# IMP MCQs

## EDU401 Finals

- 1) According to Billet, which type of learning is more common and more effective than formal learning? **Informal**
- 2) What is one of the challenges in deciding the medium of instruction (MOI) at the primary level? **Deciding whether to use the mother tongue, Urdu, or English**
- 3) Which pressure is second most important for privatization after demand-side pressure? **Supply-Side Pressure.**
- 4) Another term that is used for privatization? **'liberalization'**
- 5) **Informal learning** may be intentional but, in most cases, it is non-intentional (or incidental /random).
- 6) The science of population is called **Demography.**
- 7) In general, the **democratic purpose** of schooling is usually interpreted as necessitating in general, the democratic purpose of schooling is usually interpreted as necessitating.
- 8) Which region is the highest as per the distribution of Private Educational Institutions in Pakistan? **Punjab 65%**
- 9) the idea of **'common schooling'**: social goods are created through communal activities.
- 10) Which of the following is not the feature of informal learning? A) Internally determined objectives B) No assessment C) Learner control **D) Teacher as authority**
- 11) \_\_\_\_\_ method involves creating physical representation, such as models of earthquakes? **Modeling**
- 12) What is the role of teacher when students are allowed to work on their own? **facilitator**
- 13) In which of the following ways does distance learning benefit teachers and schools? A) Reduce hours **B) Save teaching time** C) Improve gadgets D) Eliminate workshops
- 14) A truly **democratic** decision-making process needs to be sensitive to the views and participation of excluded minority groups within the school.
- 15) Using technology advantage teachers can present lessons and ways bed suited to the **cognitive** styles of their students.
- 16) What is adobe? **Digital Software.**

## EDU401 Finals

- 17) What are the good online resources to provide answers and share information with each other? **Blogs and chatroom's**
- 18) Who saying this "It is difficult to make a clear distinction between formal and informal learning as there is often a crossover between the two"? **McGivney 1999**
- 19) During disaster situations mapping can help by **Showing evacuation routes**
- 20) **Diversity of private education** in Pakistan is a characteristic feature and has tremendous implications for policy research but this aspect remains largely under explored in the literature.
- 21) **Productive Efficiency** criterion refers to the maximization of educational results for any given resource constraint.
- 22) **Equity** can be assessed in terms of **inputs**.
- 23) The quests for **fairness** in access to educational opportunities, resources and outcomes by gender, social class, race, language origins and geographical location of students are called **Equity**.
- 24) According to the 2007 IPCC (Intergovernmental Panel on Climate Change) report, what is necessary to prevent catastrophic damage from climate? **An immediate and sustained action.**
- 25) Which of the following is NOT the purpose of Population Education? A) Designed to help people understand the nature B) Know the causes of population events C) Identify the consequences of Population events **D) Evaluate the human nature**
- 26) **Reforms** are appropriate for policymakers and to decide raising the quality of educational services.
- 27) Formal education systems in the developing world and in most industrialized nations are financed and directed largely **from the national center**.
- 28) In the "World Population Plan of Action", **women's rights** are emphasized.
- 29) Which one of the following is the challenge for Technology limitation? **Device security (Physical and Logical)**
- 30) When the teacher is technology open and ready to embrace technology, the students will **learn well with technology in that classroom**.

## EDU401 Finals

- 31)** Population education is bound to reinforce the **trends** towards innovation and renovations.
- 32)** Rights of Children to basic education through mother tongue should be guaranteed at least till **Three Grade**.
- 33)** What educational right is raised in the context of ethnic minorities? **The right to receive primary education in their own mother tongue**
- 34)** What type of learning is typically provided by an institution, structured by objectives and time, and leads to certification? **Formal**
- 35)** Eraut's definition of non-formal learning is based on what type of study in the workplace? **Investigation.**
- 36)** Who argued that there is often a crossover between formal and informal learning, making distinction difficult? **McGivney.**
- 37)** In developing countries, population growth is estimated to account for how much of the medium-term rise in food demand? **70%.**
- 38)** Who says there is no such things as informal learning? **Billet.**
- 39)** **Eraut** Presents five features of formal learning.
- 40)** Which factor is highlighted as a subject of particular concern in the area of social justice? **The status of women and girls.**
- 41)** Which of the following population places an extra burden both on the area receiving inhabitants and on the area from which the migrants have come? **Migratory**
- 42)** During which century, did the population experience a rapid increase in the rate of population? **Mid-20th century.**
- 43)** In which of the following years of human history, population growth was negligible? **1<sup>st</sup> thousands.**
- 44)** Beckett and Hager (2002) identify practice-based characteristics in which type of learning? **Informal.**
- 45)** From which grade is English introduced as a subject? **Grade 1.**

## EDU401 Finals

- 46) Which type of learning involves pursuit of knowledge or skills without externally imposed curricular criteria? **Informal learning**.
- 47) What is the annual average annual rate of population in industrial nations? **1%**.
- 48) What should be used as a medium of instruction in the early childhood years? **Mother Tongue**.
- 49) In the sixteenth century in England, the word population was used as synonym for: **devastation**.
- 50) For formal learning, what type of timeframe is typically required as per Colley, Hodgkinson and Malcom? **Fixed ad limited**.
- 51) According to Billet, which type of learning is more common and more effective than formal learning? **Informal**.
- 52) What is one advantage of using the mother tongue as the medium of instruction (MOI) in primary education? **It promotes access, equity, and academic achievement**.
- 53) EU's definitions are related with the context of **Life-Long Learning** policy.
- 54) What is the medium of instruction (MOI) recommended for early grades (Pre-primary to Grade 5)? **Mother tongue**.
- 55) In health care, developing nations mainly focus on: **Reducing infant mortality**.
- 56) Introduce and expand mother tongue literacy courses in: **Local Language**.
- 57) When does the transition from mother tongue to Urdu as Medium of Instruction begin? **Grade 4**.
- 58) The sum of the decisions of people shapes the nature of population: **forces**
- 59) Which of the following is NOT a learning type? **Unformal**.
- 60) Why is the **mother tongue** recommended as the medium of instruction in early childhood education? **To support a child-friendly environment and children's right to learn**.
- 61) Other than education services that are provided by the schools fall under \_\_\_\_\_? **Non-formal services**

## EDU401 Finals

- 62) What is given to the population education at the present stage due to the difference in goals and objective? **Identity**
- 63) What is the relationship between macro and micro units in population decision-making? **They are interrelated**
- 64) What is concerned to be used in population education activities for emphasis on relevance, decision making and future orientation? **Methods**
- 65) Which level should be emphasized to make population education more meaningful to learners? **Individual and family level**
- 66) Which approach can help in addressing both educational and population-related challenges? **Implementing population education**
- 67) What is the current trend of privatization in education policies across the primary, secondary, and tertiary sectors? **Developing**
- 68) Which concern arises when planning broader population education programs? **Generalizing local participation.**
- 69) Which type of education can contribute to solving both population and educational problems faced by individuals and nations? **Population education**
- 70) One way to encourage private expenditures on education is to make those expenditures exempt from: **Taxes**
- 71) Training for citizenship and national identity usually involves: **Conditioning**
- 72) **Liberalization** would involve reducing **Red Tapism.**
- 73) Annual average industrialized nations rates of **1 %.**
- 74) Why do people think population education is about national or global concerns? **Not enough data for small units**
- 75) What is an important goal that is often suggested for population education? **Renovation**
- 76) Cultural sensitivity in planning raises concerns about: **relevance of the curricula**
- 77) **Media** communication is primarily involved in a process of transmitting information.

## EDU401 Finals

- 78) What does a value-fair stance in education involve? **Examining multiple viewpoints**
- 79) Methodological issues are concerned which of the following factor for different ways of adding population education to the school curriculum? **Effectiveness**
- 80) How do ideology and culture shape population education? **By framing goals**
- 81) What do some scholars believe about population education in schools? **It is part of other educations**
- 82) What has contributed to disillusionment with schooling in many parts of the world? **Ignoring learner differences**
- 83) What are the educational coupons called that entitle each student to a prescribed amount of schooling? **Vouchers**
- 84) What is a common focus of out-of-school programs for adults? **Preparing for future decisions**
- 85) Which type of demography is mainly learned informally through family, kin, peers, and community interactions? **Folk demography**
- 86) What type of decisions are often addressed in school-based population education? **Future life decisions**
- 87) In population education programs, where is learner participation often encouraged but rarely practiced? **Planning stages**
- 88) What does privatization involve? **Shifting control to private individuals**
- 89) What does private funding in education often involve? **Families paying part of the costs**
- 90) Which one is not a goal of relevance? **a) Impair advancement in society.** b) Focus on needs of communities c) Progress nation's aptitude d) Improves learner's ability
- 91) Which level refers to individual and family situations in population education? **Micro level**
- 92) **Six** have **higher rates** and **four** have **lower rates**.

## EDU401 Finals

- 93)** How formal education systems are typically managed in both developing and industrialized nations? **Through the national center**
- 94)** What is a key idea of private regulation in education? **Students and families help monitor quality**
- 95)** The Census 1999-2000 showed that annual investment by the private sector was **Rs. 2.5 billion**
- 96)** **Environmental** education (EE) aims to create an environmentally literate citizenry.
- 97)** The UNESCO's Convention against **discrimination in education** (1960) acknowledges the crucial role of education in ensuring equality of opportunity for all children.
- 98)** Communities in sub-Saharan Africa are most concerned about **lack of water**.
- 99)** Children took the lead in the 2004 post tsunami reconstruction and repair of the schools in the Trincomalee district of northeast **Sri Lanka**.
- 100)** **Innovation and Renovation** is an important goal often suggested for population education.
- 101)** **subsidies or assistance** grants directly to private schools.
- 102)** international reviews of the **demand-side and supply-side policies** show that many countries have implemented some form of **privatization**.
- 103)** In Los Gatos, California's Hillbrook High, tech savvy students are assigned to be **"tablet doctors"** who provide their fellow classmates and teachers with technical assistance.
- 104)** According to NEMIS report for 2007-08 non-teaching staff was **11%**.
- 105)** **World Bank** commissioned an assessment under LEAPS project based on test scores of grades 3 students from both public and private schools in rural Punjab.
- 106)** Equity can also be assessed in terms of **outcomes**.
- 107)** **Ideology** plays an important role in determining what is most relevant to the needs of any particular group, there is no agreement on what should or should not be included.

## EDU401 Finals

- 108)** two major types of expenditure were salaries for **non-teaching staff (11%)** and rent of **building (10%)**.
- 109)** recurrent expenditure amounted to about **Rs.12 billion** in the year preceding the Census.
- 110)** **Teaching staff** was given to private sector according to the Census 1999-2000.
- 111)** The consideration of population problems cannot be reduced to the analysis of **population** trends only.
- 112)** Accomplishing this means that educators must view technology not as the enemy but as the key tool to motivate an **engaged student**.
- 113)** The term privatization is the transfer of activities, **assets and responsibilities**.
- 114)** There are many experiences across different countries at different stages in the process of **privatization**.
- 115)** **Diversity of private** education remains largely under explored in the literature.
- 116)** A second purpose is to identify areas where **development** is needed to indicate those that can be dealt with by alternative strategies or by research.
- 117)** At the time of its inception in 1947, the state promised universal primary education as well as sought **'other actors'** to participate in realizing it.
- 118)** Which one is not a visual technique? a) Mapping **b) Reflection** c) Modeling d) Record keeping.
- 119)** diversity in the private educational marketplace is a response to variance in the **demand** which already exists in the society.
- 120)** By 2002, there were over **2,700 charter** schools in about **37 states**, catering to students of various socio- economic groups and with different educational preferences.
- 121)** The purpose of the PowerPoint is to **help you learn**.
- 122)** When school should fall under other services? **a) Private contracting** b) Privatization. c) Public School Liberalization
- 123)** The school cluster approach also provides for **diversity**

## EDU401 Finals

- 124)** Which one is not a primary barrier to the effective implementation of child centered sustainable development curricula? a) Understanding **b) Reflection**. c) Lack of knowledge d) Pre-service training
- 125)** Bali is situated in: **Indonesia**
- 126)** it is the teacher responsibility first to **learn, understand and experience the technology** they are putting to their students through.
- 127)** Which of the following categories describes both forms of environment education? **Formal and informal**
- 128)** Which of the following has the goal to improve learners' and nations' abilities to deal effectively with population issues? **Relevance**
- 129)** In which country rainwater harvesting projects in school were carried out? **Myanmar**.
- 130)** In which areas of Pakistan has the private provision of education also become a significant phenomenon? **rural areas of Pakistan**.
- 131)** What is the third type of privatization? **Private regulation**.
- 132)** How many forms are there for privatization? **Three 3**
- 133)** A motivation for greater freedom of choice is to make the education system more: **Accountable**
- 134)** Achievement of an output efficiently is known as: **Efficiency**
- 135)** Which of the following redesign means a child is not working alone? **Participate**
- 136)** Who has strong objections to the term informal learning because all learning takes place within social organizations? **Billet (2001)**
- 137)** Which one of the following learning is activated by individual learners rather than teachers? **Informal**
- 138)** Which of the following statements is NOT TRUE about women in the "World Population plan of Education"? **a) She doesn't have access to get education** b)

## EDU401 Finals

She has equal participation in political life      c) She has equivalent rights in social life  
d) She has freedom in economic opportunities

**139)** "The company of dilat rate in reaching particular audiences" refers to which of the following research? **Outreach**

**140)** Where a school has a captive market, it is less likely that it will respond to students: **Needs**

**141)** According to the Census 1999-2000, the largest chunk of private sector's expenditure went to **teaching staff (57%).**

**142)** The second purpose of population education is to identify the areas that need: **development**

**143)** Today most people associate the word population with **growth** though the depopulation of rural areas.

**144)** Learning that is not provided by an education or training institution and typically does not lead to certification is called **non-formal learning.**

**145)** Death rates have **dropped** rapidly only in the last few decades of this century.

**146)** **Assimilation Model:** Starting in the mother tongue, and continuing to national language immersion.

**147)** Eraut's definition of non-formal learning is based on an **investigation** into learning in the workplace.

**148)** **Informal learning** is not only more common, but also more effective than formal learning: **Beckett and Hager (2002)**

**149)** The status of women and girls is a subject of particular concern today within the general area of social **justice.**

**150)** EU's definitions are related with the context of **Life-Long Learning** policy.

**151)** **population growth** is not the sole reason for the world's food problem.

**152)** an average world population growth rate at present of **2 percent** is misleading.

## EDU401 Finals

- 153)** Excess demand has grown because education has become more important for social and **economic** betterment.
- 154)** In rural areas, parents favor **single-sex** schools for older girls.
- 155)** The Rio Declaration on Environment and Development of 1992 confirmed the indispensability of children in achieving **sustainable development**.
- 156)** some advocates of privatization are motivated by an **ideological** commitment to individual rights over government intervention.
- 157)** In practice, environmental education is intended to exemplify sound education principles based on sound **pedagogy** and sound science.
- 158)** Even for those who value freedom of choice, **the costs** of deciding which school to go to --- or to change to --- may be high.
- 159)** A comprehensive framework for evaluation presented here has **four** criteria.
- 160)** the fee structure **correlate** with quality of education in private schools.
- 161)** The growth of private schools received a serious setback due to government's drive for nationalization in **1972**.
- 162)** Quality of teaching and learning is a main factor in the rapid growth **of private educational** institutions in Pakistan.
- 163)** Assessments of learning and student **achievements** shape an idea of overall level of quality in private schools but they present different pictures.
- 164)** Recent scientific findings indicate that a changing **climate** has a significant impact on our planet.
- 165)** detractors may argue that any private education system based on ability-to-pay is **inequitable**.
- 166)** Population education is not an attempt to develop a new **discipline**.
- 167)** Deciding how these systems can be responsive to the needs of learners in different parts of the country, in different racial and ethnic groups, in different social and economic classes is another problem for **population educators**.

## EDU401 Finals

- 168)** Industrialized nations, struggle with unprecedented **man-made** threats to health.
- 169)** The consideration of population problems cannot be reduced to the analysis of **population** trends only.
- 170)** One of the goals of **population education** is to assist learners to identify, examine and understand their folk demography and implications it has for population decisions.
- 171)** While **developing** nations wrestle with agrarian reforms.
- 172)** Before passing on to the question of **integration**, it seems necessary to indicate briefly the goals of both population education and other educational programs which are in some way related to population education.
- 173)** The nature and scope of **educational** programs are influenced by political and ideological orientations.
- 174)** Few individuals make **population**-related decisions outside a group context.
- 175)** Although **demography and folk demography** form the core of knowledge needed for population education, they do not cover the whole range of issues involved.
- 176)** The greatest confusion that arises concerns population education's relation to sex education, family life education, environmental education and **development education**.
- 177)** many of the earlier **curricula** for school programs emphasized world and national issues.
- 178)** Educational institutions in all countries should be encouraged to expand their **curricula** to include a study of population dynamics and policies.
- 179)** Developing nations average annual growth rates of **2.5 per cent**, which means that their populations will double in 28 years.
- 180)** industrialized nations average annual rates of **1 percent**, which means that their population will double in **70 years**.
- 181)** Planners of population education activities must identify the level of **aggregation**.
- 182)** As a result of external production, the **Textbook Boards** have not been able to prepare even basic elementary readers in any of the mother tongues.

## EDU401 Finals

- 183)** In the Netherlands, the proportion of schools administered by private school boards is almost **70%**.
- 184)** Methodological issues also concern **effectiveness** of different ways of adding population education to the school curriculum/
- 185)** In school programs, many of the population related decisions likely to be considered are those that will be made in the **future**.
- 186)** The term privatization is the transfer of activities, **assets** and responsibilities from government/public institutions and organizations to private individuals and agencies.
- 187)** The challenge facing **population educators** is to ensure that, in translating this goal into action, the program retains its focus on the needs of the learners, their families, communities and societies.
- 188)** There are many experiences across different countries at different stages in the process of **privatization**.
- 189)** One way to foster competition between public and private schools is to give .....or assistance? **subsidies**
- 190)** population education in **a lifelong** context.
- 191)** if it is decided that a prescriptive approach is necessary the efficacy of prescription is, in certain circumstances, **questionable**.
- 192)** most although not all information and motivation activities have been aimed at supporting **family-planning** activities.
- 193)** No education system, anywhere in world is free from some degree of **persuasion** and prescription.
- 194)** broader research agenda needs to be initiated for ..... so that future programs can be planned more rationally and systematically. **program development**
- 195)** All people are population **actors**.
- 196)** **Non-formal** or further education occurs when learners opt to acquire further knowledge or skill by studying voluntarily with a teacher who assists their self-determined interests.

## EDU401 Finals

- 197)** **Formal education** occurs when a teacher has the authority to determine that people designated as requiring knowledge effectively learn a curriculum taken from a pre-established body of knowledge.
- 198)** **technology** as a fundamental provider of education in future years.
- 199)** The continued absence of **research** findings in these areas appears to be one of the major barriers to the further progress in the conceptual and methodological development of population education.
- 200)** the present situation of the **developing countries** originates in the unequal processes of socio-economic development which have divided peoples since the beginning of the modern era.
- 201)** While children are among the most vulnerable to climate change, they need not be considered passive or helpless **victims**.
- 202)** According to the research, educating girls and women is one of the best ways of strengthening community adaptation to **climate change**.
- 203)** mitigation and **adaptation** are two complementary strategies that reduce risk and strengthen affected communities.
- 204)** ideally, non-formal and formal education systems are complementary, working as one **holistic system** to provide quality education for all learners.
- 205)** Natural disasters and climatic events such as earthquakes, storms, drought or floods require schools to consider a range of **safety** and disaster preparedness measures.
- 206)** Strategies to awareness require collaboration with non-governmental organizations and the **private sector**.
- 207)** Quality education is a key component of **adaptive capacity**, the knowledge and skills needed to adapt lives and livelihoods to the ecological.
- 208)** The most common approaches used for children in the exploration of the environment are **mapping**.
- 209)** Which of the following has areas that are designated with subtitles and need to fill it? **Template**.

## EDU401 Finals

- 210)** Former strategies that involved teaching by rote and following **rigid** academic agendas.
- 211)** The technology that students use, admire and aspire to educational institutions will appeal to digital native, driving which of the following's aspects of students on a path to success? **innovation and enthusiasm.**
- 212)** **Formal communication** channels are especially powerful components of environment friendly school.
- 213)** The second pathway is that of **collaboration.**
- 214)** The 1<sup>st</sup> pathway is **customized.**
- 215)** The 3<sup>rd</sup> pathway is that **Creative.**
- 216)** The 4<sup>th</sup> pathway is that of **distribution.**
- 217)** What teachers need to do for paths to successful education and to answer the question that where and how can teacher put in the technology component? **Collaborative work together.**
- 218)** Using technology increased the amount of time students spent on a task, their willingness to critically review and revise their work and their pride in which one of the following aspects? **Finished product**
- 219)** Jobs require **intellect and creativity.**
- 220)** When technology comes into the classroom the teacher is not the teacher, the teacher is **the facilitator.**
- 221)** today's employers are demanding workers who can think and work differently from their **parents.**
- 222)** Action based research takes young people into the real world makes them **experience the** reality.
- 223)** it is important to interact with people from elsewhere because then you get a **fresh perspective** to the same issue.
- 224)** There is mounting evidence of the positive relationship between green schoolyards and student **health.**

## EDU401 Finals

- 225) calculating, drawing and building garden blocks which includes of course **math and geometry**.
- 226) Technology takes the boring and makes it interesting when you add sound color music movement into your academic presentations into your **teaching abilities**.
- 227) when we do mass farming, we talk of **pesticides** and contaminant.
- 228) Methods for investigating climate change and sustainability with children should include a range of **visual** techniques at which children can excel.
- 229) In most **environment**-friendly schools may propose direct involvement of all students or a system of voting.
- 230) the participation of adult stakeholders, such as parents and teachers, should be sought. But their voice should not override children's **preferences**.
- 231) the education revolution driven by **technology** is at once old and new.
- 232) entire focus on using technology is **entertainment** that needs to change.
- 233) Many environment-friendly schools around the world have incorporated EE into their design, operation and **curriculum**.
- 234) change and adapt new techniques and approaches of the 21<sup>st</sup> century. This heavily depends **on technology**.
- 235) the tactile learner needs to **move**.
- 236) students should know **technology** at the back of their only then they will contribute in a positive constructive way.
- 237) Now technology and computer science are not something you can learn and be good at by reading and writing about it, this needs to be **practiced**.
- 238) Action based research that is done on the ground not in **a classroom not in a lab**.
- 239) One objective is to identify issues and clarify difficulties so that population educators and educators working in related fields can focus attention on their **solution**.

## EDU401 Finals

- 240) The 'green schools' design approach describes environmentally sustainable schools.
- 241) One way to encourage private expenditures on education is to make those expenditures exempt from taxes.
- 242) A second purpose is to identify areas where development is needed to indicate those that can be dealt with by alternative strategies or by research.
- 243) everyone needs to be involved and not just in the talking phase, but also in the action phase.
- 244) children from marginalized communities, these are communities that are out of the bounds of the urban and rural.
- 245) Effective teacher preparation in environmental education requires pre-service teacher training at the minimum.
- 246) the principles of ecology, the origins of food and respect for all living systems.
- 247) Schools should promote the social good; this is the main reason why they are publicly funded.
- 248) The more options you have the chances of reaching a wider community is guaranteed.
- 249) Making Association layers awning with individuals in the community is the critical factor.
- 250) School buildings and grounds can be made more friendly safe and sustainable through various concrete actions

# SUBJECTIVE

Write down the benefits of Cluster approach synergy in school with reference to disaster preparedness?

## EDU401 Finals

- 1) Better preparedness for recurring disasters
- 2) Collective planning and brainstorming
- 3) Prevention as well as response
- 4) Stronger community-level impact
- 5) Sharing solutions across locations
- 6) Improved coordination and teamwork
- 7) Active involvement of children and youth

### Difference between immersion model and National Language Model?

**Immersion Model:** The main instructions are given in the national language, but the teacher is allowed to explain and discuss them orally in the local language so students can understand better.

**National Language Model:** Only the national language is used for instruction, and the teacher does not use the mother tongue at all.

### Write a note of common schooling in privatization?

**Common schooling means** a single education system where all children, rich or poor, study together in similar schools with the same quality of education. It promotes equality, social unity, and equal opportunities for all students. **Privatization of education means** that schools are run by private owners instead of the government. These schools usually charge fees, so only families who can afford them can send their children there.

When education is privatized too much, common schooling becomes weak because students are divided based on money. This can increase inequality in society. Common schooling supports equal education, while privatization often creates differences in quality and access.

### According to Eraut, what are the features of Formal learning?

- 1) A prescribed learning framework
- 2) An organized learning event or package
- 3) The presence of a designated teacher or trainer
- 4) The award of a qualification or credit
- 5) The external specification of outcomes

### What is an Educational Voucher?

Vouchers are like education coupons given to students. Each student receives a fixed amount of money from the government for schooling. This money can be used to study in any approved school, whether public or private. Schools earn money based on how many students join them. If a school does not get enough students, it must reduce its expenses or may even close down.

## EDU401 Finals

In a voucher system, the government still pays for education, but it does not have to run the schools itself. Parents are free to choose the school they like, which increases their choices. Vouchers may not pay the full cost of education; they only help encourage students to enroll. For example, in Guatemala, vouchers or scholarships are given especially to girls because their school enrollment rates are usually low.

Analyze the situation when school have more than two issues then how school cluster approach will be helpful? Give your answer with suitable examples.

When a school has more than two issues, it becomes difficult to solve them alone because resources, expertise, and support are limited. In this regard the school cluster approach is very effective because it promotes cooperation, resource sharing, and collective improvement. This approach helps schools solve problems more efficiently than working alone.

### How it is helpful:

- a) **Sharing Resources:** Schools in a cluster can share teachers, books, laboratories, and training facilities. For example: If one school lacks a science teacher, a teacher from another school in the cluster can teach there part-time.
- b) **Improved Quality of Education:** Stronger schools support weaker ones, helping improve teaching and management practices. For Example: A well-performing school mentors a poorly performing school in lesson planning and assessment.
- c) **Joint Problem-Solving:** School heads and teachers meet regularly to discuss common problems and find solutions together. For Example: If several schools face low enrollment, they can plan joint community awareness programs.

### Give historical background of Privatization in Pakistan?

Privatization of education in Pakistan is not a new concept.

- 1) **1947:** At independence, Pakistan promised **universal primary education** but, due to lack of resources, it invited private actors due to limited resources.
- 2) **Early Years:** Private education existed through madrassahs, missionary schools, NGOs, and business-run schools.
- 3) **1972:** Government policy of **nationalization** caused a decline in private schools.
- 4) **Late 1980s: Denationalization** revived the private education sector.
- 5) **1981–1998:** Limited research due to absence of population census.
- 6) **Late 1990s:** Private schools were no longer limited to urban elites.

## EDU401 Finals

**7) After 2000:** Rapid growth of private schools in both urban and rural areas.

**8) MDGs (2000):** International pressure pushed Pakistan to support private education under liberal policies to achieve **Education for All**.

### Technique of classroom assessment?

- ✚ Tests
- ✚ Quizzes
- ✚ worksheets
- ✚ portfolios
- ✚ Peer Assessment
- ✚ Self-Assessment

### Diversity of Private Education in Pakistan?

Private education in Pakistan is very diverse, but most studies treat it as if all private schools are the same. In reality, private schools differ in many ways:

- ❖ **Fees:** Some are low-fee, some high-fee.
- ❖ **Medium of Instruction:** Some schools teach in Urdu, some in English, and they may follow different syllabi.
- ❖ **Gender:** Some schools are for boys, some for girls, and some are mixed.

In fact, private schools can be classified in even more categories, showing a wide variety in how education is provided.

### Lack of food?

A lack of food happens when people do not have enough to eat or cannot get the food they need. In developing countries, this problem is often caused by:

- (a)** Rapid population growth
- (b)** Limited food production
- (c)** Poverty
- (d)** Unequal distribution

In developing countries, population growth is a major reason for increased food demand. While population growth isn't the only cause of food problems, it is responsible for about **70% of the increase in food demand** in the medium term.

### How is taking photos and videos during tours beneficial for children?

## EDU401 Finals

- ❖ It helps children observe carefully and notice important details in their surroundings.
- ❖ Photos and videos act as learning records, which children can review later to remember what they saw and learned.
- ❖ It encourages creativity as children think about what to capture and how to present it.
- ❖ Children can use photos and videos for projects, presentations, and discussions in class.
- ❖ It makes learning more interesting and enjoyable, increasing motivation and engagement.
- ❖ Children can be creative photographers and film maker.

### Why is Privatization Happening?

There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Privatization is happening for several simple reasons:

-  Demand – Side Pressures
-  Decline in public services
-  Supply-side Pressures
-  General Pressures
-  Parental dissatisfaction
-  Funding problems

### According to Livingstone Formal, Informal & Non-Formal Learning?

#### **1) Formal Education:**

- Happens in schools or traditional systems where a teacher decides what learners need to know.
- Follows a pre-set curriculum and often has age-based classes.
- Example: Going to primary, secondary, or university school.

#### **2) Non-Formal Education:**

- Happens when learners choose to learn voluntarily with a teacher's help.
- Uses an organized curriculum but is not part of the formal school system.
- Example: Adult education classes, workshops, or skill training courses.

#### **3) Informal Education:**

## **EDU401 Finals**

- Happens outside formal or structured systems.
- Learning is spontaneous, without a pre-set curriculum.
- Example: Learning job skills from a mentor, or gaining knowledge through community activities.

### **Environmental education in private sector made be successful?**

Yes, environmental education (EE) can be successful in private schools if the right conditions are met:

- 1)** Incorporating EE into the curriculum and adapting it locally.
- 2)** Teacher training to improve knowledge and skills for teaching EE.
- 3)** Raising awareness through media, events, and community engagement.
- 4)** Using non-formal education like after-school activities, field trips, and projects.
- 5)** Providing a safe, environment-friendly physical school environment.
- 6)** Developing green schools with sustainable design, energy efficiency, and local materials.
- 7)** Carrying out EE projects in the community, linking schools and local people.

All these strategies show that if private schools follow similar approaches, environmental education can be successful.

### **Migratory population Trend?**

Migratory population trend refers to the movement of people from one place to another and the patterns this movement creates over time. Many people move from rural areas to cities in search of jobs, education, and better living conditions. Others migrate from one country to another for work, safety, or improved opportunities. Some migration is seasonal, such as workers moving during harvests or festivals. Over time, these movements affect population distribution, urban growth, and the demand for social services. Studying migratory trends helps governments and planners make better decisions about cities, schools, hospitals, and employment opportunities.

### **Why must environmental education be locally relevant? Explain with an example.**

Environmental education must be locally relevant and culturally appropriate, and it should also include reference to equity issues. It should be based on action-based research, which is carried out in real settings rather than only in classrooms or laboratories. Action-based research takes young people into the real world, allowing them to experience real environmental problems and make meaningful findings. Environmental education should first focus on local issues, because if

## EDU401 Finals

local problems are not addressed, it becomes difficult to understand and solve global environmental issues.

### **Example:**

In a community facing water scarcity, environmental education should focus on water conservation, rainwater harvesting, and efficient water use. When students study and practice these local solutions, they can immediately apply what they learn to improve conditions in their own area. This local understanding later helps them understand wider global water issues as well.

### Financing Private Education in Pakistan?

Private education in Pakistan is mainly financed through fees paid by parents. Most private schools and colleges depend on monthly or annual tuition fees for their expenses. Some institutions offer installment plans to make fees affordable. Scholarships and fee concessions are given to deserving or talented students. In addition, NGOs and foundations provide financial support or interest-free loans. Government support is limited, but some private schools reserve free or low-fee seats for needy students

### How gamification too is beneficial for teachers in classroom?

Gamification is the use of game elements—like points, badges, leaderboards, challenges, or rewards—in non-game settings, such as classrooms, to make learning more fun and engaging.

### **Gamification Benefits:**

- ✓ Increases Student Engagement
- ✓ Makes Learning Fun
- ✓ Encourages Healthy Competition
- ✓ Helps Track Progress
- ✓ Supports Differentiated Learning
- ✓ Promotes Positive Behavior

### Why Govt supports the private financing?

Governments support private financing of education for several reasons:

- ✚ Reduce Government Burden
- ✚ Increase Access to Education
- ✚ Encourage Quality and Innovation
- ✚ Shared Responsibility
- ✚ Promote Choice

### Three forms of Privatization? Explain

#### **1) Private Provision:**

## EDU401 Finals

Education can be provided by **private agencies** instead of government schools. Private schools can be run by:

- Religious groups
- For-profit businesses
- Charities or other organizations

Many families choose private schools even when public education is free.

### **Examples around the world:**

- ✚ **USA:** 11% of children are in private schools, mostly elementary.
- ✚ **Netherlands:** About 70% of schools are privately run but get public funding.
- ✚ **Denmark:** Two-thirds of students attend publicly funded private schools, mostly religious.
- ✚ **Belgium:** Around 50% of students are in private schools.
- ✚ **Philippines:** Over 75% of university students are in private universities.
- ✚ **UK & much of Europe:** Very few students attend private schools.

### **2) Private Funding:**

Education can be **paid for by private individuals** (like parents) instead of fully by the government. This is called privatization. Private schools usually get money from tuition fees paid by families. In some developing countries, families pay **extra fees** for books or materials even in state schools. Sometimes, both families and governments share the costs.

- Example: In the U.S., public universities charge tuition that covers **half the cost**, the rest comes from government subsidies.
- Example: In South Korea, families spend as much on private education and tutoring as the government spends.

### **3) Private Regulation: (S.O)**

Education services can be **checked by students and their families** because they use the services directly. If a school is of poor quality, parents may not enroll their children or may demand better services. Privatization can give parents more choice about schools and what happens in them, even within the public system. Governments also monitor education quality by making laws,

## EDU401 Finals

inspect schools, audit them, and check teacher licensing, curriculum, and academic standards.  
**For example:**

- ❖ **OFSTED** in England and Wales inspects schools.
- ❖ In Denmark, all schools must follow state requirements.

Another option is letting parents choose schools based on their own preferences, without relying only on government inspection systems.

### What is Population Education?

The word population has meant different things at different times. In the sixteenth century in England, it was used as synonym for devastation, for laying waste. Today, people usually think of population as growth, although many rural areas are actually losing people, which happens in both developed and developing countries. Population is not just about births; it also includes the movement of people within and between countries and mortality.

Population education is the process of teaching and learning about population issues and their impact on society, the environment, and development.

### What is Non-Formal Learning?

Non-formal learning is intentional from the learner's perspective. Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

### What is private contracting in education, and why do governments support it?

Schools provide a range of services under the title 'education'. These include instruction, but they also provide food, sports facilities and welfare counseling.

Many of these **ancillary services** can be done by private companies under contract instead of the government. If private contractors can do these jobs more efficiently, governments encourage more contracting. For example, companies now provide textbooks, food, transport, and cleaning to schools. In the 1990s in the U.S., **Educational Management Organizations (EMOs)** appeared, offering services like student assessment, budgeting, and administration. This allows schools to focus on teaching while private contractors handle other services.

Why governments support it:

- ✚ To improve quality
- ✚ To reduce costs
- ✚ To expand access
- ✚ To focus on performance

## EDU401 Finals

### Discuss Supply-side Pressures in your own words?

Another reason for privatization is that public schools are often seen as low quality, and sometimes they don't get enough money. Many parents think their local public school doesn't give the kind of education their children need. For example, some schools can't always keep children safe. Sometimes, there are too many students because enrollment grows faster than funding. This causes overcrowded classrooms, big class sizes, and schools having to run double or triple shifts. Part of the problem is that less money is spent per student.

Higher education is expensive, and governments often ask students to pay more for their studies. Because of these problems, some reforms have been made, like students paying privately, creating private schools, and giving more resources to schools that perform well. Another reason public schools may seem low quality is that they have reached their limits. With fast population growth, government schools can get overcrowded, so private schools are needed. For example, in the Dominican Republic, private schools get government support if they take in low-income students when public schools are full.

### What do you understand by population-related decision making?

In many cases, people do not make population-related decisions alone; the decisions are often made by a group, like a large family in Pakistan or a village street committee. Groups also influence the choices of individuals and families. Understanding these influences helps people make better, informed decisions. The goal is to see how big societal units (macro) and small units (micro) are connected. However, the choices available to individuals or groups are often limited because of inequality, social rules, traditions, and taboos.

### What characteristics are given by Beckett and Hager, to informal learning?

- 1) Practice-based informal learning is organic / holistic.
- 2) Practice-based informal learning is contextual
- 3) Practice-based informal learning is activity- and experience-based
- 4) Practice-based informal learning arises in situations where learning is not the main aim
- 5) Practice-based informal workplace learning is activated by individual learners rather than by teachers / trainers
- 6) Practice-based informal workplace learning is often collaborative / collegial

### Why is it important to include environmental education in in-service teacher education programs?

- I. Teachers' knowledge from pre-service training may become **outdated**, so refresher courses are needed.
- II. Many teachers **lack knowledge and understanding** of environmental education.

## EDU401 Finals

- III.** In-service programs help teachers **stay updated** on climate change, sustainability, and life skills education.
- IV.** Continuous training enables teachers to **teach environmental topics accurately and effectively**.
- V.** Teachers can connect with **community experts and stakeholders** to fill gaps in their knowledge.
- VI.** This ensures students receive **relevant and practical environmental education** in classrooms.

### Effectiveness Tracking-Challenges?

#### **1) Limited Measurement:**

- ❖ We don't yet have proper tools to measure how well technology works in classrooms.
- ❖ Feedback from software or programs is seen only by the student, not the teacher.

#### **2) Impact on Student Achievement:**

- ❖ It's hard to know if students are improving in writing, participating in discussions, or contributing to forums.
- ❖ Determining these skills in a tech-enabled classroom is a challenge.

#### **3) Short-term vs Long-term Impact:**

- ❖ Short-term: How students perform this week, month, or year.
- ❖ Long-term: What skills or knowledge they retain 5–10 years later.
- ❖ Measuring both short-term and long-term effects is important for research.

#### **4) Return on Investment (ROI) Analysis:**

- ❖ Schools invest in technology, but it's important to measure the benefits or outcomes of that investment.
- ❖ Understanding ROI is a valuable area for future research.

### Why is need for population education?

Population education is needed because it helps people understand and manage population issues in a better way.

## **EDU401 Finals**

- 1** to help people understand the nature
- 2** Identify the consequences of Population events
- 3** It creates awareness about population growth and its effects.
- 4** It promotes responsible family planning and informed decision-making.
- 5** It improves health, education, and quality of life.
- 6** It helps in sustainable development by balancing population with available resources.
- 7** It helps people understand problems like overpopulation, poverty, unemployment, and lack of resources.

### **Implementing Mother Tongue as Medium of Instruction Challenges?**

- ❖ It is only useful in similar (homogeneous) communities.
- ❖ Teachers are not yet trained, and no proper system for hiring or training them exists.
- ❖ Because books are made outside, Textbook Boards cannot prepare even basic reading books in mother languages.
- ❖ Political problems and unrest make it hard to apply changes at the local level.

### **role of media and population education?**

- 1** Media creates awareness about population problems.
- 2** It gives information about family planning and small family norms.
- 3** Media helps people understand issues like overpopulation, health, and poverty.
- 4** TV, radio, newspapers, and social media reach a large number of people quickly.
- 5** Media helps change attitudes and behavior by spreading positive messages.

### **Students need more than just technology skills?**

Students need more than just technology skills because technology alone is not enough for success. They also need critical thinking to solve problems, communication skills to share ideas, and social skills to work with others. Emotional skills help students handle stress and make good decisions. Moral values are important so they use technology responsibly. Therefore, students need overall life skills along with technology skills.

### **How does technology support instruction?**

- i.** Makes lessons more interesting using videos and visuals
- ii.** Helps teachers explain concepts clearly
- iii.** Allows self-paced learning for students

## EDU401 Finals

- iv. Provides quick tests and feedback
- v. Improves communication between teachers and students
- vi. Encourages interactive and active learning

### “World Population Plan of Action”?

The World Population Plan of Action recognizes women’s rights by stating that women should be fully included in development. Women must have **equal access to education** and **equal participation** in social, economic, cultural, and political life. From a population point of view, the main issue in many countries is that women should have the right to make informed decisions about important life events such as marriage and childbirth. However, this freedom is difficult to achieve in societies where men and women do not have equal opportunities.

The World Population Plan of Action emphasized the need for population education. It stated that schools and colleges should include population studies in their courses. These studies should cover population growth, family life, responsible parenthood, and how population affects social and economic development and international relations. Population education programs can help solve population and education problems faced by people and countries. However, real solutions depend on social changes that promote equality, social justice, independence, and self-determination.

### Student Adjustment- Mitigation Strategy?

- **Parental awareness and support:** Parents need to understand that technology is important for future jobs. Today’s employers want people who can use technology. Parents may need to make some sacrifices to afford devices for their children. Schools can also ask donors or suppliers to provide needed gadgets for classrooms.
- **Technology use rules at school and home:** Clear rules are needed for using technology both in school and at home. At home, things like TV and mobile phones can distract students from study. Parents should set limits on screen time and closely monitor how children use technology.
- **Student training before using technology:** Students should be trained before technology is introduced in classrooms. This helps them understand why learning is changing from books and paper to digital tools. When students understand the purpose, they accept and use technology more positively.

### When the school is in landsliding areas what strategies you adopt for preserve the landsliding?

- Remove large rocks
- Plant stabilizing shrubs and

## **EDU401 Finals**

- Research and planning
- Involve students and community
- Waste management
- Identify risky structures
- Advocate for laws
- Structural changes

### **What is the link of population studies with other studies?**

Population studies are connected to many other fields because population affects almost every part of society. In economics, population influences jobs, income, and the use of resources. In health and medicine, population size affects healthcare services, disease control, and nutrition. In sociology, it helps us understand family structures, migration, and social behavior. Population also affects education by determining school planning, literacy rates, and learning needs. It impacts the environment through resource use and pollution, and it affects politics by influencing government planning and policies. In short, population studies are closely linked with economics, health, society, education, environment, and politics.

### **Explain Innovation and Renovation in Population education?**

An important goal of population education is to help improve and modernize the education system by introducing Innovation and Renovation. Until now, population education in schools and out-of-school programs has mostly meant adding new content to existing subjects. These additions can be called innovative only in a limited way because adding new material requires some re-organization of the learning system. However, population education programs have usually used the same traditional teaching methods already present in the education system.

Today, many educators believe that the goals of population education need new and innovative teaching and learning methods. In traditional or formal education systems, where teaching is mostly teacher-centered, population education focuses more on student evaluation, decision-making, and responses. This represents a big change in emphasis. Therefore, these teaching methods can be seen as proposals for change.

In education systems that already use less formal and learner-centered approaches, population education further supports innovation and improvement. In systems that are not changing much, introducing population education alone is unlikely to bring major change. However, in systems that are already changing their organization and content, population education can strongly support these changes—especially when the focus is on integrating subjects, making learning more relevant, increasing student participation, and developing skills useful for future life.

### **What are the benefits if school yards are given instead of just brown mud?**

## EDU401 Finals

- ❖ **Better physical health:** Grass and proper play surfaces encourage running, sports, and exercise, reducing obesity and improving fitness.
- ❖ **Improved mental well-being:** green spaces lower stress, improve mood, and help students concentrate better in class.
- ❖ **Safer environment:** muddy grounds cause slips, falls, and injuries; proper yards reduce accidents.
- ❖ **Social development:** Yards provide space for teamwork, cooperation, and social interaction through games.
- ❖ **Cleanliness and hygiene:** Less mud means cleaner uniforms, classrooms, and better overall hygiene.

### What type of diversity private sector education is facing?

Private-sector education faces multiple types of diversity challenges and opportunities—similar in some ways to public education but with unique dynamics tied to access, market forces, and institutional priorities.

- ✚ **Student diversity:** Students come from different family incomes, cultures, languages, and learning abilities.
- ✚ **Cultural diversity:** Students and teachers belong to different traditions and backgrounds.
- ✚ **Ability diversity:** Some students learn fast, some slowly, and some have special needs.
- ✚ **Gender diversity:** Boys and girls study together and need equal opportunities.
- ✚ **Economic diversity:** Not all students can afford the same fees or facilities.

### Write three sources from which the stimulus of internal efficiency comes?

This stimulus to internal efficiency is expected to come from three sources:

- (a) greater competition
- (b) superior ownership and managerial structures within the enterprises
- (c) enhanced accountability / incentive systems

### According to Colley, Hodgkinson and Malcom Write the Features of Formal and Informal Learning?

| <u>Formal Learning</u> | <u>Informal Learning</u> |
|------------------------|--------------------------|
|------------------------|--------------------------|

## EDU401 Finals

|                                             |                                    |
|---------------------------------------------|------------------------------------|
| Teacher as authority                        | No teacher involved                |
| Educational premises                        | Non-educational premises           |
| Teacher control                             | Learner control                    |
| Planned and structured                      | Organic and evolving               |
| Summative assessment accreditation          | No assessment                      |
| Externally determined Objectives / outcomes | Internally determined objectives   |
| High status                                 | Low status                         |
| Education                                   | No education                       |
| Measured outcomes                           | Outcomes Not precise; immeasurable |

### Role of ideological theories and culture?

Ideological theories and culture influence population education by deciding its goals and what topics are taught. They affect how people understand population issues and how these issues are connected to social, economic, and political life. Culture shapes people's beliefs and values about family size, marriage, the role of women and children, and where people live. Since learners learn these ideas mainly from their family and community, population education should recognize these cultural influences and help learners understand and think about their existing beliefs when making population-related decisions.

### Explain historical traces of population education?

The historical traces of population education are found in the changing patterns of population growth over time.

- **Early human history:** For the first thousands of years of human history, population growth was negligible: annual growth rates of about **0.002 percent** meant that a given population would double in about 35,000 years. Population growth was **very slow** for thousands of years.
- **Until the 20th century:** Only a slight increase in population occurred.
- **Mid-20th century:** Population growth increased **rapidly**, mainly because **death rates declined** due to better health care and medical technology, not because people had more children.
- **Developing countries:** Death rates fell quickly, but **birth rates remained high**, causing fast population growth.
- **Consequences:**
  - Large **young population** created pressure on health, education, and housing.

## EDU401 Finals

- **Migration** from rural to urban areas weakened rural communities and caused development problems.

### Persuasion and prescription?

**Persuasion** means trying to influence learners' attitudes, values, and behavior through education. In population education, this happens when learners are encouraged to accept certain ideas, such as being good citizens or feeling responsible toward national population goals. **Prescription** means directly telling learners what they should do by turning government population policies into educational goals. For example, promoting a small family norm, encouraging migration, or supporting population increase as a fixed rule.

Population education cannot be completely value-free, and the main issue is whether education should persuade and prescribe government policies, or remain neutral and allow learners to think and decide for themselves.

### How can you evaluate privatization program? Explain

A complete evaluation framework is given that uses **four criteria**. These criteria help us understand and judge different aspects of privatization policy, showing how well the policy works and what effects it has.

#### **1) Freedom to Choose: (S.O)**

This criterion means that **parents have the right to choose schools** for their children according to their values, beliefs, religion, and educational ideas. Supporters say parents should have more choice because parents know their children best and care more about their future than the government. Parents understand their children's learning needs and learning styles better. Although a few parents may not take responsibility, most parents act in their children's best interest. When students have different needs and preferences, freedom of choice becomes very important.

#### **2) Productive Efficiency:**

Productive efficiency means **getting the best educational results using limited resources**. Since resources are limited, they must be used carefully because they could be used for other important activities. Privatization in education can help improve efficiency because **private** institutions often use resources more carefully and effectively than government systems. The main support for privatization is that it can increase internal efficiency, meaning how well education is delivered using the available resources.

#### **3) Equity:**

Equity means **fairness in education**. It focuses on making sure that **all students**—no matter their gender, social class, race, language, or where they live—have equal access to educational

## EDU401 Finals

opportunities, resources, and outcomes. Equity also looks at whether students receive fair support based on their needs, such as enough funding, learning materials, and special support for students with disabilities or special needs.

### **4) Social Cohesion:**

Social cohesion means that **schools help bring society together** and promote the common good. Since schools are often funded by the public, they are expected to contribute to the welfare of the whole society.

### **According to you what is the vision of environmental education?**

- 1) Environmental education helps people learn about the environment and **become aware and responsible citizens**.** Its goal is to motivate action on problems like climate change, endangered species, habitat loss, and water shortages.
- 2) EE involves everyone—students, communities, policymakers, young and old—and focuses on **building skills, empowering people, and giving opportunities to take action**.**
- 3) At its best, environmental education gives **hope and encourages positive change**.** It helps people make informed and responsible decisions that protect the environment, economy, and society—the basics of sustainable living.
- 4) By teaching these values, environmental education guides our individual and community actions and helps everyone work toward a **better life and a healthier planet**.**

### **Levels of Aggregation in relation with Population education?**

In the past, population education programs often focused on big issues at the national or world level. Early school curricula talked mostly about global or country-wide problems. But now it is clear that population education works best when it focuses on the **individual and family level** – the micro level. For many learners, especially in rural or isolated areas, their “world” may only include their village or local community.

School programs need to consider what learners can relate to. Trying to teach about far-away national or global issues may not be effective if it is too far from their experience. The goal can still be to help learners think beyond their immediate world, but this should be done by connecting family and local problems to bigger issues, showing how local challenges can relate to broader problems elsewhere or in the future.

### **Explain Demand – Side Pressures?**

## EDU401 Finals

The main reason for privatization in education is that **many parents want it**. Education is seen as a way to improve social and economic status, so demand is high. When governments cannot provide enough good-quality education, parents look for private schools. This is called **excess demand** – more demand than what public schools can offer.

Parents also want education that is **different from what public schools provide**. This is called **differentiated demand**. Both types of demand have increased in recent years. Excess demand grew because education is very important for getting high-paying jobs and better opportunities. Differentiated demand grew because public schools often provide the same uniform education, and because societies and jobs have become more specialized. Many parents now want schools that prepare children for specific trades, careers, or skills.

### What are General Pressures?

Besides the reasons parents want private schools, there are also broader reasons for privatization. One reason is **global economic and social change**. Globalization and market changes make governments look for education systems that are more efficient, flexible, and able to grow. Privatization is one way to achieve this.

Another reason is the **support from international organizations** like the World Bank. In the past decade, the World Bank has helped countries such as El Salvador, Indonesia, Mali, and the Dominican Republic to improve their education, which has encouraged privatization.

### Research for Program Development?

Even though programs cannot always wait for research, it is important to start more research now so that future programs can be planned better. Different types of research are needed:

- ❖ **Systematic research:** Studies that look at what is already known about learners and their learning environments.
- ❖ **Basic research:** Studies that show how learners understand population-related ideas in different settings.
- ❖ **Program research:** Studies that compare how effective different teaching methods are for reaching learners.

### Relationship Between Quality education and environment education?

Quality education and environmental education are closely connected. Quality education teaches students not only basic subjects but also critical thinking, problem-solving, and responsible behavior. Environmental education is part of this because it helps students understand the importance of protecting nature and using resources wisely. When students learn about the environment, they develop awareness, values, and skills that lead to sustainable living. In turn,

## EDU401 Finals

including environmental education in schools improves the overall quality of education by making learning more meaningful, practical, and responsible.

### What role play environment friendly schools for climate change?

Environment-friendly schools play an important role in fighting climate change. They teach students about reducing waste, saving energy, planting trees, and using resources wisely. These schools also show by example how to live sustainably, like using solar energy or recycling. When students learn these habits early, they can take them home and into their communities, spreading awareness and encouraging others to act. In this way, environment-friendly schools help reduce pollution, conserve resources, and prepare future generations to fight climate change.

### Defines the dimensions of non-formal learning?

- i. The timing of stimulus (past, current, future)
- ii. The extent to which such learning is tacit (tacit, reactive or deliberative)
- iii. To the extent to which learning is either individual or social
- iv. To the extent to which learning is either implicit or explicit
- v. Eraut's definition of non-formal learning is based on an investigation into learning in the workplace.

### The role of systematic approach in population studies?

A systematic approach in population studies means studying population in an **organized and step-by-step way**. It helps researchers collect accurate data, understand population problems, and find the causes and effects of population changes. Using a systematic approach makes it easier to plan solutions, make policies, and evaluate the results of population programs. Without it, population studies could be confusing or incomplete.

### goals of environment education?

- (a) To foster clear awareness of, and concern about, economic, social, political, and ecological interdependence in urban and rural areas.
- (b) To provide every person with opportunities to acquire the knowledge, values, attitudes, commitment, and skills needed to protect and improve the environment
- (c) To create new patterns of behavior of individuals, groups and society as a whole toward the environment.
