## SUBJECTIVE 8

3 MARKS=4 QUESTION

5 MARKS=4 QUESTIONS

ALMOST 30 MCQZ WERE FROM PAST PAPERS AND REST WSA ABOUT DURATION AND BOND PRICE.NO CONCEPTUAL MCZQ.ALL WERE SIMPLE

QUESTION:

SCENARIO WAS GIVEN AND ASK IT IS CALL OR PUT OPTIN ,OPTION PREMIUM AND PROFIT =5 MARKS

SAME QUESTION WAS THERE =5 MARKS

MEAN TO SAY THERE WERE 2 QUESTION RELATED TO OPTION.

ONE NUMERIC OF COVARIENCE.AMOUNTS WERE GIVEN.THIS QUESTION WAS FROM PAST PAPERS.=5 MARKS

ONE NUMERIC QUESTION WAS ABOUT REWARD TO VARIABILITY RATIO (RVAR).=5 MARKS

WHY DERIVATIVES USE HEDGING=3 MARKS

ONE SCENARION WAS GIVEN AND ASK THAT INVESTOR WILL CHOOSE CAPITAL MARKET OR MONEY MARKET.=3 MARKS

ONE QUESTION WAS ABOUT BOND DURATION=3 MARKS

AND ONE WAS ABOUT EVALUATION OF PORTFOLIO=3 MARKS.

THAT WAS MY PAPER.

FIN630 FINAL TERM PAPER SHARED BY STUDENT

ON MARCH 12, 2015 AT 4:05PM

- Suppose you are going to invest and you have the following options:

Company X

Company Y

Company X's beta is 1.3, company Y's beta is 0.5. Average value of beta is 1.

1. As a **risk averse investor**, which company would you prefer for investing and why?
2. As a **risk taker investor**, which company would you prefer for investing and why? (5)

- What type of market (derivative or spot) will be suitable for the following situations. Give reasoning to support your answer.

1. Suppose you want to purchase food for dinner from a restaurant.
  2. You are dealing in Ice cream manufacturing and you have to purchase milk on regular basis from a nearby milkman (5)\
- Suppose you have purchased a contract that is giving you right to buy the 500 shares of ABC Company at \$ 15 on 30<sup>th</sup> September, 2011, you have paid \$50 to seller of the contract to get the right to buy the shares.

You are required to identify the type of option contract (**call or put**) in this situation.

What is the option premium in this contract?

If the market price of the contract on 30<sup>th</sup> September, 2011 is \$17, what will be the profit for the option holder if he exercises it?(5)

[www.ranapk.com](http://www.ranapk.com)

- A company is offering Rs. 1,000 par value bond with 9% coupon paid semiannually. Calculate the duration for the bond if bond matures in 2 years and required rate of return is 12%.(5)
- A British portfolio manager is considering investing in Japanese government bonds denominated in yen. What are the major risks associated with this investment?(5)
- Why derivatives are used in hedging?(3)
- Investors are exposed to the credit risk when they purchase a bond. However, even if an issuer does not default on its obligation prior to maturity date, there is still a concern about credit risk. How credit risk can adversely impact the performance of a bond?(3)
