Be kind To Yourself.

Q.7- elements of professional personality

1. Factors to affect successful learning.

Rare pinpointed distinct factors which generally underpin successful learning:

1. **Wanting**: To learn, which is something intrinsic. Taking some sort of ownership of the need to learn.
2. **Learning by doing**: Things like having a g, experience, repetition, learning by trial and error are all theimportant features here.
3. **Learning through feedback**: Learning is helped by having access to other people's reactions, gettingconfirmation you're on the right lines, seeing where you've made mistakes and simply seeing if something that you've done works out.
4. **Making sense of things**: The job of teaching is to provide learners with the best possibleenvironment in which they can accomplish their learning.
5. **Verbalizing orally**: Speaking to others, face to face, helps people to make sense of something givenbetter than they had done previously.
6. **Assessing how students make informed judgment**: The process of seeing and making evaluative judgments about what others have done and how they've gone about it intensifies many of the other factorslisted above.

Q.8 Baseline of professionalism project

1. **Inclusiveness rather than Exclusiveness**:

Networks and partnership are the mechanism by which inclusiveness can be achieved.

2. Collective and collaborative actions

These actions draws together a range of: intellectual, social, cultural and other resources.

3. Effective communication of aims and expectations:

People always need to know what is expected to them and what will be the importance ofcompleted work.

4. Recognition of the expertise of all parties involved:

Be kind To Yourself.

Participation of groups interested in educational agenda will offer opportunities for people to learn from eachother.

5. Creating and environment of trust and mutual respect:

Activist teacher professionalism requires trust in people and practices.

6. Ethical practice

Q.9 Ages of professionalism.

The concept of professionalism has passed through different ages and different periods, and these all have an impact today because they are in continuity. It doesn't mean that when this stage or period ended, the concept was closed. There are certain aspects which are in continuity and some aspects have become redundant. So, these are different stages, the different edges of the concept of professionalism.

The four ages are:

1. The pre-professional age
2. The age of the autonomous professional
3. The age of the collegial professional
4. The post-professional age

Q.10 How raise online training and fresher idea help of professional development.

1. The rise of online training.

Massive Open Online Courses have many benefits for teachers who want to build on their capabilities. They are low cost (and in some cases free), courses are generally 20hours in length and teachers can workat their own pace.

2. A fresh idea: A return on investment perspective

Now a days, professional development is viewed as an investment. School can contribute time and funding forteachers to undertake PD and in return schools may anticipate that teachers can take on additional responsibilities in their role.

Be Kind To Yourself.

Q.11 School base model.

One student teachers always love having in their classroom is a model student. While teachers can like all their students equally, a model student is a delight to teach. The model student participates, listens, and doesn't cause a disruption that stops the learning momentum.

The **School based management** provides principals, teachers, students and parents control over the education process by giving them the responsibility for decision about the programs/projects.

Novice in teaching learning.

Novice teachers need at least a few years of tangible classroom teaching experience to reach their capacity tobe effective classroom teachers. In this regard, educational leaders are encouraged to design activities that stimulate reflective practice in novice teachers.

Be kind To Yourself.

Q.21 How can government improve the teachers profession

The first thing that needs to be done is to improve the quality of teachers. This can be done by providing better training and incentives for them. The government should also focus on recruiting more qualified teachers, who are passionate about teaching rather than just earning a salary from the job.

Q.22 How reflective practice improve the professional growth and learning of teacher

It helps teachers to become aware of their underlying beliefs and assumptions about learning and teaching. It helps teachers promote a positive learning environment. It allows teachers to consciously develop a repertoire of relevant and context specific strategies and techniques. Reflective practice can help teachers to improve their teaching methods, better understand their students, and identify areas in which they need to continue to develop their skills. In addition, reflective practice can help teachers to build a more positive relationship with their students.

Q.23 What is professional teacher do in the class

In their pursuit of excellence, professional teachers select learning goals based on their own perceptions of student needs and personal interest. They also collaborate with colleagues to select and plan professional learning for the larger school community.

The primary focus of the classroom teacher is on the planning, preparation and teaching of programs to achieve specific student outcomes. The classroom teacher engages in critical reflection and inquiry in order to improve knowledge and skills to effectively engage students and improve their learning.
