MCD403 FINAL TERM OBJECTIVE FROM HANDOUTS

PREPARED BY SHOAIB MUGHAL

LEARNING WITH SM

1. A patriotic hymn or other song adopted by a nation for use on public or state occasions
2. PTV is still the only channel that promotes nationalism through its pro-Pakistan broadcast on national days.
3. ISPR stand for Inter Service Public Relations
4. The best national songs came during and after 1965 Indo-Pak war
5. patriotism was promoted during the era of late Prime Minister Zulifiqar Ali Bhutto during 1971-77.
6. Best voices for patriotic of past include Mehdi Hassan, Noor Jahan, Ustad Amanat Ali Khan, Naheed Akhtar, Shahnaz and Mahnaaz.
7. Popular Music carries articles by scholars from a large variety of disciplines and theoretical perspectives.
8. Popular music songs are rarely composed using different music for each stanza of the lyrics
9. The verse and chorus are considered the primary elements. Each verse usually has the same melody but the lyrics change for most verses.
10. The verse and chorus are usually repeated throughout a song, while the bridge, intro, and coda (also called an "outro") tend to be used only once.
11. During the solo section one or more instruments play a melodic line which may be the melody used by the singer,
12. The most significant feature of the emergent popular music industry of the late 18th and early 19th centuries was the extent of its focus on the commodity form of sheet music"
13. During the 19th century, more people began getting involved in music by participating in amateur choirs or joining brass bands
14. the technological innovations that helped to spread popular music around the turn of the century was player pianos
15. By 1920 there were almost 80 record companies in Britain, and almost 200 in the USA".
16. .Radio broadcasting of music, which began in the early 1920s, helped to spread popular songs to a huge audience.
17. In the 1960s, the development of new technologies in recording such as multitrack recorders gave sound engineers an increasingly important role in popular music.
18. Of course, music affects many different areas of the brain,
19. after hearing a short piece of music, participants were more likely to interpret a neutral expression as happy or sad, to match the tone of the music they heard.

LEARNING WITH SHOAIB (SM)

20. there are two kind of emotions related to music: perceived emotions and felt emotions.
21. moderate noise levels increase processing difficulty which promotes abstract processing, leading to higher creativity
22. The study used five personality traits for the test: openness to experience, extraversion, agreeableness, conscientiousness, and emotional stability.
23. Drivers made more mistakes and drove more aggressively when listening to their own choice of music
24. Stroke patients in one small study showed improved visual attention while listening to classical music.
25. when it comes to being distracted by the conversations of others, phone calls where we can only hear one side of the conversation are the worst offenders
26. After a survey showed that up to 82% of people find overhearing cellphone conversations annoying,
27. Those who heard the one-sided phone conversation found it more distracting than those who heard both people speaking.
28. In 1911, an American researcher, Leonard Ayres, found that cyclists pedaled faster while listening to music than they did in silence.
29. Listening to music competes for our brain's attention, and can help us to override those signals of fatigue,
30. A 2012 study showed that cyclists who listened to music required 7% less oxygen to do the same work as those who cycled in silence.
31. Some recent research has shown that there's a ceiling effect on music at around 145 bpm
32. Music appreciation is teaching people what to listen for and how to understand what they are hearing in different types of music.
33. Compositions for dance music need to be suitable for dance.
34. Musicians often play in ensembles where there is a fixed combination of instruments
35. When musicians perform at a broad range of live music events, this means that the instruments that they are playing can be more easily seen and heard.
36. Good posture will help the singer to produce a better sound.
37. In the 2010s, historical musicology is one of several large musicology sub-disciplines.
38. Ethnomusicology is the study of non-Western music.
39. Cognitive musicology is the set of phenomena surrounding the computational modeling of music.
40. Pakistan has inherited musical traditions that go far back into history
41. Pakistani music and musical instruments are a serenade of melody and rhythm composed in a delightful manner
42. A composer (Latin com+ponere, literally "one who puts together") is a person who creates music
43. Composers create and arrange musical scores for anything that requires a soundtrack

LEARNING WITH SHOIB (SM)

44. People who practice composition are called composers.
45. A musician (or instrumentalist) is a person who plays a musical instrument or is musically talented.
46. The music between antraas or between asthai & antraas or between antraas is called interlude.
47. The process of mixing track and the singer's voice is called mixing.
48. A piece of music exists in the form of a composition in musical notation or as a single acoustic event
49. Improvisation is the act of composing musical elements spontaneously during the performance
50. In discussing the structure (or organization) of a musical work, the composition of that work is generally called its musical form.
51. The task of adapting a composition for musical instruments/ensembles, called arranging or orchestrating,
52. One method to compose music is starting with a chord progression.
53. In classical music, one common form used in pieces is sonata form.
54. The differing verses will share chord progressions while the chorus is often exactly the same throughout.
55. Today, the contemporary composer can virtually write for almost any combination of instruments.
56. Arranging is composition which employs prior material so as to comment upon it such as in mash-ups
57. Different versions of a composed piece of music are referred to as an arrangement.
58. In spite of this, Indian music has maintained it's characteristics in it's highly developed melodic and rhythmic structure
59. The Ancient period (6000 BC? to between 200 BC and 400 AD)
60. The Medieval period (400 AD to 1500 AD)
61. The Modern period (1500 AD onwards)
62. The frequency ratio 200:100, which is 2:1, represents what is called an octave
63. the number of sounds that it can discern, differentiate, or grasp, is 22, They are called shruti-s
64. Taking the sound represented by 100 Hz as the point of reference, we get 22 ratios.
65. The 23rd ratio takes us to the sound represented by 200 Hz, These ratios are called intervals.
66. The octave can be divided into two equal parts: the lower tetra chord, consisting of C-D-E-F, and the upper tetra chord, made up of G-A-B-C.
67. The lower tetrachord is called "poorvaanga" (poorva + anga), the upper tetrachord, "uttaraanga" (uttara + anga) in Indian musicology.
68. The notes in Western music use the tempered scale / in Indian music the notes use the natural harmonic scale.

LEARNING WITH SHOIB (SM)

69. A thaat (scale) is a 7-ladder scale, made up of 7 primary notes.
70. The concept associated with the term" raga" is highly developed and complex.
71. A raga cannot be formed out of less than 5 notes.
72. Tabla a pair of small hand drums used in Indian music
73. Sarangi an Indian bowed musical instrument about two feet high, with three or four main strings and up to thirty-five sympathetic strings
74. Harmonium a keyboard instrument in which the notes are produced by air driven through metal reeds by foot operated bellows.
75. The banjo is a four-, five- or six-stringed instrument with a thin membrane stretched over a frame or cavity as a resonator, called the head
76. A musical instrument is an instrument created or adapted to make musical sounds.
77. The oldest object that some scholars refer to as a musical instrument, a simple flute, dates back as far as 67,000 years
78. The academic study of musical instruments is called organology.
79. The instrument's most famous predecessor is the Baroque oboe d'amore, often used by Johann Sebastian Bach.
80. Trumpet one of the most ancient of all instruments.
81. In sound recording and reproduction, audio mixing (or “mix down”) is the process which commences after all tracks are recorded and edited as individual parts
82. Audio mixing is utilized as part of creating an album or single
83. The process is generally carried out by a mixing engineer, though sometimes it is the musical producer
84. A remix is a piece of media which has been altered from its original state by adding, removing, and/or changing pieces of the item.
85. Another distinction should be made between a remix and a cover
86. The Copyright Office was established at Karachi in 1963 under the Provision of Copyright Ordinance, 1962
87. Curtail the examination period of Artistic Works from 4-5 years to 2-1.5 years
88. Curtail the examination period of Non-Artistic Works from 4-5 years to 1 year
89. In note sur (Note) minimum cycle/second …….. 160 & Maximum cycle/second ……. 1800
90. When two or more notes are sounded together they are said to form a Chord
91. When two or more notes sounded together produce a pleasant effect on the ear, the combination is called a Concord or Consonance.
92. When two or more notes sounded together produce an unpleasant effect on the ears, the combination of the notes is called Discord.
93. When notes producing concord are sounded simultaneously, the effect is called Harmony.
94. When notes producing concord sound one after the other, the effect is called Melody
95. When two notes have the same frequency, they are said to be in Unison.

LEARNING WITH SHOIB (SM)

96. RHYTHM is about when notes, chords, and other musical sounds begin and end.
97. I don't want to get too philosophical on you, but humans have a deep connection to rhythm.
98. In fact, your first experience was the rhythms of your mother's heartbeat.
99. One theory of mine is that styles evolve partly because the audience gets bored with the current rhythms in music.
100. The RHYTHM SECTION consists of the bassist, drummer, and other instruments playing a rhythmic role such as guitarists and pianists.
101. Melodic parts of singers and when musicians play solos are not part of the rhythm section.
102. The rhythm section is the backbone of the band.
103. In fact, when things completely fall apart in performance musicians call it a TRAIN WRECK.
104. Dhrupad is the most ancient style of Hindustani classical music that has survived until today in its original form.
105. The nature of Dhrupad music is spiritual.
106. The SAM VEDA was chanted with the help of melody and rhythm called Samgana.
107. The language of Dhrupad changed from Sanskrit Brij Bhasha some time between the 12th and the 16th century
108. All music existent today has attained this stature of construction because of Dhrupad.
109. Perhaps this is the reason Dhrupad is considered the soul of Indian music
110. Traditionally the primary instrument used for dhrupad has been the Rudra Veena,
111. Like all Indian classical music, dhrupad is modal and monophonic, with a single melodic line and no chord progression.
112. The text is preceded by a wholly improvised section, the alap
113. Compositions exist in the metres (tala) tivra (7 beats), sul (10 beats) and chau (12 beats)
114. Qawwali is a form of music practiced by Sufis to inspire religious devotion and instruction
115. The roots of Qawwali began in the 11th Century with the tradition of sama, spiritual concerts which predate the birth of Muhammad. Shaikh Nizamuddin Auliya,
116. the godfather of Qawwali is said to be **Sain Amir Khusru** from the 13th century.
117. Qawwali is a communal experience, with the audience being participators and no single person is considered to be more important.
118. The variation, improvisation and repetition are carried out to such an extent that the music become hypnotic and meditive

LEARNING WITH SHOIB (SM)

119. The speaker was the biggest ever Qawwal star, known as ‘Pakistan’s Pavarotti’
120. Nusrat Fateh Ali Khan died in 1997 aged just 49.
121. The roots of Qawwali can be traced back to 8th century Persia.
122. , the sound of the regional language qawwali can be totally different from that of mainstream qawwali.
123. A Ghazal , Arabic for love song.
124. The other form of Hindustani music is what we call Khayal.
125. Khayal, the form of music which was invented by Hazrat Amir Khusrau Dehalvi(1253-1325 A.D.), a court poet in the Darbar, of Hazrat Nizamuddin Auliya of Delhi.
126. Deer have been hypnotized and hunted simply by music."
127. During the reign of the mughals, which is known as the Medieval Period in Indian history.
128. During the mid 14th century, the blending of Persian music with contemporary Indian music came to be known as 'Indraprastha Matt'.
129. AMIR KHUSRAU picked up twelve students to render Qawwali and made Miyan Saamat Qawwal as the leader of the group. This group is called Qawwal Bachhe
130. Meer Bula Kalawant was one of the two court musicians of Baadshah Shams Iltumish.
131. Raja Nahar Singh was the ruler of 101 villages in and around Ballabhgarh
132. Bahadur Shah Zafar his father name is Qadirbaqsh (They were also called Qutubbaqsh) He was also awarded by the King of Nepal.
133. Mir Mohammad Khan, who had blood ties with Mir Allahbaqsh was a very fine vocalist in the court of Maharaja Loharu.
134. Saungi Khan once visited Samepur, near Delhi.
135. The daughter of Ghulam Hussain was married to Saungi Khan.
136. Miyan Achpal had two descendants These were Tanras Khan and Ghulam Hussain.
137. Ghulam Hussain had a daughter and a son Nanhe Khan.
138. Saungi Khan (Abdul Ghani Khan) was a court musician of Ballabhgarh
139. The four sons of Saungi Khan were Sughra Khan, Kale Khan, Mamman Khan and Samman Khan.
140. Ustad Chand Khan was a well known vocalist in the court of Patiala for 24 years (1913-37)
141. Nasir Ahmed Khan was known for his purital recitals of Raagas with ancient Gharanedar compositions with lightning fast taans
142. Emperor, Mohammad Shah 'Rangeele', who was the predecessor of Bahadur Shah 'Zafar'

LEARNING WITH SHOIB (SM)

143. The most prominent feature of the representation of Khusrau's music being in the form of Khayal.
144. Qawwali is a form of light classical music
145. A racy musical form in classical music has been the most popular form sung all over India
146. The musophonic syllables sung in fast tempo has made it enjoyable from a learned to a layman.
147. Tarana was popularized by Amir Khusrau.
148. Amir Khusrau was born in India from a Persian father and an Indian mother.
149. Tarana , a word derived from Persian word Tarannum literary means a song.
150. Prabandh' the musical form sung in that period were composed by combining two parts, Dhatu and Ang.
151. Kaivad Prabandh was composed by selecting three Ang namely, Tenak, Paat, and Swar out of six.
152. The curves and corners of swar and laya improvised in different taals in all three layas
153. One can identify its footsteps in Zhala of an instrumental performance.
154. nom tom aalap were further adapted in Agra Gharana of Khayal singing .
155. Another special characteristics of Tarana are its racy taans.
156. The clear and graceful pronounciation of syllables in the composition makes it more enjoyable.
157. In presentation the robostic nature of the tarana was changed to a softer one in some of the compositions.
158. Tarana is an Hindustani vocal music genre in which the texts of the compositions are constructed
159. Tarana Singing - Ustad Amir Khan
160. The quatrain speaks of the creation of Adam and the day his soul encountered the body.
161. Kafi is a classical form of Sufi poetry.
162. poetry style has also lent itself to the Kafi genre of singing, popular throughout South Asia
163. The word Kafi is derived from the Arabic kafa meaning group.
164. Kafi poetry is usually themed around heroic and great romantic tales from the folkfore,
165. There are no fixed styles of singing of Kafi.
166. Abida Parveen is a foremost exponent of Kafi singing.
167. Ustad Allahdino Noonari, who used the fusion form.
168. Kafi has gained a higher profile in the West in the late 20th century
169. Sanam Marvi is also great singer and vocalist of kKafi based Sufi songs.

LEARNING WITH SHOIB (SM)

170. Ustad Muhammad Juman was born on 10 October 1935 in Sorra, Balochistan, Pakistan.
171. Ustad Muhammad Juman went to Radio Pakistan in Karachi to begin a career as a violinist.
172. Ustad Muhammad Juman Started his program in Radio Pakistan Hyderabad.
173. Ustad Muhammad Juman died at the age of 54 on 24 January 1990 in Karachi.
174. ghazals have become popular with the common man.
175. ghazals swept through the Indian music scene,
176. The word ḡazal is of Arabic origin, the meaning is spinning.
177. The rhyming scheme is based on monorhyme with internal rhyme in the opening line, called maṭlaʿ-e moraṣṣaʿ.
178. At the end of the 15th century, the poet ʿAbd-al-Raḥmān Jāmī regarded a poem of seven distichs as the most perfect form.
179. Since late medieval times the devise is known **as taḵallosá**
180. The use of the pen-name in poetry is a general rhetorical device which can be found in any kind of poem.
181. The rhetorical embellishment should be less than in a panegyrical qaṣīda.
182. The form is in the first place connected to the genres of erotic poetry,
183. In the best specimens, a subtle balance between the possibilities of transcendental and secular references is carefully maintained.
184. Arabic love poetry provided an important example to the Persian poets.
185. In the 2nd/8th century female singers from Persia performed love poems in cities of Ḥejāz
186. Two examples of the ḡazal in the classical form have been attributed to the Samanid poet Rūdakī,
187. Farroḵī clearly refers to separate love poems when he exhorts a minstrel to sing a ḡazal,
188. The oldest sizable collection of ḡazals has been preserved in manuscripts of Sanāʾī's Dīvān.
189. This early collection also shows that ḡazals were not exclusively used for lyrical poems
190. In its classical form a Geet conforms to Prabandha, a composition bound by Dhatu that comprises Sthayi, Antara, Dhrupad etc
191. part of the geet which is between Dhruv and Aabhog is called Pada or Antara.
192. Geets are a significant part of Indian Folk-literature meant for all memorable occasions
193. Urdu Geets mainly speak about feminine anguish.
194. Hindi geets have retained the flavour drawn from earlier compositions in Rajasthani dialect, Brij Bhasha and Maithali.

LEARNING WITH SHOAIB (SM)

195. pop music as "a body of music which is distinguishable from popular, “jazz, and folk music”.
196. Although pop music is often seen as oriented towards the singles charts
197. In the pre-modern tradition, the aesthetics of music or musical aesthetics explored the mathematical and cosmological dimensions of rhythmic and harmonic organization.
198. The origin of this philosophic shift is sometimes attributed to Baumgarten in the 18th century, followed by Kant.
199. many musicians, music critics, and other non-philosophers have contributed to the aesthetics of music.
200. It is often thought that music has the ability to affect our emotions, intellect, and psychology.
201. The philosopher Plato suggests in the Republic that music has a direct effect on the soul.
202. Sound recording is re-creation of sound waves.
203. The sound we hear around us is due to compression and rarefaction of the air.
204. Analog sound recording is done with the help of a small microphone diaphragm.
205. magnetic sound recording, the microphone diaphragm vibrates due to the sound waves which are then converted into a varying electric current
206. the sound recorded is represented as magnetized areas on a plastic tape with a magnetic coating on it.
207. Electronically produced sound waves may also be recorded straight from devices such as an electric guitar pickup or a synthesizer.
208. In the digital sound recording, the analog sound signals are picked up by the microphone
209. Digital sound recording stores audio signals as a series of binary numbers.
210. the digital audio signal must be reconverted to analog form during playback before applying to a loudspeaker or earphones.
211. The mute button is the greatest tool in helping with volume balancing.
212. Volume balancing is the process of setting sound levels in proper relationship to each other to create the desired overall sound.
213. In the church environment, volume balancing is performed for the vocals and instruments in a worship band.
214. The biggest problem in volume balancing is indecision.
215. If the sound suddenly jumps way out in the mix, then you know it was too loud.
216. Use the mute button on the channels where you’re not sure if you’ve got the volume right
217. A digital system samples a sound’s wave form, or value, several thousand times a second and assigns numerical values

LEARNING WITH SHOIB (SM)

218. A typical digital recording system is equipped with an analog-to-digital converter
219. many digital recording systems are designed to detect and eliminate interfering signals
220. Background music refers to various styles of music or soundscapes primarily intended to be passively listened to
221. Music that is played at a low volume and is not the main focus of an audience is also referred to as background music.
222. The study of background music focuses on the impact of music with non-musical tasks
223. Music's beneficial effects on mental health have been known for thousands of years
224. Military bands use music to build confidence and courage
225. Modern research supports conventional wisdom that music benefits mood and confidence.
226. Light music is a generic term applied to a mainly British musical style.
227. Although mainly a British phenomenon, light music was also popular in the United States and in continental Europe.
228. Videography refers to the process of capturing moving images on electronic media.
229. The advent of digital video recording in the late 20th century blurred the distinction between videography and cinematography.
230. Any video work outside commercial motion picture production could be called videography..
231. The most basic part of a vision mixer is a bus.
232. Most modern mixers, however, have one bus that is always the program bus.
233. ed. Some switchers allow the operator to switch between these two modes.
234. Another main feature of a vision mixer is the transition lever, also called a T-bar or Fader Bar.
235. A third bus used for compositing is the key bus.
236. A mixer can have more than one key bus, but often they share only one set of buttons.
237. The digital on-screen graphic image that will be seen in the program is called the fill.
238. The mask used to cut the key's translucence is called the source.
239. These three main buses together form the basic mixer section called Program/Preset or P/P.
240. Bigger production mixers may have a number of additional sections. Which are called Mix/Effects (M/E for short).
241. P/P section mostly used for keying text or graphics

LEARNING WITH SHOIB (SM)

242. Mixers are often equipped with effects memory registers.
243. The 18-input switcher has sixteen video bus inputs and two auxiliary inputs
244. The switcher is an 18-input video switcher designed for both live production and postproduction.
245. If the mixer is used for video editing, the editing console (which usually controls the vision mixer remotely) must also be synched.
246. Most larger vision mixers divide the control panel from the actual hardware.
247. A shot taken from a crane, plane, or helicopter. Not necessarily a moving shot. Aerial shot
248. Backlighting The main source of light is behind the subject, silhouetting it, and directed toward the camera.
249. **Bridging Shot** A shot used to cover a jump in time or place or other discontinuity.
250. Jump cut Cut where there is no match between the 2 spliced shots.
251. These are cuts that take us seamlessly and logically from one sequence or scene to another. Continuity cut
252. A set of wheels and a platform upon which the camera can be mounted to give it mobility. Dolly
253. ellipsis A term that refers to periods of time that have been left out of the narrative.
254. Eyeline then refers to the trajectory of the looking eye.
255. A term used to point to the continuity editing practice ensuring the logic of the look or gaze
256. The eyeline match creates order and meaning in cinematic space.
257. The art of cinematography is the art of lighting and making that light tell the story.
258. When a quick and simple lighting plan is needed, cross-lighting is usually the best approach.
259. Adjustable spotlights are placed in the corners of a room, flanking the intended camera position.
260. Unfocused light loses its power with the square of the distance from the light.
261. There is often little or no light from the direction of the camera.
262. Instead, lights are placed at from about seventy to ninety degrees from the camera position.
263. Of course, the mood and artistic objectives of the dance have to be considered.
264. More radical lighting might be suggested by dance emphasizing the form and movement of the human body
265. The technique of eliminating fill lighting, leaving only key and back light, is called "high contrast" lighting
266. The intended effect is to leave the subject without any visual context.
267. Key and fill lights are eliminated, leaving only back and background lights.
268. Standard television lighting wouldn't like the light until the sun fell to about a forty-five degree angle.

LEARNING WITH SHOAIB (SM)

269. Light haze and clouds will almost always be brighter than the subject.

270. Office lighting generally runs from fifty to one hundred foot candles

271. Eye sockets are turned into black holes.

272. Spotlights have traditionally been used as key lights to provide clear, crisp images with video formats that lacked resolution

273. VHS tape has a resolution of about 230 to 240 lines.

274. As resolution improves, traditional television lighting tends to be harsh and unflattering.

275. Rather, the effects of room lighting should be examined and recreated for the camera.

276. The basic area illuminated by room light is normally at the level of table lamps and below

277. By aiming lights and using barn doors to reduce the amount of light near the top of the set, this effect can be imitated.

278. Instead, key lights might be placed to strike the subject from the same general angle to the camera as the visible or implied source.
