VIRTUAL UNIVERSITY OF PAKISTAN

CS601 Data Communication

Important Objective Type for Final-Term

1. The inversion of the level at 1 bit is called as _____

- NRZ-L
- **NRZ-I Page 73**
- RZ

2. In selective-reject ARQ, only the specific damaged or lost frame is_____.

- **Retransmitted (Page 200)**
- Forwarded
- Selected
- Rejected

3. YMODEM has _____Byte of data unit.

- **1024 Page 205**
- 256
- 128
- 512

4. Which of the following sublyer, resolves the contention for the shared media

- **MAC (Page 219)**
- LLC
- Physical

5. Like 10 Base 5, 10 Base 2 is a _____ topology LAN

- Ring
- Mesh
- Star
- **Bus (Page 227)**

6. At the CRC generator, _____ added to the data unit after the division process

- **0s are (Page 176)**
- 1s are
- The polynomial
- The CRC remainder is

7. Flow control is needed to prevent _____.

- Bit errors
- Overflow of the sender buffer
- **Overflow of the receiver buffer (Page 46)**
- Collision between sender and receiver

8. In Y-MODEM Multiple files can be sent simultaneously

- **True (Page 205)**
- False

9. In 56K Modems Max Uploading speed is _____ bytes and downloading speed is_____ byte.

- 40K, 56K
- **33.6K, 56K (Page 117)**
- 56K, 33.6K
- None of given

10. If db is amplified then attenuation is ----------

- **Positive (Page 142)**
- Negative
- Zero
- None of the above

11. Amplifiers are used to _____the signal to heat.

- **Amplify (Page 142)**
- Rectify
- Testify
- Nullify

12. _____requires the maximum number of

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

I/O ports.

- Bus
- Star
- Mesh (Page 29)
- Ring

13. There are _____ basic categories of multiplexing.

- 3 (Page 148)
- 4
- 2
- 5

14. In _____ transmission, bits are transmitted over a single wire, one at a time.

- Asynchronous serial
- Synchronous serial
- Parallel (Page 98)
- Asynchronous & Synchronous serial

15. In_____ transmission, bits are transmitted over their own wires

- Asynchronous serial
- Synchronous serial
- Parallel
- Asynchronous & Synchronous serial

16. EIA 232 allows for a maximum bit rate of _____Kbps.

- 40
- 30
- 20 (Page 104)
- 10

17. In CRC the quotient at the sender _____

- Becomes the dividend at the receiver
- Becomes the divisor at the receiver
- Is discarded
- Is the remainder

18. In line discipline after the data transmission, the sending system finishes with an_____ frame

- EOT (Page 189)
- EKT
- ENT
- ESP

19. Encryption and encoding are the same terms.

- True
- False (Page 52)

20. Traditional modems are wide spread now to a data rate of _____.

- 56 Kbps (Page 115)
- 72 Kbps
- 42 Kbps
- 96 Kbps

21. Bi phase encoding is a type of bipolar encoding in which we use two voltage levels.

- True
- False (Page 73)

22. The _____ layer changes bits into electromagnetic signals.

- physical
- data link
- transport
- none of given

23. Which is not an element of protocol?

- Semantics
- Timing
- Communication service module (Page 19)

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

24. A telephone network is an example of a _____ network.

- ▶ Packet-switched
- ▶ **Circuit-switched (Page 38)**
- ▶ Message-switched
- ▶ none of the given

25. The bit rate always equals the baud rate in which type of signal?

- ▶ **FSK (Page 86)**
- ▶ QAM
- ▶ 4-PSK
- ▶ PSK

26. Secondary hub in a tree must be a passive hub.

- ▶ True
- ▶ **False (Page 31)**

27. In case of uploading at the switching station, data is converted to digital signal using _____.

- ▶ TCP
- ▶ **PCM (Page 116)**
- ▶ ICP
- ▶ TDM

28. Category 5 UTP cable is used for data transmission of upto_____.

- ▶ **100 Mbps (Page 123)**
- ▶ 200 Mbps
- ▶ 250 Mbps
- ▶ 400 Mbps

29. Which of the following primarily uses guided media?

- ▶ Cellular telephone system
- ▶ **Local telephone system (Page 120)**
- ▶ Satellite communications
- ▶ Radio broadcasting

30. Ultra high-frequency waves always use _____ propagation.

- ▶ Ground
- ▶ Sky
- ▶ **Line of Sight (Page 136)**
- ▶ Space

31. Distortion occurs in a _____ signal.

- ▶ Rectified
- ▶ **Composite (Page 141)**
- ▶ Amplified
- ▶ none of the given

32. Which of the following are not used to measure the performance of TX Media.

- ▶ Throughput
- ▶ Propagation Speed
- ▶ Propagation Time
- ▶ **none of the given (Page 144)**

33. A portion of the path that carries TX b/w a given pair of devices is known as _____.

- ▶ Node
- ▶ Bridge
- ▶ **Channel (Page 147)**
- ▶ Gateway

34. _____ takes data from one high speed line and breaks it into portions.

- ▶ Multiplexing
- ▶ **Inverse multiplexing (Page 158)**
- ▶ Inverse subtraction
- ▶ Inverse addition

35. The _____ layer is the layer closest to the transmission medium.

- ▶ **physical**

▶ data link

▶ network

▶ transport

36. In primary-secondary communication _____ is always the initiator of a session

▶ **Primary (Page 189)**

▶ Secondary

▶ Sender

▶ Receiver

37. YMODEM has _____Byte of data unit.

▶ **1024 (Page 205)**

▶ 256

▶ 128

▶ 512

38. _____ coordinates the amount of data that can be sent before receiving acknowledgment

▶ **flow control (Page 186)**

▶ error control

▶ data control

39. If the ASCII character H is sent and the character I is received, what type of error is this?

▶ **Single-bit (Page 169)**

▶ Multiple-bit

▶ Burst

▶ Recoverable

40. In _____ ARQ, if a NAK is received, only the specific damaged or lost frame is retransmitted.

▶ Stop-and-wait

▶ Go-Back-N

▶ **Selective reject (Page 200)**

▶ Stop-and-wait & Go-back-N

41. Data link protocols can be divided into _____ sub-groups.

▶ **two (Page 202)**

▶ three

▶ four

▶ five

42. If odd parity is used for ASCII error detection, the number of 0s per 8-bit symbol is _____

▶ Even

▶ **Odd (Page 173)**

▶ Indeterminate

▶ 42

43. In Y-MODEM Multiple files can be sent simultaneously

▶ **True (Page 205)**

▶ False

44. The PDU has no flag fields, no CRC, and no station address

▶ **TRUE (Page 220)**

▶ FALSE

45. Check sum method is used for _____ layers.

▶ Physical

▶ Application

▶ Transport

▶ **Data link**

46. Repeater is an amplifier, not a regenerator.

▶ True

▶ **False (Page 240)**

47. RARP stands for Reverse Address Resolution Protocol.

▶ **True (Page 244)**

▶ False

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

48. The BNC-T connector is a T-shaped device with _____ ports

- ▶ Three (Page 228)
- ▶ Two
- ▶ Four
- ▶ Five

49. When data are transmitted from device A to device B, the header from A's layer 4 is read by B's_____ layer.

- ▶ physical
- ▶ transport
- ▶ application
- ▶ none of the given

50. A periodic signal completes one cycle in 0.001 s. What is the frequency?

- ▶ 1 Hz
- ▶ 100 Hz
- ▶ 1 KHz (Page 61)
- ▶ 1 MHz

51. Zero crossing bandwidth is also called as equivalent noise bandwidth.

- ▶ True
- ▶ False (Page 67)

52. Amplitude in ASK is more resistive to EMI and Noise.

- ▶ True
- ▶ False (Page 87)

53. If FCC regulations are followed, the carrier frequencies of adjacent AM radio stations are _____apart.

- ▶ 5 KHz
- ▶ 10 KHz (Page 95)
- ▶ 200 KHz
- ▶ 530 KHz

54. There are _____ types of serial transmission:

- ▶ 1
- ▶ 2 (Page 99)
- ▶ 3
- ▶ 4

55. Synchronous transmission has _____.

- ▶ a start bit
- ▶ a stop bit
- ▶ gaps between bytes
- ▶ none of the given (page 99)

56. Which of the following is an example of ITU-T modem standards?

- ▶ T-series
- ▶ X-series
- ▶ N-series
- ▶ V-series (Page 114)

57. The maximum data rate in the uploading direction is still _____.

- ▶ 26.6 Kbps
- ▶ 33.6 Kbps (Page 117)
- ▶ 36.6 Kbps
- ▶ 46.6 Kbps

58. Category 5 UTP cable is used for data transmission of upto_____.

- ▶ 100 Mbps (Page 123)
- ▶ 200 Mbps
- ▶ 250 Mbps
- ▶ 400 Mbps

59. All of popular Fiber optic connectors are _____ shaped.

- ▶ Conical

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

▶ **Barrel (Page 131)**

▶ Circular

▶ Rectangular

60. The VLF and LF bands use _____ propagation for communications.

▶ Ground

▶ Sky

▶ **Line of sight (Page 134)**

▶ Space

61. Multiplexing is the set of techniques that allows simultaneous TX of multiple signals across _____data link

▶ **Single (Page 147)**

▶ Multi

▶ Single and Multi

▶ none of the given

62. Need for Addressing makes Asynchronous TDM inefficient for bit or byte _____.

▶ **Interleaving (Page 158)**

▶ Addition

▶ Subtraction

▶ None of the given

63. _____ takes data from one high speed line and breaks it into portions.

▶ Multiplexing

▶ **Inverse multiplexing (Page 158)**

▶ Inverse subtraction

▶ Inverse addition

64. A traditional telephone line has a bandwidth of _____.

▶ **3000Hz (Page 111)**

▶ 4000 Hz

▶ 2000 MHz

▶ 4000 MHz

65. If the ASCII character H is sent and the character I is received, what type of error is this?

▶ **Single-bit (Page 169)**

▶ Multiple-bit

▶ Burst

▶ Recoverable

66. At the CRC generator, _____ added to the data unit after the division process

▶ **0s are**

▶ 1s are

▶ The polynomial

▶ The CRC remainder is

67. Error control in the data link layer is based on _____

▶ **automatic repeat request (Page 196)**

▶ automatic repeat acknowledgment

▶ automatic send acknowledgment

68. In line discipline the initiator first transmits a frame called an _____

▶ **Enquiry (Page 189)**

▶ Acknowledgment

▶ NAK

▶ Request

69. Primary device uses _____ to receive transmission from the secondary devices.

▶ ACK

▶ ENQ

▶ **POLL (Page 191)**

70. Flow control is needed to prevent _____.

▶ Bit errors

▶ Overflow of the sender buffer

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

▶ **Overflow of the receiver buffer (Page 46)**

▶ Collision between sender and receiver

71. For stop-and-wait ARQ, for N data packets sent, _____ acknowledgments are needed.

▶ **N**

▶ 2N

▶ N-1

▶ N+1

72. In Y-MODEM Multiple files can be sent simultaneously

▶ **True (Page 205)**

▶ False

73. HDLC is an acronym for _____.

▶ High-duplex line communication

▶ **High-level data link control (Page 210)**

▶ Half-duplex digital link combination

▶ Host double-level circuit

74. Token Bus has no commercial application in data communications

▶ **True (Page 232)**

▶ False

75. The BNC-T connector is a T-shaped device with _____ ports

▶ **Three (Page 228)**

▶ Two

▶ Four

▶ Five

76. Each station in the Token Ring regenerates the frame.

▶ **True (Page 234)**

▶ False

77. Repeater works on _____ layer.

▶ Data Link

▶ Physical

▶ **Network (224)**

▶ Application

78. Trunks are transmission media such as _____ that handle the telephone to the nearest end office.

▶ Satellite links

▶ **Twisted-pair & Fiber-optic**

▶ Twisted-pair

▶ Fiber-optic

79. _____representation of links that connect nodes is called as physical topology.

▶ geometrical

▶ logical

▶ **physical (page 44)**

80. The internet model consists of _____ layers.

▶ three

▶ two

▶ **five**

▶ seven

81. Encryption and encoding are the same terms.

▶ True

▶ **False (Page 52)**

82. The amplitude of a digital signal depends upon the_____ to represent a bit.

▶ phase

▶ **voltage (Page 59)**

▶ wavelength

83. The inversion of the level at 1 bit is called as _____

▶ NRZ-L

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

▶ NRZ-I (Page 73)

▶ RZ

84. Modulation of an analog signal can be accomplished through changing the _____ of the carriersignal.

▶ amplitude

▶ frequency

▶ phase

▶ all of the given

85. If FCC regulations are followed, the carrier frequencies of adjacent AM radio stations are _____apart.

▶ 5 KHz

▶ 10 KHz (Page 95)

▶ 200 KHz

▶ 530 KHz

86. Category 5 UTP cable is used for data transmission of upto_____.

▶ 100 Mbps (Page 123)

▶ 200 Mbps

▶ 250 Mbps

▶ 400 Mbps

87. The RG number gives us information about _____.

▶ Twisted pairs

▶ Coaxial cables (Page 125)

▶ Optical fibers

▶ all of the given

88. The inner core of an optical fiber is _____ in composition.

▶ Glass plastic (Page 130)

▶ Copper

▶ Bimetallic

▶ Liquid

89. All of popular Fiber optic connectors are _____ shaped.

▶ Conical

▶ Barrel (Page 131)

▶ Circular

▶ Rectangular

90. The VLF and LF bands use _____ propagation for communications.

▶ Ground

▶ Sky

▶ Line of sight (Page 134)

▶ Space

91. Multiplexing is the set of techniques that allows simultaneous TX of multiple signals across _____data link

▶ Single (Page 147)

▶ Multi

▶ Single and Multi

▶ none of the given

92. A portion of the path that carries TX b/w a given pair of devices is known as _____.

▶ Node

▶ Bridge

▶ Channel (Page 147)

▶ Gateway

93. Which error detection method involves polynomials?

▶ Checksum

▶ Two-dimensional parity check

▶ CRC (Page 177)

▶ Simple parity check

94. If the ASCII character G is sent and the character D is received, what type of error is this?

▶ Single-bit

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

- Multiple-bit
- **Burst**
- Recoverable

95. Which error detection method involves the use of parity bits?

- **Simple parity check & two dimensional parity check**
- CRC
- Two-dimensional parity check
- Simple parity check

96. Which error detection method can detect a single-bit error?

- Simple parity check
- Two-dimensional parity check
- CRC
- **All of the given**

97. The Hamming code is a method of _____

- Error detection
- **Error correction (Page 181)**
- Error encapsulation
- Error detection & Error encapsulation

98. Sliding window requires that data frames be transmitted _____

- **Sequentially (Page 199)**
- Frequently
- Synchronously
- Asynchronously

99. In selective-reject ARQ, only the specific damaged or lost frame is_____.

- **Retransmitted (Page 200)**
- Forwarded
- Selected
- Rejected

100. Which of the following sub layer, resolves the contention for the shared media

- **MAC (Page 219)**
- LLC
- Physical

101. The PDU has no flag fields, no CRC, and no station address

- **TRUE (Page 220)**
- FALSE

102. IEEE divides the base band category into _____ standards.

- **5 (Page 222)**
- 4
- 3
- 6

103. Like 10 Base 5, 10 Base 2 is a _____ topology LAN

- Ring
- Mesh
- Star
- **Bus (Page 227)**

104. Check sum method is used for _____ layers.

- Physical
- Application
- Transport
- **Data link**

105. Repeater works on _____ layer.

- Data Link
- Physical
- **Network (Page 224)**
- Application

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

106. Trunks are transmission media such as _____ that handle the telephone to the nearest end office.

- ▶ Satellite links
- ▶ **Twisted-pair & Fiber-optic**
- ▶ Twisted-pair
- ▶ Fiber-optic

107. Which of the following _____ uses a series of filters to decompose multiplexed signal into itsconstituent signals?

- ▶ MUX
- ▶ **DEMUX (Page 150)**
- ▶ Switch
- ▶ Bridge

108. In Fast Ethernet, data rate can be increased by _____ collisions.

- ▶ Increasing
- ▶ **Decreasing (Page 230)**
- ▶ Keeping Constant
- ▶ None of the given

109. Which is not an element of protocol

- ▶ semantics
- ▶ timing
- ▶ **communication service module (Page 19)**

110. Layers 5, 6 and 7 also called as network support layers.

- ▶ True
- ▶ **False (Page 42)**

111. Fourier transform tells us that any digital signal can be decomposed into infinite number of periodic signals

- ▶ **True**
- ▶ **False (Page 42)**

112. Time domain plot show changes in signal phase with respect to time.

- ▶ **True**
- ▶ **False (Page 63)**

113. Analog to digital conversion is also termed as modulating an analog signal.

- ▶ True
- ▶ **False (Page 70)**

114. DC component is also termed as Direct current component or a component with non-zero frequency.

- ▶ **False (Page 72)**
- ▶ **True**

115. Manchester is a type of _____encoding.

- ▶ **biphase (Page 75)**
- ▶ polar
- ▶ biphase & polar
- ▶ none of the given

116. The inversion of the level at 1 bit is called as _____

- ▶ NRZ-L
- ▶ **NRZ-I (Page 73)**
- ▶ RZ

117. PCM is the first process of PAM.

- ▶ True
- ▶ **False (Page 80)**

118. In 4PSK each phase change represents _____bits.

- ▶ 3
- ▶ 6
- ▶ **2 (Page 91)**
- ▶ 4

119. In RS 422 Balanced mode two lines carry _____ signals which are not identical to

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

each other.

- Same (Page 109)
- different
- digital
- analog

120. A _____ converts an analog signal into a digital signal.

- Demodulator (Page 110)
- Modulator
- Digital-to-analog converter

121. Which of the following is an example of ITU-T modem standards:

- T-series
- X-series
- N-series
- V-series (Page 114)

122. The maximum data rate in the uploading direction is still _____.

- 26.6 Kbps
- 33.6 Kbps (Page 117)
- 36.6 Kbps
- 46.6 Kbps

123. Which of the following primarily uses guided media

- Cellular telephone system
- Local telephone system (Page 120)
- Satellite communication
- Radio broadcasting

124. When a beam of light travels through media of two different densities, if the angle of incidence is greater thanthe critical angle, _____occurs.

- Reflection
- Refraction (Page 127)
- Incidence
- Criticism

125. When we talk about unguided media, usually we are referring to _____.

- Metallic wires
- Nonmetallic wires
- The air (Page 132)
- Water

126. Optical fibers are defined by the ratio of the _____ of their core to the diameter of their cladding.

- Diameter (Page 130)
- Radius
- Length
- Width

127. All of popular Fiber optic connectors are _____ shaped.

- Conical
- Barrel (Page 131)
- Circular
- Rectangular

128. Radio wave transmission utilizes _____ different types of propagation.

- Four
- Three
- Two
- Five (Page 132)

129. dB is _____ if a signal is amplified.

- Negative
- Positive (Page 142)
- Null
- Zero

130. (Marks: 1) - Please choose oneA prism can

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

deflect the light depending upon the angle of _____ and the frequency.

- ▶ **Deviation**
- ▶ **Incident (Page 151)**
- ▶ Refraction (Page 127)
- ▶ Reflection

131. Asynchronous TDM is efficient only when the size of the time slot is kept relatively _____

- ▶ **Large (Page 158)**
- ▶ Small
- ▶ Medium
- ▶ None of the given

132. The local loop has _____ cable that connects the subscriber telephone to the nearest end office.

- ▶ **Twisted-pair (Page 160)**
- ▶ Coaxial
- ▶ Fiber-optic
- ▶ None of the given

133. Data from a computer are _____; the local loop handles _____ signals.

- ▶ Analog; analog
- ▶ Analog; digital
- ▶ Digital; digital
- ▶ **Digital; analog**

134. Which error detection method uses ones complement arithmetic?

- ▶ Simple parity check
- ▶ Two-dimensional parity check
- ▶ CRC
- ▶ **Checksum (Page 179)**

135. Flow control is needed to prevent _____

- ▶ Bit errors
- ▶ Overflow of the sender buffer
- ▶ **Overflow of the receiver buffer (Page 46)**
- ▶ Collision between sender and receiver

136. _____ coordinates the amount of data that can be sent before receiving acknowledgment

- ▶ **flow control (Page 186)**
- ▶ error control
- ▶ data control

137. Error control is both error _____ and error _____

- ▶ **detection; correction (Page 186)**
- ▶ detection; deletion
- ▶ detection; avoidance
- ▶ detection; forwarding

138. Addressing is not needed in _____ configuration.

- ▶ **Point to Point (Page 190)**
- ▶ Multipoint
- ▶ Point to point and multipoint

139. In a Go-Back-N ARQ, if the window size is 63, what is the range of sequence number?

- ▶ **0 to 63**
- ▶ 0 to 64
- ▶ 1 to 63
- ▶ 1 to 64

140. A timer is set when _____ is sent out.

- ▶ A data frame
- ▶ **An ACK (Page 197)**
- ▶ A NAK

141. Sliding window requires that data frames

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

be transmitted _____

- ▶ Sequentially (Page 199)
- ▶ Frequently
- ▶ Synchronously
- ▶ Asynchronously

142. In Y-MODEM Multiple files can be sent simultaneously

- ▶ True (Page 205)
- ▶ False

143. BLAST stands for :

- ▶ Blocked asynchronous transmission (Page 205)
- ▶ Blocked synchronous transmission
- ▶ Barrel asynchronous transmission
- ▶ Below asynchronous transmission

144. HDLC is an acronym for _____.

- ▶ High-duplex line communication
- ▶ High-level data link control (Page 210)
- ▶ Half-duplex digital link combination
- ▶ Host double-level circuit

145. The HDLC _____ field defines the beginning and end of a frame.

- ▶ Flag (Page 214)
- ▶ Address
- ▶ Control
- ▶ FCS

146. _____ is the access protocol used by traditional Ethernet.

- ▶ CSMA/CD (Page 222)
- ▶ CSMA/CA
- ▶ Token Ring
- ▶ CSMA

147. Bridges can divide a large _____ into smaller segments

- ▶ Network (Page 241)
- ▶ Packet
- ▶ Frame
- ▶ Address

148. Like VRC, LRC and CRC, Checksum is also based on _____.

- ▶ Redundancy (Page 179)
- ▶ Decimal Division
- ▶ Encryption
- ▶ Encoding

149. The information to be communicated in a data communications system is the

- ▶ Medium
- ▶ Protocol
- ▶ Message (Page 7)
- ▶ Transmission

150. A set of devices connected by communication links is called networking

- ▶ True (Page 12)
- ▶ False

151. Internet with small "i" specifies the world wide Network the actual internet.

- ▶ True
- ▶ False (Page 39)

152. Data chunk at data link layer is called_____

- ▶ frame
- ▶ packet (Page 38)
- ▶ datagram

153. Data synchronization is a function related with _____

- ▶ session layer (Page 51)

All Boards Solved Past Papers. Class Notes. VU All Subjects Solved Papers. General Knowledge MCQs, Onile Test Quiz Time Based, PPSC, FPSC, NTC, Solved Papers and Other Helping Material are available on our website. Visit our Website Now. www.concept360web.com

▶ presentation layer

▶ transport

154. When data are transmitted from device A to device B, the header from A's layer 4 is read by B's_____ layer.

▶ physical

▶ **transport**

▶ application

▶ none of the given

155. Data must be converted into_____ before transmission.

▶ **signal (Page 56 and 84)**

▶ wave

▶ electric pulse

156. PCM is the first process of PAM.

▶ True

▶ **False (Page 80)**

157. In _____ transmission, bits are transmitted over a single wire, one at a time.

▶ Asynchronous serial

▶ Synchronous serial

▶ **Parallel (Page 98)**

▶ Asynchronous & Synchronous serial

158. EIA 232 allows for a maximum bit rate of _____Kbps.

▶ 40

▶ 30

▶ **20 (Page 104)**

▶ 10

159. When a beam of light travels through media of two different densities, if the angle of incidence is greaterthan the critical angle, _____occurs.

▶ Reflection

▶ **Refraction (Page 127)**

▶ Incidence

▶ Criticism

160. A parabolic dish antenna is a(n) _____ antenna.

▶ Omnidirectional

▶ Bidirectional

▶ **Unidirectional (Page 138)**

▶ Horn

161. Ultra high-frequency waves always use _____ propagation.

▶ Ground

▶ Sky

▶ **Line of Sight (Page 136)**

▶ Space

162. Middle frequency waves having range 300 KHz-3 MHz always use _____ propagation.

▶ Ground

▶ Sky

▶ **Line of Sight**

▶ Space**Page 8 of this book.**

163. DB is _____ if a signal is attenuated.

▶ **Negative (Page 142)**

▶ Positive

▶ Null

▶ Zero

164. Which multiplexing technique involves signals composed of light beams?

▶ FDM

▶ TDM

▶ **WDM (Page 150)**

▶ none of the given

165. Multiplexing has long been used as an essential tool in the _____.

- Electronic industry
- **Telephone industry (Page 159)**
- Space science
- VLAN

166. A telephone network is an example of a _____ network.

- Packet-switched
- **Circuit-switched (Page 38)**
- Message-switched
- none of the given

167. The local loop has _____ cable that connects the subscriber telephone to the nearest end office.

- **Twisted-pair (Page 160)**
- Coaxial
- Fiber-optic
- None of the given

168. Which error detection method involves polynomials?

- Checksum
- Two-dimensional parity check
- **CRC (Page 177)**
- Simple parity check

169. In CRC there is no error if the remainder at the receiver is _____

- Equal to the remainder at the sender
- **Zero (Page 176)**
- Nonzero
- The quotient at the sender

170. In CRC the quotient at the sender _____

- Becomes the dividend at the receiver
- Becomes the divisor at the receiver
- **is discarded**
- is the remainder

171. Which error detection method can detect a bust error?

- The parity check
- Two-dimensional parity check
- CRC
- **Two-dimensional parity check and CRC**

172. At the CRC checker, _____ means that the data unit is damaged

- A string of 0s
- A string of 1s
- A string of alternating 1s and 0s
- **A nonzero remainder**

173. Error control is both error _____ and error _____

- **detection; correction (Page 186)**
- detection; deletion
- detection; avoidance
- detection; forwarding

174. In line discipline the initiator first transmits a frame called an _____

- **Enquiry (Page 189)**
- Acknowledgment
- NAK
- Request

175. In line discipline after the data transmission, the sending system finishes with an _____ frame

- **EOT (Page 189)**
- EKT
- ENT

▶ ESP

176. In primary-secondary communication _____ is always the initiator of a session

▶ **Primary (Page 189)**

▶ Secondary

▶ Sender

▶ Receiver

177. Primary device uses _____ to receive transmission from the secondary devices.

▶ ACK

▶ ENQ

▶ **POLL (Page 191)**

178. In a Go-Back-N ARQ, if the window size is 63, what is the range of sequence number?

▶ **0 to 63**

▶ 0 to 64

▶ 1 to 63

▶ 1 to 64

179. Sliding window requires that data frames be transmitted _____

▶ **Sequentially (Page 199)**

▶ Frequently

▶ Synchronously

▶ Asynchronously

180. Data link protocols can be divided into _____ sub-groups.

▶ **two (Page 202)**

▶ three

▶ four

▶ five

181. XMODEM is a _____ protocol designed for telephone-line communication b/w PCs.

▶ **file transfer (Page 203)**

▶ hardware

▶ software

▶ application exchange

182. In Y-MODEM Multiple files can be sent simultaneously

▶ **True (Page 205)**

▶ False

183. Which of the following combines features of the other two?

▶ **ZMODEM (Page 205)**

▶ YMODEM

▶ XMODEM

▶ None of given

184. BLAST stands for :

▶ **Blocked asynchronous transmission (Page 205)**

▶ Blocked synchronous transmission

▶ Barrel asynchronous transmission

▶ Below asynchronous transmission

185. Which one of the following uses full duplex operation with sliding window flow control.

▶ **BLAST (Page 205)**

▶ XMODEM

▶ YMODEM

▶ ZMODEM

186. HDLC is an acronym for _____.

▶ High-duplex line communication

▶ **High-level data link control (Page 210)**

▶ Half-duplex digital link combination

▶ Host double-level circuit

187. The DSAP and SSAP are addresses used by _____ to identify the protocol stacks.

▶ LLC (Page 220)

▶ MAC

▶ Network

188. The PDU has no flag fields, no CRC, and no station address

▶ TRUE (Page 220)

▶ FALSE

189. Which of the following is a bus topology LAN that uses base band signaling and has a max? segment lengthof 500 meters

▶ 10 Base5 (Page 223)

▶ 10 Base2

▶ 100 Base2

▶ 100 Base5

190. Token Bus has no commercial application in data communications

▶ True (Page 232)

▶ False

191. The BNC-T connector is a T-shaped device with _____ ports

▶ Three (Page 228)

▶ Two

▶ Four

▶ Five

192. _____ is the access protocol used by traditional Ethernet.

▶ CSMA/CD (Page 222)

▶ CSMA/CA

▶ Token Ring

▶ CSMA

193. When a collision is detected in a network using CSMA/CD. _____

▶ The frame is immediately resent

▶ A jam signal is sent by the station

▶ The backoff value is set to 0

▶ The backoff value is decremented by 1

194. Like VRC, LRC and CRC, Checksum is also based on _____.

▶ Redundancy (Page 179)

▶ Decimal Division

▶ Encryption

▶ Encoding

195. Check sum method is used for _____ layers.

▶ Physical

▶ Application

▶ Transport

▶ Data link

196. Repeater works on _____ layer.

▶ Data Link

▶ Physical

▶ Network (Page 224)

▶ Application

197. When systems share a point to point link, then protocols used are called _____ protocols.

▶ Direct (Page 21)

▶ Indirect

▶ Monolithic

▶ structured

198. _____ requires more bandwidth.

▶ FSK

▶ ASK

▶ PSK

▶ QAM

199. An unauthorized user is a network _____ issue.

▶ Performance

▶ Reliability

▶ **Security (Page 15)**

▶ All of the given

200. Which is not an element of protocol?

▶ semantics

▶ timing

▶ **communication service module (Page 19)**

201. _____ is a multipoint topology.

▶ Ring

▶ Mesh

▶ Tree

▶ **Bus (Page 31)**

202. Unidirectional traffic movement is overcome by dual ring technology.

▶ **True (Page 33)**

▶ False

203. Physical layer define characteristics of interface between device and _____

▶ **transmission medium**

▶ another device

▶ another peer physical layer at other side

▶ modem

204. _____ layer deals with syntax and semantics of information exchange.

▶ **presentation (Page 51)**

▶ session

▶ application

▶ physical

205. To allow access to network resources is the function of _____

▶ **application layer (Page 53)**

▶ physical layer

▶ network layer

206. Time domain plot show changes in signal phase with respect to time.

▶ True

▶ **False (Page 63)**

207. In 8QAM each signal shift or one baud represents _____.

▶ 4 bits

▶ 2 bits

▶ 5 bits

▶ **3 bits (Page 93)**

208. Modulation of an analog signal can be accomplished through changing the _____ of the carriersignal.

▶ amplitude

▶ frequency

▶ phase

▶ **all of the given (Page 62)**

209. EIA 449 provides much better functionality than EIA _____

▶ **232 (Page 110)**

▶ 223

▶ 262

▶ 222

210. Which of the following is an example of ITU-T modem standards:

▶ T-series

▶ X-series

▶ N-series

▶ **V-series (Page 114)**

211. Traditional modems are wide spread now to a data rate of _____.

▶ **56 Kbps (Page 115)**

▶ 72 Kbps

▶ 42 Kbps

▶ 96 Kbps

212. In case of uploading at the switching station, data is converted to digital signal using _____.

▶ TCP

▶ **PCM (Page 116)**

▶ ICP

▶ TDM

213. The RG number gives us information about _____.

▶ Twisted pairs

▶ **Coaxial cables (Page 125)**

▶ Optical fibers

▶ all of the given

214. The _____ is an association that sponsors the use of infrared waves.

▶ **IrDA**

▶ EIA

▶ **FCC**

▶ PUD

215. Optical fibers are defined by the ratio of the _____ of their core to the diameter of their cladding.

▶ **Diameter (Page 130)**

▶ Radius

▶ Length

▶ Width

216. The section of EM spectrum defined as Radio Communication is divided into _____ ranges called BANDS.

▶ **8 (Page 132)**

▶ 10

▶ 5

▶ 6

217. Radio wave transmission utilizes _____ different types of propagation.

▶ Four

▶ Three

▶ Two

▶ **Five (Page 132)**

218. The VLF and LF bands use _____ propagation for communications.

▶ Ground

▶ Sky

▶ **Line of sight (Page 136)**

▶ Space

219. In _____ propagation, low-frequency radio waves hug the earth.

▶ Ground

▶ Sky

▶ Line of Sight

▶ **Space (Page 133)**

220. dB is _____ if a signal is amplified.

▶ Negative

▶ **Positive (Page 142)**

▶ Null

▶ Zero

221. Distortion occurs in a _____ signal.

▶ Rectified

▶ **Composite (Page 141)**

▶ Amplified

▶ none of the given

222. There are _____ basic categories of multiplexing.

▶ **3 (Page 148)**

▶ 2

▶ 5

223. In bit _____, MUX adds extra bits to a device.

▶ **Stuffing (Page 156)**

▶ Adding

▶ Multiplication

▶ Exchanging

224. The local loop has _____ cable that connects the subscriber telephone to the nearest end office.

▶ **Twisted-pair (Page 160)**

▶ Coaxial

▶ Fiber-optic

▶ None of the given

225. FTTC stands for _____

▶ flexible to the curb

▶ **fiber to the curb (Page 166)**

▶ fiber to the cable

▶ fiber to the center

226. If the ASCII character G is sent and the character D is received, what type of error is this?

▶ Single-bit

▶ Multiple-bit

▶ **Burst**

▶ Recoverable

227. Which error detection method can detect a single-bit error?

▶ Simple parity check

▶ Two-dimensional parity check

▶ CRC

▶ **All of the given**

228. Flow control is needed to prevent _____

▶ Bit errors

▶ Overflow of the sender buffer

▶ **Overflow of the receiver buffer (Page 46)**

▶ Collision between sender and receiver

229. In data link layer, communication requires at least _____ devices working together

▶ 3

▶ **2 (Page 185)**

▶ 4

▶ 5

230. Data link control is composed of _____ important functions.

▶ 2

▶ **3 (Page 185)**

▶ 4

▶ 5

231. _____ coordinates the amount of data that can be sent before receiving acknowledgment

▶ **flow control (Page 186)**

▶ error control

▶ data control

232. Primary device uses _____ to receive transmission from the secondary devices.

▶ ACK

▶ ENQ

▶ **POLL (Page 191)**

233. In a Go-Back-N ARQ, if the window size is 63, what is the range of sequence number?

▶ **0 to 63**

- 0 to 64
- 1 to 63
- 1 to 64

234. Data link protocols can be divided into _____ sub-groups.

- two (Page 202)
- three
- four
- five

235. XMODEM is a _____ protocol designed for telephone-line communication b/w PCs.

- file transfer (Page 203)
- hardware
- software
- application exchange

236. YMODEM uses ITU-T CRC-_____ for Error Checking

- 16 (Page 205)
- 32
- 8
- 4

237. In Y-MODEM Multiple files can be sent simultaneously

- True (Page 205)
- False

238. HDLC is an acronym for _____.

- High-duplex line communication
- High-level data link control (Page 210)
- Half-duplex digital link combination
- Host double-level circuit

239. What is present in all HDLC control fields?

- P/F bit (Page 215)
- N(R)
- N(S)
- Code bits

240. Which of the following sublyer, resolves the contention for the shared media

- MAC (Page 219)
- LLC
- Physical

241. Ethernet LANs can support data rates between _____

- 1 and 100 Mbps (Page 223)
- 1 and 200 Mbps
- 1 and 500 Mbps
- 1 and 100 Gbps

242. In FDDI, Token Passing is used as Access method.

- True (Page 236)
- False

243. Bridges can divide a large _____ into smaller segments

- Network (Page 241)
- Packet
- Frame
- Address

244. Like VRC, LRC and CRC, Checksum is also based on _____.

- Redundancy (Page 179)
- Decimal Division
- Encryption
- Encoding

245. Check sum method is used for _____ layers.

- Physical

▶ Application

▶ Transport

▶ **Data link**

246. Which of thefollowing _____ uses a series of filters to decompose multiplexed signal into its constituent signals?

▶ Bridge

▶ MUX

▶ **DEMUX (Page 150)**

▶ Switch

247. We need_____ to decompose a composite signal into its components.

▶ **Fourier transform (Page 64)**

▶ nyquist theorem

▶ shannon capacity

248. Data from computer is in _____ form and the local loop handles _____ signals.

▶ Analog; analog

▶ Analog; digital

▶ Digital; digital

▶ **Digital; analog**

249. There are how many factors on which the performance of a network depends?

▶ Three

▶ **Five (Page 14)**

▶ Four

▶ Two

250. _____requires the maximum number of I/O ports.

▶ Bus

▶ Star

▶ **Mesh (Page 29)**

▶ Ring

251. Headers are added at layers 1 and 7 of OSI model.

▶ True

▶ **False (Page 41)**

252. Trailer is only added at _____layer of OSI model.

▶ **data link (Page 41)**

▶ physical

▶ network

▶ application

253. A sine wave must be an analog signal.

▶ **True (Page 58)**

▶ False

254. If there is _____in voltage then the frequency is infinite.

▶ **instantaneous change (Page 61)**

▶ continuous change

▶ no change

255. The inversion of the level at 1 bit is called as _____

▶ NRZ-L

▶ **NRZ-I (Page 73)**

▶ RZ

256. The last process in PCM is _____ digital data into digital signal.

▶ **encoding (Page 82)**

▶ decoding

▶ modulating

257. Amplitude in ASK is more resistive to EMI and Noise.

▶ True

▶ **False (Page 87)**

258. If FCC regulations are followed, the carrier frequencies of adjacent AM radio stations are

_____apart.

- 5 KHz
- **10 KHz (Page 95)**
- 200 KHz
- 530 KHz

259. In _____ transmission, a start bit and a stop bit frame a character byte.

- **Asynchronous serial (Page 99)**
- Synchronous serial
- Parallel
- Asynchronous & Synchronous serial

260. Synchronous transmissions have _____.

- a start bit
- a stop bit
- gaps between bytes
- **none of the given (Page 99)**

261. Transmission media are usually categorized as _____

- Fixed or Unfixed
- **Guided or Unguided (Page 119)**
- Determinate or Indeterminate
- Metallic or Nonmetallic

262. The RG number gives us information about _____.

- Twisted pairs
- **Coaxial cables (Page 125)**
- Optical fibers
- all of the given

263. Radio wave and microwave frequencies range from _____.

- 3 to 300 KHz
- **300 KHz to 300GHz (Page 132)**
- 3 KHz to 300 GHz
- 3 KHz to 3000 GHz

264. All of popular Fiber optic connectors are _____ shaped.

- Conical
- **Barrel (Page 131)**
- Circular
- Rectangular

265. In _____ method a signal can be directed in a straight from Antenna to antenna.

- **Line of sight (Page 134)**
- Ground propagation
- Sky propagation
- Microwaves

266. Amplifiers are used to _____the signal to heat.

- **Amplify (Page 142)**
- Rectify
- Testify
- Nullify

267. There are _____ basic categories of multiplexing.

- **3 (Page 148)**
- 4
- 2
- 5

268. If a T-1 carries 8000 frames, the data rate is _____

- 2.544 Mbps
- **1.544 Mbps (Page 165)**
- 1.544 Kbps
- 1.544 Gbps

269. FTTC stands for _____

▶ flexible to the curb

▶ **fiber to the curb (Page 166)**

▶ fiber to the cable

▶ fiber to the center

270. Optical signals are multiplexed using _____ at switching office to create wider BW optical signals

▶ **WDM (Page 167)**

▶ FDM

▶ TDM

▶ MUX

271. Which error detection method consists of a parity bit for each unit as well as an entire data unit of paritybits?

▶ Simple parity check

▶ **Two-dimensional parity check**

▶ CRC

▶ Checksum

272. If the ASCII character G is sent and the character D is received, what type of error is this?

▶ Single-bit

▶ Multiple-bit

▶ **Burst**

▶ Recoverable

273. Flow control is needed to prevent _____

▶ Bit errors

▶ Overflow of the sender buffer

▶ **Overflow of the receiver buffer. (Page 46)**

▶ Collision between sender and receiver

274. In data link layer, communication requires at least _____ devices working together

▶ 3

▶ **2 (Page 185)**

▶ 4

▶ 5

275. Data link control is composed of _____ important functions.

▶ 2

▶ **3 (Page 185)**

▶ 4

▶ 5

276. Error control is both error _____ and error _____

▶ **detection; correction (Page 186)**

▶ detection; deletion

▶ detection; avoidance

▶ detection; forwarding

277. ENQ/ACK stands for_____

▶ **Enquiry/ Acknowledgment (Page 187)**

▶ Enque/ Acknowledgment

▶ Enquist/ Acknowledgment

▶ none of the given

278. In _____ ARQ, if a NAK is received, only the specific damaged or lost frame is re-transmitted.

▶ Stop-and-wait

▶ Go-Back-N

▶ **Selective reject (Page 200)**

▶ Stop-and-wait & Go-back-N

279. Sliding window requires that data frames be transmitted _____

▶ **Sequentially (Page 199)**

▶ Frequently

▶ Synchronously

▶ Asynchronously

280. Which of the following combines features of the other two?

- ZMODEM (Page 205)
- YMODEM
- XMODEM
- None of given

281. BLAST stands for :

- Blocked asynchronous transmission (Page 205)
- Blocked synchronous transmission
- Barrel asynchronous transmission
- Below asynchronous transmission

282. HDLC is an acronym for _____.

- High-duplex line communication
- High-level data link control (Page 210)
- Half-duplex digital link combination
- Host double-level circuit

283. The HDLC _____ field defines the beginning and end of a frame.

- Flag (Page 214)
- Address
- Control
- FCS

284. The shortest frame in HDLC protocol is usually the _____ frame.

- Information
- Supervisory (Page 213)
- Management
- None of the given

285. The PDU has no flag fields, no CRC, and no station address

- TRUE (Page 220)
- FALSE

286. _____ is the access protocol used by traditional Ethernet.

- CSMA/CD (Page 222)
- CSMA/CA
- Token Ring
- CSMA

287. Repeater is an amplifier, not a regenerator.

- True
- False (Page 240)

288. Bridges can divide a large _____ into smaller segments

- Network (Page 241)
- Packet
- Frame
- Address

289. Marks : 2Which error detection method uses ones complement arithmetic?

- Simple parity check
- Two-dimensional parity check
- CRC
- Checksum (Page 179)

290. Marks : 2In a time-domain plot, the vertical axis is the measure of _____.

- Amplitude (Page 59)
- Frequency
- Phase
- Time

291. Marks : 2Which topology requires a multi-point connection?

- Mesh
- Star
- Bus (Page 31)
- Ring

292. Marks : 2A timer is set when _____ is (are) sent out.

- ▶ A data frame
- ▶ **An ACK (Page 197)**
- ▶ A NAK
- ▶ An ARQ

293. Marks : 2If the data unit is 111111, the divisor 1010, and the remainder 110, what is the dividend at thereceiver?

- ▶ 111111011
- ▶ **111111110**
- ▶ 1010110
- ▶ 110111111

294. OSI standard is practically implemented in the form of internet.

- ▶TRUE
- ▶FALSE

295. TCP/IP application layers combine the functions of OSI Application, Session and Transport layers.

- ▶**TRUE (Page 55)**
- ▶FALSE

296. Unipolar use one voltage levels.

- ▶**TRUE (Page 71)**
- ▶FALSE

297. The material of core and cladding in fiber optic cable is same.

- ▶TRUE
- ▶**FALSE (Page 127)**

298. Burst error is easily corrected then bit error.

- ▶TRUE
- ▶FALSE

299. Set of rules governing communication is known as

- ▶OSI model
- ▶**Protocol (Page 08)**
- ▶Medium

300. WDM(wave division multiplexing) deals with

- ▶ electric waves
- ▶**light waves (Page 150)**
- ▶both

301. A Null modem is a

- ▶traditional modem
- ▶**technique to connect two DTE (Page 106)**
- ▶both

302. Router work on

- ▶data link layer
- ▶physical layer
- ▶**network layer (Page 48)**

303. Poll/Select is a technique related with

- ▶line control
- ▶**line discipline (Page 187)**
- ▶error control

304. In cyclic redundancy checking, what is the CRC?

- ▶the divisor
- ▶the quotient
- ▶the dividend
- ▶**the remainder**

305. In fiber optics the signal source is _____waves.

- ▶**Light (Page 126)**
- ▶Radio
- ▶Very Low frequency
- ▶Infrared

306. Each device has a dedicated point – to – point line configuration only with the two devices on eitherside of it.

- ►**Ring Topology (Page 33)**
- ►Star Topology
- ►Mesh Topology
- ►Tree Topology

307. Measures the relative strengths of two signals

- ►**Decibel (Page 141)**
- ►Bandwidth
- ►Wavelength
- ►Phase

308. Which multiplexing technique shifts each signal to a different carrier frequency?

- ►**FDM (Page 149)**
- ►Synchronous TDM
- ►Asynchronous TDM
- ►None of the above

309. The _____of a signal is the width of the frequency spectrum.

- ►Amplitude
- ►**Bandwidth (Page 66)**
- ►Bit interval
- ►Phase

310. In cyclic redundancy checking, what is the CRC?.

- ►the divisor
- ►the quotient
- ►the dividend
- ►**the remainder**

311. In fiber optics the signal source is _____waves..

- ►**Light (Page 126)**
- ►Radio
- ►Infrared
- ►Very Low frequency

312. Each device has a dedicated point – to – point line configuration only with the two devices on eitherside of it.

- ►**Ring Topology (Page 33)**
- ►Mesh Topology
- ►Star Topology
- ►Tree Topology

313. Measures the relative strengths of two signals.

- ►**Decibel (Page 141)**
- ►Bandwidth
- ►Phase
- ►Wavelength

314. Which multiplexing technique shifts each signal to a different carrier frequency?

- ►**FDM (Page 149)**
- ►Synchronous TDM
- ►Asynchronous TDM
- ►None of the above

315. The _____of a signal is the width of the frequency spectrum..

- ►Amplitude
- ►**Bandwidth (Page 66)**
- ►Bit interval
- ►Phase
