

Q. Any six trends of research in ELT/ 1)**English Language Curriculum, Assessment, and Reform** :What should be taught to students on different levels? How can school/university programs be organized to optimize the English Language Learning development of students?/2)**Individual Differences** L2 Motivation, anxiety, attitudes, aptitudes are powerful contributor to the learner's ability to learn a language./3)**Learner Autonomy & Self Efficacy**The learner's autonomy is very much important to make him a successful learner./4)**Course and Material Development** It is according to the needs of students and changing trends of the use of English in various social and Academic fields. Not only development but the division is also a popular area of research./5)**Learning and Teaching Strategies** They are also very much important in various contexts./6)**Error Analysis** It includes systematic methods to analyze learners' errors. It also includes identifying, describing, and explaining student's errors.

Q. Relationship between language and identify with reference to ELT.Language can be defined as a shared set of verbal codes and as a generic, communicative phenomenon especially in descriptions of instructions. In ELT, teachers and students use both spoken and written language to communicate. Students learn to read and write - learn the discourse of academic disciplines (academic literacies). When it comes to the discussion of language and education, both definitions are important./ Relationship between Language and Education /

Q. What kind of information is provided by curriculum? /Q.What questions does the curriculum address? What is the purpose of educating students in this particular institution / educational level? /What kinds of knowledge should students is taught? /What kinds of learning experiences do the students need to go through in order to acquire the knowledge and achieve our purposes?/What kinds of teaching methods should be used to help students acquire the knowledge and achieve our purposes?/How should these learning experiences be organized?/By answering these questions.

Q:Conversational Analysis (CA) Conversation is discourse mutually constructed and negotiated in time between speakers. It is usually informal and unplanned (Cutting, 2010). A conversation can be viewed as a series of speech acts - greetings, inquiries, comments, congratulations, invitations, requests, refusals, accusations, etc. Cook (1989: 51) says that talk may be classed as conversation when:/ (1) It is not primarily necessitated by a practical task.(2). Any unequal power of participants is partially suspended.(3). The number of the participants is small. (4). Turns are quite short. (5). Talk is primarily for the participants not for an outside audience .(cited in Cutting, 2010) /Based on this, classroom transactions, doctor-patient interviews and TV quiz shows are not conversations because they do not have all the properties listed here. For example, teacher-pupil exchange carries an unequal power balance./The analysis of natural conversation in order to discover what the linguistic characteristics of conversation are and how conversation is used in ordinary life is called conversational analysis (CA). It includes the study of how speakers decide when to speak during a conversation, how the utterances of two or more speakers are related.

Q. Elements of CA: CA introduced a continuing major theme of SLA research: 'the influence of L1 on L2'. It involves predicting and explaining learner problems based on the comparison of L1 and L2 to determine similarities and differences. It is influenced by the theories of Structuralism and Behaviorism. The focus of CA is on the surface forms of both L1 and L2 systems and on describing and comparing the languages one level at a time – generally contrasting the phonology of L1 and L2 first, then morphology, and then syntax. Lexicon and discourse usually receive little attention. Following behaviorist view, CA assumed that language acquisition essentially involves habit formation in a process of Stimulus – Response – Reinforcement (S-RR). Assumption - transfer of elements acquired in L1 to the target L2. The process of CA involves analyzing roughly comparable segments of the languages for elements which are likely to cause problems for learners. Effective teaching would concentrate on areas of differences and prepare materials accordingly

.Q. Socio- contextual and relational factors: There are different theories on relationship between language and society./Social structure may either influence or determine linguistic structure and/or behavior (AgeGrading).//Linguistic structure and/or behavior may either influence or determine social structure (Whorfian hypothesis)./Language and society may influence each other (Marxist View)./There is no relationship at all between linguistic structure and social structure (Chomsky).

Q. Factors of language knowledge and awareness teacher should know before he/she starts teaching.

***Linguistics Factors** • Teacher needs to understand the system and function of the second language and the differences between L1 and L2 of the learner./• A teacher should know how to speak and understand a language. He/she should attain the technical knowledge required to understand and explain the system of that language - its phonemes, morphemes, words, sentences and discourses structures. /**Learning Processes** • How can a person ensure success in language learning? • What cognitive processes are utilized? • What kinds of strategies are available to a learner and which ones are optimal? /**Age and Acquisition** • To know about differences between children and adults' learning process. It is a common observation that children are better language learners than adults. /**Instructional Variables** • What are the effects of varying methodological approaches, textbook, materials teacher.

Q. Types of reference Major Forms of Reference **Endophoric Reference (Endophora)** - where the interpretive source lies in the co-text. An Endophoric reference can be divided into two sub-types:**Anaphoric Reference (Anaphora):** where the referent lies in the prior text, e.g. respect a man, he will do the more./**Cataphoric Reference (Cataphora):** where the referent lies in the text to come, e.g. When I met her, Mary looked ill./**Exophoric Reference (Exophora):** where interpretive source lies in context, e.g. (Mary is standing there) I like her. // **Role of a Learner** : Negotiator – Between the self, the learning process, and the object of learning.///Contributor - Learner is not a passive recipient of knowledge // **Roles of a Teacher:** Facilitator - between all participants in the classroom, and between these participants and the various activities and texts.//Participant - within the learning - teaching group. //Organizer, guide.//Researcher, learner//Needs Analyst, counselor.

Q.Role of a teacher: Teacher as an organizer: Within the classroom, teacher's role may change from one activity to another. Teacher's role such as prompter, resource, or tutor may well fulfill this concept//**Resource:** Students do not know everything so they need the teacher's help as a resource. Teachers give information, such as teaching grammar, explaining vocabulary, Students might ask how to say or write something or what a word or phrase means. They might want to know information in the middle of an activity or they might want information about where to look for a book or a website. This is where a teacher can be one of the most important resources they have.//**Controller** They are in charge of the class and of the activity taking place. Controllers take the role, telling students things, organize drills, read aloud, and exemplify the other qualities of a teacher-fronted classroom.//**Prompter:** A Teacher should hold back and let the students work things out for themselves or instead nudge them forward in a supportive way. Controller makes announcements, orders to be restored, provide explanations in a question and answer session. If we opt for the latter we are adopting some kind of a prompting role. Being a prompter, teacher will occasionally offer words or phrases, suggest that the students say something, or what could come next in a paragraph. E.g., often they can prompt students in monolingual groups to speak English rather than using their mother tongue

Q:Qualities of manager in a classroom Classroom management refers to teachers' behavior that facilitates learning. A well-managed classroom increases learning. Effective classroom managers are those who understand and use specific techniques and most effective instructional strategies. Effective teachers appear to be effective with students of all levels, irrespective of diversity in their classes. Even if the school they work in is highly ineffective, individual teachers can produce powerful gains in student learning.

Q. Course rationale : Developing a course rationale/ Describing entry and exit levels/ Choosing course content/ Sequencing course content Planning the course content/ Preparing the scope and sequence plan/ Course Rationale -- starting point in course development.

Q:Concordances: are software programmes which allow users to search thousands, and in some cases millions, of words of a corpus for in-context occurrences of particular morphemes, words, or phrases. Concordance can support language learning in several important ways: for both teachers and learners.

For teachers, concordance can offer input for materials development and classroom teaching, and provide a source of lexico - grammatical information about naturally occurring language. **For learners**, it can provide

opportunities for inductive learning, a resource for error analysis and correction, and opportunities for 'serendipity learning'. Further, concordance tools may help us investigate lexical and grammatical patterns of academic language as it is actually used in written and spoken forms. Moreover, concordancing is an alphabetical list of words// ---

--**Q:Corpora:** Language corpora are collections of spoken or written text, created for the purposes of linguistic analysis or description. Specially designed software along with digitalized corpora can allow researchers, materials developers, classroom teachers, and language learners to examine English closely in a range of contexts

.**Types of Corpora:** **Monolingual Corpus** is texts in one language only. Usually tagged for parts of speech and is used by a wide range of users for various tasks from highly practical ones, e.g., checking the correct usage of a word or natural word combinations, to scientific use, e.g., identifying frequent patterns or new trends in language./ **Parallel Corpus** is a corpus consisting of the same text in two languages. The texts are aligned (matching segments, usually sentences are linked). The corpus allows searches in one or both languages to look up translations. The user can then observe how the search word or phrase is translated.

Multilingual Corpus contains texts in several languages which are all translations of the same text and are aligned in the same way as parallel corpora. Sketch Engine allows the user to select more than two aligned corpora and the search will display the translation into all the languages simultaneously./**Learner Corpus** is texts produced by the learners of a language. Study the mistakes and problems learners have while learning an L2. Sketch Engine can use both error and correction annotation. It provides an interface to search for the error itself, error correction, and error type or for a combination of the three options. /**Diachronic Corpus** contains texts from different periods. It is used to study the development or change in language. It's sketch Engine allows searching the corpus as a whole or only includes selected time intervals into the search./

Q. Usage of corpus The use of corpus contributes to language teaching in a number of ways.//The insights derived from native-speaker corpora contribute to a more accurate language description, which then feeds into the compilation of pedagogical grammars and dictionaries. /The analysis of learner language provides insights into learner's needs in different contexts, which then form learner dictionaries and grammars.//Research on learner corpora also contributes to our understanding of language learning processes //Corpora of language teaching course books enable the examination of the language to which learners are exposed. //Facilitate the development of more effective pedagogical materials. //Corpus-based research has also revealed the inadequacy of many of the rules that still dominate ELT materials.//Corpus research in English language teaching has led to real innovations in material design and classroom practice. –

---**Q: Virtual worlds** (VW) are three dimensional environments in which you can interact with others and create objects as part of that interaction. One can appear as an avatar (representing a person) in the virtual world. Then You can communicate with another person using text, sound, graphical images and gesture. Some of the more advanced worlds allow you to use voice or touch. For the purposes of language teaching, VWs are 3 Dimensional, web-based, network-based, simulated worlds. In order to learn a second language (L2), learners need to become proficient in four areas of language: Reading (interactions with objects and text chat), writing (text chat and object creation), speaking (voice chat), and listening (interactions with objects, voice chat)

. **Q. Functional Notational Approach:** People who study and use a language are mainly interested in how they can do things with language - how they can make meanings, get attention to their problems and interests. They are only interested in the grammatical structure of the language as a means to getting things done.

Objectives>To explain language in terms of how people use it to live.//Adopts a semantic and pragmatic orientation inside the grammar.//It does not see semantics and pragmatics as extra levels of organization but sees them as integral to the organization of the grammar.//Communicative meanings that learners would need in order to express themselves and to understand others effectively.

Q: Disadvantages of teaching grammar through text: The difficulty of the text, especially an authentic one, may be counter-productive.//The alternative is to use simplified texts , may give a misleading impression as to how the language item is naturally used, again defeating the purpose of using texts.//Not all texts will be of equal interest to students. //Students who want quick answers to simple questions may consider the use of texts a lengthy route, and would prefer a quicker, more direct route instead.//No single method of grammar presentation is going to be appropriate for all grammar items, nor for all learners, nor for all learning contexts.

Q: Use of pronoun and noun as a silent feature of African English: **property** is use of generic nouns or pronouns in regionally characteristic ways. E.g., he is a real/whole person [i.e. an adult]. Other examples include the use of 'boy' by girls for their friends and 'footing' to mean 'walking' in Zambia. **structure** exhibits plural of nouns which in Inner-Circle varieties are in the mass or non-count category.

Q: Define teaching In education, teaching is the concerted sharing of knowledge and experience, which is usually organized within a discipline and, more generally, the provision of stimulus to the psychological and intellectual growth of a person by another person or artifact.-----

Q: South Asia grammar's characteristics In grammar, the distribution of articles remains an open question. **Phonological characteristics of south Asian English** In phonology, there are various segmental qualities that are distinctive for SAE. //Most diphthongs are pronounced as simple vowels. //In some sub-varieties the distinction between tense and lax vowels (e.g., those of deep Versus dip, seat Versus sit, and boot Versus book) is not made. -----

--Q: The Deductive Approach It is rule driven grammar learning approach. It starts with the presentation of rules to students, which is followed by examples for explanation. Students then practice those rules. Learners engage themselves with rules through the study and manipulation of examples. A teacher - centered approach to present new content. **Example:** The form and use of the 'third conditional' is explained to learners; then they have a gap-fill exercise to complete; then prepare their own examples. // **Use of DA:** It may be suitable, with lower level learners who need a clear base from which to begin with, or with learners who are accustomed to a more traditional approach and lack the training to find rules themselves. When dealing with highly motivated students for preparing students to write exams. // **Advantages of DA:** It gets straight to the point, and can therefore be time - saving. Many rules can be explained quickly. This allows more time for practice and application. /It respects the intelligence and maturity of many, especially adult, students and acknowledges the role of cognitive processes in acquisition. // **(Criticism of DA (Adamson))** Teaches grammar in an isolated way. Little attention is paid to meaning. Practice is often mechanical.) -----

-QUESTION ABOUT RULES: Prescriptive Rule: A principle or order which guides behavior; how things are to be done, etc. Example: Use 'shall' for the first person and 'will' for second and third persons.

// **Descriptive Rule:** The usual way that something happens - what speakers of the language actually do say than what they should do. Example: You do not normally use 'the' with proper nouns referring to people. // **Pedagogic Rules:** Rules of form and rules of use. // **Attributes of a Good Rule:** Clarity and simplicity.

*Familiarity - make use of concepts already familiar to the learner.

Relevance - should answer only those questions that the student needs answered. *Mention limitations – on the use of a given form. It is rule-discovery path approach.

Q: An inductive approach starts with examples and asks learners to find rules. It is more learner-centered. Instead of explaining a given concept and following its explanation with examples, the teacher presents students with many examples showing how the concept is used. The intent is for students to "notice" through examples and how the concept works. The teacher would present the students with a variety of examples for a given concept without giving any preamble about how the concept is used. It is hoped that students will notice how the concept is to be used and determine the grammar rule. As a conclusion to the activity, the teacher can ask the students to explain the grammar rule as a final check that they understand the concept. In contrast with the deductive method, inductive instruction makes use of student "noticing". It is an upward process of thought – leads to principles. /

/Q. Disadvantages of Inductive App It may make learning process slow. The time taken to work out a rule may be at the expense of time spent in putting the rule to some sort of productive practice. Students may hypothesize the wrong rule - a danger where there is no overt testing of their hypotheses. It can place heavy demands on teachers in planning a lesson; need to select and organize the data carefully so as to guide learners to an accurate formulation of the rule. It may frustrate those students who prefer simply to be told the rule. //

Q. Procedures of situational analysis: Oral approach is also known as Structural - Situational Method and Situational LT. It emerged in Europe and the United States of America in 1920s and 1930s. This method was an attempt by Harold Palmer and Hornby to present language items in a systematic way in the classroom. Language was viewed as a system of structurally related elements i.e. phonemes, morphemes, words, structures, and sentence types. These elements were must for the learners to master to encode and decode the meaning.

Objectives To develop oral proficiency Focus on vocabulary control The use of mother tongue is avoided
Reading and writing are not neglected Grading the grammatical items

Q. Motivation Motivation involves the factors behind human actions; ‘why people think and behave as they do’ (Dörnyei, 2005, p. 1). Dörnyei, et al. further elaborate that motivation deals with ‘the direction and magnitude of human action, that is, the choice of a particular action, the persistence with it and the effort expended on it’. It arises from a purpose and then guides human actions. The concept of motivation seems to be a difficult and complex area to define. The multidimensional nature and wide range of motives for human behavior make it impossible to develop a comprehensive theory of motivation. A kind of cognitive stimulation, which encourages somebody to make ‘sustained intellectual and/or physical effort’ in order to achieve a goal (Williams and Burden, 1997, p. 120). Similar to its important contribution in influencing human behavior, motivation also plays a key role in successful educational learning.

Q. L2 motivation self wla question= Components of motivational self system: 1. Ideal L2 self • Portrays a range of qualities and aspirations one would like to own.

Underlines the L2- related image of one’s ideal person. //Can be an influential motivating factor provided the person one inspires to become is proficient in L2.//Relies on ‘the desire to reduce the discrepancy between [their] actual and ideal selves.’//The promotion of a hoped-for future self’//Includes both ‘integrative and internalized instrumental motives’ (Dörnyei, 2009) // **2. Ought-to L2 Self** :One’s inclination to develop certain qualities or skills to prevent negative and feared outcomes in the future.//Primarily extrinsic and prevention in nature.//It also incorporates those aspects of an individual’s future self which other people (such as parents, family, friends) are perceived to desire for her/him – e.g., obligations. //May play a more prominent role in Asian L2 contexts.

Q: Define Pidgin and creol... Pidgin is a variety of language without native speakers which arises in a language contact situation and operates as a lingua franca. Pidgin language, later on, can have native speakers, but that pidgin is called creole/----

Q: Code Switching and Code Mixing There is difference between code switching and code mixing. Some linguists (Kachru, 1983; Singh, 1985; Sridhar & Sridhar, 1980) reserve the term code switching for inter-sentential switches only, and instead prefer to use code-mixing for intra-sentential switches. Code mixing requires the integration of the rules of the two languages in the discourse. Muysken (2000) avoids using the term code switching as a cover term because they believe that switching suggests alternation only, as in the case of switching between turns or utterances, but not necessarily insertion. Instead, they prefer to use code-mixing as a hyponym to cover both code switching (intra-sentential only) and borrowing. Kinds of Code-switching//**1. Situational Code-Switching** It is a tendency to use different codes in different situations. When code switching is constrained by where speakers happen to be, it can be called ‘domain-based’ or ‘situational code switching’. When it is constrained by who a speaker happens to be talking to, it can be called addressee-based.//**2. Metaphorical Code-switching** Each of the codes represents a set of social meanings is called metaphorical code switching. //**Reasons for Code Switching:** **To show identity with a group** Lack of facility/vocabulary** Lack of register** To seek attention (advertisements)**To express emotions and amusement .—

Q. Status of English in Pak. 5 Mark. English remained a foreign language in India for several decades after independence. Kachru defines modern South Asian English (SAE) as ‘the educated variety of South Asian English’, with, ‘varieties within this variety’. The passage of the Official Languages Act 1967 made English co-equal with Hindi ‘for all official purposes of the union, for Parliament, and for communications between the union and the states’ (Ferguson, 1996: 31). One important aspect of the value of English in South Asia is its capacity to provide neutralization. Choosing a given code in a multilingual context asserts one or more identities, for example, of religion, caste, and educational attainment, in addition to signaling the message. Similar to India, in contemporary Pakistan, English continues to have a central position in the national life. –

Q. Approaches of need analysis Target-Situation Analysis (TSA) - focuses on the learner’s needs at the end of the course and target level performance.//**Present-Situation Analysis (PSA) - focuses on the learners’ competence concerning skills and language at the beginning of a course.//**Learning-Centered Approaches is a process of negotiation between individuals and society, the latter including syllabus, materials, teaching method, etc., and divide needs into necessities, lacks and wants.//**Strategy Analysis focuses on methods of learning i.e. preferred learning styles and strategies

Q. Limitations of conversational analysis : **Lack of systematicity - list of all adjacency pairs is not exhaustive. **Does not take into account pragmatic or sociolinguistic aspects of interaction. **May be coupled with discourse analysis and cultural approaches.

Q. 5 points regarding Difference ASPECTS OF discourse ANALYSIS: **Discourse as the social construction of reality.//**Discourse and socially situated identities//**Discourse and Performance: ‘a Discourse is a ‘dance’ //** While we say something, we also do it. //**Discourse and Intertextuality. //**Difference between spoken and written Discourse: Writing is more structurally complex; spoken discourse has its own complexity. //**Grammatical intricacy. ---

Q. CDA 5 tools discuss .CDA and Framing: The way in which the content of the text is presented to its audience, and the sort of perspective, angle and slant the writer or speaker is taking.//**Foregrounding:** What is chosen to emphasize.//**Backgrounding:** What is chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting.//**Presupposition:** Background knowledge, assumptions, attitudes and points of view that the text presupposes. //**Topicalization:** What has been put at the front of each sentence to indicate what it is about. //**Agency:** Who initiates the action, agent-patient relationship – who does what to whom? ,Who has the most authority and power in the discourse? What agents have been left out of sentences?

Q:Define critical discourse analysis? Critical Discourse Analysis: It studies and analyzes both spoken and written texts in order to investigate the discursive sources of power, dominance, bias and inequality, which govern language. CDA studies are becoming very popular. ** Major Issues Investigated in CDA //**The use of discourse in relation to social and cultural issues such as race, gender, politics, identity, ideology, etc. //**Why the discourse is used in a particular way and what are the implications of that kind of use?

//Q:Assumptions of CDA: •Language use is always social. •Discourse both reflects and constructs the social world. •Power relations are discursive. •Discourse does ideological work. •Discourse is historical. //•The link between text and society is mediated. Discourse is a form of social action.-----

-Q. Types of dialects: ** **Idiolect** – The speech variety of an individual speaker. ****Sociolect** – A variety or lect which is thought of as being related to its speaker’s social background rather than geographical background. E.g., in India, social system “caste” determines which variety of a language a speaker uses. Factors that contribute to bring variation in a Language : There are many factors to cause variation like social situation, occupation, age, geography, education, gender, social status/class, and ethnicity. -----

Q. Define Coherence... It refers to the relationship which links the meanings of utterances in a discourse. Coherence focuses on the unity of meaning. What is said or written should make sense in terms of people’s normal experience of things. The key to the concept of coherence (“everything fitting together well”) is not something that exists in words or structures, but something that exists in people. Not all relations among the various parts of a discourse are explicitly marked. Still, we are able to understand it because sociocultural and background knowledge. //**A: Could you give me a lift home? B: Sorry, I’m visiting my sister. ---

Q. COHERENCE types: ****Referential coherence** (consistency in who or what is being talked about)//****Temporal coherence** (when the events occur) • **Locational coherence** (where the events occur) ****Causal coherence** (why events happen).

Q.Word Stress Rules : To communicate clearly when you are speaking in English, it’s important to stress the correct syllables in each word. This is called word stress, which means pronouncing one syllable of a multisyllabic word with greater emphasis (stress) than the other syllables in the word. Here are four general rules to keep in mind about word stress as you practice pronunciation: --

Q: General Rules of Stress: A word stress is a manner in which stresses are distributed on the syllables of a word. It’s also called word accent. Word stress has different rules in every language. Before those rule there are few things to remember. Some general rules are:i. Only strong vowels are stressed (not weak vowels i.e. schwa: /ə/). If long vowel/diphthong or a vowel + coda appear in a syllable, that syllable is considered strong and will take the stress. //ii. Nouns and adjectives with two syllables With most adjectives and nouns with 2 syllable the stress on the first syllable.//iii. Verbs with two syllables With most verbs with two syllable, the stress is on the last syllable.//iv. Compound nouns In most compound nouns (a noun which is made up of two or more words), the word stress is on the first noun.

Q. Diglossia: Diglossic situation exists in a society when it has two distinct languages which show clear functional separation; that is, one is employed in one set of circumstances and the other is entirely different set. “High” Versus “low” variety of a language. /

/Q. Language and Culture: Ideology, variety, and culture define : Simpson defines ideology as "assumptions, beliefs, value- systems which are shared collectively by social groups". These concepts are dependent on language, because it is with the help of language that people express everything. The relationship of language and ideology has been explicitly studied in CDA-Fairclough defines ideologies are acquired, expressed and enacted with the help of language. He further contended that any variable structure of language is ideologically 'marked'. When it comes to ELT, an understanding of the relationship between language and culture is important for language learners, users and for all those involved in language education. Language is formed by culture, while culture is influenced by language. Without language, culture cannot be completely acquired nor it can be effectively expressed and transmitted and without culture, language cannot exist. Thus, culture shapes languages and language is also formed by it. Language is the medium of culture

Q. Define Linguistic imperialism: (3) Linguistic imperialism means the transfer of dominant language (and all the aspects of its culture) to the speaker of other languages. For instance, the transfer of aspects of English language to Urdu. Linguistic imperialism lingers not only in cultural spheres, but in ideological, social, political and economic practices as well. To Phillipson (1992) "Linguistics imperialism assumes the 'active promotion' of the language by the dominant class as an active expression of power of the powerful over the powerless". It is closely related to cultural imperialism, because it is language which acts as a tool to mediate or permeate imperialism. Linguistic imperialism is concerned with the study of 'linguistic hierarchizations'. It addresses the issues of why some languages come to be used more and others less.

Q: Incubation: It is about planning and preparation, may overlap with the incubation stage. In evolution stage, dreams, daydreams, unconsciousness, and random writing play an important role. Incubation creates an incoming wave of the subconscious that washes over the pages you will write...

Q. Novel As communication. According to Helton, Asamani and Thomas (1998), the benefits of novels are: Stimulate imagination. //Help students to identify the emotions of the characters so that they can learn how others cope with situations and problems similar to their own experiences.// Examination of moral attitudes, while developing communication skills. //Motivate students to become a lifelong readers.//Help them master the skills that will enable them to acquire information, process this knowledge, identify problems, formulate alternatives, and arrive at meaningful, thoughtful, effective decisions and solutions. // **Q. Importance of**

Writing poetry: Poems are made up of lines of words that do not usually reach the far side of the page. Words themselves possess a small amount of music because they are made up of syllables, which are themselves made up of short and long speech sounds, and gradations between, just like birdsong. It is hearing your own nature. Poetry is more natural an art form than you might have been led to believe. Lines in your poetry are units of your time. Those units of time operate with the rhythm of language, the beat of your species and of you. Hugo suggests, how we feel about ourselves may color how we write poems.

****Inside Poetry:** In writing poems, you hear, see and feel every word, space and punctuation marks intimately. Some poets write to preserve moments of significance, often small and apparently trifling instants or perceptions. Observation and memory: are as talismanic to poetry as character and story are to fiction. Poems try to create a small and clear world that goes on recreating itself every time somebody reads it - perceptual and temporal clarity. // ****Awakening Language:** Language is made to live through poems, but the living language of poetry does not simply begin and end with the meaning of your words, and those words combed into lines and stanzas. Words are sticky with meaning, history and association, and these elements are brought to life through their choice and combination – and by chance created by meter, rhyme and form...

Q. Explain Rhythm.. English speech resemble music as it has beat. There are groups of syllables within each group there are strong and will beats. Our sense of self and community are bound up in the speech-rhythms of our first language (L1). Therefore; it is common for students to feel uneasy when they hear themselves speak with the rhythm of a second language (L2). They "sound foreign" to themselves usually unconsciously. Teachers and students can overcome the difficulties and boredom often associated with pronunciation by focusing their attention on the development of pronunciation that is "listener friendly." ..

Q. Factors of fiction Writing: Merriam Webster defines fiction as, "literature in the form of prose, especially novels, that describes imaginary events and people." The key elements of writing fiction are character, plot, setting, structure, issues, narrative voice, narrative viewpoint, action, dialogue, language, and style or genre.----
-Character: These are the people (or animals, or creatures). They provide a human element that allows readers to imagine themselves inside the story. John Gardner once wrote that character is the heart and mind of your

story – it is what makes it live.----**Plot:** The primary threads of your story form the plot. The plot is moved forward through the actions of the characters. It is driven from the inciting incident or ordinary world, through the changes that lead to the conclusion and denouement. Plot is not the story. Plot is a series of events you have devised, and these events may not even occur linearly.----**Scenes:** They are often perceived beforehand by the writer as they dream their way through the story. They are usually a location in which characters are seen and heard at close quarters, and they accomplish some action which has an outcome directly bearing on the forward movement of the story.----**Form and Structure:** are interchangeable terms because it is almost impossible to separate them in the act of writing. The structures of literary fiction allow you to frame your decision: the architecture of all the action; how you place incidents, and when; where you position and resolve conflicts-----**Issues:** Stories have problems. These are the things that make characters take action and that drive the story forward. It is the problems and the way characters solve these problems that make stories interesting, and building an arcing theme or moral or meaning into the story...

..Q:Frenquency and Range: **Frequency:** Useful to teach the most frequent words in any language. Lists of vocabulary can be arranged according to learners' areas of use. **Range:** Most useful words are those which are not only frequent but also occur across a wide variety of texts. Teachers may decide about it with the help of their intuition and experience. Good course books include such ranges. ----

Q. Six sub-genres of umbrella under non-fiction=OR Six Sub-genres of Non-Fiction : Under the umbrella, it is called "Creative Nonfiction", we might find a long list of sub-genres such as: memoirs, personal essays, meditations on ideas, nature writing, travel writing, journals or letters, cultural commentary, hybrid forms, and even, sometimes, autobiographical fiction. In creative nonfiction, reality must be transformed into literature but remains recognizable. It is grounded in life and vivid detail

Q. vocabulary and disruptive vocabulary. Vocabulary (the knowledge of words and word meanings) is one of the key building blocks in learning a new language. Majority of meaning is carried lexically. Vocabulary is the total number of words in a language one knows. It largely consists of 'content' words as opposed to 'structure' words. The term 'word', in vocabulary teaching, refers to expressions made up of one or more terms which form units of meaning (Campillo). Therefore, idioms and multi-word verbs such as phrasal and prepositional verbs (e.g., give up, to put up with) will be considered words in the same way as single words (e.g., fan).

Q. Strategies for teaching pronunciation: Instructional strategies for teaching pronunciation that can help students to meet their personal and professional needs.//****Cultivate Positive Attitudes Toward Accuracy** Teachers should create a classroom atmosphere in which learners work on their English pronunciation in order to be understood. Background lesson on varieties of English will help students work on specific pronunciation features.//****Identify Specific Pronunciation Features that Pose Problems for Learners** Prior language experiences have an impact on the way a language is learned, but these experiences do not consistently have predictive value. Develop lists of sounds that native speakers of particular languages may find problematic in learning English. For example, speakers of Asian languages may have difficulty producing /l/ and /r/ sounds; speakers of Spanish may have difficulty in distinguishing between and producing /sh/ and /ch/ sounds.//****Make Learners Aware of Prosodic Features** It's extremely important to comprehensibility. Prosodic training is for: *Listen for rising intonation in yes/no questions. --**Compare question intonation in English with that of their native languages, imitate dialogues.

Lead perception exercises on the duration of stress, loudness of stress, and pitch. //**Focus on Developing Learners' Communicative Competence** Learners need exposure to conversations so they can hear variation in pronunciation. Using audio-, videotapes, especially of speakers of different varieties of English

. **Q: Key factors in effective pronunciation tuition:** (1) Teaching works better if the focus is on larger chunks of speech, such as words, phrases and sentences, than if the focus is on individual sounds and syllables.//2.) Pron lessons work best if they involve students in actual speaking, rather than in just learning facts or rules of pron. (3) Many students of course feel more comfortable learning the rules of the language because it is less threatening. However, the transfer of explicit knowledge of rules into pronunciation practice is very limited. (4) Learning pronunciation requires an enormous amount of practice, especially at early stages. (5) It is not unreasonable for learners to repeat a particular phrase or sentence many times. (6) Pronunciation teaching requires thorough preparation through work on the perception of English sounds and contrasts.

//Q:Factors Affecting Pronunciation: 1. The Native Language 2. Age Factor 3. Intelligibility and Varieties of English 4. Phonetic Ability 5. Attitude and Identity 6. Motivation and Exposure. //

/Q. Teaching Vocabulary at elementary level: Visual Techniques : **Useful for teaching vocabulary at the elementary level. /**Help teachers to establish a link between a word and its meaning. /**Realia – objects in the class. /**Mime, gestures, actions, facial expressions, etc. /**Interesting, direct and makes an impression on the class // **Verbal Techniques:** •By presenting examples of the type – e.g., illustrating the meanings of superordinates. •By using illustrative situations to explain abstract words/ideas. •Definitions to make sure that it is clear. •They may check in a learner dictionary. •Ask questions to check whether students have understood properly. •Synonyms/Antonyms; the use of the words a student already knows can be effective for getting meaning across. •Scales for Gradable items.

Q: Gric's Maxims of Conversation: There are four categories: 1.)Quantity (give as much information as is required, and no more than is required). / 2)Quality (do not say what is false or that for which you lack adequate evidence). /3) Relation (be relevant). /4) Manner (be clear, be orderly, be brief, and avoid ambiguity).-
----**Q:To Norton, identity** is “how people understand their relationship to the world, how that relationship is constructed across time and space, and how people understand their possibilities for the future”. West (1992) further explained Norton's idea of identity and asserted that identity is related to a desire to be recognized, affiliated, and the desire for safety and security.

Q. Halliday three heuristic categories relevant to ELT :Halliday divided language learning into 3 experiential categories relevant to ELT:

1. Language Learning -Children develop use of complex grammatical structures and vocabulary; communicative competence i.e. comprehension of both spoken and written forms. Teacher helps his student in learning a language -methodology that is different on different levels. For instance, young children are taught with the help of curriculum and the instructional programs. At secondary and post-secondary level, they must learn how to read, write or argue in discipline-specific ways. Moreover, instructional programs may focus on specific language needs -create a student centered environment.

2. Learning Through Language -Learning in classroom is primarily accomplished through language. A teacher may impart a Lesson, ask questions, arrange discussions, and assign reading and writing tasks. A teacher can adopt different techniques to help his students 'learn through language' e.g., Scaffolding //3.

Learning About Language -The teaching of foreign language or second language in ELT always includes the coverage of vocabulary, grammar, history of language and its other components. The ultimate goals of language education for both learners and instructors revolve around the acquisition of competency.

Q:The diffusion of English has resulted in the emergence of **three broad categories of regional varieties**. First set includes the varieties in the countries where the English language has its origin. Where it is the dominant language as a result of population migration, e.g., Australia, Canada, New Zealand, the UK and the USA. Second set comprises the varieties that have developed in countries where English has a long history, essentially due to colonization, in which the language has undergone acculturation and nativization. It has a body of creative writing, and has an official status, e.g., India, Nigeria, Singapore, the Philippines, and others (Crystal, 1987: 357). The third set consists of the varieties that are developing in countries where English is used primarily for international purposes and is becoming an instrument of identity construction and artistic innovation (e.g., in the People's Republic of China, Japan and Korea). These three sets have been termed the Inner-Circle, the Outer-Circle and the Expanding-Circle varieties in the Concentric Circles model (Kachru, 1985).

Q. Background CDA: Backgrounding: What is chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting. **Presupposition:** Background knowledge, assumptions, attitudes and points of view that the text presupposes.----

Q:Sociolinguistic? Sociolinguistics is the study of how language is related to society. It also studies how people affect language usage. Sociolinguistics studies how variety in language changes between groups of people because of things such as race, gender, status, age, etc. This explains how standard language varieties are different between countries.

Q:Assessor, Organizer, Participant, Tutor: Assessor As an assessor, they have to offer feedback and correction and grading students in various ways. Assessment allows the teachers to know where students are having problems with their learning or not. E.g., When teachers find that students have problems with something, they point it, may be at that time, especially when the students are focused on accuracy, or may be

later, for example in a fluency activity. /**Organizer** One of the most important roles is to organize students for various activities, giving information, Telling them how they are going to do the activity, putting them into pairs or groups, and finally closing things. The first thing a teacher needs to do when organizing something is to get students involved, engaged and ready. /**Participant** They are participants to do things better from inside instead of always having to prompt or organize from outside the group. There are times when teacher might want to join in an activity not as a teacher but also as a participant. When it goes well, students enjoy having the teacher with them, and for the teacher, participating is often more instantly enjoyable. /**Tutor** When students are working on longer projects such as pieces of writing or preparations for a talk or a debate, working with individuals or small groups pointing them in directions that have not yet thought of taking. In such situations, we are combining the roles of prompter and resources acting as a tutor. However, being a tutor, when students are working in small groups or in pairs, teacher can go round and stay briefly with a particular group or individual and offer general guidance. /

Q:What is ELT? **ELT** is the teaching of English to people whose first language is not English. **ELT** is an abbreviation for 'English Language Teaching'. As an academic discipline, ELT is primarily concerned with the teaching and learning of English.

Q:Three causes of language contact?**Language Contact:**A contact between different languages, it takes place typically when the languages are spoken in the same or adjoining regions and when there is a high degree of communication between the people speaking them. ****Causes of Language Contact:** •Increase of social interaction. •Colonization •Conquests •Missionaries •Spread of Language of Power, Knowledge and Prestige •Trade and Commerce •Migrants •Globalization and Communication..

---**Q:Advantages of CALL** It offers great flexibility for class scheduling and pacing of individual learning, choosing activities and content to suit individual learning styles It allows us to incorporate multimedia applications, video, sound, and text. CALL widened its scope, embracing the communicative approach and a range of new technologies. It allows the learner to interact with both the program and other learners (Felix, 1998). It is no longer one subject - division between computer mediated communication and CALL.-

---**Q: Research** is a process of constant exploration and discovery. It is a systematic study of materials and sources in order to establish facts. McMillan and Schumaker (1997) defined research as it is a systematic process of collecting and analyzing information (data) for some purpose. Research is the careful investigation of a given subject, field, or problem, undertaken to discover facts or principles. We carry out research when we have a query or a problem we want to resolve by going through a rigorous scientific scrutiny to find an answer.---

-Q:Research Process: 1)Asking the question 2.)Identifying important factors 3)Formulating the hypothesis 4)Collecting relevant information 5.)Testing the data 6) Working with the hypothesis . 7)Working with the theory 8.)Back to new questions //

Q:Research in ELT:It is a rapidly growing field of study. Research in ELT has gained significant importance across the globe for several reasons: ****•Key to teacher development. //•Potential areas for research in ELT are becoming broader and new areas are emerging. //•Conducting research increases the professional skills and competence of ELT teachers. //•Has a direct relationship with both policy and practice.//•Policy makers and practitioners are usually seen as consumers of research - the generation of policy and the implementation of more effective practice.**

//•The performance of ELT has remained below satisfactory in many EFL/ESL contexts including Pakistan. //

Q:Scope of Research in ELT:In recent years, there has been a dramatic change in the scope of English language teaching worldwide and an increasing demand for competent English language teachers, as well as for language programmes. Its focus is on English language skills and competencies needed by today's global citizens. The teaching of English consumes a considerable portion of available educational resources in many countries. English is not necessarily a neutral commodity offering equal opportunities for all. English teachers need to appreciate the special status English has in modern life. Research has gained significance in ELT and the façade of research has also changed tremendously over the last decade. It subjects to numerous changes, innovations and perspectives. The global spread of English and its impact.is a major reason of increasing research trends in ELT.

Q.What do you understand by the phrase “Controlled Practice” in the classroom? Enlist two examples.

It focuses only on the target language giving students many opportunities to use it. Here are a few examples: Drills and gap-fill, Sentence completion, Quizzes and tests, Games, Information search, dictation, etc.

Q:How to Reduce Anxiety?Examine the thoughts that cause the fear.//Exhibit genuine concern for your students.//Provide a relaxed, reassuring classroom atmosphere - Use humor.//Positive learning experiences may reduce L2 anxiety—

Q. Two benefits of describing ‘objectives’:They facilitate planning: once objectives have been agreed on, course/ planning, materials preparation, textbook selection, and related processes can begin.

They "provide measurable outcomes and thus provide accountability: given a set of objectives, the success or failure of a program.

Q. Define the term “Face” in the context of Pragmatics.(3) It is defined as “the public self-image that every member wants to claim for himself”, and the efforts made by interlocutors to “maintain each other’s face”.

Under politeness theory, there is a positive and a negative face.

Positive face reflects the desire to have one’s self-image approved of by others. // **Negative face** is a part of personality that desires not to be imposed upon.

Q.View of the Critical Period Hypothesis about age factor in language learning. Some linguists support the idea, known as the Critical Period Hypothesis that a learner needs to begin learning the language before age 7 in order to develop native-like pronunciation.However, more recent research suggests that other factors (environment, motivation, etc.) may be more important factors in the development of native-like pronunciation (Schaetzel, 2009).We do not yet have clear-cut evidence for a simple and straightforward link between age and the ability to pronounce a new language. The primary aim is that students be understood. Good pronunciation is needed for this, but a “perfect accent” is not (Harmer, 1991). /

/Q. What kind of educational learning material do computer Techonologies promote?(3)CALL To Levy it is, ‘the search for and study of applications of the computer in language teaching and learning’. To find ways for using computers for the purpose of teaching and learning the language. Computer technologies promote educational learning, including: word processing, presentation packages, guided drill and practice, tutor, simulation, problem solving, games, multimedia CD-ROM, and internet applications such as e-mail, chat and the World Wide Web (WWW) for language learning purposes. //

Q. Benefits of Bilingualism.(5) ****Bilingualism strengthens cognitive abilities/.****Bilingual people tend to be more creative and flexible./****They can be more open-minded, and they also find it easier to focus on a variety of tasks simultaneously./****And being able to speak two languages helps in other ways TOO. //

Q:Behavior Tickets:Every time a student is disruptive, write him or her a “ticket”.Consequences? Three tickets might require the student to prepare and give a class presentation on a lesson related to the weekly topic.//

Q. Common Communicative Methodologies: modern communicative methodology There are some basic ideas which are common in modern communicative methodology such as: **1)Use of the Mother Tongue:** Everyone has a different opinion about when, how and how often a teacher should use the mother tongue of her/his students. You may find it necessary to give instructions or explain certain items of grammar in the mother tongue./ **2)Eliciting:** By drawing on the board or use pictures to elicit such things as rooms, methods of transport, • To work backwards from answers to elicit question forms; e.g., write ‘She’s a doctor’ on the board to elicit ‘What does she do?/ **3)Board Work:** When writing new vocabulary, try to make it clear what part of speech the word is from. • If you only write single words, students may not remember whether it’s a verb or a noun. • Write ‘a house’ instead of just ‘house’. **4)Drilling:** The opportunity to practice saying a new word, phrase or structure in a highly controlled environment. **5)Pronunciation:** It involves ‘modelling’ the pronunciation of new language for students to imitate. The modelling can either be done by the teacher or by playing the course book cassette learning purposes.

Q. Importance of Vocabulary in Learning language: The more words a learner knows, the more they will be able to understand what they hear and read, and the better they will become at expressing what they want to when speaking or writing. Motivational impact raises achievement and confidence in L2 learning. Vocabulary helps students in becoming independent learners. Without words to express a wide range of meanings, communication in an L2 just cannot happen in a meaningful way

.Q. Define CALL: The acronym CALL appears to have been coined at the beginning of the 1980s. To Levy it is, 'the search for and study of applications of the computer in language teaching and learning'. To find ways for using computers for the purpose of teaching and learning the language. Computer technologies promote educational learning, including word processing, presentation packages, guided drill and practice, tutor, simulation, problem solving, games, multimedia CD-ROM, and internet applications such as e-mail, chat and the World Wide Web (WWW) for language //

Q. Intonation: Speech also uses changes in pitch. Speakers change their voice by making it higher or lower in pitch at their will, it is called Intonation. The rise and fall of voice may be very sudden or gradual and can be put together in various combinations (rise-fall-rise, fall-rise-fall, etc.). Speakers use pitch to send various messages. Sentence stress and intonation work together to help speakers send precise messages.

Q. Difference between Presupposition and Entailment: **Presupposition:** A presupposition is something the speaker. / assumes to be the case prior to making an utterance. Speakers, not sentences, have presupposition. It is treated as a relationship between two propositions./ **Example:** Mary's dog is cute. (=p) Mary has a dog. (=q) $p \gg q$ // **Entailment :** An entailment is something that logically./ follows from what is asserted in the utterance. Sentences, not speakers, have entailments. The relationship between two sentences where the truth of one (A) requires the truth of the other (B)./ **Example:** (A) The president was assassinated entails (B) the president is dead. ///

Q. Lesson Planning: A lesson plan is a framework for a lesson. It is an important tool that makes both the instructor and the learner focus on the purpose of the lesson and enables learners to efficiently meet their goals. A lesson is a unified set of activities that focuses on one teaching objective at a time. Lesson plan works as a map - shows where you start, where you finish and the route to take to get there. Lesson plans are the product of teachers' thoughts about their classes; what they hope to achieve and how they hope to achieve it. They are usually, though not always, in written form. As many different kinds of plans as there are teachers. //

Q. Define preparing : The creative process begins in preparation, which includes active reading, imitation, research, play and reflection: all conscious actions. The time when you are settling your project, deciding exactly what you are going to do. In this stage, you are also researching ways to help you achieve it, including researching history and other factual data for fiction and creative nonfiction. Ask yourself two questions: What am I preparing for? How shall I do this

Q. Activities for Teaching Vocabulary: Semantic Map, Word Cards, Reading Technique, Venn Diagram Technique, Cross Word Puzzle, Anagrams, Word Definition, One Word Substitution, Linking Words, Finish the Sentence

./Q. Teaching Pronunciation to Beginners: A teacher can decide the resources, lesson plans and activities to improve student's pronunciation skills according to their level. For the beginners the teacher may follow these areas. ****Syllable stress /**Voiced and voiceless consonants/** Silent letters //** **Pronunciation Activities** :Slap That Word!/Fun game for learners asking them to associate words that are posted on the wall of the classroom - reinforce pronunciation patterns./Read and Rhyme - asking students to come up with words that rhyme with others presented on cards.

Encourage them to speak as much as they can. /

Q. 5 strategies for class room management=5 marks **1) Create an Effective Learning Environment**

(Arrange the room to facilitate your proximity to students and your mobility. /Greet students at the classroom door and tell them what to do when they enter the classroom. /Learn every student's name and something about each student./End class with a routine that summarizes the day's accomplishments, reminds students what they need to do to prepare for the next day, ensures materials are put away, and leaves the room clean. **2)Establish Classroom Procedures/**

3)Create a Motivational Environment (Create an attractive, enriched environment by asking students to decorate their own classroom/Develop lessons at a level that challenges students/Give clear directions./ Make learning interesting by relating lesson content to the students' life and society. **4). Make Every Minute Count - Begin on Time -End on time.**(A few minutes of class time saved every day could add up to hours of additional academic instruction.) **5. Keep Everyone Engaged:** Both low and high achievers to participate in discussions and answer questions.

Q. Curriculum vs syllabus . 3 marks While a curriculum is a theoretical, policy document, a syllabus is a guide for teachers and learners that indicate what is to be achieved. A curriculum is concerned with making general

statements about language learning, learning purpose, and experience, and the relationship between teachers and learners. A syllabus is more localized and is based on the accounts and records of what actually happens at the classroom level as teachers and students apply a curriculum.

Q. Scope of Research in ELT: In recent years, there has been a dramatic change in the scope of English language teaching worldwide and an increasing demand for competent English language teachers, as well as for language programmes. Its focus is on English language skills and competencies needed by today's global citizens. The teaching of English consumes a considerable portion of available educational resources in many countries. English is not necessarily a neutral commodity offering equal opportunities for all. English teachers need to appreciate the special status English has in modern life. Research has gained significance in ELT and the façade of research has also changed tremendously over the last decade. It subjects to numerous changes, innovations and perspectives. The global spread of English and its impact is a major reason of increasing research trends in ELT

Q: Cheating affects on individual and group learning. Students do not remember when they copy from others when they do their own work. Students are aware when cheating is allowed to occur - the teacher's credibility is diminished, honest students are disadvantaged, and they may feel compelled to cheat just to keep up. Unchecked cheating can erode students' motivation to learn.

Q. How to prevent cheating any 3 ways- Make sure that your test accurately represents what you have taught./Define what cheating is before the first quiz or examination.
Discuss what you consider cheating, what is unacceptable, and what you expect from your students. (Peace Corps)

Objectives:

1. Learners of English; often no clear relation between **spellings** and pronunciation.
2. Grammar adds meanings that are **not easily inferable** from the immediate context
3. Pronunciation on lessons work best if they involve students in **actual speaking**
4. Creative nonfiction usually takes **reality** as its origin
5. Which of the following types of corpus contains texts from different period?
6. In education the acronym ICE stands for: **INTERNATIONAL CORPUS OF ENGLISH**
7. Most of the literary works included in the language courses belong to **classical** English
8. Lesson plan works as a **Map** - shows where you start, where you finish and the route to
10. The process of collecting information about learner needs is called **(Need Analysis)**
11. An aim refers to a statement of a **General Change** that a program seeks to bring about in
12. Which type of evaluation finds out what is working well, and what is not, and what problems need to be addressed? **Formative Evaluation**
13. Instruction Skills is what most people think of as **Teaching**.
14. Assessment and **Grading** are essential tasks for all educators.
15. Research is a process of constant exploration and **Discovery**

Diachronic Corpus.

literature

take to get there

learners.

2

16. The performance of ELT has remained below **Satisfactory** in many EFL/ESL contexts including Pakistan.

17. In education, ELT stands for **(English Language teaching).**

18. The social contexts of Emily Bronte's novels need to be understood in the context of **Victorian** morality in Britain.

19. According to Fairclough (1995), **ideologies** are acquired, expressed and enacted with

- _____

the help of language.

20. All the prosperous nations have developed a/an **'research culture'**.

Subjective

Q. Ways Deductive Approach is criticized by Adamson?(3)

Criticism of DA (Adamson)

2. Little attention is paid to meaning.
3. Practice is often mechanical.

Q. Three assumptions of Critical Discourse analysis?(3)

- Discourse both reflects and constructs the social world.
- The link between text and society is mediated. Discourse is a form of social action.

Q. What do you understand by the phrase “Controlled Practice” in the classroom? Enlist

It focuses only on the target language giving students many opportunities to use it. Here are a few examples:

- Discourse does ideological work.
- Discourse is historical.

1.
Teaches
grammar
in an
isolated
way.

- L

- Drills and gap-fill
- Sentence completion
- Quizzes and tests
- Games, Information search, dictation, etc.

Q. Elements of CA

CA introduced a continuing major theme of SLA research: ‘the influence of L1 on L2’. It Involves predicting and explaining learner problems based on the comparison of L1 and L2 to Determine similarities and differences. It is influenced by the theories of Structuralism and Behaviorism. The focus of CA is on the surface forms of both L1 and L2 systems and on Describing and comparing the languages one level at a time – generally contrasting the Phonology of L1 and L2 first, then morphology, and then syntax. Lexicon and discourse usually Receive little attention. Following behaviorist view, CA assumed that language acquisition Essentially involves habit formation in a process of Stimulus – Response –

Reinforcement (S-R-R). Assumption – transfer of elements acquired in L1 to the target L2. The process of CA involves analyzing roughly comparable segments of the languages for elements which are likely to cause problems for learners. Effective teaching would concentrate on areas of differences and prepare materials accordingly.

Q. Socio- contextual and relational factors

Possible Relationships Between Language and Society

There are different theories on relationship between language and society.

- Social structure may either influence or determine linguistic structure and/or behavior (Age-Grading).
- Linguistic structure and/or behavior may either influence or determine social structure (Whorfian hypothesis).
- Language and society may influence each other (Marxist View).
- There is no relationship at all between linguistic structure and social structure (Chomsky).

Q. Factors affecting L2 motivation

There are multiple factors interfering learning L2 motivation:

Attitudinal Factors

Cultural Interest L2 learners are represented important aspects of the socio-cultural attributes of L2 community. It was observed that the awareness about the cultural items of an L2 Community influenced L2 attitudes of the learners. Even where direct contact with the native Speakers TL is rare, cultural products, such as books, media and music provide L2 learners with the opportunity to be familiar with L2 community.

Attitudes Towards L2 Community Successful L2 learning is largely driven by learners' Attitudes towards L2 community. It focuses not only on learners' attitudes towards L2 Community and its ethno-linguistic vitality but also on their desire to meet with this community and travel to the countries that belong to it.

Integrativeness Learners may want to integrate into the L2 culture and become similar to the L2 speakers (Dörnyei et al., 2006).

Instrumentality (Promotion and Prevention) It is one of the most important and widely Accepted aspects of motivational research in L2 settings. A significant motivational factor in the previous Pakistani studies. Utilitarian value of the target language serves as an important incentive for the learners.

International Posture A tendency to see oneself as connected to the international community. It concerns for international affairs. The readiness to interact with the people other than those from the local context (Yashima, 2009).

Q. Factors of language knowledge and awareness

1. Linguistics Factors • Teacher needs to understand the system and function of the second language and the differences between L1 and L2 of the learner. • A teacher should know how to speak and understand a language. He/she should attain the technical knowledge required to understand and explain the system of that language - its phonemes, morphemes, words, sentences and discourses structures.

2. Learning Processes • How can a person ensure success in language learning? • What cognitive processes are utilized? • What kinds of strategies are available to a learner and which ones are optimal?

3. **Age and Acquisition** • To know about differences between children and adults' learning process. It is a common observation that children are better language learners than adults.

4. **Instructional Variables** • What are the effects of varying methodological approaches, textbook, materials teacher styles and institutional factors?

Q. Cheating affects on individual and group learning.

Students do not remember when they copy from others when they do their own work. Students Are aware when cheating is allowed to occur – the teacher's credibility is diminished, honest Students are disadvantaged, and they may feel compelled to cheat just to keep up. Unchecked Cheating can erode students' motivation to learn.

Q. Approaches of need analysis

- Target-Situation Analysis (TSA) – focuses on the learner's needs at the end of the course and Target level performance.
- Present-Situation Analysis (PSA) – focuses on the learners' competence concerning skills and Language at the beginning of a course.
- Learning-Centered Approaches is a process of negotiation between individuals and society, the Latter including syllabus, materials, teaching method, etc., and divide needs into necessities, lacks And wants.
- Strategy Analysis focuses on methods of learning i.e. preferred learning styles and strategies.

Q. Two benefits of describing 'objectives'(3)

- They facilitate planning: once objectives have been agreed on, course/ planning, materials Preparation, textbook selection, and related processes can begin.
- They "provide measurable outcomes and thus provide accountability: given a set of objectives, The success or failure of a program.

Q. Any six trends of research in ELT (3)

1.English Language Curriculum, Assessment, and Reform What should be taught to students on different levels? How can school/university programs be Organized to optimize the English Language Learning development of students? What processes Can be employed to enable teachers and policy makers to understand the strengths and Weaknesses of schools? **2.Individual Differences**

L2 Motivation, anxiety, attitudes, aptitudes are powerful contributor to the learner's ability to Learn a language.

3.Learner Autonomy and Self Efficacy

The learner's autonomy is very much important to make him a successful learner.

4.Course and Material Development

It is according to the needs of students and changing trends of the use of English in various social And Academic fields. Not only development but the division is also a popular area of research.

5.Learning and Teaching Strategies

They are also very much important in various contexts.

6.Error Analysis

It includes systematic methods to analyze learners' errors. It also includes identifying, Describing, and explaining student's errors.

Q. Define the term "Face" in the context of Pragmatics.(3)

It is defined as "the public self-image that every member wants to claim for himself", and the efforts made by interlocutors to "maintain each other's face". Under politeness theory, there is a positive and a negative face.

Positive face reflects the desire to have one's self-image approved of by others.

Negative face is a part of personality that desires not to be imposed upon.

Q.View of the Critical Period Hypothesis about age factor in language learning. (3) Some linguists support the idea, known as the Critical Period Hypothesis that a learner needs to begin learning the language before age 7 in order to develop native-like pronunciation. However, more recent research suggests that other factors (environment, motivation, etc.) may be more important factors in the development of native-like pronunciation (Schaetzel, 2009). We do not yet have clear-cut evidence for a simple and straightforward link between age and the ability to pronounce a new language. The primary aim is that students be understood. Good pronunciation is needed for this, but a "perfect accent" is not (Harmer, 1991).

Q. What kind of educational learning material do computer Technologies promote?(3)

To Levy it is, 'the search for and study of applications of the computer in language teaching and learning'. To find ways for using computers for the purpose of teaching and learning the language.

Computer technologies promote educational learning, including:

word processing, presentation packages, guided drill and practice, tutor, simulation, problem solving, games, multimedia CD-ROM, and internet applications such as e-mail, chat and the World Wide Web (WWW) for language learning purposes.

Q. Benefits of Bilingualism.(5)

Bilingualism strengthens cognitive abilities.

Bilingual people tend to be more creative and flexible.

They can be more open-minded, and they also find it easier to focus on a variety of tasks simultaneously.

And being able to speak two languages helps in other ways TOO.

Q. Relationship between language and identify with reference to ELT. (5)

Language can be defined as a shared set of verbal codes and as a generic, communicative phenomenon especially in descriptions of instructions. In ELT, teachers and students use both spoken and written language to communicate. Students learn to read and write - learn the discourse of academic disciplines (academic literacies). When it comes to the discussion of language and education, both definitions are important.

Relationship between Language and Education

Halliday divided language learning into three heuristic categories relevant to ELT:

- Language Learning
- Learning Through Language
- Learning About Language

Q. What kind of information is provided by curriculum?

Or

Q. What questions does the curriculum address?

1. What is the purpose of educating students in this particular institution / educational level?
2. What kinds of knowledge should students be taught?
3. What kinds of learning experiences do the students need to go through in order to acquire the knowledge and achieve our purposes?
4. What kinds of teaching methods should be used to help students acquire the knowledge and achieve our purposes?
5. How should these learning experiences be organized?
6. How should we assess learners in order to see whether the purposes have been achieved? By answering these questions, a curriculum provides information on: the goals of education, subjects to be taught, activities learners should be engaged in (how), methods and materials, allocation of time and resources and assessment of students and of the curriculum itself. **Q.**

How does one gain cultural intelligence?

First -- Increase your awareness of your own cultural values, beliefs, traditions, and norms and how they affect your behavior.

Next -- Appreciatively observe everyday school life and ask non-judgmental questions. Make tentative assumptions about the culture. Check your assumptions through additional observations and/or discussions with individuals familiar with the culture. Learn from your mistakes. Study and practice the language. Finally - Adapt some behaviors that enable you to function in the culture.

An Activity to Gain Insight into a School Culture: A cultural interview activity -- Encourage students or teachers to think about school culture and share their thoughts with the teacher.

Following questions can be helpful in such interviews:

- What would your friends tell a new student about this school?
- What is the one thing your friends would most like to change about this school?
- Who is a hero at this school? Why?
- What is your friends' favorite thing about this school?
- What do your friends think a new teacher should know about this school?

Q. Define plot

The primary threads of your story form the plot. The plot is moved forward through the actions of the characters. It is driven from the inciting incident or ordinary world, through the changes that lead to the conclusion and denouement. Plot is not the story. Plot is a series of events you have devised, and these events may not even occur linearly.

Q. Define preparing

The creative process begins in preparation, which includes active reading, imitation, research, play and reflection: all conscious actions. The time when you are settling your project, deciding exactly what you are going to do. In this stage, you are also researching ways to help you achieve it, including researching history and other factual data for fiction and creative nonfiction.

Ask yourself two questions:

- What am I preparing for?
- How shall I do this

Q. Guess work in vocabulary:

It is to infer meaning from the context in the same way as native speakers do. It can be more efficient in the long run. It give them confidence that many words can just be ignored. Encourage

students to adopt a positive attitude towards new words instead of the negative one (Help!!). **Q.**

Importance of Vocabulary in Learning language:

The more words a learner knows, the more they will be able to understand what they hear and read, and the better they will become at expressing what they want to when speaking or writing.

Motivational impact raises achievement and confidence in L2 learning. Vocabulary helps students in becoming independent learners. Without words to express a wide range of meanings, communication in an L2 just cannot happen in a meaningful way. **Q. Define CALL:**

The acronym CALL appears to have been coined at the beginning of the 1980s. To Levy it is, 'the search for and study of applications of the computer in language teaching and learning'. To find ways for using computers for the purpose of teaching and learning the language. Computer technologies promote educational learning, including word processing, presentation packages, guided drill and practice, tutor, simulation, problem solving, games, multimedia CD-ROM, and internet applications such as e-mail, chat and the World Wide Web (WWW) for language learning purposes.

Q. COHERENCE types:

- Referential coherence (consistency in who or what is being talked about)
- Temporal coherence (when the events occur) • Locational coherence (where the events occur)
- Causal coherence (why events happen).

Q. Common Communicative Methodologies:

There are some basic ideas which are common in modern communicative methodology such as:

- 1. Use of the Mother Tongue:** Everyone has a different opinion about when, how and how often a teacher should use the mother tongue of her/his students. You may find it necessary to give instructions or explain certain items of grammar in the mother tongue.
- 2. Eliciting:** By drawing on the board or use pictures to elicit such things as rooms, methods of transport, etc. • To use mime to elicit such things as sports, everyday activities, etc. • To work backwards from answers to elicit question forms; e.g., write 'She's a doctor' on the board to elicit
- 3. Board Work:** When writing new vocabulary, try to make it clear what part of speech the word is from. • If you only write single words, students may not remember whether it's a verb or a noun. • Write 'a house' instead of just 'house'.

4. **Drilling:** The opportunity to practice saying a new word, phrase or structure in a highly controlled environment.
5. **Pronunciation:** It involves ‘modelling’ the pronunciation of new language for students to imitate. The modelling can either be done by the teacher or by playing the course book cassette.

Q. Discuss ‘Incubation’ as a process of writing creativity. (3)

It is about planning and preparation, may overlap with the incubation stage. In evolution stage, dreams, daydreams, unconsciousness, and random writing play an important role. Incubation creates an incoming wave of the subconscious that washes over the pages you will write.

Q. Write about use of ‘Generic Nouns and Pronouns’ as a Salient features of African English. (3)

Use of generic nouns or pronouns in regionally characteristic ways. E.g., he is a real/whole person [i.e. an adult]. Other examples include the use of ‘boy’ by girls for their friends and ‘footing’ to mean ‘walking’ in Zambia (Tripathi, 1990).

Q. Advantages of CALL:

It offers great flexibility for class scheduling and pacing of individual learning, choosing activities and content to suit individual learning styles (Oxford, et. al 1998). It allows us to incorporate multimedia applications, video, sound, and text. CALL widened its scope, embracing the communicative approach and a range of new technologies. It allows the learner to interact with both the program and other learners (Felix, 1998). It is no longer one subject - division between computer mediated communication and CALL. In the past, teachers had to book computer rooms or language labs to go with their learners and allow them to use CALL software with mostly drill-type exercises. Today, technology has become integrated into the classroom physically and pedagogically rather than being an add on. Computers particularly have come to be seen and used as a tool to accomplish certain tasks or to communicate. Therefore, Garrett (2009: 719) defines CALL now as ‘the full integration of technology into language learning’ with its three elements of theory, pedagogy, and technology, playing an equally important role. **Q.**

Parallel Corpus:

It is a corpus consisting of the same text in two languages. The texts are aligned (matching segments, usually sentences are linked). The corpus allows searches in one or both languages to look up translations. The user can then observe how the search word or phrase is translated. **Q.**

Language and Culture:

Language is formed by culture, while culture is influenced by language. Without language, culture cannot be completely acquired nor it can be effectively expressed and transmitted and without culture, language cannot exist. Thus, culture shapes languages and language is also formed by it. Language is the medium of culture. Thanasoulas (2001) stated: “Language does not exist apart from culture, that is, from the socially inherited assemblage of practices and beliefs that determines the texture of our lives. In a sense, it is ‘a key to the cultural past of a society’ -a guide to ‘social reality’ (Sapir, 1929, p. 209, cited in Salzmann, 1998, p. 41). **Example:** This is clearly seen in immigrant societies, for example, in America. These immigrants are accustomed to a certain language, and therefore, despite the assimilation, will continue to use it and keep it alive, creating different and cultured societies in this foreign land to keep the language alive.

Q. Factors of fiction Writing:

Merriam Webster defines fiction as, “literature in the form of prose, especially novels, that describes imaginary events and people.” The key elements of writing fiction are character, plot, setting, structure, issues, narrative voice, narrative viewpoint, action, dialogue, language, and style or genre (Griffith University, 2012, p. 17).

Character: These are the people (or animals, or creatures). They provide a human element that allows readers to imagine themselves inside the story. John Gardner once wrote that character is the heart and mind of your story – it is what makes it live.

Plot: The primary threads of your story form the plot. The plot is moved forward through the actions of the characters. It is driven from the inciting incident or ordinary world, through the changes that lead to the conclusion and denouement. Plot is not the story. Plot is a series of events you have devised, and these events may not even occur linearly.

Scenes: They are often perceived beforehand by the writer as they dream their way through the story. They are usually a location in which characters are seen and heard at close quarters, and they accomplish some action which has an outcome directly bearing on the forward movement of the story.

Form and Structure: are interchangeable terms because it is almost impossible to separate them in the act of writing. The structures of literary fiction allow you to frame your decision: the

architecture of all the action; how you place incidents, and when; where you position and resolve conflicts.

Issues: Stories have problems. These are the things that make characters take action and that drive the story forward. It is the problems and the way characters solve these problems that make stories interesting, and building an arcing theme or moral or meaning into the story. **Q.**

Functional Notational Approach:

People who study and use a language are mainly interested in how they can do things with

- To explain language in terms of how people use it to live.
- Adopts a semantic and pragmatic orientation inside the grammar.
- It does not see semantics and pragmatics as extra levels of organization but sees them as integral to the organization of the grammar.
- Communicative meanings that learners would need in order to express themselves and to

Backgrounding: What is chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting.

Presupposition: Background knowledge, assumptions, attitudes and points of view that the text

- how they can make meanings, get attention to their problems and interests. They are only interested in the grammatical structure of the language as a means to getting things done.

Objectives understand others effectively. **Q. Background CDA:**

presupposes.

Q. Limitations of conversational analysis

- Lack of systematicity - list of all adjacency pairs is not exhaustive.
- Does not take into account pragmatic or sociolinguistic aspects of interaction.
- May be coupled with discourse analysis and cultural approaches.

Q. 5 points regarding Difference ASPECTS OF discourse ANALYSIS:

- Discourse as the social construction of reality.
- Discourse and socially situated identities.
- Discourse and Performance: 'a Discourse is a 'dance' (Gee, 2005, p. 19).

While we say something, we also do it.

- Discourse and Intertextuality.
- Difference between spoken and written Discourse: Writing is more structurally complex; spoken discourse has its own complexity.
- Grammatical intricacy.

Q. Strategies for teaching pronunciation

Instructional strategies for teaching pronunciation that can help students to meet their personal and professional needs.

1. Cultivate Positive Attitudes Toward Accuracy Teachers should create a classroom

atmosphere in which learners work on their English pronunciation in order to be understood. Background lesson on varieties of English will help students work on specific pronunciation features.

2. Identify Specific Pronunciation Features that Pose Problems for Learners Prior language

experiences have an impact on the way a language is learned, but these experiences do not consistently have predictive value (Brown, 2000; Wardhaugh, 1970). Develop lists of sounds that native speakers of particular languages may find problematic in learning English. For example, speakers of Asian languages may have difficulty producing /l/ and /r/ sounds; speakers of Spanish may have difficulty in distinguishing between and producing /sh/ and /ch/ sounds.

The checklist can also be used to make learners aware of particular problems.

3. Make Learners Aware of Prosodic Features It is extremely important to comprehensibility.

Prosodic training is for:

- Listen for rising intonation in yes/no questions.
- Compare question intonation in English with that of their native languages, imitate dialogues.
- Lead perception exercises on the duration of stress, loudness of stress, and pitch.

4. Focus on Developing Learners' Communicative Competence Learners need exposure to conversations so they can hear variation in pronunciation. Using audio-, videotapes, especially of speakers of different varieties of English

Q. Types of reference

Major Forms of Reference

Endophoric Reference (Endophora) - where the interpretive source lies in the co-text. An Endophoric reference can be divided into two sub-types:

- **Anaphoric Reference (Anaphora):** where the referent lies in the prior text, e.g. respect a man, he will do the more.
- **Cataphoric Reference (Cataphora):** where the referent lies in the text to come, e.g. When I met her, Mary looked ill.

Exophoric Reference (Exophora): where the interpretive source lies in the context, e.g. (Mary is standing there) I like her.

Q. Scope of Research in ELT

In recent years, there has been a dramatic change in the scope of English language teaching worldwide and an increasing demand for competent English language teachers, as well as for language programmes. Its focus is on English language skills and competencies needed by today's global citizens. The teaching of English consumes a considerable portion of available educational resources in many countries. English is not necessarily a neutral commodity offering equal opportunities for all. English teachers need to appreciate the special status English has in modern life. Research has gained significance in ELT and the façade of research has also changed tremendously over the last decade. It subjects to numerous changes, innovations and perspectives. The global spread of English and its impact is a major reason of increasing research trends in ELT.

Q. Teacher as an organizer

Teachers use many metaphors to describe what they do. Within the classroom, teacher's role may change from one activity to another. If they are fluent at making changes, the effectiveness

as teachers may greatly enhance. Teacher's role such as prompter, resource, or tutor may well fulfill this concept.

Resource

Students do not know everything so they need the teacher's help as a resource. Teachers give information, such as teaching grammar, explaining vocabulary, showing how to write essay or how to prepare a presentation and equip them for creative writing tasks. Students might ask how to say or write something or what a word or phrase means. They might want to know information in the middle of an activity or they might want information about where to look for a book or a website. This is where a teacher can be one of the most important resources they have.

Controller

They are in charge of the class and of the activity taking place. Controllers take the role, telling students things, organize drills, read aloud, and exemplify the other qualities of a teacher-fronted classroom.

Prompter

When students are involved in a role play activity and lose the thread of what is going on and may not be quite sure how to proceed: what should teachers do in these circumstances? They should hold back and let the students work things out for themselves or instead nudge them forward in a supportive way. Controller makes announcements, orders to be restored, provide explanations in a question and answer session. If we opt for the latter we are adopting some kind of a prompting role. Being a prompter, teacher will occasionally offer words or phrases, suggest that the students say something, or what could come next in a paragraph. E.g., often they can prompt students in monolingual groups to speak English rather than using their mother tongue

Q. Course rationale

- Developing a course rationale
- Describing entry and exit levels
- Choosing course content
- Sequencing course content
- Planning the course content
- Preparing the scope and sequence plan

Q. Usage of corpus

The use of corpus contributes to language teaching in a number of ways.

1. The insights derived from native-speaker corpora contribute to a more accurate language description, which then feeds into the compilation of pedagogical grammars and dictionaries.
2. The analysis of learner language provides insights into learner's needs in different contexts, which then form learner dictionaries and grammars.
3. Research on learner corpora also contributes to our understanding of language learning processes (Granger et al., 2002).
4. Corpora of language teaching course books enable the examination of the language to which learners are exposed.
5. Facilitate the development of more effective pedagogical materials.
6. Corpus-based research has also revealed the inadequacy of many of the rules that still dominate ELT materials.
7. Learner corpora have the potential to contribute to the construction and evaluation of language tests in a multitude of ways, however, this potential has remained underexploited.
8. Corpus research in English language teaching has led to real innovations in material design and classroom practice

Q. Disadvantages of IA

It may make learning process slow. The time taken to work out a rule may be at the expense of time spent in putting the rule to some sort of productive practice. Students may hypothesize the wrong rule - a danger where there is no overt testing of their hypotheses. It can place heavy demands on teachers in planning a lesson; need to select and organize the data carefully so as to guide learners to an accurate formulation of the rule. Some language areas (e.g., aspect and modality) resist easy rule formulation. It may frustrate those students who prefer simply to be told the rule.

Q. How to prevent cheating any 3 ways=3marks

- Make sure that your test accurately represents what you have taught.
- Define what cheating is before the first quiz or examination.
- Discuss what you consider cheating, what is unacceptable, and what you expect from your students. (Peace Corps, n.d)

Q. Six sub-genres of umbrella under non-fiction=3 marks OR Six Sub-genres of Non-Fiction

Under the umbrella, it is called “Creative Nonfiction”, we might find a long list of sub-genres such as: memoirs, personal essays, meditations on ideas, nature writing, travel writing, journals or letters, cultural commentary, hybrid forms, and even, sometimes, autobiographical fiction. In creative nonfiction, reality must be transformed into literature but remains recognizable. It is grounded in life and vivid detail

Q. L2 motivation self wla question=3 marks

Components of L2 Motivational Self System

1. Ideal L2 self •

Portrays a range of qualities and aspirations one would like to own.

- Underlines the L2- related image of one’s ideal person.
- Can be an influential motivating factor provided the person one inspires to become is proficient in L2.
- Relies on ‘the desire to reduce the discrepancy between [their] actual and ideal selves’ (Dörnyei, 2009, p. 29).
- The promotion of a hoped-for future self’ (MacIntyre et al., 2009, p. 195).

• I

• One’s inclination to develop certain qualities or skills to prevent negative and feared outcomes in the future (Dörnyei, 2005, 2009).

• Primarily extrinsic and prevention in nature.

• It also incorporates those aspects of an individual’s future self which other people (such as parents, family, friends) are perceived to desire for her/him – e.g., obligations.

• May play a more prominent role in Asian L2 contexts.

Q. Halliday wla question chapter no 38 start mein he ha 3= marks

Relationship Between Language and Education Halliday divided language learning into three

- Learning About Language Language, education and development are interrelated in language

cludes both 'integrative and internalized instrumental motives' (Dörnyei, 2009) **2. Ought-to L2**

Self heuristic categories relevant to ELT:

- Language Learning
- Learning Through Language

acquisition

Q. Code switching=5 marks

It is a process in which the bilingual speakers shift back and forth between one language or a dialect and another language or dialect within the same conversation (Trudgill, 2003). Myers-Scotton (1993) coined a cover term for "alternations of linguistic varieties within the same conversation".

Kinds of Code-switching

1. Situational Code-Switching

It is a tendency to use different codes in different situations. When code switching is constrained by where speakers happen to be, it can be called 'domain-based' or 'situational code switching'. When it is constrained by who a speaker happens to be talking to, it can be called addressee-based.

2. Metaphorical Code-switching

Each of the codes represents a set of social meanings and is called metaphorical code switching.

Reasons for Code-Switching

- To show identity with a group
- Lack of facility/vocabulary

Q. 5 strategies for class room management=5 marks

o
f

1. Create an Effective Learning Environment

- Arrange the room to facilitate your proximity to students and your mobility.
- Greet students at the classroom door and tell them what to do when they enter the classroom.
- Learn every student's name and something about each student.
- End class with a routine that summarizes the day's accomplishments, reminds students what they need to do to prepare for the next day, ensures materials are put away, and leaves the room

r

- Develop a set of written behavior expectations (rules and procedures) with the class.
- Make parents your allies.

• T

2. Establish Classroom Procedures

o

3. Create a Motivational Environment

s

seek attention (advertisements) • To express emotions and amusement

clean.

- Create an attractive, enriched environment by asking students to decorate their own classroom.
- Develop lessons at a level that challenges students.

- Give clear directions.
- Demonstrate consistently that you believe all students will learn.
- Make learning interesting by relating lesson content to the students' life and society.
- Use vivid, novel, or different attention getters at the beginning of the lesson.

4. Make Every Minute Count - Begin on Time

- End on time.
- A few minutes of class time saved every day could add up to hours of additional academic instruction.

5. Keep Everyone Engaged:

Both low and high achievers to participate in discussions and answer questions. **Q.**

Activities for Teaching Vocabulary:

- Semantic Map

Q. Teaching Pronunciation to Beginners:

A teacher can decide the resources, lesson plans and activities to improve student's pronunciation skills according to their level. For the beginners the teacher may follow these

- Voiced and voiceless consonants

nique

- Cross Word Puzzle

• W

- Linking Words • Finish the Sentence

areas.

- Syllable stress

- Silent letters

Pronunciation Activities

- Slap That Word!
- Fun game for learners asking them to associate words that are posted on the wall of the classroom - reinforce pronunciation patterns.
- Read and Rhyme - asking students to come up with words that rhyme with others presented on cards.
- Encourage them to speak as much as they can.

Q. Word Stress Rules : (goggled the answer)

To communicate clearly when you are speaking in English, it's important to stress the correct syllables in each word. This is called word stress, which means pronouncing one syllable of a multisyllabic word with greater emphasis (stress) than the other syllables in the word. Here are four general rules to keep in mind about word stress as you practice pronunciation:

1. Stress the first syllable of:

- o Most two-syllable nouns (examples: CLImate, KNOWledge)
- o Most two-syllable adjectives (examples: FLIPpant, SPACious)

2. Stress the last syllable of:

- o Most two-syllable verbs (examples: reQUIRE, deCIDE)

3. Stress the second-to-last syllable of:

o Words that end in -ic (examples: ecSTATic, geoGRAPHic) o Words ending in -sion and -tion (examples: exTENSion, retriBUtion)

4. Stress the third-from-last syllable of: o Words that end in -cy, -ty, -phy and -gy (examples: deMOCracy, unCERtainty, geOGRAPHy, radiOLogy)

o Words that end in -al (examples: exCEPtional, CRItical) **Q.**

Diglossia:

Diglossic situation exists in a society when it has two distinct languages which show clear functional separation; that is, one is employed in one set of circumstances and the other is entirely different set. “High” Versus “low” variety of a language. **Q. Monolingual**

Corpra:

Monolingual Corpus is texts in one language only. Usually tagged for parts of speech and is used by a wide range of users for various tasks from highly practical ones, e.g., checking the correct usage of a word or natural word combinations, to scientific use, e.g., identifying frequent patterns or new trends in language.

Q. Define Linguistic imperialism: (3)

Linguistic imperialism means the transfer of dominant language (and all the aspects of its culture) to the speaker of other languages. For instance, the transfer of aspects of English language to Urdu. Linguistic imperialism lingers not only in cultural spheres, but in ideological, social, political and economic practices as well. To Phillipson (1992) “Linguistics imperialism assumes the ‘active promotion’ of the language by the dominant class as an active expression of power of the powerful over the powerless”. It is closely related to cultural imperialism, because it is language which acts as a tool to mediate or permeate imperialism. Linguistic imperialism is concerned with the study of ‘linguistic hierarchizations’. It addresses the issues of why some languages come to be used more and others less. **Q. Teacher as tutor:**

- Reads interesting materials aloud to students on the consistent basis
- Visits the school library regularly and set aside time for browsing and reading
- Explains to students, how to make a choice of what to read according to genre, level of understanding and interest

- Tells them what s/he expect over a period. **Q. Lesson Planning:**

A lesson plan is a framework for a lesson. It is an important tool that makes both the instructor and the learner focus on the purpose of the lesson and enables learners to efficiently meet their goals. A lesson is a unified set of activities that focuses on one teaching objective at a time.

Lesson plan works as a map - shows where you start, where you finish and the route to take to get there. Lesson plans are the product of teachers' thoughts about their classes; what they hope to achieve and how they hope to achieve it. They are usually, though not always, in written form.

As many different kinds of plans as there are teachers. **Q.**

Define Coherence...

It refers to the relationship which links the meanings of utterances in a discourse. Coherence focuses on the unity of meaning. What is said or written should make sense in terms of people's normal experience of things. The key to the concept of coherence ("everything fitting together well") is not something that exists in words or structures, but something that exists in people. Not all relations among the various parts of a discourse are explicitly marked. Still, we are able to understand it because sociocultural and background knowledge.

A: Could you give me a lift home?

B: Sorry, I'm visiting my sister. **Q.**

Define Pidgin and creol...

Pidgin is a variety of language without native speakers which arises in a language contact situation and operates as a lingua franca. Pidgin language, later on, can have native speakers, but that pidgin is called creole

Q. Explain Rhythm...

English speech resembles music as it has a beat. There are groups of syllables, within each group there are strong and weak beats.

Our sense of self and community are bound up in the speech-rhythms of our first language (L1). Therefore; it is common for students to feel uneasy when they hear themselves speak with the rhythm of a second language (L2). They "sound foreign" to themselves usually unconsciously. Teachers and students can overcome the difficulties and boredom often

associated with pronunciation by focusing their attention on the development of pronunciation that is “listener friendly.”

Q. Explain Narrative view point...

Narrative Viewpoint :-

It relates to who is telling the story. Sometimes this is a character in the story and sometimes it is an anonymous voice in the abstract that can be presumed.

Narrative Voice: It is unique characteristics of the narrator that make him distinguishable from other narrators

Q. Importance of Writing poetry...

Poems are made up of lines of words that do not usually reach the far side of the page. Words themselves possess a small amount of music because they are made up of syllables, which are themselves made up of short and long speech sounds, and gradations between, just like birdsong. It is hearing your own nature. Poetry is more natural an art form than you might have been led to believe. Lines in your poetry are units of your time. Those units of time operate with the rhythm of language, the beat of your species and of you.

Hugo suggests, how we feel about ourselves may color how we write poems.

Inside Poetry: In writing poems, you hear, see and feel every word, space and punctuation marks intimately. Some poets write to preserve moments of significance, often small and apparently trifling instants or perceptions

Observation and Memory are as talismanic to poetry as character and story are to fiction.

Poems try to create a small and clear world that goes on recreating itself every time somebody reads it - perceptual and temporal clarity.

Awakening Language - Language is made to live through poems, but the living language of poetry does not simply begin and end with the meaning of your words, and those words combed into lines and stanzas. Words are sticky with meaning, history and association, and these elements are brought to life through their choice and combination – and by chance created by meter, rhyme and form.

Q. vocabulary and disruptive vocabulary...

Vocabulary (the knowledge of words and word meanings) is one of the key building blocks in learning a new language. Majority of meaning is carried lexically. Vocabulary is the total number of words in a language one knows. It largely consists of ‘content’ words as opposed to ‘structure’ words. The term ‘word’, in vocabulary teaching, refers to expressions made up of one or more terms which form units of meaning (Campillo). Therefore, idioms and multi-word verbs such as phrasal and prepositional verbs (e.g., give up, to put up with) will be considered words in the same way as single words (e.g., fan).

Q. >>motivation

Motivation involves the factors behind human actions; ‘why people think and behave as they do’ (Dörnyei, 2005, p. 1). Dörnyei, et al. (2006, p. 9) further elaborate that motivation deals with ‘the direction and magnitude of human action, that is, the choice of a particular action, the persistence with it and the effort expended on it’. It arises from a purpose and then guides human actions. The concept of motivation seems to be a difficult and complex area to define. The multi-dimensional nature and wide range of motives for human behavior make it impossible to develop a comprehensive theory of motivation. A kind of cognitive stimulation, which encourages somebody to make ‘sustained intellectual and/or physical effort’ in order to achieve a goal (Williams and Burden, 1997, p. 120). Similar to its important contribution in influencing human behavior, motivation also plays a key role in successful educational learning. **Q. Staus of**

English in Pak.5 Mark.

English remained a foreign language in India for several decades after independence. Kachru defines modern South Asian English (SAE) as ‘the educated variety of South Asian English’, with, ‘varieties within this variety’. The passage of the Official Languages Act 1967 made English co-equal with Hindi ‘for all official purposes of the union, for Parliament, and for communications between the union and the states’ (Ferguson, 1996: 31). One important aspect of the value of English in South Asia is its capacity to provide neutralization. Choosing a given code in a multilingual context asserts one or more identities, for example, of religion, caste, and educational attainment, in addition to signaling the message. Similar to India, in contemporary Pakistan, English continues to have a central position in the national life.

Q. CDA 5 tools discuss .5 CDA

and Framing:

The way in which the content of the text is presented to its audience, and the sort of perspective, angle and slant the writer or speaker is taking.

Foregrounding:

What is chosen to emphasize.

Backgrounding:

What is chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting.

Presupposition: Background knowledge, assumptions, attitudes and points of view that the text presupposes.

Topicalization: What has been put at the front of each sentence to indicate what it is about.

Agency: Who initiates the action, agent-patient relationship – who does what to whom? ,Who has the most authority and power in the discourse? What agents have been left out of sentences ?

Ideology.variety.and culture define 5

Simpson (1993, p. 5) defines ideology as "assumptions, beliefs, value- systems which are shared collectively by social groups". These concepts are dependent on language, because it is with the help of language that people express everything. The relationship of language and ideology has been explicitly studied in CDA. To Fairclough (1995), ideologies are acquired, expressed and enacted with the help of language. He further contended that any variable structure of language is ideologically 'marked'. When it comes to ELT, an understanding of the relationship between language and culture is important for language learners, users and for all those involved in language education.

Language is formed by culture, while culture is influenced by language. Without language, culture cannot be completely acquired nor it can be effectively expressed and transmitted and without culture, language cannot exist. Thus, culture shapes languages and language is also formed by it. Language is the medium of culture. Thanasoulas (2001) stated: "Language does not exist apart from culture, that is, from the socially inherited assemblage of practices and beliefs

that determines the texture of our lives. In a sense, it is ‘a key to the cultural past of a society’ -a guide to ‘social reality’ (Sapir, 1929, p. 209, cited in Salzmann, 1998, p. 41).

Q. Curriculum vs syllabus . 3 marks

While a curriculum is a theoretical, policy document, a syllabus is a guide for teachers and learners that indicate what is to be achieved. A curriculum is concerned with making general statements about language learning, learning purpose, and experience, and the relationship between teachers and learners. A syllabus is more localized and is based on the accounts and records of what actually happens at the classroom level as teachers and students apply a curriculum.

Q. Novel As communication.3 Marks

According to Helton, Asamani and Thomas (1998), the benefits of novels are:

- Stimulate imagination.
- Help students to identify the emotions of the characters so that they can learn how others cope with situations and problems similar to their own experiences.
- Examination of moral attitudes, while developing communication skills.
- Motivate students to become a lifelong readers.
- Help them master the skills that will enable them to acquire information, process this knowledge, identify problems, formulate alternatives, and arrive at meaningful, thoughtful, effective decisions and solutions.

Q. Types of dialect 3. Marks

Idiolect –

The speech variety of an individual speaker.

Sociolect –

A variety or lect which is thought of as being related to its speaker’s social background rather than geographical background. E.g., in India, social system “caste” determines which variety of a language a speaker uses. Factors that contribute to bring variation in a Language : There are many factors to cause variation like social situation, occupation, age, geography, education, gender, social status/class, and ethnicity.

Q. Relationship between language and identify with reference to ELT. (5)

Language can be defined as a shared set of verbal codes and as a generic, communicative phenomenon essentially in descriptions of instructions. In ELT, teachers and students use both spoken and written language to communicate. Students learn to read and write - learn the discourse of academic disciplines (academic literacies). When it comes to the discussion of language and education, both definitions are important. Relationship between Language and Education could divide language learning into three heuristic categories relevant to ELT:

- Language Learning Learning Through Language Learning About Language

Role of a Learner

Negotiator – Between the self, the learning process, and the object of learning

Contributor - Learner is not a passive recipient of knowledge **Roles**

of a Teacher

□ Facilitator - between all participants in the classrooms, and between these participants and the various activities and texts.

□ Participant - within the learning - teaching group.

□ Organizer, guide

□ Researcher, learner

□ Needs Analyst, counselor

Q.Role of a teacher: Teacher as an organizer Teachers use various set phrases to describe what they do. Within the classrooms, teacher's role can change from one activity to another. If they are fluent at making changes, the effectiveness as teachers can greatly enhance. Teacher's role such as monitor, resource, or tutor can all fulfill this function.

Resource Students do not know everything so they need the teacher's help as a resource.

Teachers give information, such as teaching grammar, explaining vocabulary, showing how to write essays or how to prepare a presentation and equipping them for creative writing tasks. Students might ask how to say or write something or what a word or phrase means. They might want to know information in the middle of an activity or they might want information about where to look for a book or a website.

This is where a teacher can be one of the most important resources they have. **Controller** They are in charge of the class and of the activity taking place. Controllers take the role, telling

students things, organize drills, read aloud, and exercise the other qualities of a teacher-fronted classrooms.

ENG503 INTRODUCTION TO ELT

OBJECTIVES LESSON 21- 23

Lesson 21:

1. The study of what speakers mean or “speaker’s meaning” is called pragmatics.
2. Pragmatics may vary from culture to culture.
3. The relationship between the linguistic form and communicative function is of central interest in Pragmatics.
4. Deixis (Greek) means „pointing“ via language.
5. Deixis is also known as the „Indexicality of language“ or „Indexicals“ as they operate as indexes of specific meaning in a context.
6. Person Deixis function in first person pronoun (I, We) second person pronoun (you) and third person pronoun (He, she, it, they, a boy)
7. Spatial deixis is used to indicate the relative location of people and things.
8. Spatial Deixis is also known as „place deixis“.
9. Temporal Deixis is also known as „time deixis“.
10. An act by which a speaker (or writer) uses language to enable a listener (or reader) to identify something is called Reference.
11. Endophoric Reference is where the interpretive source lies in the co-text.
12. Anaphoric Reference (Anaphora) is where the referent lies in the prior text.
13. Cataphoric Reference (Cataphora) is where the referent lies in the text to come.
14. Exophoric Reference (Exophora) is where the interpretive source lies in the context.
15. A presupposition is something the speaker assumes to be the case prior to making an utterance.
16. Speakers have presupposition.
17. Sentences have entailments.
18. Existential Presupposition is the assumption of the existence of entities named/committed by the speaker.
19. Factive Presupposition is the assumption that something is true due to the presence of some verbs.
20. Lexical Presupposition - Use of one form with its asserted meaning is conventionally interpreted with the presupposition that another (non-asserted) meaning is also understood (Yule).
21. Structural Presupposition – The certain sentence structures have been analyzed as conventional and regular, presupposing that part of the structure is already assumed to be true.

22. **Non Fictive Presumption** is that something is not true, like verbs "dream" "imagine" and "pretend" follows what is not true.

23. **Counterfactual Presupposition** - What is presupposed is not only untrue but is the opposite of what is true, or contrary to facts.

24. An entailment is something that logically follows from what is asserted in the utterance.

25. Grice's central claim was that an overarching principle of human interaction was an impulse towards cooperative behavior.

26. Implicature is what a speaker implies, suggests or means is distinct from what the speaker literally says. (Grice 1975)

27. Conventional Implicatures are associated with specific words and result in additional conveyed meanings when those words are used. E.g., but, even, yet, and.

28. Conversational Implicatures are the assumptions suggested by the speaker and inferred by the hearer in an exchange situation.

29. Politeness generally refers to the ideas like, being tactful, modest and nice to other people.

30. In pragmatics, politeness can be defined as „showing awareness and consideration of another person's face“ (Yule, 2010).

31. Politeness in language is centered on the notion of face.

32. Three Maxims of Politeness were given by Lakoff, 1973

33. According to Austin (1975), the speech act theory is a foundational part of pragmatics.

34. Speech Act Theory attempts to explain the processes of how meanings are constructed within conversations.

35. According to Austin and Searle "Language is used to „do things“ other than just refer to the truth and falseness of particular statements."

36. According to Austin, there are three part system for describing a speech act.

37. Locutionary Act -- Literal meanings of the actual words. What speaker says and makes sense; i.e. follows the rules of pronunciation and grammar.

38. Illocutionary Act - Speaker's intention in uttering the words; the uses to which language is put in a society.

39. Perlocutionary Act - The effect or „take up“ of an utterance on the thoughts or actions of the other person; what follows an utterance.

40. According to Searle (1976), all speech acts fall into five main types.

41. Representatives – commit the speakers to the truth of the expressed proposition, state what the speaker believes to be the case or not (e.g., asserting, concluding, statements of fact)
42. Directives – attempt by the speaker to get the addressee to do something, what speaker wants (requesting, questioning)
43. Commissives – commit the speaker to some future course of action – what s/he intends (promising, threatening, offering, refusing)
44. Expressives – express a psychological state or what a speaker feels (thanking, apologizing, welcoming, congratulating).
45. Declarations – effect immediate changes in the institutional state of affairs - rely on extra-linguistic institutions (marrying, declaring war, and firing from employment)

Lesson 22:

1. Sociolinguistics is study of the relationship between language and society.
2. Society is any group of people who are drawn together for a certain purpose or purposes.
3. Language is what the members of a particular society speak.
4. Social structure may either influence or determine linguistic structure and/or behavior (Age-Grading).
5. According to Whorfian hypothesis Linguistic structure and/or behavior may either influence or determine social structure.
6. In Marxist View Language and society may influence each other.
7. According to Chomsky, There is no relationship at all between linguistic structure and social structure.
8. According to Hudson, a variety of language is „a set of linguistic items with similar social distribution“
9. Abstand is a variety considered as a language, rather than a dialect, by virtue of being different in its linguistic characteristics.
10. Ausbau is a variety which derives its status as a language, not so much from its linguistic characteristics but from its social, cultural and political characteristics
11. Dialect is a language variety, spoken by a speech community, that is characterized by systematic features (e.g., phonological, lexical, grammatical) that distinguish it from other varieties of the same language.
12. Idiolect is the speech variety of an individual speaker.
13. Sociolect is a variety or lect which is thought of as being related to its speaker, „s social background rather than geographical background.
14. Language choice is a careful selection of word, phrase, clause or sentence of another language within the speaker's linguistic repertoire.
15. Code Switching is a process in which the bilingual speakers shift back and forth between one language or a dialect and another language or dialect within the same conversation (Trudgill, 2003).

16. Borrowing is a process by which bilingual/multilingual speakers introduce words from one language into another language, and these words eventually become an integral part of the second language.
17. When code switching is constrained by where speakers happen to be, it can be called „domain-based“ or „situational code switching“.
18. Each of the codes represents a set of social meanings is called metaphorical code switching.
19. Gender is more amorphous in nature and is subject to change with reference to context and time.
20. In recent times, media has emerged as a powerful constitutive agent of gender related ideas and notions.
21. Lakoff (1975) presented a set of basic assumptions about what marks out the language of women.
22. Dominance Theory is men are more likely to interrupt than women to show their dominance.
23. Difference Theory is many of the differences “arise because boys and girls grow up in what are essentially different cultures, so talk between women and men is crosscultural communication”(Tannen, 1991)
24. Language Contact is used to apply to the situations where two or more groups of speakers who do not have a native language in common, are in social contact with each other or come into such contact”.
25. Pidgin is a variety of language without native speakers which arises in a language contact situation and operates as a lingua franca.
26. Pidgin language, later on, can have native speakers, but that pidgin is called creole.
27. Diglossic situation exists in a society when it has two distinct languages
28. About 7000 languages are spoken in a world of about 200 nation states.
29. Bilingualism- for individuals, even if they are trilingual, quadrilingual, etc.
30. Trudgill - „the ability of an individual to speak two or more languages“ (1992:13) .
31. Weinreich - „the practice of alternately using two languages“.
32. Multilingual - For nations or societies, even if only two languages are involved.
33. Bilingual Competence- There is no clear definition of what it means to "speak a language”.

Lesson 23

1. Discourse is defined as „a stretch of language in use, of any length and in any mode, which achieves meaning and coherence for those involved.“

2. The Term Discourse was First introduced by Zellig Harris in 1952 to examine; the language beyond the level of the sentence and relation between linguistic and nonlinguistic behavior.
3. Applied linguists“ interest in discourse analysis originated in an awareness of the inability of formal linguistics to account for how participants in communication achieve meaning.
4. Discourse of Writing is more structurally complex; spoken discourse has its own complexity.
5. The goal of discourse analysis is to examine how the reader/user of a discourse recognizes that the words /phrases/ sentences in a discourse must be co-interpreted, and that parts of a discourse are dependent on others.
6. The cohesion refers to the grammatical and/or lexical relationship between the different elements of a discourse.
7. Substitution is Replacing one word by another at a particular position in a structure.
8. Ellipsis is leaving out a word or phrase of a sentence for reasons of economy, emphasis or style.
9. Coherence refers to the relationship which links the meanings of utterances in a discourse.
10. Coherence focuses on the unity of meaning.

11. Intertextuality is a complex interrelationship between a text and other texts taken as basic to the creation or interpretation of the text.

12. Conversational Analysis (CA) is discourse mutually constructed and negotiated in time between speakers.

13. Conversational Analysis is usually informal and unplanned (Cutting, 2010).

14. Based on Conversational Analysis, classroom transactions, doctor-patient interviews and TV quiz shows are not conversations because they conversation between interlocutors“ exchange carries an unequal power balance.

15. The analysis of natural conversation in order to discover what the linguistic characteristics of conversation are and how conversation is used in ordinary life is called conversational analysis (CA).

16. Turn-Taking is the cooperation in conversation is managed by all participants through turn taking.

17. Transition Relevance Place (TRP) – A point in a conversation where a change of turn is possible. It is usually end of a sentence.

18. Interruption is when speakers do not want to wait until the TRP. Usually indicated with a //.

19. Pause is acceptable length. If the pause is intended to carry meaning – attributable silence.

20. Adjacency Pairs conversation contains frequently occurring patterns, in pairs of utterances known as „adjacency pairs“.

21. Critical Discourse Analysis is a type of discourse analytical research that primarily studies the way social power abuse; dominance and inequality are enacted, reproduced, and resisted by text and talk in the social and political context (Van Dijk).

22. Framing is the way in which the content of the text is presented to its audience, and the sort of perspective, angle and slant the writer or speaker is taking.

23.Foregrounding is what is chosen to emphasize.

24.Backgrounding is what is chosen to de-emphasize or leave out of the text. It can easily be identified in newspaper reporting.

25.Topicalization is what has been put at the front of each sentence to indicate what it is about.

26.Choice of words: The connotations of particular words or phrases, degree of formality/ informality, technicality, certainty, etc.

27.Multimodal Discourse Analysis is an emerging paradigm in discourse studies.

28.Multimodal Discourse Analysis extends the study of in combination with other resources, such as images, scientific symbolism, gesture, action, music and sound.

29.In multimodal texts, discourses and events, collectively called multimodal phenomena 30.The medium is the mean through which the multimodal phenomena materialize

31.Michael Halliday's (1994, 2004) gave social semiotic approach to language.

Lesson 24:

1. English is used by over 300 million people as a first language in Australia, Canada, New Zealand, the UK and the USA, and by over 700 million people as a second language, e.g., in the countries of Africa, Asia, Europe, and Latin America, and among the Island nations of the world .
2. The notion „World Englishes“ provides the major conceptual framework for a useful and reasoned understanding of the spread and functions of the English language.
3. „World Englishes“ indicates a „world language“, highlighting the role of English as a world language and as an international lingua franca.
4. To Kachru (2004), the notion of „World Englishes“ is independent of whether or not English functions as a world language.
5. „World Englishes“ is similar to „New Englishes“.
6. World English (WE) belongs to everybody who speaks it, but it is nobody's mother tongue.
7. These three sets have been termed the Inner-Circle, the Outer-Circle and the Expanding-Circle varieties in the Concentric Circles model (Kachru, 1985).
8. The notion „native speaker“ has been employed as a mark of power and prestige for the benefit of some individuals.
9. „Nonnative“ has also been used as an instrument to exclude others on the base of race and culture.
- 10.The notions 'native'/'nonnative' are operational when one compares learners of a specific language with those who acquired that language at an early age.
- 11.Native Varieties - British English (BE), American English (AE), etc

12. Non-Native Varieties - Indian English (IE), Brunei English (BE) and Singaporean English (SE).
13. Widdowson's (1994: 385) - „no nation can have custody,“ for English is not the private property of any one nation or community.
14. Asian Englishes included the Englishes of South Asia (Bangladesh, India, Nepal, Pakistan, Sri Lanka) and Southeast Asia (Indonesia, Malaysia, the Philippines, Singapore, Thailand).
15. The passage of the Official Languages Act 1967 made English co-equal with Hindi „for all official purposes of the union, for Parliament, and for communications between the union and the states“
16. One important aspect of the value of English in South Asia is its capacity to provide neutralization.
17. Lexical Innovations: It means „the intrusion from a language in contact“ are exemplified by loanwords, loan shifts, and hybridization and parallel lexical sets.
18. In phonology, there are various segmental qualities that are distinctive for South Asian English.
19. Most diphthongs are pronounced as simple vowels in South Asian English.
20. In some sub-varieties of South Asian English the distinction between tense and lax vowels (e.g., those of deep Versus dip, seat Versus sit, and boot Versus book) is not made.
21. The attitudes of South Asians towards English amount to what Kachru (1994: 549–50) terms a linguistic „schizophrenia.“
22. The most salient and frequent feature of African English, according to Bokamba, is „omission of function words such as ... articles.“
23. A third type of African English structure exhibits plural of nouns which in Inner-Circle varieties are in the mass or non-count category.
24. Coinage is an important agent of Africanization of English - rich derivational morphology.
25. Compounding is very productive in all African Englishes.
46. Functionally, English is restricted to public domains of use, such as education and broadcasting in Africa.

Prompter When students are involved in a role play activity and lose the thread of what is going on and so not be quite sure how to proceed: what should teachers do in these circumstances?

They should hold back and let the students work things out for themselves or instead nudge them forward in a supportive way. Controller makes announcements, orders to be restored, provide explanations in a question and answer session. If the role for the latter they are adopting some kind of a directing role. Being a director, teacher will occasionally offer words or phrases, suggest that the students say something, or what would come next in a paragraph. i.e., often the main director students in monolingual groups to speak English rather than using their mother tongue

Qualities of manager in a classroom Classroom management refers to teachers' behavior that facilitates learning. A well-managed classroom increases learning. Effective classrooms managers are those who understand and use effective techniques and most effective instructional strategies. Effective teachers appear to be effective with students of all levels, irrespective of diversity in their classes. Even if the school the work in is highly ineffective, individual teachers can produce successful gains in student learning
