

EDU431

Final-Term (Solved)

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Test Development & Evaluation

1. Measurement

Measurement is the process of assigning numbers or scores to students' performance according to specific rules, such as marks obtained in a test.

2. Evaluation

Evaluation is the systematic process of collecting and interpreting measurement data to make judgments and decisions about students, programs, or teaching effectiveness.

3. Reliability (with examples)

Reliability refers to the consistency and stability of test results.
Example: If a student gets nearly the same score on the same test administered twice, the test is reliable.

4. Unreliable results

Unreliable results are inconsistent scores that change due to chance, poor test design, unclear instructions, or scoring errors.

5. Predictive validity

Predictive validity shows how well a test predicts future performance.
Example: Entry tests predicting university success.

6. Criterion validity & predictive validity

- **Criterion validity:** Agreement between test scores and an external criterion.
- **Predictive validity:** A type of criterion validity that predicts future outcomes.

7. Face validity & content validity

- **Face validity:** Test appears to measure what it claims to measure.
- **Content validity:** Test covers all important content areas of the syllabus.

8. Diagnostic assessment

Assessment used **before instruction** to identify students' strengths, weaknesses, and learning difficulties.

9. Formative assessment

Ongoing assessment during teaching to **monitor progress and improve learning** (quizzes, classwork).

10. Summative assessment

Assessment conducted **at the end of instruction** to evaluate overall achievement (final exams).

11. Self-assessment

A process where learners judge and reflect on their own learning and performance.

12. Importance of self-assessment

- Promotes responsibility
- Improves motivation
- Develops critical thinking
- Encourages lifelong learning

13. Peer assessment

Students assess each other's work.
Used because: It develops collaboration, reflection, and evaluative skills.

14. Alternative forms of test

Non-traditional tests like portfolios, projects, presentations, observations.

15. Maximum & typical performance

- **Maximum performance:** Best possible performance (achievement tests)
- **Typical performance:** Usual behavior (personality tests)

16. Bloom's taxonomy (cognitive domain)

A hierarchy of thinking skills from simple to complex.

17. Levels of cognitive domain

1. Knowledge

2. Comprehension
3. Application
4. Analysis
5. Synthesis
6. Evaluation

18. SOLO taxonomy

Structure of Observed Learning Outcomes classifies learning based on complexity of understanding.

Levels:

- Pre-structural
- Uni-structural
- Multi-structural
- Relational
- Extended abstract

19. Depth of Knowledge (DOK)

A framework that categorizes tasks by **cognitive complexity**, not difficulty.

20. Table of specifications

A blueprint linking **content areas** with **learning objectives** and weightage.

21. Importance of table of specifications

- Ensures content validity
- Balanced coverage
- Fair distribution of marks

22. Objective test item types

- MCQs
- True/False
- Matching
- Completion

23. Subjective type questions

Questions requiring written responses.
Types: Essay, short answer.

24. Multiple-choice items

An item with a **stem**, **correct answer**, and **distractors**.

25. Advantages of MCQs

- Objective scoring
- Wide content coverage
- High reliability

26. Limitations of MCQs

- Guessing
- Difficult to construct
- Limited creativity

27. Rules for True–False items

- Avoid ambiguity
- Use simple statements
- Avoid absolute words

28. Essay type questions

Questions requiring extended written responses to assess higher-order thinking.

29. Advantages of essay questions

- Assess creativity
- Measure reasoning
- Test organization of ideas

30. Limitations of essay questions

- Subjective scoring
- Time-consuming
- Limited syllabus coverage

31. Restricted response essays

Essays with clear limits on content and length.

32. Extended response essays (example)

Allow freedom in content and organization.
Example: "Discuss the role of assessment in education."

33. Usefulness of restricted response items

- When specific outcomes are required
- For objective scoring

34. Guidelines for essay questions

- Clear wording
- Specify length
- Match objectives

35. Guidelines for restricted response items

- Clearly define limits
- Specify expectations
- Avoid vague wording

36. Rubric

A scoring guide that outlines criteria and performance levels.

37. Elements of a rubric

- Criteria
- Levels of performance
- Descriptors
- Scores

38. Analytic rubric

Scores each criterion separately.

39. Holistic rubric

Provides a single overall score.

40. Benefits of rubrics

- Fair grading
- Clear expectations
- Consistency

41. Types of rubrics

- Analytic
- Holistic

42. Item analysis

Statistical study of test items to improve quality.

43. Item difficulty

Indicates how easy or difficult an item is.

44. Item difficulty in CTT

Calculated as the **proportion of students answering correctly**.

45. Item difficulty in IRT

Represents the ability level required to answer an item correctly.

46. Formula for item discrimination

$$D = \frac{U - L}{N}$$

47. Characteristics of ICC

- S-shaped curve
- Shows relationship between ability and success

48. Types of guessing

- Random guessing

- Informed guessing

49. Time for item analysis

After test administration.

50. Classical Test Theory (CTT)

Assumes observed score = true score + error.

51. Item Response Theory (IRT)

Focuses on item characteristics and student ability independently.

52. Issues in test administration

- Poor environment
- Cheating
- Time mismanagement

53. Test security

Protection of test materials and scores from misuse.

54. Prohibited test security practices

- Teaching test items
- Sharing answer keys
- Altering scores

55. Recording test items

Documenting items for future reference and analysis.

56. Assembling a test

Selecting, arranging, and formatting items properly.

57. Reproducing the test

Printing or duplicating test materials securely.

58. Things to remember in test administration

- Clear instructions
- Proper timing
- Fair supervision

59. Report & its types

A written account of performance.
Types: Formal and informal.

60. Formal vs informal reports

- **Formal:** Structured, official
- **Informal:** Verbal or brief notes

61. Parent–teacher meeting

Discussion of student progress, behavior, and improvement strategies.

62. High-stakes testing

Tests with serious consequences for students or institutions.

63. Decisions based on high-stakes testing

- Promotion
- Admission
- Certification

64. High-stakes testing in Pakistan

Board exams, entry tests, competitive exams.

65. Criticism of high-stakes testing

- Stress
- Teaching to test
- Limited skill measurement

66. Recommendations for effective high-stakes testing

- Fair design
- Multiple assessment methods
- Transparency

67. Standardized achievement test

A test administered and scored uniformly to measure achievement.

68. Characteristics of standardized tests

- Reliability
- Validity
- Norm-referenced

69. Standardized vs classroom tests

Standardized	Classroom
Uniform	Teacher-made
Rigid	Flexible
Large-scale	Small-scale

70. Assessment institutions in Pakistan

- BISEs
- IBCC
- HEC
- NEAS

71. NEAS

National Education Assessment System evaluates educational quality nationwide.

72. Test–retest method

Reliability method using the same test twice.

73. Syllabus criteria for higher education

- Relevance
- Research orientation
- Skill development

74. Curriculum at higher education in Pakistan

- Outcome-based
- Research focused
- Approved by HEC
