- B. Scientific research
- C. Simulating measurements
- D. Data storage**

What type of computers make up about 90 percent of large computers now in use?

- A. Analog computers
- B. Digital computers**
- C. Mainframe computers
- D. Hybrid computers

In the context of computer technology, what do "code consisting of digits" represent?

- A. Passwords
- B. Business documents
- C. Single-character numbers**
- D. Software programs

What is the primary operation of digital computers, according to the text?

- A. Continuous work
- B. Simulating measurements
- C. Performing calculations in steps**
- D. Using code consisting of digits

What is the primary purpose of the hybrid computer in the context of scientific research?

- A. Data storage
- B. Business data processing
- C. Simulating measurements**
- D. Electronic components

Which type of computers is most commonly used for business or statistical purposes in electronic data processing?

- A. Analog computers
- B. Digital computers**

- C. Mainframe computers
- D. Hybrid computers

In the text, what is the analogy used to describe the operation of analog computers?

- A. Car dashboard
- B. Speedometer**
- C. Cash register
- D. Refrigeration system

What is the primary distinction between digital and analog computers in terms of their calculations?

- A. Digital computers work continuously.
- B. Digital computers are smaller.
- C. Digital computers use code consisting of digits.
- D. Analog computers perform calculations in steps.**

What is the key difference between digital and analog computers, as mentioned in the text?

- A. Digital computers are smaller.
- B. Digital computers work continuously.**
- C. Digital computers are used for business purposes.
- D. Analog computers are more expensive.

What is the primary role of the hybrid computer in the context of scientific research?

- A. Business data programming
- B. Simulating measurements**
- C. Data and program storage
- D. Managing main memories

Which type of computers are commonly associated with speed and accuracy in their operations?

- A. Analog computers
- B. Hybrid computers
- C. Mainframe computers
- D. Digital computers**

What should be done with the area used for computer installations due to the bulkiness of computer equipment, as mentioned in the text?

- A. Ignore it
- B. Permit it
- C. Measure it**
- D. Associate it

In the context of computer systems, what has been a weak link in terms of efficiency and reliability?

- A. Electronic components
- B. Peripherals
- C. Mechanical devices**
- D. Weakness

LECTURE # 11

What is the primary focus of the text?

- A. Understanding arithmetic operations
- B. Evaluating computer salespeople
- C. Highlighting the role of computers
- D. Advising on buying computer systems**

According to the text, why should a businessman seeking to buy a computer system admit his lack of knowledge about computers?

- A. To impress computer salespeople
- B. To avoid buying a computer system
- C. To receive outside advice**
- D. To discourage consultants

What is the significance of observing systems similar to those under consideration in operation, as mentioned in the text?

- A. To delay the purchase of a computer system
- B. To confirm that a consultant is needed
- C. To understand the financial situation of the supplier
- D. To accommodate differences in operations**

In the context of buying a computer system, why does the text suggest checking the financial situation of the supplier?

- A. To discourage buying a computer system
- B. To emphasize the importance of hardware
- C. To ensure the supplier's financial stability**
- D. To evaluate the effectiveness of consultants

According to the text, what is important before buying a computer system?

- A. Demanding written details**
- B. Understanding computer companies
- C. Investigating hardware and software
- D. Rejecting the use of computers

What is the text's stance on computers?

- A. Computers are inherently problematic.
- B. Computers have no issues when used correctly.
- C. Problems arise from how and why computers are used.**
- D. Computer companies are financially unstable.

What do the words "enumerate" and "listing" imply in the context of the text?

- A. Recommending buying computer systems
- B. Making a catalog of computer features**
- C. Counting the problems with computer salespeople
- D. Providing an inventory of computer capabilities

In the provided table of listing markers, which marker is not associated with an ascending or descending order?

- A. Furthermore**
- B. First and foremost
- C. Last but not least
- D. One, two, three, etc.

What can computers decide, as mentioned in the text?

- A. Complex mathematical operations
- B. The type of communication with the user
- C. Whether one number is less than another**
- D. Which computer system to purchase

Which of the following topics does the text NOT primarily focus on?

- A. Computers and arithmetic operations**
- B. Computers and communication with the user
- C. The financial stability of computer companies
- D. The role of consultants in buying computer systems

According to the text, why should a businessman consider getting advice from other executives who have experience buying computer systems?

- A. To impress computer salespeople
- B. To avoid the need for consultants
- C. To gain different perspectives**
- D. To discourage other executives

What is the primary point emphasized in the text?

- A. The importance of detailed contracts in computer system purchases
- B. The advantages of hiring consultants for buying computer systems
- C. The need for outside advice when purchasing a computer system**
- D. The difficulties of understanding computer salespeople

What should a businessman try to see before buying a computer system, according to the text?

- A. Computer salespeople in action
- B. Similar computer systems in operation**
- C. A variety of consulting firms
- D. A financial statement from the supplier

Why is it important to find out what would be involved in upgrading a system, as mentioned in the text?

- A. To delay the purchase of a computer system
- B. To ensure that the supplier is financially stable
- C. To determine the role of consultants
- D. To be prepared for future needs**

What is the role of "listing markers" in the text?

- A. To provide a numerical ranking of ideas
- B. To enumerate and organize information**
- C. To classify computer salespeople
- D. To summarize the key points of the text

Which type of marker in the table indicates the highest priority or importance in a list?

- A. Firstly
- B. Another
- C. Lastly/finally
- D. First and foremost**

In the context of the table, what is the function of "One, two, three, etc."?

- A. Indicating descending order
- B. Enumerating and organizing information**
- C. Categorizing topics by priority
- D. Showing transitions between paragraphs

What does the text primarily emphasize when providing a list of markers?

- A. The importance of numerical order in a list
- B. The significance of using a variety of markers
- C. The ways in which writers connect ideas in a text**
- D. The role of sequence in conveying information

What is the text's stance on the necessity of listing markers in enumerating information?

- A. They are crucial for understanding information.**
- B. They are unnecessary and should be avoided.
- C. They indicate the importance of numerical order.
- D. They are primarily used to impress the reader.

In the context of the text, what is the role of transitions?

- A. Indicating the importance of ideas in a list
- B. Marking the beginning and end of a text
- C. Conveying relationships between parts of a text**
- D. Summarizing the key points of a text

Why is it important for the reader to recognize transitions in a text, as mentioned in the text?

- A. To delay the comprehension of the text
- B. To emphasize the function of sequence
- C. To highlight the importance of numerical order
- D. To improve overall reading comprehension**

What are "function words" in the context of the text?

- A. Words related to computer functions
- B. Small, often-used words that establish relationships**
- C. Content words that convey the main ideas in a text
- D. Words chosen for their literary devices

What are the primary functions of function words in writing and reading, as mentioned in the text?

- A. They establish emphasis and relationships between parts.**
- B. They fully define key content words.
- C. They emphasize the importance of hardware.
- D. They convey emotions and attitudes.

According to the text, what is one way an author may modify key content words in different parts of the text?

- A. By providing clear definitions for each content word
- B. By using synonyms with similar meanings**
- C. By avoiding the use of antonyms
- D. By disregarding the impact of tone

How can a successful reader recognize and understand the clues that the writer gives, according to the text?

- A. By relying on their first reading
- B. By understanding all literary devices
- C. Through practiced reading**
- D. By minimizing the use of clues

What does the text emphasize about reading comprehension?

- A. Comprehension can be achieved through a single reading.

B. The author's tone is the only factor to consider.

C. Recognition and understanding require practiced reading.

D. Clues are often not present in the first reading.

What is the primary reason for recognizing the relationships in which sentences and groups of sentences combine to present information, as mentioned in the text?

A. To discourage reading the text

B. To enhance the reading experience

C. To evaluate the writer's tone

D. To analyze the color of the text

In the context of the text, what does it mean to "enumerate" information?

A. To provide a numerical ranking of ideas

B. To count the problems with computer salespeople

C. To make a catalog of computer features

D. To use the right literary devices

What is the primary focus when using the listing markers provided in the text?

A. The importance of using them frequently

B. Enumerating and organizing information

C. Categorizing topics by priority

D. Avoiding transitions between paragraphs

What is the primary function of markers like "First and foremost" and "Last but not least"?

A. Indicating the lowest priority or importance in a list

B. Enumerating information in ascending order

C. Expressing the writer's personal opinion

D. Marking the beginning and end of a text

What is the role of transitions in a text, as emphasized in the text?

A. Summarizing the key points of a text

B. Highlighting the importance of numerical order

C. Providing numerical rankings of ideas

D. Conveying relationships between parts of a text

What does the text highlight as the main reason for recognizing transitions in a text?

A. To improve the use of literary devices

B. To avoid emphasizing the function of sequence

C. To enhance the use of transitions between paragraphs

D. To improve overall reading comprehension

What is the role of "function words" in writing and reading, as explained in the text?

- A. They fully define key content words.
- B. They emphasize the importance of hardware.
- C. They establish emphasis and relationships between parts.**
- D. They convey emotions and attitudes.

In the context of the text, how can content words affect the reader's understanding of a text?

- A. By providing literary devices
- B. By indicating the importance of tone
- C. By conveying the main ideas of the text**
- D. By minimizing the role of function words

What is the primary role of recognizing and understanding the clues given by the writer, according to the text?

- A. To demonstrate expertise in literary devices
- B. To increase the number of times a text is read
- C. To enhance the reader's first reading experience
- D. To improve reading comprehension through practiced reading**

How is the necessity of recognizing the relationships in which sentences and groups of sentences combine to present information presented in the text?

- A. To emphasize the importance of transitions in a text
- B. To discourage analyzing the content of the text
- C. To highlight the writer's tone and style
- D. To enhance the reading experience**

In the text, what is the primary role of listing markers?

- A. Enumerating information in descending order
- B. Indicating the order of paragraphs in a text
- C. Providing numerical rankings of ideas
- D. Enumerating and organizing information**

What is the text's perspective on transitions in a text?

- A. Transitions are unnecessary in well-structured texts.
- B. Transitions help convey relationships between parts of a text.**
- C. Transitions are primarily used to emphasize the writer's tone.
- D. Transitions should be minimized for a clean reading experience.

What is the emphasis of the text regarding the necessity of recognizing transitions in a text?

- A. To highlight the importance of numerical order
- B. To minimize the use of listing markers

C. To explain the color of the text

D. To improve overall reading comprehension

In the context of the text, how is the term "enumerate" used?

A. To categorize topics by priority

B. To minimize the use of literary devices

C. To count the problems with transitions

D. To make a catalog of computer capabilities

LECTURE # 12

What is the term used to describe the process of picking up ideas that are not directly stated in the material you are reading?

A. Inference

B. Implication

C. Conclusion

D. Suggestion

What is the aim of helping readers become better readers and stronger thinkers, as mentioned in the text?

A. To make them experts in non-fiction writing

B. To help them understand what is directly stated

C. To enable them to analyze and evaluate what they read

D. To encourage them to read more literature

In the example provided in the text about the crowd gathered outside a shop, what does the text emphasize as the basis for making inferences?

A. Experience and general knowledge

B. The accuracy of eyewitness accounts

C. The crowd's reaction to the situation

D. The number of people involved

Why does the text mention that not all inferences will necessarily prove true?

A. To discourage making inferences

B. To emphasize the accuracy of eyewitness accounts

C. To highlight the complexity of human behavior

D. To emphasize the importance of solid evidence

In the examples provided in the text, what do the inferences about the high school and the dog imply?

A. The high school is well-guarded.

B. The dog is a friendly pet.

C. There is a public examination or important function.

D. The dog has a loving owner.

What is the primary skill demonstrated in the text by readers who make logical jumps from known information to inferred ideas?

A. Inference

B. Analytical reading

C. Observational skills

D. Fact-checking

What is the reader's role in drawing inferences, as explained in the text?

A. Using clues provided by the writer

B. Writing down every possible inference

C. Avoiding inferences to maintain objectivity

D. Seeking external sources for confirmation

In the example about Sohail always sitting in the last row of the classroom, what is the reader expected to infer?

A. Sohail dislikes his college courses.

B. Sohail is unprepared for his class.

C. Sohail feels uncomfortable sitting in the front row.

D. Sohail is farsighted.

What does the text emphasize regarding the strength of inferences made by readers?

A. The importance of jumping to conclusions

B. The significance of personal opinions

C. The necessity of solid evidence

D. The avoidance of inferences

How does the text encourage readers to draw inferences based on the information provided?

A. By discouraging making inferences

B. By providing a large amount of information

C. By suggesting multiple possible inferences

D. By offering clear, unambiguous statements

In the context of the text, what is "super-automation" primarily described as?

A. A threat to jobs in industrial factories

B. The use of computers in agriculture

C. Advanced technology in offices

D. The increased use of manual labor

According to the text, what is a key function of super-automation?

- A. Reducing job opportunities
- B. Handling and storing information**
- C. Creating more manual labor jobs
- D. Eliminating technology in agriculture

How does the text suggest that machines can benefit company employees?

- A. By replacing them with super-automation
- B. By enabling employees to accomplish more**
- C. By eliminating the need for skilled workers
- D. By making the workforce less efficient

According to the text, what can be inferred about the advantages and disadvantages of super-automation?

- A. There are no disadvantages to super-automation.
- B. Super-automation has only advantages.
- C. Super-automation has both advantages and disadvantages.**
- D. Super-automation is always a disadvantage.

How does the text describe the way writers can indicate character in literature?

- A. Through explicit statements
- B. Through direct speeches of characters**
- C. Through their choice of words
- D. Through the use of clichés

In literature, what is one way creative writers often show what they mean by describing a scene or situation?

- A. Through direct statements
- B. Through indirect dialogue**
- C. Through clear explanations
- D. Through clichéd expressions

What does the text highlight as a key skill for understanding and appreciating literature, especially when meaning is implied?

- A. Inference skills**
- B. Reading speed
- C. Memorization
- D. Critical analysis

What type of writing requires readers to apply inference skills, as mentioned in the text?

- A. Factual and non-fiction writing
- B. Poetry and short stories**
- C. Novels and biographies

D. Creative and fictional writing

What is the text's purpose in providing the poem "Sixty-Eight Birthday" by James Russell Lowell?

- A. To showcase the author's literary skills
- B. To emphasize the importance of literal meaning
- C. To illustrate the importance of reading between the lines**
- D. To provide an example of a factual statement

How does the poem "Sixty-Eight Birthday" use the term "milestones"?

- A. To mark the progress of life**
- B. To indicate road distances
- C. To describe the journey of a character
- D. To represent birthday celebrations

In the poem "Sixty-Eight Birthday," what does the text imply about birthdays as milestones?

- A. They have no significance.
- B. They are markers of life's progress.**
- C. They are meaningless celebrations.
- D. They have no connection to age.

In the poem "Sixty-Eight Birthday," what does the phrase "headstones" signify?

- A. Milestones on the road of life
- B. Important life events
- C. Gravestones marking death**
- D. Significant achievements

What is the primary purpose of the poem "Sixty-Eight Birthday" in using the term "headstones"?

- A. To highlight the celebration of life
- B. To illustrate the value of milestones
- C. To emphasize the inevitability of death**
- D. To depict a positive view of aging

How is the reader expected to interpret the relationship between milestones and headstones in the poem "Sixty-Eight Birthday"?

- A. As unrelated concepts
- B. As representations of youth
- C. As symbols of progress
- D. As symbols of life and death**

In the poem "Fog" by Carl Sandburg, how does the fog move?

- A. Like movements in the harbor

- B. Like movements in the city
- C. Like a cat moving quickly and silently**
- D. Like a cloud slowly spreading

What does the comparison of fog to "little cat feet" imply about the fog's characteristics?

- A. The fog moves erratically.
- B. The fog is dangerous.
- C. The fog moves silently and unpredictably.**
- D. The fog is a common occurrence.

What is the continuation of the comparison with a cat in the poem "Fog"?

- A. Harbor
- B. Haunches**
- C. City
- D. Silent

According to the poem "Fog," what does the fog typically do after it "sets looking" at the harbor and city?

- A. It stays for a while and then leaves.**
- B. It hangs over the city.
- C. It moves quickly away.
- D. It remains silent.

What is the poem "Fog" primarily showing fog as?

- A. Dangerous
- B. Quiet**
- C. Full of movement
- D. Disruptive

What is the text's primary message about the role of readers in literature when it comes to reading between the lines?

- A. Readers should focus on explicit statements.
- B. Readers should avoid creative writing.
- C. Readers should use inference to depict character.**
- D. Readers should not interpret dialogue.

What can be deduced about Jeeves from his answers to Bertie Wooster in "Thank You, Jeeves"?

- A. Jeeves is loquacious and talkative.
- B. Jeeves is a close friend of Bertie.
- C. Jeeves is economical in speech and polite.**
- D. Jeeves is dismissive of Bertie's concerns.

In the passage from "Thank You, Jeeves," what do Jeeves's responses imply about his attitude towards Miss Stoker?

- A. He is fond of Miss Stoker.
- B. He is indifferent to Miss Stoker.
- C. He dislikes Miss Stoker.**
- D. He is afraid of Miss Stoker.

What does Jeeves's response "I can conceive that after what occurred in New York it might be distressing for you to encounter Miss Stoker" imply?

- A. Jeeves disapproves of Bertie's actions in New York.
- B. Miss Stoker had a negative impact on Bertie in New York.**
- C. Jeeves is concerned about Bertie's well-being.
- D. Jeeves had a pleasant encounter with Miss Stoker in New York.

How does the text suggest playwrights and other writers reveal their characters through speech?

- A. By using explicit statements
- B. By using indirect dialogue**
- C. By describing characters in detail
- D. By using external sources for information

In what way does the passage from "Thank You, Jeeves" emphasize Jeeves's character through his dialogue?

- A. By using detailed descriptions of Jeeves
- B. By highlighting his friendly demeanor
- C. By showing his economy of speech**
- D. By revealing his affection for Bertie

In the context of the text, what is the reader's role in understanding characters in literature?

- A. To focus on explicit character descriptions
- B. To use inference and read between the lines**
- C. To rely on external sources for character details
- D. To avoid interpreting character dialogue

What does the text suggest as the primary way to acquire the skill of reading between the lines?

- A. By memorizing the text
- B. By reading extensively**
- C. By avoiding literature
- D. By focusing on explicit statements

What can be inferred about the importance of reading between the lines in literature, as emphasized in the text?

- A. It is a secondary skill in literary analysis.
- B. It is essential for understanding character and meaning.**
- C. It is not relevant in creative writing.
- D. It is only applicable to non-fiction literature.

According to the text, what is a key skill readers need when engaging with creative writers?

- A. Speed reading
- B. Critical analysis
- C. Memorization
- D. Inference skills**

What is the primary message the text conveys regarding the importance of inference skills when reading literature?

- A. Inference skills are irrelevant in literature.
- B. Inference skills are primarily used in factual writing.
- C. Inference skills are essential for understanding and appreciating literature.**
- D. Inference skills are best avoided in creative writing.

LECTURE # 13

Fact vs. Opinion:

Identify the opinion (O) in the following statements:

- a) Mohammad Ali Bogra was the worst Prime Minister our country had ever had.**
- b) My brother, Aslam, is very handsome.
- c) In fact, none of the candidates for the Nazim's post is well qualified.
- d) The neem tree in our garden is 25 feet tall.

Which statement represents a fact (F)?

- a) Pakistan won the 1992 World Cup.**
- b) The Alhmara Arts Council building is the most beautiful building in Lahore.
- c) The Prime Minister should have willed his property to the nation.
- d) The Lahore Museum is the oldest museum in Pakistan.

Which sentence is an opinion (O)?

- a) Lovecraft died in the conditions of shameful neglect.
- b) It's raining outside.
- c) The economy has been in the worst condition for four years.**
- d) The truth of the matter is that frozen meat tastes as good as fresh meat.

Identify the statement that is a fact (F):

- a) The Alhmara Arts Council building is the most beautiful building in Lahore.

b) It's raining outside.

- c) In fact, none of the candidates for the Nazim's post is well qualified.
- d) Ostriches do not hide their heads in the sand.

Time Sequence:

Choose the time relater that suggests something happened simultaneously with the given time-reference:

a) First

b) Meanwhile

c) At present

d) Earlier

Which adjective indicates that something happened before the given time-reference?

a) Later

b) Former

c) Contemporary

d) Following

What adverbial phrase suggests events occurring at the same time as the given time-reference?

a) Eventually

b) In the meantime

c) Already

d) At this point

Which time relater implies something happening after the given time-reference?

a) Next

b) Simultaneous

c) Former

d) Earlier

Time Sequence:

Identify the time relater that implies events occurring after the given time-reference:

a) Meanwhile

b) Simultaneous

c) By the end

d) Following

Select the adjective that indicates something happened earlier than the given time-reference:

a) Subsequent

- b) Later
- c) Former**
- d) Current

Which adverbial phrase implies events happening simultaneously with the given time-reference?

- a) Up to now/then
- b) Meanwhile
- c) In the meantime
- d) Now**

What time relater is used to suggest events occurring after the given time-reference?

- a) Later**
- b) By the end
- c) Simultaneous
- d) Earlier

Time Sequence:

Choose the adjective that represents events occurring before the given time-reference:

- a) Later
- b) Following
- c) Former**
- d) Simultaneous

Which adverbial phrase indicates events occurring at the same time as the given time-reference?

- a) In the meantime
- b) Contemporary**
- c) At the moment
- d) Afterwards

What time relater suggests something happened before the given time-reference?

- a) Subsequent
- b) In the meantime
- c) Earlier**
- d) Next

Identify the time relater that implies something happening after the given time-reference:

- a) Meanwhile
- b) Simultaneous
- c) By the end

d) Following

Fact vs. Opinion:

Identify the fact (F) in the following statements:

- a) The Eiffel Tower is located in Paris.**
- b) The Taj Mahal is the most beautiful building in the world.
- c) In my opinion, sunsets are the most stunning natural phenomena.
- d) The moon is made of green cheese.

Which statement is an opinion (O)?

- a) Brazil is the largest country in South America.
- b) The Great Wall of China is a remarkable architectural feat.
- c) I think chocolate ice cream is the best dessert.**
- d) The Nile River is the longest river in the world.

Which sentence represents a fact (F)?

- a) The Sphinx is a mysterious statue in Egypt.**
- b) In my view, mathematics is the most challenging subject.
- c) Paris is the capital of France.
- d) Elephants can fly.

Identify the statement that is an opinion (O):

- a) Water boils at 100 degrees Celsius at sea level.
- b) The Grand Canyon is a breathtaking natural wonder.**
- c) According to scientific research, the Earth orbits the sun.
- d) I believe that aliens walk among us.

Time Sequence:

Choose the time relater that suggests something happened at the same time as the given time-reference:

- a) First
- b) Meanwhile**
- c) Afterwards
- d) Earlier

Which adjective indicates that something happened before the given time-reference?

- a) Later
- b) Former**
- c) Contemporary
- d) Following

What adverbial phrase suggests events occurring at the same time as the given time-reference?

- a) Eventually
- b) In the meantime
- c) Already**
- d) At this point

Which time relater implies something happening after the given time-reference?

- a) Next**
- b) Simultaneous
- c) Former
- d) Earlier

Time Sequence:

Identify the time relater that implies events occurring after the given time-reference:

- a) Meanwhile
- b) Simultaneous
- c) By the end
- d) Following**

Select the adjective that indicates something happened earlier than the given time-reference:

- a) Subsequent
- b) Later
- c) Former**
- d) Current

Which adverbial phrase implies events happening simultaneously with the given time-reference?

- a) Up to now/then
- b) Meanwhile
- c) In the meantime
- d) Now**

What time relater is used to suggest events occurring after the given time-reference?

- a) Later**
- b) By the end
- c) Simultaneous
- d) Earlier

LECTURE # 14

How do writers bring characters to life in their writing?

- a. Through dialogue
- b. By using visual elements
- c. By showing action**
- d. All of the above

What does the description of Mrs. Gargery's bread-cutting technique reveal about her character in "Great Expectations"?

- a. She is gentle and caring
- b. She is skilled and precise**
- c. She is clumsy and careless
- d. She is talkative and social

How does Jeeves' speech in "Thank You, Jeeves" reveal his character?

- a. He is talkative and friendly
- b. He is concise and reserved**
- c. He is humorous and witty
- d. He is angry and confrontational

What is the purpose of direct statements in character description?

- a. To allow readers to draw their own conclusions
- b. To provide a clear picture of the character**
- c. To create ambiguity and mystery
- d. To make the character more relatable

How is the character of Miss Arkwright described in "A Little Companion"?

- a. Remarkable and eccentric
- b. Unlikable and unpopular
- c. Tolerant and religious
- d. Liked and kind-hearted**

In character description, what does the technique of comparisons and associations involve?

- a. Comparing characters to inanimate objects
- b. Associating characters with significant ideas**
- c. Describing characters using only actions
- d. None of the above

How is Miss Murdstone described in "David Copperfield" in terms of her association with metal?

- a. She is soft and delicate like metal
- b. She is warm and inviting like metal
- c. She is rigid and cold like metal**
- d. She is smooth and gentle like metal

What characteristic is associated with Thomas Gradgrind in "Hard Times"?

- a. Warmth and compassion
- b. A focus on facts and calculations**
- c. Artistic creativity
- d. An appreciation for fiction

In character description, what does the choice of words and specific details aim to achieve?

- a. Creating ambiguity and mystery
- b. Providing a clear and vivid picture of the character**
- c. Keeping the character's traits hidden
- d. Making the character relatable

What is the purpose of character description in literature?

- a. To confuse the readers
- b. To create multiple interpretations
- c. To bring characters to life and enhance the story**
- d. To hide the character's traits

How do writers use speech to indicate character in their writing?

- a. By using direct statements**
- b. By comparing characters to inanimate objects
- c. By describing their actions
- d. By providing detailed background information

What is the primary purpose of direct statements in character description?

- a. To create ambiguity
- b. To allow readers to draw their own conclusions
- c. To provide a clear and detailed image of the character**
- d. To hide the character's traits

How does the choice of words and specific details help in character description?

- a. It creates ambiguity and mystery.
- b. It provides a clear and vivid picture of the character.**
- c. It keeps the character's traits hidden.
- d. It makes the character less relatable.

What role does the association of characters with specific ideas or objects play in character description?

- a. It confuses readers.
- b. It creates ambiguity.
- c. It enhances the character's relatability.
- d. It helps readers form mental images of the character.**

In "Hard Times," what characteristics are associated with Thomas Gradgrind?

- a. Warmth and compassion
- b. A focus on facts and calculations**
- c. Artistic creativity
- d. An appreciation for fiction

How do writers use specific words to make characters vivid in readers' minds?

- a. By using abstract and generic language
- b. By using descriptive and detailed language**
- c. By providing lengthy background information
- d. By using ambiguous and vague language

What is the primary purpose of character description in literature?

- a. To create confusion and ambiguity
- b. To hide the character's traits from readers
- c. To bring characters to life and enhance the story**
- d. To provide a detailed plot summary

What technique involves comparing characters to something else or associating them with specific ideas or objects?

- a. Direct statements
- b. Use of speech
- c. Comparisons and associations**
- d. Choice of words

What is the significance of the choice of words and specific details in character description?

- a. To create ambiguity and mystery
- b. To hide the character's traits
- c. To provide a clear and vivid image of the character**
- d. To confuse the readers

How does speech play a role in character description?

- a. By providing a direct and detailed description of the character**
- b. By creating ambiguity and confusion
- c. By allowing readers to draw their own conclusions
- d. By using abstract language

In character description, what is the purpose of using direct statements?

- a. To create ambiguity and confusion
- b. To provide a clear and detailed image of the character**
- c. To hide the character's traits
- d. To make the character more relatable

How are characters brought to life in writing through comparisons and associations?

- a. By using abstract and generic language
- b. By making the character's traits hidden
- c. By comparing them to inanimate objects or associating them with specific ideas**
- d. By keeping the character's actions a mystery

How is Miss Murdstone's character associated with metal in "David Copperfield"?

- a. She is soft and delicate like metal
- b. She is warm and inviting like metal

c. She is rigid and cold like metal

d. She is smooth and gentle like metal

What does the use of the word 'sir' add to the character of Thomas Gradgrind in "Hard Times"?

a. It suggests warmth and friendliness

b. It indicates humility and submissiveness

c. It reinforces his focus on facts and calculations

d. It portrays him as an artistic individual

How do the choice of words and specific details help create vivid characters?

a. By using abstract and vague language

b. By providing lengthy background information

c. By using descriptive and detailed language

d. By creating ambiguity and mystery

Which of the following is not a primary purpose of character description in literature?

a. To create confusion and ambiguity

b. To bring characters to life and enhance the story

c. To make the story more relatable to readers

d. To provide depth and richness to the narrative

How do writers use speech to reveal character traits?

a. By creating ambiguity and confusion

b. By allowing readers to draw their own conclusions

c. By using direct statements and specific words

d. By using abstract language

What is the primary aim of direct statements in character description?

a. To hide the character's traits

b. To create ambiguity and confusion

c. To provide a clear and detailed image of the character

d. To make the character more relatable

How is the association of characters with specific ideas or objects helpful in character description?

a. It creates ambiguity and mystery

b. It keeps the character's traits hidden

c. It helps readers form mental images of the character

d. It confuses the readers

In character description, what does the choice of words and specific details aim to achieve?

a. Creating ambiguity and mystery

b. Providing a clear and vivid picture of the character

c. Keeping the character's traits hidden

d. Making the character less relatable

LECTURE # 15

Interpreting Visual Data and Texts:

What are some of the primarily visual means of communication mentioned in the text?

- a) Words and numbers
- b) Graphs, charts, diagrams, tables, and maps**
- c) Audio recordings
- d) Mathematical equations

Why are graphs and tables included in most textbooks?

- a) To confuse the readers
- b) To increase the book's weight
- c) To help readers understand and interpret the material**
- d) To save space in the book

What is the primary reason for converting information consisting of words and figures into visuals?

- a) To make the material more complex
- b) To make it easier to forget
- c) To help readers see the information more clearly**
- d) To increase the retention levels

After 24 hours, how much of the information from an hour's lecture do most students typically forget?

- a) 10%
- b) 25%
- c) 50%
- d) 75%**

According to the text, what can help improve the retention levels of information after a lecture?

- a) Reviewing and taking notes**
- b) Forgetting the information
- c) Avoiding discussions
- d) Lengthening the lecture duration

Tables:

What is the purpose of a table in the text?

- a) To confuse readers
- b) To provide information in a compact, organized form**
- c) To display colorful images
- d) To entertain readers

What should you do when reading a table, according to the text?

- a) Skip the title
- b) Ignore footnotes

c) Check the source of information

- d) Pay attention to irrelevant details

What should you understand when looking at the column headings in a table?

- a) The background color
- b) The font size

c) The units used and what each heading refers to

- d) The number of words in each heading

What does "n.a." mean in the context of a table?

a) Not Applicable

- b) No Analysis
- c) New Application
- d) No Association

Graphs:

How does a graph illustrate a relationship between variables?

- a) Through words only
- b) By using a vertical axis
- c) By using colorful images

d) By plotting variables on axes

What does the text describe as the primary purpose of a graph?

- a) To confuse the audience
- b) To make information less clear

c) To provide an organized representation of relationships

- d) To entertain the audience

What does the graph in the text show?

- a) The population of the United States

b) The annual death rate

- c) The percentage of English speakers
- d) The number of airline flights

According to the graph, what is the difference in mean income of elementary school and high school graduates in 1956?

- a) \$1000

b) \$1250

- c) \$1500
- d) \$2000

In 1976, what was the difference in mean income of elementary school and high school graduates?

- a) \$1200
- b) \$1500

c) \$1720

d) \$2000

In 1961, what was the mean income of a college graduate?

a) \$8000

b) \$10,000

c) \$11,000

d) \$12,000

What was the mean income of a college graduate in 1966?

a) \$11,000

b) \$12,000

c) \$15,000

d) \$20,000

Approximately how much did the income of college students increase between 1961 and 1976?

a) \$1000

b) \$2000

c) \$5000

d) \$6500

Bar Graphs:

What does the bar graph in the text show?

a) The number of cars in a city

b) The number of speakers of important languages

c) The cost of living in different countries

d) The number of books in a library

How is the number of speakers indicated on the vertical axis in the graph?

a) In thousands

b) In millions

c) In billions

d) In fractions

How many speakers of English are there in the world?

a) 37 million

b) 370 million

c) 3.7 billion

d) 37 billion

What languages have about as many speakers as Arabic?

a) German and Portuguese

b) French and Spanish

c) Chinese and Russian

d) Japanese and Korean

What dialect of Chinese has the most speakers?

a) Mandarin

- b) Cantonese
- c) Shanghai
- d) Hokkien

About twice as many speakers of Hindi as of what other language?

a) Malay

- b) Arabic
- c) Japanese
- d) Russian

Which language ranks fifth in total number of speakers?

a) Urdu

- b) German
- c) Italian
- d) Dutch

Map Reading:

What is the name of the largest island of Japan?

a) Honshu

- b) Kyushu
- c) Shikoku
- d) Hokkaido

Which island is the northernmost in Japan?

- a) Honshu
- b) Kyushu
- c) Shikoku

d) Hokkaido

Which island is the southernmost in Japan?

- a) Honshu
- b) Kyushu**
- c) Shikoku
- d) Hokkaido

Name the ocean surrounding Japan.

- a) Atlantic Ocean
- b) Indian Ocean

c) Pacific Ocean

- d) Arctic Ocean

Which sea is to the west of Japan?

- a) Mediterranean Sea
- b) Black Sea

c) Sea of Japan

- d) Caribbean Sea

Which sea is to the southeast of Japan?

- a) Caspian Sea
- b) Red Sea

c) Philippines Sea

What country is nearest to Japan, and how far is it from Japan?

- a) China, 500 kilometers
- b) South Korea, approximately 150 kilometers**
- c) Russia, 300 kilometers
- d) Australia, 1000 kilometers

What countries are close to Japan besides South Korea?

a) China and Russia

- b) India and Nepal
- c) Brazil and Argentina
- d) Canada and Mexico

Approximately how far are China and Russia from Japan?

- a) 1000 kilometers
- b) 500 kilometers
- c) 400 kilometers
- d) 300 kilometers**

What direction are China and Russia from Tokyo?

a) East

- b) West
- c) North
- d) South

How far is Hokkaido from the Soviet Union?

- a) Approximately 1000 kilometers
- b) Approximately 500 kilometers**
- c) Approximately 400 kilometers
- d) Approximately 300 kilometers

Which direction is Hokkaido from the Soviet Union?

- a) East
- b) West
- c) North**
- d) South

Which direction is Hokkaido from Korea?

- a) East
- b) West**
- c) North
- d) South

Name one city that is due west of Kushiro.

a) Sapporo

- b) Nagasaki
- c) Tokyo

d) Osaka

Name one city that is due north of Hakodate.

a) Sapporo

b) Nagasaki

c) Tokyo

d) Osaka

How many cities in Japan have a population of 1,000,000 or more?

a) 2

b) 4

c) 6

d) 8

LECTURE # 16

What is the primary focus of evaluating texts as discussed in the passage?

a) Understanding the author's background

b) Identifying the reader's point of view

c) Evaluating the text's tone and argumentation

d) Analyzing historical context

Which of the following is NOT a part of evaluating texts as discussed in the passage?

a) Identifying facts from opinions

b) Recognizing the reader's emotional state

c) Understanding the writer's intention

d) Being aware of possible bias

What is the term for a tone that says one thing and means the opposite?

a) Sarcasm

b) Irony

c) Satire

d) Pessimism

How many forms of irony are mentioned in the passage?

a) One

b) Two

c) Three

d) Four

Which type of irony occurs when something unexpected happens in a situation that was expected to be different?

a) Situational irony

b) Verbal irony

c) Dramatic irony

d) Cosmic irony

Which type of irony involves a discrepancy between what is said and what is meant?

a) Situational irony

b) Verbal irony

c) Dramatic irony

d) Cosmic irony

In the example of verbal irony given in the passage, what does the cricket player actually mean when he says, "Oh, great!"?

a) He is excited about the rain.

b) He is upset about the rain.

c) He is indifferent to the rain.

d) He wants to play in the rain.

What is the primary purpose of an argument?

a) To confuse the audience

b) To present a point and support it with evidence

c) To entertain the audience

d) To make information less clear

In an argument, what is considered support for a point?

a) Contradictory evidence

b) Emotional appeals

c) Persuasive and logical evidence

d) Personal anecdotes

What is the main flaw in an argument that uses circular reasoning?

a) The argument is too lengthy.

b) The author lacks evidence.

c) The support and conclusion are the same.

d) The argument is overly emotional.

Which type of fallacy ignores the true issue by presenting evidence unrelated to the argument?

a) Changing the subject

b) Circular reasoning

c) Personal attack

d) Hasty generalization

What does hasty generalization involve?

a) Making assumptions based on insufficient evidence

b) Providing multiple pieces of evidence

c) Using strong emotional appeals

d) Presenting logical arguments

Which fallacy occurs when someone assumes that just because one event precedes another, the first event caused the second event?

a) Changing the subject

b) Circular reasoning

c) False cause

d) Hasty generalization

What does the either-or fallacy involve?

a) Presenting only two possible solutions to a problem

b) Exploring multiple facets of an issue

c) Providing strong logical reasoning

d) Focusing on false comparisons

Which of the following statements is an example of an either-or fallacy?

a) "We can either raise taxes or reduce public services."

b) "There are several ways to approach this problem."

c) "We need to consider all possible solutions."

d) "There is only one right answer."

What is the next lesson going to focus on, according to the passage?

a) Developing basic reading skills

b) Identifying the author's personal background

c) Developing advanced, critical levels of comprehension

d) Learning about history

LECTURE # 17

What is the primary focus of the text?

a. Computer hardware

b. Computer software

c. Memory in a computer

d. Computer peripherals

What is another term used for primary memory?

a. Real storage

b. Secondary memory

c. Virtual storage

d. CPU storage

How is primary memory related to the CPU?

a. Primary memory stores long-term data for the CPU.

b. Primary memory is the same as the CPU.

c. Primary memory stores programs and data temporarily for the CPU.

d. Primary memory is separate from the CPU.

What is the key requirement for primary memory to facilitate processing?

a. Random access and speed

b. Sequential access and storage

c. Low cost and speed

d. Random access and low cost

How is the system of addresses in primary memory similar to addresses of houses?

a. They change frequently.

- b. They are expensive.
- c. They are like a series of tiny compartments.**
- d. They are only used for internal reference.

Which of the following is not a characteristic of primary memory?

- a. It is costly.
- b. It is used transiently.
- c. It stores programs and data temporarily.
- d. It is used for dedicated functions.**

What are the two categories of secondary memory devices mentioned in the text?

- a. Random and sequential devices**
- b. Dedicated and transient devices
- c. Costly and inexpensive devices
- d. Magnetic and optical devices

Which secondary memory device provides almost direct access to specified data?

- a. Magnetic tape
- b. Magnetic disk**
- c. Optical disk
- d. CD-ROM

When disks are used to increase the capacity of primary memory, what is it called?

- a. Primary extension
- b. Secondary memory boost
- c. Virtual storage**
- d. Magnetic enhancement

How does virtual storage increase the apparent memory capacity of a computer?

- a. By adding more CPU cores
- b. By increasing the speed of primary memory
- c. By connecting additional monitors
- d. By using disks to provide additional storage**

Main Idea: Which statement best expresses the main idea of the text?

- a. There are two types of memory: primary and secondary.**
- b. Primary memory is more important than secondary memory.
- c. Secondary memory devices are unimportant in a computer system.
- d. Computers have various types of memory for different purposes.

Understanding the Passage: Is the following idea stated in the text?

"Minicomputers and microcomputers have a similar memory capacity."

- a. S (Stated)
- b. NS (Not Stated)**

Locating Information: In the text, where is the idea expressed that "Random-access devices are more efficient than sequential devices"?

- a. Paragraph 2

b. Paragraph 4

- c. Paragraph 3
- d. Paragraph 1

Contextual Reference: What do the words "internal storage" in the text refer to?

a. Primary memory

- b. Secondary memory
- c. CPU
- d. Disk drives

Understanding Words: What is a synonym for "expressed" in the context of the text?

a. Stated

- b. Expressed
- c. Suppressed
- d. Represented

What is a synonym for "equalize" in the context of the text?

a. Differentiate

b. Balance

- c. Unequal
- d. Match

What is a synonym for "consideration" in the context of the text?

a. Reflection

- b. Negligence
- c. Comprehension
- d. Consequence

What is a synonym for "design" in the context of the text?

a. Plan

- b. Destroy
- c. Reject
- d. Modify

What is a synonym for "advertised" in the context of the text?

a. Promoted

- b. Concealed
- c. Ignored
- d. Discarded

What is a synonym for "reinforcement" in the context of the text?

a. Retraction

b. Strengthening

- c. Abandonment
- d. Reduction

What is an example of information presented to reinforce a point in the text?

- a. "In addition to their speed, computers are accurate and can do repetitive operations over and over without becoming tired or bored."**

- b. "Microcomputers are cheaper than mainframes, as well as compact and portable."
- c. "Microcomputers can have a storage capacity of up to 32K, like minicomputers."
- d. "Many minicomputers, much the same way as is the case in automobile emission control, are used merely for a fixed application and run only a single program."

What is an example of information presented to illustrate a point of similarity in the text?

- a. "In addition to their speed, computers are accurate and can do repetitive operations over and over without becoming tired or bored."
- b. "Microcomputers are cheaper than mainframes, as well as compact and portable."
- c. "Microcomputers can have a storage capacity of up to 32K, like minicomputers."**
- d. "Many minicomputers, much the same way as is the case in automobile emission control, are used merely for a fixed application and run only a single program."

LECTURE # 18

What is the primary focus of the text?

- a. Different types of computer operating systems
- b. The history of computer hardware
- c. Types of memory in a computer**
- d. Computer programming languages

Which type of memory was used in the first computers, with small ferrite rings called cores?

- a. Core memory**
- b. Semiconductor memory
- c. Bubble memory
- d. RAM memory

What is the unique address associated with each intersection of wires in core memory used for?

- a. Magnetizing the cores
- b. Demagnetizing the cores
- c. Identifying the cores**
- d. Increasing memory capacity

What does each core in core memory represent?

- a. A binary digit of 0 or 1**
- b. A hexadecimal digit
- c. A floating-point number
- d. An ASCII character

How has the capacity of computer memory evolved from early computers to modern ones?

- a. It has remained the same.
- b. It has decreased significantly.

c. It has increased significantly.

d. It is not mentioned in the text.

Which development in the 1970s revolutionized the computer field by etching integrated circuits onto silicon chips?

a. Core memory

b. Bubble memory

c. Semiconductor memory

d. RAM memory

What disadvantage is mentioned for semiconductor memory compared to core memory?

a. It is slower.

b. It consumes more power.

c. It is less reliable.

d. Information is lost when power is removed.

What is the concept of bubble memory based on?

a. Magnetic film

b. Thin metal rings

c. Magnetic bubbles

d. Ferrite rings

What advantage does bubble memory offer in terms of storage density?

a. It is less dense than existing memories.

b. It is about the same density as existing memories.

c. It can store information at a greater density.

d. It cannot store information.

What is mentioned about bubble memory's cost, power consumption, size, and reliability?

a. It is expensive, consumes a lot of power, and is unreliable.

b. It is cheap, consumes a lot of power, and is large.

c. It is not mentioned in the text.

d. It is not expensive, consumes little power, is small, and highly reliable.

Main Idea: Which statement best expresses the main idea of the text?

a. The history of core memory in early computers.

b. The disadvantages of semiconductor memory.

c. An overview of different types of computer memory.

d. The development of bubble memory in modern computers.

Understanding the Passage: Is the following idea stated in the text? "Core memory is the most recent development in computer memory."

a. S (Stated)

b. NS (Not Stated)

Locating Information: In the text, where is the idea expressed that "early computer memories had less storage capacity than newer ones"?

a. Paragraph 2

b. Paragraph 4

- c. Paragraph 1
- d. Paragraph 3

Contextual Reference: What do the words "their respective addresses" in the text refer to?

a. The memory boards

b. The cores

- c. The wires
- d. The integrated circuits

Understanding Words: What is a synonym for "capacity" in the context of the text?

a. Space

b. Potential

c. Size

d. Capability

What is a synonym for "dominated" in the context of the text?

a. Controlled

b. Defeated

c. Led

d. Exceeded

What is a synonym for "advances" in the context of the text?

a. Retreats

b. Improvements

c. Regressions

d. Failures

What is a synonym for "retaining" in the context of the text?

a. Losing

b. Keeping

c. Removing

d. Erasing

What is a synonym for "suitable" in the context of the text?

a. Unsuitable

b. Appropriate

c. Inappropriate

d. Acceptable

What is a synonym for "creating" in the context of the text?

a. Destroying

b. Inventing

c. Building

d. Decreasing

Words Forms: Choose the appropriate word forms to complete the sentences.

a. When a program doesn't work properly, it is often necessary to make alterations to it.

b. The omission of data from a program can alter its results drastically.

c. The use of the computer in business has altered the workload of many people.

Answer: alterations, alter, altered

Words Forms: Choose the appropriate word forms to complete the sentences.

- a. A lot of electricity is needed to operate large computer systems.
- b. Alexander Graham Bell invented the electric light bulb.
- c. Many students today are studying to become electrical engineers.

Answer: electricity, electric, electrical

Words Forms: Choose the appropriate word forms to complete the sentences.

- a. The introduction of the computer in the workplace has reduced the workload of many people.
- b. There will probably be a great reduction in the consumption of oil in the next decade due to the use of computer technology.

Answer: reduced, reduction

Words Forms: Choose the appropriate word forms to complete the sentences.

- a. A programmer usually has a creative as well as a logical mind.
- b. It takes a lot of inspiration and hard work to come up with a new creation in computer technology.
- c. Computers have certainly created new opportunities for fraud.

Answer: creative, creation, created

Content Review: Use the information in the text on 'Types of Memory' to complete the table.

Type: Core memory

Developed: Early computers

Size: Made up of a grid of wires

Composition: Ferrite rings

Memory Capacity: Around 80,000 bits

Content Review: Use the information in the text on 'Types of Memory' to complete the table.

Type: Semiconductor memory

Developed: 1970s

Size: Tiny piece of silicon

Composition: Integrated circuits

Memory Capacity: High-speed, millions of bits

Focus Review: Time sequence

Para: [2]

Time Sequence Marker: "The memory of the first computers"

Information: Core memory had around 80,000 bits.

Focus Review: Time sequence

Para: [3]

Time Sequence Marker: "In the 1970s"

Information: Development of semiconductor memory revolutionized the computer field.

Focus Review: Adding information

In the 1970s there was a further development which revolutionized the computer field.
(Para. 3)

Focus Review: Adding information

2. Moreover, the size of the components containing the circuitry can be considerably reduced... (Para. 3)

Focus Review: Giving an explanation or a definition

In texts similar to those in this book, authors often give definitions to new or unfamiliar terms, or vocabulary items and concepts, or ideas specific to the subject being discussed.

True or False: In texts, authors often provide explanations and definitions for new or unfamiliar terms or concepts.

Answer: True

What is a common method used to define or explain terms or concepts in texts?

- a. Using synonyms
- b. Using antonyms
- c. Giving examples
- d. Providing appositional definitions**

What is a common way to define or explain a term implicitly in a text?

- a. By using synonyms
- b. By using antonyms
- c. By giving an appositional definition
- d. By presenting a term and describing its characteristics**

Which part of the definition typically includes the term to be defined?

- a. Characteristics
- b. Group**
- c. Synonyms
- d. Apposition

What is the characteristic of a good definition as mentioned in the text?

- a. It should always be brief.
- b. It should omit the term to be defined.
- c. It should distinguish the term from others in the group.**
- d. It should avoid providing examples.

How is an "abacus" defined in the text?

- a. A bead frame**
- b. A mathematical tool
- c. An ancient computer
- d. A type of calculator

How is "input" defined in the text?

- a. The information presented to the computer**
- b. The process of data entry
- c. The output of a computer
- d. The type of information stored in semiconductor memory

What is the distinguishing characteristic of "large computer systems" or "mainframes" as per the text?

- a. They are used for scientific research.
- b. They are the most recent development in computer technology.
- c. They process immense amounts of data.**
- d. They use bubble memory.

What is a synonym for "faster" in the context of the text?

- a. Slower
- b. Quick
- c. Speedy
- d. Rapid**

What is a synonym for "advances" in the context of the text?

- a. Developments**
- b. Delays
- c. Regressions
- d. Retreats

LECTURE # 19

1. Main Idea: Which statement best expresses the main idea of the text?

- a. Computers are intelligent problem solvers.
- b. Steps involved in solving computer problems.**
- c. The importance of programming languages.
- d. The history of computer development.

2. Understanding the Passage: Decide whether the following statements are true or false (T/F) by referring to the information in the text. Then make the necessary changes so that the false statements become true.

Computers are intelligent problem solvers. **(F)**

All problems are equally difficult to solve. **(F)**

An algorithm is a sequence of steps of instructions used to solve a problem. **(T)**

The most important part of problem-solving is coding the program. **(F)**

Block diagrams cannot show relationships. **(F)**

Coding sheets are used for writing programs. **(T)**

Punched cards are the only way of transferring the program to computer memory. **(F)**

If data is not added to the program, the computer cannot perform calculations. **(T)**

It is a good idea to test the program before adding the data. **(T)**

A computer is very intelligent. It is capable of thinking. **(F)**

3. Locating Information: Find the passages in the text where the following ideas are expressed. Give the paragraph references.

Programs are usually written on certain lined forms. (Paragraph 4)

A block diagram can show decisions with two different outcomes. (Paragraph 1)

The programmer is the one who solves the problems. (Paragraph 3)

Even if the programmer is using a terminal instead of cards, it is possible to get a permanent copy of his program. (Paragraph 6)

Not all problems are of the same level of difficulty. (Paragraph 2)

4. Contextual Reference: Look back at the text and find out what the words in bold typeface refer to.

It is a machine (1.1)...

Reference: Computer

Which the programmer gives it (1.2)...

Reference: Procedure

Who solves the problems (1.3)...

Reference: Programmer

Which may be stated (1.14)...

Reference: Flowchart

The latter is a diagrammatic representation (1.15)...

Reference: Block diagram

Operate to do it (1.27)...

Reference: Key punch the program

This transfers the information (1.32)...

Reference: Reading cards through card readers

Or if it has errors (1.33)...

Reference: Program

It will follow the instructions (1.40)...

Reference: Computer

Does what it is told (1.42)...

- Reference: Computer

5. Understanding Words: Refer back to the text and find synonyms for the following words.

Construct (1.10)...

Synonym: Formulate

Takes a lot of time (1.13)...

Synonym: Time-consuming

Exact (1.15)...

Synonym: Precise

Mistakes (1.34)...

Synonym: Bugs

Help (1.35)...

Synonym: Aids

Now refer back to the text and find antonyms for the following words.

6. Ambiguously (1.5)...

- Antonym: Clearly

7. Specific (1.6)...

- Antonym: General

8. Partially (1.39)...

- Antonym: Completely

6. Word Forms: First, choose the appropriate form of the words to complete the sentences. Then check the differences in meaning in your dictionary.

Procedure, proceed, proceeding

- a) The machine carries out the...procedure...which the programmer gives it.
- b) You should ...proceed...with care when using a calculator.

Program, programmer, programmed, programming

- a) I would like to ...program...in COBOL.
- b) There were quite a few errors in my ...program...
- c) My calculator is ...programmed...; it plays a tune on the hour.
- d) Fortran is one of the many ...programming... languages available on the market.
- e) Computer ...programming... is a new field of study at the university.
- f) He is a good ...programmer... because he always constructs algorithms for his problems.

Relationships, Relate, Related

- a. The first two steps in your program are not ...related...
- b. In a flowchart, the ...relationship...between events is shown by means of connecting arrows.
- c. Assembler is one example of a machine ...related...

Code, coding

- a. Do you have any ...coding...sheet left.
- b. I have to ...code...my program.
- c. Assembler is one example of a machine ...code...

Printer, Printing, Print, Printed

- a. ...Print...your name and address in block letters.
- b. ...Printing...was introduced by Gutenberg in Germany.
- c. The quality of the ...printed...output from a daisy wheel printer is superior to that from a dot matrix.
- d. ...Printers...provided a hard copy of the results of data processing operations.

Answer:

- 1.
 - a) procedure
 - b) proceed
- 2.
 - a) program
 - b) program
 - c) programmed
 - d) programming
 - e) programming
 - f) programmer
- 3.
 - a. related
 - b. relationship
 - c. related
- 4.
 - a. coding
 - b. code
 - c. code
- 5.
 - a. Print

- b. Printing
- c. printed
- d. Printers

7a. Content Review: Try to think of a definition for each of these items before checking them in the Glossary. Then complete the following statements with the appropriate words. Make sure you use the correct form, i.e. singular or plural.

Special forms which are usually used for writing programs are called ...coding sheets...

Another word for program errors is ...bugs...

A number of steps used in solving a program is called a ...algorithm...

A machine which is incapable of thinking but follows instructions is called a ...robot...

A ...flowchart... is either a group of exact sentences to solve a problem or a block diagram.

Answer:

Special forms which are usually used for writing programs are called coding sheets.

Another word for program errors is bugs.

A number of steps used in solving a program is called an algorithm.

A machine that is incapable of thinking but follows instructions is called a robot.

A flowchart is either a group of exact sentences to solve a problem or a block diagram.

7b. Control Review: Solving a problem is a process involving various steps. Complete the following diagram to show the sequence of these steps.

[Insert a flowchart diagram showing the sequence of steps in problem solving.]

8. Focus Review: Focus On: Cause and effect/result. The following sentences were taken from the text on 'Steps in Problem Solving.' While reading these sentences, underline the cause once, the effect/result twice, then circle the cause-effect/result marker.

If the programmer is using a terminal instead of cards to enter his instructions, he can, with the aid of a few commands, store the program in the memory of the computer and get a printout.

The computer will follow the instructions in the program to the minutest details.

Therefore, one can say that the computer is a robot.

Answer:

If the programmer is using a terminal instead of cards to enter his instructions, he can, with the aid of a few commands, store the program in the memory of the computer and get a printout.

Cause: Using a terminal instead of cards

Effect/Result: Store the program in the memory of the computer and get a printout

The computer will follow the instructions in the program to the minutest details.

Therefore, one can say that the computer is a robot.

Cause: The computer following instructions in the program

Effect/Result: One can say that the computer is a robot.

LECTURE # 20

1. Main Idea: Which statement best expresses the main idea of the text?

- a. Predictions are absolute and unchangeable.
- b. Condition-prediction relationships are not important in understanding the text.
- c. The text focuses on making predictions based on existing conditions.**
- d. Computers will never become obsolete due to rapid technology growth.

2. Understanding the Passage: Decide whether the following statements are true or false (T/F) by referring to the information in the text. Then make the necessary changes so that the false statements become true.

Predictions can be made without any knowledge of existing conditions. **(F)**

A necessary condition for a prediction to be made is expressed with the word "if." **(T)**

Condition-prediction relationships always use present tense verbs. **(F)**

The text discusses the absolute and unchangeable nature of predictions. **(F)**

The rate of computer technology growth will ensure that computers will never become obsolete. **(F)**

3. Locating Information: Find the passages in the text where the following ideas are expressed. Give the paragraph references.

The rate at which computer technology is growing. **(Paragraph 1)**

Why Dr. Hollerith needed to speed up the analysis of census data. **(Paragraph 2)**

The impact of the hammer's timing in drum printers. **(Paragraph 3)**

The role of microminiaturization in saving space. **(Paragraph 4)**

The potential replacement of chips with bubble memory. **(Paragraph 5)**

4. Contextual Reference: Look back at the text and find out what the words in bold typeface refer to.

It has been said that if transport technology had developed as rapidly as computer technology (1.1)...

Reference: Transport technology

Working for the U.S. Census Bureau, Dr. Hollerith realized that unless some means of speeding up the analyses of census data (1.2)...

Reference: Dr. Hollerith

If the hammer in train printers hits a little early or late (1.3)...

Reference: Hammer in train printers

Mainframes would still be occupying a lot of space if it weren't for microminiaturization (1.4)...

Reference: Mainframes

If computer technology continues growing at the rate it has (1.5)...

Reference: Computer technology

5. Understanding Words: Refer back to the text and find synonyms for the following words.

Rapidly (1.1)...

Synonym: Quickly

Develop (1.1)...

Synonym: Advance

Speeding up (1.2)...

Synonym: Accelerating

Replace (1.5)...

Synonym: Substitute

Trip (1.1)...

Synonym: Journey

Now refer back to the text and find antonyms for the following words.

6. Impossible (1.2)...

- Antonym: Possible

7. Complete (1.2)...

- Antonym: Incomplete

8. Certainly (1.1)...

- Antonym: Doubtfully

6. Word Forms: First, choose the appropriate form of the words to complete the sentences. Then check the differences in meaning in your dictionary.

Rapid, rapidly

a) The computer technology industry is advancing ...rapidly...

Speed, speeding

a) The means of ...speeding up... the analysis of census data were crucial.

Absolute, absolutely

a) Predictions are not ...absolute...; they can change based on existing conditions.

Probable, probability

a) There is a high ...probability... that bubble memory will replace chips.

Predict, prediction

a) Making a ...prediction... about future technology growth is challenging.

Answer:

1.

a) rapidly

2.

a) speeding

3.

a) absolute

4.

a) probability

5.

a) prediction

7a. Content Review: Try to think of a definition for each of these items before checking them in the Glossary. Then complete the following statements with the appropriate words. Make sure you use the correct form, i.e. singular or plural.

A prediction is a statement about a particular subject which is related to a prior condition being fulfilled. In other words, it is an inference in which we tell in advance what we think will happen in the future.

In the context of the text, a condition-prediction relationship is when a statement of condition is preceded by "if," and it relates to the events of the prediction that will happen in the future.

One of the primary indicators for making predictions is the rate at which computer technology is growing.

Dr. Hollerith's work highlighted the necessity of speeding up the analysis of census data, showing the importance of condition-prediction relationships.

Microminiaturization played a crucial role in saving space occupied by mainframes.

7b. Content Review: Problem 1 Study the following flowchart, which shows the procedure followed in calculating an employee's salary. In the following paragraph based on the flowchart above, fill in the blanks with the proper connectives. Use these words: but, that is, then, if, to begin with, after, first, finally, next, before, and in other words. In calculating an employee's salary, a computer must go through a number of operations in a logical manner.it must read the number of hours worked and the rate of pay for each hour worked. it must calculate the gross salary; multiply the hours work by the rate of pay for each hour worked.....doing these two operations it must find out whether the employee has worked overtime or not.

Answer:

In calculating an employee's salary, a computer must go through a number of operations in a logical manner. To begin with, it must read the number of hours worked and the rate of pay for each hour worked. Then, it must calculate the gross salary; first, it must multiply the hours worked by the rate of pay for each hour worked. Next, it must find out whether the employee has worked overtime or not. Finally, after doing these two operations, it must determine whether the employee has worked overtime or not.

LECTURE # 21

In the context of writing, what is rhetoric primarily concerned with?

- a. Grammar and syntax
- b. The choice of words and their effective arrangement**
- c. Composition and paragraph structure
- d. Punctuation and spelling

Which part of speech is concerned with variations in the form of words when used in different constructions?

- a. Noun
- b. Pronoun
- c. Adjective
- d. Verb**

What is the importance of knowing the rules of grammar, according to the text?

- a. To complicate writing
- b. To make writing less precise
- c. To communicate thoughts successfully**
- d. To eliminate creativity in writing

How many categories does grammar classify words into, according to the text?

- a. 4
- b. 5
- c. 6
- d. Many**

What is a relative adverb, as described in the text?

- a. Part adverb and part pronoun
- b. Part adverb and part adjective
- c. Part adverb and part preposition
- d. Part adverb and part conjunction**

In what way is composition defined in the text?

- a. As the arrangement of paragraphs
- b. As the choice of words
- c. As "putting together" of parts to form a whole**
- d. As the use of punctuation

What does the text say is essential to all writing?

- a. Punctuation
- b. Grammar
- c. Syntax
- d. The arrangement of parts into a whole**

Which of the following is NOT mentioned as one of the tools of writing in the text?

- a. Knowledge of grammar and syntax
- b. Vocabulary and conventions of use
- c. Spelling and pronunciation**
- d. Knowledge of punctuation

Why does good writing depend on more than just grammatical correctness?

- a. Because grammar is not important
- b. Because sentences should be very long
- c. Because control over sentences is crucial**
- d. Because spelling is more important

Which kind of sentence includes one independent statement and at least one dependent statement?

- a. Simple sentence
- b. Compound sentence
- c. Complex sentence**
- d. Compound-complex sentence

How is a simple sentence defined in the text?

- a. As a short sentence
- b. As a sentence with complex ideas
- c. As a sentence with one subject and one verb**
- d. As a sentence without a subject

Which type of sentence is composed of two or more independent statements/clauses?

- a. Simple sentence
- b. Compound sentence**
- c. Complex sentence
- d. Compound-complex sentence

What do dependent words like "although," "because," and "when" introduce in a sentence?

- a. Independent clauses
- b. Compound sentences
- c. Dependent clauses**
- d. Prepositions

Which of the following is a compound-complex sentence?

- a. The cat slept while the dog barked.
- b. When it rained, I stayed indoors, and I read a book.**
- c. She went to the store, but she forgot her wallet.
- d. Running fast is important, and it keeps you healthy.

What is the purpose of using joining words like "and" or "but" in compound and compound-complex sentences?

- a. To add complexity to sentences
- b. To create simple sentences
- c. To join independent clauses together**
- d. To indicate dependent clauses

Which of the following is NOT a joining word mentioned in the text?

- a. Although
- b. Or
- c. While
- d. Soon**

How can you distinguish a complex sentence from a simple sentence?

- a. By its length
- b. By the presence of dependent clauses**
- c. By its subject and verb combination
- d. By its punctuation

What is the function of a semicolon in a compound sentence?

- a. To separate independent clauses without a coordinating conjunction**
- b. To separate dependent clauses
- c. To end the sentence
- d. To indicate a question

What punctuation is used to separate items in a list within a sentence?

- a. Hyphen
- b. Comma**
- c. Colon
- d. Semicolon

Which sentence is an example of a compound sentence?

- a. He went to the store.
- b. She stayed home and watched a movie.
- c. They arrived late, so the show had already started.**
- d. The teacher was strict but fair.
