We offer Project help for ENG525-526 as well.

SHORT QUESTIONS

1. Differentiate between Gender and Sex.

Sex refers to biological differences between males and females, while gender refers to socially and culturally constructed roles, behaviors, and identities.

2. Define Genderlect.

Genderlect refers to the distinctive language styles and communication patterns associated with different genders.

3. Differentiate between Sociolinguistics and Sociology of Language.

Sociolinguistics studies how language is affected by society, while sociology of language studies how language influences social structures and relationships.

4. Define Linguistic Competence and mention its components.

Linguistic competence is a speaker's knowledge of language rules.

- Phonology
- Morphology
- Syntax

5. Define Communicative Competence and mention its components.

Communicative competence is the ability to use language effectively in real situations.

- Grammatical Competence
- Sociolinguistic Competence
- Discourse Competence
- Strategic Competence

6. What are the two forms of Communicative Competence?

- Linguistic Competence
- Pragmatic Competence

7. Define Agency, Identity, and Language Use.

Agency is a person's ability to act independently, identity is one's sense of self, and language use reflects and shapes both.

8. Explain Co-construction of Identity.

Co-construction of identity refers to the process through which individuals develop and negotiate identities through interaction with others.

9. Explain the Theory of Structuration (Giddens).

Giddens' theory states that social structures influence human actions, while human actions also create and modify social structures.

10. Define Bourdieu's Notion of Habitus.

Habitus refers to the beliefs, attitudes, and behaviors individuals acquire through social experiences and cultural background.

11. Explain the Sapir-Whorf Hypothesis (Linguistic Relativity).

The Sapir-Whorf Hypothesis suggests that language influences how people think, perceive, and understand the world.

12. Define the Classical Theory of Concept.

The Classical Theory states that concepts are defined by a set of necessary and sufficient features shared by all members of a category.

13. Explain Micro-Macro Meaning in Critical Applied Linguistics (CAL).

Micro level focuses on individual interactions, while macro level examines broader social, political, and cultural influences on language.

14. Mention the Domains of Critical Applied Linguistics.

- Identity
- Ideology
- Power
- Discourse
- Inequality

15. What are the Types/Names of Knowledge?

- Declarative Knowledge
- Procedural Knowledge
- Conditional Knowledge

16. What are the Types/Kinds of Meaning?

- Conceptual Meaning
- Interpersonal Meaning
- Textual Meaning

17. What are the Types of Language Transfer?

- Positive Transfer
- Negative Transfer
- Zero Transfer

18. Define Language Attrition.

Language attrition is the gradual loss of language skills due to lack of use, reduced exposure, or language replacement.

19. Mention the Causes of Language Attrition.

- Lack of language use
- Reduced exposure to the language
- Influence of another dominant language

20. Mention the Types of Language Attrition.

- First Language Attrition
- Second Language Attrition
- Individual Attrition
- Community Attrition

21. Define Grammatical Attrition.

Grammatical attrition is the loss or weakening of grammatical knowledge and structures in a language over time.

22. What are the three names/types of Linguistic Relativity?

- Sapir-Whorf Hypothesis
- Linguistic Determinism
- Linguistic Relativity

23. Explain the Processes of Language Planning (Haugen's Model).

- Selection
- Codification
- Implementation
- Elaboration

These steps help develop and standardize a language.

24. Define CALL and mention its types.

CALL (Computer-Assisted Language Learning) refers to the use of computers in language teaching and learning.

- Behavioristic CALL

- Communicative CALL
- Integrative CALL

25. Mention the Types of CALL Activities.

- Drill and Practice
- Language Games
- Simulations
- Problem Solving
- Writing Activities

26. Define CMC (Computer-Mediated Communication).

CMC is communication that occurs through digital technologies such as computers, mobile devices, and the internet.

27. Mention three ways computers are used in the classroom.

- Presenting instructional materials
- Conducting online assessments
- Supporting collaborative learning

28. Mention three advantages of teaching and learning through technology.

- Increased student engagement
- Easy access to information
- Improved communication and collaboration

29. Mention three points of Teacher Education.

- Subject knowledge development
- Teaching skills training
- Professional growth and reflection

30. What are the Types of Vocabulary?

- Receptive Vocabulary
- Productive Vocabulary
- Academic Vocabulary

31. Explain Memory and Inference.

Memory is the mental ability to store and recall information, while inference is the ability to understand implied meanings based on context and prior knowledge.

32. Define Speech Production.

Speech production is the process of creating spoken language through cognitive planning, articulation, and pronunciation of sounds.

33. Define Tags and mention their types.

Tags are short questions added at the end of statements to confirm information.

- Positive tags
- Negative tags

34. Define Affective Tags and mention their types.

Affective tags express the speaker's attitude or emotion.

- Positive affective tags
- Negative affective tags

35. What are the Forms of Speech?

- Direct Speech
- Indirect Speech
- Reported Speech

36. Define Discourse Analysis.

Discourse analysis is the study of language use beyond sentence level, focusing on meaning, context, and communication patterns.

37. Explain Ellipsis and Substitution.

Ellipsis is the omission of words understood from context, while substitution replaces words or phrases with shorter forms to avoid repetition.

38. Define Intonation Units.

Intonation units are chunks of speech marked by a single pitch contour used to organize spoken discourse and improve clarity.

39. Mention three Types of Multimodal/Multilingual Texts.

- Print-based texts
- Digital texts
- Visual texts

40. Define Interactional Sociolinguistics.

Interactional sociolinguistics studies how context, culture, and social norms influence meaning in conversation.

41. Mention Ferguson's Three Categories.

- Diglossia
- Bilingualism
- Multilingualism

42. Mention Pennycook's Features in Critical Applied Linguistics.

- Power and inequality in language
- Ideology in discourse
- Social justice in language use

43. Explain Tollefson's Theory/Model.

Tollefson's model emphasizes that language planning is influenced by political, social, and economic power structures, not just linguistic factors.

44. Mention the Linguistic Components proposed by Noam Chomsky.

- Syntax
- Semantics
- Phonology

LONG QUESTIONS

1. Differentiate between Gender and Sex with examples.

Sex refers to biological differences such as male and female anatomy, while gender refers to socially constructed roles and behaviors. Sex is natural and universal, whereas gender varies across cultures. For example, being male or female is sex, but masculinity and femininity are gender roles. Gender is influenced by society, culture, and expectations. Both concepts interact but are not the same.

2. Discuss the components of Communicative Competence.

Communicative competence includes the ability to use language effectively in real communication. It has four main components:

- Grammatical competence
- Sociolinguistic competence
- Discourse competence
- Strategic competence

These components help learners understand rules, context, and meaning in communication. Together, they ensure effective and appropriate language use.

3. Explain the Theory of Structuration by Anthony Giddens.

Giddens' Structuration Theory explains the relationship between individuals and society. It states that social structures shape human behavior, but human actions also create and change these structures. Language use is influenced by social rules but also reshapes them over time. This theory connects individual agency with social systems. It highlights the dynamic nature of social interaction.

4. Discuss Bourdieu's Concept of Habitus and its role in language use.

Habitus refers to internalized habits, attitudes, and dispositions developed through social experiences. It influences how individuals perceive and use language in society. According to Bourdieu, language practices reflect social class and cultural background. Habitus shapes communication style, accent, and choice of words. It links language use with social identity and power relations.

5. Explain the Sapir-Whorf Hypothesis and the concept of Linguistic Relativity.

The Sapir-Whorf Hypothesis suggests that language influences thought and perception. Linguistic relativity means that speakers of different languages perceive the world differently. Strong version claims language determines thought, while weak version suggests influence. It shows how language shapes cultural understanding. This theory highlights the connection between language, cognition, and culture.

6. Discuss the Domains of Critical Applied Linguistics.

Critical Applied Linguistics examines language in relation to power and society. Its domains include:

- Identity
- Ideology
- Power relations
- Discourse analysis
- Social inequality

It focuses on how language reflects and maintains social structures. The field promotes awareness of language-related injustice.

7. Explain the relationship between Agency, Identity, and Language Use.

Agency refers to the ability of individuals to act independently in communication. Identity is shaped through language use in social contexts. Language reflects both personal and social identity. Individuals use language to express who they are and negotiate roles. Agency allows speakers to construct and transform identity through interaction.

8. Discuss Co-construction of Identity in language interaction.

Co-construction of identity refers to how identities are formed through interaction between speakers. It is not fixed but developed during communication. People adjust their language depending on context and audience. Identity emerges through collaboration in discourse. This shows that identity is dynamic and socially constructed.

9. Explain Language Attrition, its causes, and types.

Language attrition is the loss of language ability due to lack of use. Causes include reduced exposure, dominance of another language, and aging. Types include first language attrition and second language attrition. It may occur at individual or community levels. Continuous use is necessary to maintain language proficiency.

10. Discuss Haugen's Model of Language Planning.

Haugen's model includes four stages of language planning:

- Selection
- Codification
- Implementation
- Elaboration

It explains how languages are standardized and developed. Selection chooses language forms, codification standardizes rules, implementation spreads usage, and elaboration expands functions. It is widely used in sociolinguistics.

11. Explain CALL (Computer-Assisted Language Learning), its types, and activities.

CALL refers to the use of computers in language learning and teaching. Its types include behavioristic, communicative, and integrative CALL. Activities include drills, simulations, games, writing tasks, and interactive exercises. It enhances learner engagement and autonomy. CALL supports both practice and communication skills.

12. Discuss the role of computers in language teaching and learning.

Computers support language learning through interactive tools and resources. They provide access to authentic materials and online communication. Teachers use computers for instruction, assessment, and feedback. Learners benefit from flexibility and self-paced learning. Technology improves engagement and language exposure.

13. Explain Memory and Inference in language learning.

Memory helps learners store and recall vocabulary, grammar, and experiences. Inference allows learners to understand meaning from context without direct explanation. Both
