EDU431 – Final Term Past Papers File by Tanveer Online Academy

(Subjective)

Question: State three limitations of MCQs.

Answer:

1. Take long time to construct in order to avoid arbitrary and ambiguous questions.

2. Require careful preparation to avoid multitude of questions testing only recall.

Questions: State three advantages of essay type questions.

Answer:

Advantages of essay type items:

Extended response questions have following advantages over other types of question formats:

1. Effective for assessing higher order abilities: analyze, synthesize and evaluate.

2. It is comparatively less time consuming to develop such items.

3. Emphasizes essential communicational skills.

4. Guessing is eliminated.

Question: Write a brief note on achievement test.

Answer: Achievement Test

A standardized achievement tests a fixed set if items to measure defined achievement domain, specific direction for administrating and scoring test, and norms based on representative groups of individuals.

Most published achievement test are called standardized achievement tests. These typically are norm referenced tests. Quite a few criterion referenced achievement tests are also been published.

Achievement tests are used as part if broader assessment system or alone. They provide relatively inexpensive means of measuring broad achievement goals.

Question: Enlist any three issues in test administration.

Answer: Issues in test administration

1. Cheating

2. Poor testing conditions

3. Test anxiety

4. Errors in test scoring procedure.

Question: Write down three properties of Item Characteristic Curve (ICC).

Answer: properties of an ICC

1. The difficulty which under item response theory describes the item functions along the ability scale. For example an easy item functions among the low-ability examinees and a hard item functions among the high-ability examinees

2. The second property is discrimination, which describes how well an item can differentiate between examinees having abilities below the *item location* and those having abilities above the item location

3. An item characteristic curve is the graphical representation of the probability of answering an item correctly with the level of ability on the construct being measured.

Question: State five guidelines for writing essay type questions.

Answer: Guidelines for writing essay type items

Following guidelines are for writing essay type items when developing a test.

1. Frame questions so that the examinee‘s task is explicitly defined.

2. Specify the value and an approximate time limit for each question.

3. Do not employ optional questions.

4. Employ a larger number of questions that require relatively short answers rather than only a few questions that require long answers.

5. Verify a question‘s quality by writing a trial response to the question.

Question: State five guidelines for writing restricted response items.

Answer: Guidelines for constructing Restricted response essay type items

1. Statements should not be quoted directly from the text.

2. Evaluate essay responses anonymously.

3. Frame questions so that the examinee‘s task is explicitly defined.

4. Specify the value and an approximate time limit for each question.

5. Employ a larger number of questions that require relatively short answers rather than only a few questions that require long answers.

6. Do not employ optional questions.

Question: Write down any five characteristics of standardized achievement test.

Answer: Characteristics of Standardized Achievement Test

1. The test items are of highly technical quality. They have been developed by educational and test specialists, pretested and selected on the basis of difficulty discriminating power, and relationship to a clearly defined and rigid set of specifications.

2. Directions for administering and scoring are so precisely stated that the procedures are standard for different users of test.

3. Norms based on national samples of students in the grade where the test is intended for use are provided as aids in interpreting the test scores.

4. Equivalent and comparable forms of the test are usually provided, information concerning the degree to which the forms are comparable.

5. A test manual is used as guides for administering the test, evaluating its technical qualities, and interpreting and using the results.

Question: Mention any five points that need to be considered while packaging the test.

Answer:

1. Grouping together items of similar format

2. Arranging test items from easy to hard

3. Properly spacing items

4. Keeping items and options on the same page

5. Position illustration near description (if diagram given)

6. Randomness of answer key

7. Determine how students record answers (separate sheet or same sheet)

8. Providing space for test taker‘s details

9. Proofread the test (typographical and grammatical error)

10. Test directions

Question: 3 advantages of arrange test easy to harder?

Answer:

Arranging test items from easy to hard

Increases the possibility of good start for poor starters

Build confidence

Motivates

Reduces test anxiety

Question: Write down any three caution of interpreting test score.

Answer: Cautions in Interpreting Test Scores

A test score should be interpreted

1. In terms of the specific test form which it was derived.

2. In light of all of the student‘s relevant characteristics.

3. According to the type of decision to be made.

4. As a band of scores rather than a specific value.

Question: Explain 4 elements of rubric?

Answer: Elements of Rubric

A rubric includes:

1. Score

2. Criteria

3. Level of performance

4. Descriptors

Question: Item difficulty if classical theory?

Answer:

Item difficulty in classical test theory refers to the percentage of test-takers who answer a question correctly. The higher the percentage, the easier the item.

Question: 3 defects of mcqs .

Answer:

- Can encourage guessing.
- Limits deep understanding.
- May fail to measure complex thinking skills.

Question: 3 benefits of essay type item

Answer:

- Encourages critical thinking.
- Allows in-depth explanation.
- Measures ability to organize and express ideas.

Question: Under which conditions restricted response items are more useful than selection type items

Answer:

Restricted response items are more useful when assessing the ability to explain or justify answers briefly, requiring focused, short responses that test reasoning without the complexity of longer essays.

Question: 3 ways to minimize distraction during test

Answer:

1. Ensure a quiet testing environment.
2. Remove unnecessary materials or objects.
3. Limit movement and interruptions in the room.

Question: What decisions can be based on high stake testing?

Answer:

Decisions based on high-stakes testing include student promotion or graduation, teacher evaluations, school funding, and admission to programs or institutions.

Question: 3 characteristics of ICC

Answer:

- Shows the probability of a correct response based on ability level.
- Includes parameters like item difficulty, discrimination, and guessing.
- Helps in analyzing how well a test item differentiates between different ability levels.

Question: Any 5 recommendations for effective high stake testing.

Answer:

Recommendations for effective High Stake Testing

- Protection against high stake decisions based on single test
- Adequate resources and opportunity to learn
- Validation for each intended separate use

 Full disclosure of likely consequences

 Alignment between test and curriculum

 Validity of passing scores and achievement levels

 Appropriate attention towards language difference between examinees

 Appropriate attention towards examinees with disabilities

 Careful adherence to explicit rules for determining which students are to be tested

 Ongoing evaluation for intended and unintended effects of high stake testing

Question: Item difficulty in CTT

Answer: Item Difficulty in CTT

CTT does not raise a complex theoretical model to relate an examinee‘s ability to the probability of success on a particular item.

CTT collectively considers a pool of examinees and empirically examines their success rate on an item

Question: 5 suggestions for constructing true false item or alternative form questions

Answer:

Suggestions for Constructing True-false items (alternative form questions)

Most important tsk in formulating statements is free from ambiguity and irrelevant clues. There are list of things to avoid when phrasing the statement.

1. Avoid broad general statements if they are to be judged true or false.

Explanation: Most broad generalizations are false unless qualified, and the use of qualifiers provides clues to the answer.

Example: **Poor item**

The president of Pakistan is *usually* elected to his/her office.

Example: **Better item**

According to constitute of Pakistan, the president of Pakistan is elected by parliament.

Question: Design rubric

Answer: Basic Steps to design Rubric

1. Identify a learning goal.

2. Choose outcomes that may be measured.

3. Develop or adapt existing rubric.

4. Share it with students.

Question: High stake testing

Answer: High Stake Testing in Pakistan

In school education in Pakistan, high stake testing is conducted at each level from primary to higher secondary.

1. Grade 5 and 8 examination by Punjab Examination Commission.

2. Grade 10 and 12 examination by BISEs
