Module 82: Networking & Internet : Protection and Cures

1. The main purpose of a firewall is to:
   A) Increase network speed
   B) Store user data
   C) ✔ Filter network traffic
   D) Encrypt files
2. A firewall installed at an organization's gateway mainly protects:
   A) Individual users
   B) External servers
   C) ✔ Entire intranet
   D) Databases
3. Blocking traffic from attacking computers helps stop:
   A) Phishing
   B) ✔ Denial of Service attack
   C) Encryption
   D) Auditing
4. Pretending to be another user on a network is called:
   A) Filtering
   B) Auditing
   C) ✔ Spoofing
   D) Monitoring
5. A firewall on a personal computer should block traffic for:
   A) All applications
   B) ✔ Non-existent servers
   C) Operating system
   D) Antivirus
6. Spyware retrieves information using:
   A) Firewall
   B) Proxy
   C) ✔ Clandestine server
   D) Antivirus
7. Spam filters are examples of:
   A) Encryption tools
   B) ✔ Specialized firewalls
   C) Proxy servers
   D) Auditors
8. Spam filters often use which technologies?
   A) Hardware only
   B) ✔ Probability & AI
   C) Databases
   D) Encryption
9. A proxy server mainly acts as:
   A) Database
   B) Firewall
   C) ✔ Intermediary
   D) Antivirus
10. Proxy servers protect clients by:
    A) Encrypting messages
    B) ✔ Hiding client identity
    C) Blocking hardware
    D) Creating viruses

11. FTP proxy servers can block files containing:
    A) Passwords
    B) Emails
    C) ✔ Viruses
    D) IP addresses
12. Auditing software helps administrators to:
    A) Write programs
    B) ✔ Detect irregular activity
    C) Encrypt files
    D) Design hardware
13. Sudden increase in message traffic can indicate:
    A) Normal behavior
    B) ✔ Network problem
    C) Encryption
    D) Storage issue
14. Antivirus software mainly removes:
    A) Hardware faults
    B) ✔ Known infections
    C) Firewalls
    D) Networks
15. Antivirus software must be:
    A) Installed once
    B) Ignored
    C) ✔ Regularly updated
    D) Deleted

Module 83: Networking & Internet : Encryption

1. Encryption is mainly used to:
    A) Speed communication
    B) ✔ Protect data confidentiality
    C) Block viruses
    D) Increase memory
2. Passwords are weak because:
    A) Easy to remember
    B) ✔ Can be compromised
    C) Are encrypted
    D) Never change
3. Secure version of HTTP is:
    A) FTP
    B) SSL
    C) ✔ HTTPS
    D) TCP
4. HTTPS is based on:
    A) TCP
    B) UDP
    C) ✔ SSL
    D) IP
5. SSL was originally developed by:
    A) Microsoft

B) Google
C) ✔ Netscape
D) IBM

6. Browsers show SSL usage by displaying:
   A) Warning sign
   B) Star
   C) ✔ Padlock icon
   D) Arrow
7. Public-key encryption uses:
   A) One key
   B) ✔ Two keys
   C) No key
   D) Password only
8. The public key is used for:
   A) Decryption
   B) ✔ Encryption
   C) Authentication
   D) Auditing
9. The private key is used for:
   A) Encryption
   B) ✔ Decryption
   C) Broadcasting
   D) Filtering
10. Public-key encryption ensures that:
    A) Everyone can read data
    B) ✔ Only receiver can decrypt
    C) Messages are blocked
    D) Data is deleted
11. A major problem in public-key systems is:
    A) Virus attack
    B) ✔ Verifying correct public key
    C) Bandwidth
    D) Speed
12. Trusted sites that manage keys are called:
    A) Firewalls
    B) Proxies
    C) ✔ Certificate Authorities
    D) Auditors
13. A certificate contains:
    A) Password only
    B) ✔ Name and public key
    C) Virus info
    D) IP address
14. Encrypting with private key helps in:
    A) Confidentiality
    B) ✔ Authentication
    C) Compression
    D) Routing
15. A digital signature ensures:
    A) Speed
    B) ✔ Message authenticity
    C) Storage
    D) Filtering

Module 84: Networking & Internet : Legal Approaches to Network Security

1. Legal remedies aim to:
   A) Increase hacking
   B) ✔ Enhance network security
   C) Remove firewalls
   D) Encrypt data
2. Making an action illegal:
   A) Stops it completely
   B) ✔ Does not guarantee prevention
   C) Encrypts it
   D) Makes it legal
3. Cyber laws vary because of:
   A) Hardware
   B) ✔ International differences
   C) Software bugs
   D) Networks
4. US Computer Fraud and Abuse Act was passed in:
   A) 1996
   B) 2001
   C) ✔ 1984
   D) 2016
5. CFAA covers:
   A) Games
   B) ✔ Worms and viruses
   C) Encryption
   D) Hardware
6. Electronic Communication Privacy Act applies to:
   A) Only users
   B) ✔ Employers & ISPs
   C) Hackers
   D) Governments
7. Employers can access communication if:
   A) They want
   B) ✔ Employer equipment is used
   C) It is encrypted
   D) It is private
8. Pakistan cybercrime law was passed in:
   A) 2007
   B) ✔ 2016
   C) 1996
   D) 2002
9. First-time cybercrime punishment in Pakistan can be:
   A) 2 years
   B) 5 years
   C) ✔ 10 years
   D) Life
10. Pakistan cyber laws cover:
    A) Only hacking

B) ✔ Hacking, phishing, malware
C) Games
D) Education

11. Identity theft is considered:
A) Legal
B) ✔ Cybercrime
C) Encryption
D) Auditing
12. Prevention of Electronic Crimes Ordinance was issued in:
A) 2016
B) ✔ 2007
C) 1996
D) 1885
13. Pakistan Telecommunication Act was introduced in:
A) 2007
B) ✔ 1996
C) 1933
D) 2002
14. Wireless Telegraphy Act belongs to year:
A) 1885
B) ✔ 1933
C) 1974
D) 2007
15. FIA Act was introduced in:
A) 1933
B) 1996
C) ✔ 1974
D) 2008

Module 86: Algorithm – Formal Definition Algorithm

1. An algorithm is an:
A) Random process
B) ✔ Ordered set of steps
C) Hardware unit
D) Program only
2. Algorithm steps must be:
A) Vague
B) ✔ Unambiguous
C) Optional
D) Hidden
3. Executable means:
A) Beautiful
B) ✔ Can be carried out
C) Abstract
D) Imaginary
4. Algorithm must be:
A) Infinite
B) ✔ Terminating

C) Parallel only
D) Slow

5. “Make a list of all positive integers” is not an algorithm because it:
   A) Is ordered
   B) ✔ Never terminates
   C) Is executable
   D) Is simple
6. Monitoring patient vital signs is:
   A) Terminating
   B) ✔ Non-terminating process
   C) Algorithm
   D) Program
7. Order does NOT mean:
   A) Structure
   B) Control
   C) ✔ Sequence only
   D) Execution
8. Parallel processing contradicts:
   A) Executable
   B) ✔ Sequence idea
   C) Termination
   D) Effectiveness
9. “Effective” in CS means:
   A) Cheap
   B) ✔ Executable
   C) Fast
   D) Short
10. Algorithm steps must clearly define:
    A) Hardware
    B) ✔ Required action
    C) Output format
    D) Compiler
11. Ambiguous instructions are:
    A) Clear
    B) ✔ Problematic
    C) Efficient
    D) Required
12. An algorithm describes:
    A) Data only
    B) ✔ Process
    C) Memory
    D) Storage
13. Termination means:
    A) Looping
    B) ✔ Comes to an end
    C) Parallelism
    D) Execution
14. Algorithms are mainly used to:
    A) Store data
    B) ✔ Solve problems
    C) Design hardware
    D) Encrypt files
15. Executing an algorithm results in a:
    A) Program

B) ✔ Process
C) Compiler
D) Variable

Module 87: Algorithms: Abstract Nature of Algorithms

1. An algorithm is:
   A) Physical
   B) ✔ Abstract
   C) Hardware
   D) Machine
2. Algorithm vs representation is like:
   A) CPU vs RAM
   B) ✔ Story vs book
   C) Input vs output
   D) Data vs file
3. Changing representation does NOT change:
   A) Program
   B) ✔ Algorithm
   C) Language
   D) Syntax
4. F = (9/5)C + 32 represents:
   A) Program
   B) ✔ Algorithm
   C) Process
   D) Data
5. Different forms of same algorithm are:
   A) Errors
   B) ✔ Representations
   C) Processes
   D) Compilers
6. Ambiguity arises due to:
   A) Hardware
   B) ✔ Insufficient detail
   C) Speed
   D) Memory
7. “Convert Celsius to Fahrenheit” is ambiguous for:
   A) Meteorologists
   B) ✔ Layperson
   C) Programmer
   D) Engineer
8. A program is a:
   A) Process
   B) ✔ Representation of algorithm
   C) CPU
   D) Compiler
9. A process is:
   A) Algorithm
   B) ✔ Execution of algorithm
   C) Representation
   D) Code

10. Algorithms and programs are:
    A) Same
    B) ✔ Related but distinct
    C) Unrelated
    D) Identical
11. A program without execution is:
    A) Process
    B) ✔ Static
    C) Dynamic
    D) Algorithm
12. Algorithms exist independent of:
    A) Language
    B) ✔ Representation
    C) Logic
    D) Steps
13. Translation of a book is equivalent to:
    A) New algorithm
    B) ✔ New representation
    C) New process
    D) Error
14. Executing a program means executing:
    A) Code only
    B) ✔ Algorithm
    C) Syntax
    D) Semantics
15. Algorithms are primarily:
    A) Physical
    B) ✔ Conceptual
    C) Electrical
    D) Mechanical

Module 88: Algorithm Representation (Primitives)

1. Algorithms require a:
    A) Compiler
    B) ✔ Language
    C) Network
    D) Hardware
2. Natural languages cause problems due to:
    A) Speed
    B) ✔ Ambiguity
    C) Encryption
    D) Syntax only
3. A primitive is a:
    A) Program
    B) ✔ Basic building block
    C) Process
    D) File
4. Primitives help remove:
    A) Sp

B) Memory
C) ✔ Ambiguity
D) Hardware

5. A programming language consists of:
   A) Hardware
   B) ✔ Primitives and rules
   C) CPU
   D) Storage
6. Syntax refers to:
   A) Meaning
   B) ✔ Symbolic representation
   C) Execution
   D) Output
7. Semantics refers to:
   A) Symbols
   B) ✔ Meaning
   C) Code
   D) Memory
8. Origami primitives are examples of:
   A) Hardware
   B) ✔ Algorithm representation
   C) Encryption
   D) Programs
9. Machine language primitives are:
   A) High-level
   B) ✔ Low-level
   C) Abstract
   D) Conceptual
10. Using only machine instructions is:
    A) Easy
    B) ✔ Tedious
    C) Abstract
    D) Fast
11. Higher-level primitives are built from:
    A) Algorithms
    B) ✔ Lower-level primitives
    C) Networks
    D) Firewalls
12. Programming languages allow algorithms to be expressed:
    A) Randomly
    B) ✔ At higher conceptual level
    C) In hardware
    D) Without rules
13. Picture-based instructions are prone to:
    A) Speed
    B) ✔ Misunderstanding
    C) Encryption
    D) Storage
14. Precise definitions help in:
    A) Confusion
    B) ✔ Clear communication
    C) Errors
    D) Slowness

15. Primitives must have:
    A) Hardware
    B) ✔ Syntax and semantics
    C) Compiler
    D) Memory

Module 89: Algorithm Representation (Pseudocode)

1. What is the main purpose of pseudocode?
    A) Execute the program faster
    B) ✔ **Express ideas informally during development**
    C) Replace formal programming languages
    D) Encrypt data
2. In pseudocode, how do we save a computed value for later use?
    A) save = value
    B) store(value)
    C) ✔ **name = expression**
    D) value ← name
3. Which pseudocode structure is used for decision-making?
    A) loop
    B) switch
    C) ✔ **if (condition): activity else: activity**
    D) assign
4. How would you pseudocode "Divide total by 366 if leap year, else divide by 365"?
    A) total = total / 366 if leap year else total / 365
    B) ✔ **if (year is leap year): daily total = total / 366 else: daily total = total / 365**
    C) total / 366 if leap else total / 365
    D) daily total = total / 365 or 366
5. The statement `RemainingFunds = CheckingBalance + SavingsBalance` in pseudocode is an example of:
    A) Looping
    B) Condition
    C) ✔ **Assignment**
    D) Function call
6. Pseudocode can borrow syntax from:
    A) Only Python
    B) ✔ **Any programming language**
    C) Only Java
    D) Only Pascal
7. A key property of pseudocode is:
    A) Must run on a computer
    B) ✔ **Consistent, concise representation of recurring structures**
    C) Must be compiled
    D) Must include variable types
8. If you write:
    `if (GDP increases): buy stock else: sell stock`
    This is an example of which structure?
    A) Loop
    B) Function
    C) ✔ **Conditional/Selection**
    D) Iteration

9. Which is NOT a correct pseudocode assignment statement?
   A) Total = Price + Tax
   B) ✔ **Price + Tax = Total**
   C) RemainingFunds = CheckingBalance + SavingsBalance
   D) Count = Count + 1
10. Pseudocode is primarily used to:
   A) Execute code
   B) Encrypt data
   C) ✔ **Represent algorithm logic informally**
   D) Replace flowcharts

Module 90: While-Structure (Pseudocode)

11. Which pseudocode structure is used to repeat an action while a condition is true?
   A) if-else
   B) for
   C) ✔ **while (condition): Activity**
   D) function
12. Pseudocode for “Keep selling tickets while tickets remain”:
   A) if tickets exist: sell tickets
   B) ✔ **while (tickets remain to be sold): sell a ticket**
   C) repeat until tickets sold: sell ticket
   D) for each ticket: sell ticket
13. In a while loop, when is the activity executed?
   A) Always once
   B) ✔ **Only if the condition is true**
   C) After loop ends
   D) Never
14. Which of the following best describes a while loop?
   A) Conditional executed once
   B) ✔ **Repeats as long as condition is true**
   C) Function call
   D) Variable assignment
15. What happens if the while condition is initially false?
   A) Loop executes once
   B) ✔ **Loop body is skipped**
   C) Loop executes infinitely
   D) Error occurs
16. The termination condition of a while loop is:
   A) When condition is true
   B) ✔ **When condition becomes false**
   C) Initialization
   D) Loop body
17. Which of these is a correct pseudocode for a while loop?
   A) while tickets remain to sell: sell ticket
   B) ✔ **while tickets remain to be sold: sell a ticket**
   C) loop tickets: sell ticket
   D) repeat: sell ticket
18. A loop that never ends is called:
   A) Conditional loop
   B) ✔ **Infinite loop**

C) For loop
D) Function

19. In pseudocode:
```
while (i <= n): sum = sum + i; i = i + 1
```
This is an example of:
A) Function call
B) Conditional
C) ✔ **Iteration/Loop**
D) Variable assignment

20. What is the difference between for and while loops in pseudocode?
A) for loops are faster
B) while loops can't terminate
C) ✔ **while loops repeat based on condition; for loops often repeat a fixed number of times**
D) No difference

Module 91: Algorithm Representation (Pseudocode)

Function Structure (Pseudocode)

21. Keyword used to define a function:
A) function
B) method
C) procedure
D) ✔ **def**

22. How do you call a function named `ProcessLoan`?
A) run ProcessLoan()
B) ✔ **ProcessLoan()**
C) execute(ProcessLoan)
D) start ProcessLoan

23. Correct pseudocode for if-else with functions `ProcessLoan()` and `RejectApplication()`:
A) if (condition) ProcessLoan else RejectApplication
B) if condition: ProcessLoan else RejectApplication
C) ✔ **if (condition): ProcessLoan() else: RejectApplication()**
D) if (condition): ProcessLoan else RejectApplication()

24. Which is NOT a function-related pseudocode structure?
A) def FunctionName():
B) FunctionName()
C) ✔ **if FunctionName**
D) return value

25. Functions in pseudocode can be used:
A) Only once
B) Only for arithmetic
C) ✔ **Multiple times wherever needed**
D) Only inside loops

26. What is the advantage of using functions in pseudocode?
A) Saves memory
B) ✔ **Reuse code and modular design**
C) Faster execution
D) Encrypts logic

27. Function `Greetings()` prints “Hello” three times. Which statement calls it?
    A) run Greetings
    B) ✔ **Greetings()**
    C) execute Greetings
    D) call Greetings
28. Pseudocode functions are equivalent to:
    A) Loops
    B) ✔ **Subprograms or methods in programming**
    C) Conditional statements
    D) Assignments
29. Which of the following is valid pseudocode function definition?
    A) def FindMax
    B) def FindMax:
    C) ✔ **def FindMax():**
    D) FindMax()
30. The body of a pseudocode function is:
    A) Not indented
    B) Optional
    C) ✔ **Indented under def statement**
    D) Written before def

Module 92: Algorithm: Discovery(The Art of Problem-Solving)

31. First phase in Polya’s problem-solving method:
    A) Devise a plan
    B) ✔ **Understand the problem**
    C) Evaluate solution
    D) Formulate algorithm
32. Correct sequence of problem-solving phases in programming:
    A) Plan → Understand → Evaluate → Formulate
    B) Understand → Evaluate → Plan → Formulate
    C) ✔ **Understand → Get idea → Formulate algorithm → Evaluate**
    D) Get idea → Understand → Formulate → Evaluate
33. In the “children’s ages problem,” which clue solved it?
    A) Product of ages
    B) Sum of ages
    C) ✔ **There is an oldest child**
    D) Number of children
34. Which phase involves checking if the solution works?
    A) Understand problem
    B) Devise plan
    C) Formulate algorithm
    D) ✔ **Evaluate solution**
35. Which phase involves brainstorming how an algorithm might solve the problem?
    A) ✔ **Get idea**
    B) Understand problem
    C) Execute plan
    D) Evaluate solution
36. Problem-solving skills are considered:
    A) Pure science

B) ✔ **Partly artistic, partly scientific**
C) Completely mathematical
D) Automatic

37. Trying a special case to find a general principle is an example of:
A) Loop control
B) Conditional
C) ✔ **Problem-solving heuristic**
D) Function definition

38. Why is the "oldest child" clue critical?
A) Gives sum of ages
B) ✔ **Distinguishes between two possible sets of ages**
C) Provides multiplication factor
D) Indicates gender

39. Formulating the algorithm corresponds to which Polya phase?
A) Understand problem
B) Devise plan
C) ✔ **Carry out the plan**
D) Evaluate solution

40. Which is a reason problem-solving is irregular?
A) Algorithms are simple
B) ✔ **Initial understanding may change while implementing solution**
C) Loops are hard
D) Functions are unclear

Module 93: Algorithm : Getting Your Foot in the Door

41. "Getting your foot in the door" in problem-solving means:
A) Solve the problem completely at once
B) Skip planning phase
C) ✔ **Start with a small insight or entry point into the problem**
D) Random guessing

42. Which of the following is an example of getting a foot in the door?
A) Writing the entire algorithm before testing
B) ✔ **Solving a simpler version of the problem first**
C) Ignoring constraints
D) Jumping to conclusions

43. Why is "getting your foot in the door" important in algorithm discovery?
A) Reduces coding errors
B) ✔ **Helps start a complex problem by breaking it into manageable steps**
C) Guarantees optimal solution
D) Eliminates testing

44. A correct approach to "getting your foot in the door" could be:
A) Solving only the final step
B) ✔ **Working with a sample input first**
C) Ignoring the problem statement
D) Using random numbers

45. Which of these is NOT an example of "getting your foot in the door"?
A) Trying easier related problems
B) Breaking problem into subproblems
C) ✔ **Completing the entire algorithm blindly**
D) Working backward from the solution

Module 94: Algorithm Discovery Strategies (I)

46. Working backward to discover an algorithm involves:
    A) Executing the program
    B) ✔ **Starting from the output and reasoning to input**
    C) Using recursion
    D) Looping
47. Solving related problems to find general principles is useful because:
    A) It avoids testing
    B) Reduces memory usage
    C) ✔ **Helps develop a general-purpose algorithm**
    D) Works only for numeric problems
48. Why is solving a specific example useful in algorithm development?
    A) Always produces final algorithm
    B) ✔ **Helps gain insight into general solution principles**
    C) Reduces coding time
    D) Eliminates debugging
49. Which approach is typically used to develop general-purpose algorithms?
    A) Solving only one instance
    B) ✔ **Considering multiple related instances**
    C) Random guessing
    D) Ignoring special cases
50. In the example of sorting a list of names, which is a general-purpose algorithm?
    A) Swap first two names only
    B) ✔ **An algorithm that works for any list**
    C) Move one specific name to correct position
    D) Hardcode order

Module 95: Algorithm Discovery Strategies (II)

51. Stepwise refinement is:
    A) Random task solving
    B) ✔ **Breaking a problem into subproblems iteratively**
    C) Executing loops blindly
    D) Function call
52. Stepwise refinement is also called:
    A) Bottom-up methodology
    B) ✔ **Top-down methodology**
    C) Iterative refinement
    D) Recursion
53. The smallest units in stepwise refinement are:
    A) Entire problem
    B) ✔ **Subproblems reduced to easily solved steps**
    C) Conditional statements
    D) Loop body
54. Bottom-up approach:
    A) Progresses from general to specific
    B) ✔ **Progresses from specific to general**
    C) Ignores subproblems
    D) Only used in loops

55. Stepwise refinement helps by:
    A) Avoiding testing
    B) ✔ **Making large problems easier to solve gradually**
    C) Reducing output
    D) Eliminating functions
56. Which approach often complements top-down methodology?
    A) Conditional
    B) ✔ **Bottom-up methodology**
    C) Sequential search
    D) Infinite loop
57. Which is NOT part of stepwise refinement?
    A) Decomposing into subproblems
    B) Solving subproblems
    C) ✔ **Ignoring smaller steps**
    D) Combining solutions
58. Stepwise refinement is particularly useful for:
    A) Single arithmetic operations
    B) ✔ **Large or complex problems**
    C) Printing text
    D) Assigning variables

Module 96: Iterative Structures (Sequential Search Algorithm)

59. Sequential search determines:
    A) Minimum value in list
    B) ✔ **Whether a target value exists in a list**
    C) Sorting order
    D) Maximum value
60. If a target is less than the current entry in a sorted list:
    A) Continue searching
    B) ✔ **Terminate search as failure**
    C) Reset search
    D) Increment target
61. How do you check if the list is empty in pseudocode?
    A) check empty(list)
    B) if list == null
    C) ✔ **if (List is empty): Declare search a failure else: …**
    D) while empty(list)
62. The main steps of sequential search:
    A) Initialize → Loop → Update → Compare
    B) ✔ **Select first entry → While loop → Compare → Success/Failure**
    C) Input → Output → Terminate
    D) Function → Loop → Assignment
63. When does a sequential search terminate successfully?
    A) End of list
    B) ✔ **Target value matches current entry**
    C) Target smaller than current entry
    D) Loop ends
64. Which condition in a sequential search indicates failure?
    A) Target == entry

B) ✔ **Reached end of list without match**
C) Loop condition true
D) None

65. Pseudocode representation of sequential search begins with:
A) while loop
B) ✔ **if list is empty: declare failure else select first entry**
C) function call
D) variable assignment

Module 97: Algorithm : Iterative Structure (Loop Control)

66. Loop control consists of:
A) Start, End
B) ✔ **Initialize, Test, Modify**
C) Input, Process, Output
D) Begin, Execute, Finish
67. What is the "termination condition"?
A) Initial value
B) ✔ **Condition that stops loop**
C) Loop body
D) Variable assignment
68. In `while (pH > 4): add acid`, termination condition is:
A) pH > 4
B) ✔ **pH ≤ 4**
C) Loop body
D) Add acid
69. Which loop statement is more error-prone?
A) Body
B) ✔ **Control/condition**
C) Function call
D) Assignment
70. Why do loops increase flexibility?
A) Fewer variables
B) ✔ **Body executed multiple times without rewriting code**
C) No initialization
D) Conditional statements
71. A loop that executes unknown number of times is best implemented using:
A) for loop
B) ✔ **while loop**
C) function
D) assignment
72. Which step ensures termination will occur?
A) Loop body
B) ✔ **Modification**
C) Function call
D) Indentation
73. What is the purpose of initialization in a loop?
A) Test condition
B) ✔ **Set starting value for loop control**
C) Terminate loop
D) Execute body

Module 98: Algorithm : Iterative Structure (Components of Repetitive Control)

74. Essential components of loop control are:
    A) ✔ **Initialize, Test, Modify**
    B) Input, Output
    C) Begin, Execute, Finish
    D) Function, Call, Return
75. The test activity in a loop:
    A) Executes body
    B) ✔ **Checks if termination condition is reached**
    C) Initializes variables
    D) Modifies loop index
76. Modification step in a loop:
    A) Checks condition
    B) ✔ **Moves control toward termination**
    C) Declares variable
    D) Ends loop
77. What happens if a loop is missing the modification step?
    A) Executes correctly once
    B) ✔ **May become infinite**
    C) Skips body
    D) Terminates immediately
78. The while loop condition is true:
    A) Loop terminates
    B) ✔ **Body executes**
    C) Loop ends
    D) Function called
79. Negation of while loop condition defines:
    A) Loop body
    B) Initialization
    C) ✔ **Termination condition**
    D) Function

Module 99: Algorithm : Iterative Structure (Loop Execution) (Example I)

80. To find maximum in a list, first initialize:
    A) Target
    B) ✔ **Max = first number, Current = second number**
    C) Index = 0
    D) Last number
81. In each iteration, max is updated as:
    A) max + 1
    B) ✔ **max = current if current > max**
    C) max = sum
    D) max = previous max
82. The loop continues until:
    A) ✔ **All elements checked**

B) Max unchanged
C) Current < max
D) First element

83. Sequential comparison in maximum-finding is an example of:
A) Conditional
B) ✔ **Iterative/loop structure**
C) Function call
D) Assignment

84. Which pseudocode represents finding max?
A) max = 0
B) Current = first
C) ✔ **While elements exist: if current > max: max = current**
D) sum = max

Module 100: Algorithm : Iterative Structure (Loop Execution) (Example II)

Factorial of n is calculated by initializing:
A) n and i
B) ✔ **f = 1, i = 1**
C) f = 0, i = n
D) n and f

85. Loop condition for factorial:
A) i > n
B) ✔ **i ≤ n**
C) f ≤ n
D) i = n

86. Factorial update step:
A) f + i
B) f = i
C) ✔ **f = f * i**
D) f / i

87. Loop terminates when:
A) i < n
B) ✔ **i > n**
C) f = n
D) i = 0

88. For n = 5, factorial calculation ends with f =
A) 24
B) 60
C) ✔ **120**
D) 100

89. How many iterations for factorial of n?
A) n-1
B) ✔ **n**
C) n+1
D) 1

90. Initial values before factorial loop:
A) i = 0, f = 0
B) i = n, f = 1

C) ✔ **i = 1, f = 1**
D) i = 1, f = n

91. Which pseudocode correctly computes factorial?
A) i=1; f=1; for i <= n: f = f + i
B) i=1; f=1; while i < n: f = f * i
C) ✔ **i=1; f=1; while i <= n: f = f * i; i = i + 1**
D) i=0; f=1; while i <= n: f = f + i

92. Factorial algorithm illustrates:
A) Conditional statements
B) ✔ **Iterative structures with loop control**
C) Function calling
D) Assignment only

93. Loop index `i` in factorial algorithm:
A) Does not change
B) ✔ **Increments each iteration**
C) Decrements each iteration
D) Constant

94. Multiplying f by i in factorial is part of:
A) Test
B) Initialization
C) ✔ **Loop body (activity)**
D) Termination

95. Termination of factorial loop depends on:
A) Function call
B) ✔ **Loop condition i ≤ n**
C) Variable f
D) Current value

96. Factorial of 0 is:
A) 1
B) 0
C) ✔ **1**
D) Undefined

97. Loop control ensures factorial calculation:
A) ✔ **Executes correct number of iterations**
B) Initializes f
C) Returns wrong result
D) Skips i

98. Iterative factorial computation is an example of:
A) Conditional
B) ✔ **Repetition with known termination condition**
C) Function only
D) Assignment

99. Which step ensures loop terminates in factorial algorithm?
A) f = f * i
B) ✔ **i = i + 1**
C) i = 1
D) None

100. Using while loops for factorial demonstrates:
A) Top-down decomposition
B) ✔ **Repetitive control (loop execution)**
C) Conditional selection
D) Function calling

Module 101 – Algorithm : Iterative Structure (Pretest & Posttest Loops)

1. A while loop is also called a: A) Posttest loop
   B) Infinite loop
   C) ✔ **Pretest loop**
   D) Recursive loop
2. In a pretest loop, condition is checked: A) After execution
   B) ✔ **Before execution**
   C) In the middle
   D) Never
3. A repeat loop is also known as: A) Pretest loop
   B) Conditional loop
   C) ✔ **Posttest loop**
   D) Infinite loop
4. Posttest loop executes the body: A) Zero times
   B) Only once
   C) ✔ **At least once**
   D) Never
5. Which loop guarantees at least one execution? A) While
   B) For
   C) ✔ **Repeat**
   D) Do nothing

Module 102 – Algorithm: Insertion Sort Algorithm

6. Insertion sort works by: A) Dividing array
   B) Swapping randomly
   C) ✔ **Inserting elements in sorted sublist**
   D) Deleting elements
7. Insertion sort is suitable for: A) Huge datasets
   B) Distributed systems
   C) ✔ **Small lists**
   D) Databases
8. Insertion sort sorts data: A) Externally
   B) Using extra memory
   C) ✔ **In-place**
   D) Using recursion
9. Initially, insertion sort assumes: A) Whole list sorted
   B) List empty
   C) ✔ **First element sorted**
   D) Last element sorted
10. Insertion sort is similar to sorting: A) Cards on table
    B) Files in folder
    C) ✔ **Playing cards in hand**
    D) Books on shelf

Module 103 – Algorithm Insertion Sort Example

11. In insertion sort, elements are moved: A) Randomly
    B) Backward only
    C) ✔ **To make space for insertion**
    D) Forward only
12. After first pass, sorted sublist contains: A) All elements
    B) Two elements
    C) ✔ **One element**
    D) No element
13. Insertion sort compares: A) Adjacent elements
    B) Random elements
    C) ✔ **Current element with previous sorted elements**
    D) Last element only
14. Insertion sort complexity (average case): A) O(log n)
    B) O(n)
    C) ✔ **$O(n^2)$**
    D) O(1)
15. Insertion sort is: A) Unstable
    B) ✔ **Stable**
    C) Recursive
    D) Distributed

Module 104 – Algorithm: Recursive Structure (Binary Search)

16. Binary search works on: A) Unsorted list
    B) Random list
    C) ✔ **Sorted list**
    D) Linked list only
17. Binary search divides list into: A) Three parts
    B) Four parts
    C) ✔ **Two halves**
    D) Random parts
18. Binary search uses: A) Loop only
    B) Sequential search
    C) ✔ **Recursion or iteration**
    D) Hashing
19. Binary search compares target with: A) First element
    B) Last element
    C) ✔ **Middle element**
    D) Random element
20. Binary search stops when: A) Target found
    B) List empty
    C) ✔ **Both A and B**
    D) Loop ends

Module 105 – Algorithm: Recursive Control

21. Recursion means: A) Looping forever
    B) Using loops

C) ✔ **Function calling itself**
D) Parallel execution

22. Base case in recursion: A) Starts recursion
    B) Modifies data
    C) ✔ **Stops recursion**
    D) Creates loop
23. Recursive calls are stored in: A) Heap
    B) Queue
    C) ✔ **Stack**
    D) Register
24. Missing base case causes: A) Fast execution
    B) Correct result
    C) ✔ **Infinite recursion**
    D) Compilation error
25. Recursive control requires: A) Initialization
    B) Modification
    C) Termination test
    D) ✔ **All of these**

Module 106 – Algorithm: Algorithm Efficiency

26. Algorithm efficiency measures: A) Beauty of code
    B) Length of program
    C) ✔ **Time and space usage**
    D) Syntax correctness
27. Sequential search average case is: A) O(log n)
    B) O(1)
    C) ✔ **O(n)**
    D) $O(n^2)$
28. Binary search worst case: A) O(n)
    B) $O(n^2)$
    C) ✔ **O(log n)**
    D) O(1)
29. Efficient algorithms: A) Use more memory
    B) Are complex
    C) ✔ **Save time/resources**
    D) Are longer
30. Algorithm analysis includes: A) Best case
    B) Worst case
    C) Average case
    D) ✔ **All of these**

Module 107 – Algorithm: Software Verification

31. Software verification ensures: A) Faster execution
    B) More features
    C) ✔ **Correctness of software**
    D) Better UI

32. Program believed correct means: A) Tested fully
    B) ✔ **Assumed correct**
    C) Verified logically
    D) Proven correct
33. Software verification focuses on: A) Design only
    B) Coding only
    C) ✔ **Validation & correctness**
    D) Speed only
34. Gold chain problem highlights: A) Coding
    B) Debugging
    C) ✔ **Importance of verification**
    D) Compilation
35. Fewer cuts solution required: A) 3
    B) 2
    C) ✔ **1**
    D) 7

Module 108 – Algorithm: Software Verification Examples

36. Therac-25 incident was due to: A) Hardware failure
    B) Network failure
    C) ✔ **Software failure**
    D) Power issue
37. Therac-25 caused: A) Minor injury
    B) No harm
    C) ✔ **Fatal radiation overdose**
    D) Data loss
38. Welsh NHS failure occurred in: A) 2015
    B) 2016
    C) ✔ **2018**
    D) 2020
39. NHS issue was related to: A) Security attack
    B) Virus
    C) ✔ **Software malfunction**
    D) Hardware crash
40. Software failure can cause: A) Delay only
    B) Minor loss
    C) ✔ **Serious consequences**
    D) No impact

Module 109 – Programming Languages :Early Generations_I

41. Machine language uses: A) English words
    B) Symbols
    C) ✔ **Binary numbers**
    D) Mnemonics
42. Writing machine language is: A) Easy
    B) Fast

C) ✔ **Tedious**
D) Automatic

43. Mnemonic representation is: A) Numeric
B) Binary
C) ✔ **Symbolic**
D) Random
44. MOV R5, R6 is: A) Machine code
B) ✔ **Assembly language**
C) High-level language
D) Pseudocode
45. Identifiers are also called: A) Constants
B) Keywords
C) ✔ **Variables**
D) Operators

Module 110 – Programming Languages :Early Generations-II

46. Assembly language is: A) First generation
B) ✔ **Second generation**
C) Third generation
D) Fourth generation
47. Assembler converts: A) High-level to binary
B) ✔ **Assembly to machine code**
C) Machine to assembly
D) Binary to English
48. Assembly language is: A) Portable
B) ✔ **Machine dependent**
C) Universal
D) Interpreted
49. FORTRAN is a: A) Second gen language
B) ✔ **Third gen language**
C) Assembly language
D) Machine language
50. COBOL was designed for: A) Games
B) Science
C) ✔ **Business applications**
D) AI

Module 111 – Programming Languages: Machine Independence

1. Third-generation languages aim to achieve: A) Faster execution
B) Hardware control
C) ✔ **Machine independence**
D) Smaller programs

2. Machine independence means: A) No compiler needed
   B) Same hardware required
   C) ✔ **Program runs on different machines**
   D) Uses machine code
3. Why do dialects of a language exist? A) User preference
   B) Syntax errors
   C) ✔ **Different compiler designs**
   D) Memory limits
4. ANSI and ISO provide: A) Hardware designs
   B) Software tools
   C) ✔ **Language standards**
   D) Operating systems
5. Language extensions are: A) Mandatory features
   B) Errors
   C) ✔ **Non-standard additions**
   D) Comments
6. Using non-standard features causes: A) Faster code
   B) Better output
   C) ✔ **Portability issues**
   D) Less memory usage
7. Third-generation languages are: A) Fully machine dependent
   B) ✔ **Mostly machine independent**
   C) Assembly based
   D) Binary based
8. True machine independence is: A) Fully achieved
   B) Impossible
   C) ✔ **Nearly achieved**
   D) Ignored
9. Compilers translate: A) Machine to assembly
   B) Assembly to high-level
   C) ✔ **High-level to machine code**
   D) Logic to code
10. High-level statements allow thinking in: A) Binary terms
    B) Hardware terms
    C) ✔ **Abstract concepts**
    D) Memory locations

Module 112 – Programming Languages : Imperative Paradigm

11. Imperative paradigm is also called: A) Declarative
    B) Functional
    C) ✔ **Procedural**
    D) Logical
12. Imperative paradigm focuses on: A) What to solve
    B) Results only
    C) ✔ **How to solve**
    D) Rules only
13. Python follows which paradigm? A) Declarative
    B) Functional

C) ✔ **Imperative**
D) Logical

14. Imperative programming uses: A) Facts
    B) Rules
    C) ✔ **Sequence of commands**
    D) Queries
15. Imperative paradigm is based on: A) Objects
    B) Logic
    C) ✔ **Algorithms**
    D) Functions
16. Machine language follows: A) Declarative paradigm
    B) Functional paradigm
    C) ✔ **Imperative paradigm**
    D) Object-oriented paradigm
17. Imperative approach manipulates: A) Functions
    B) Rules
    C) ✔ **Data**
    D) Queries
18. Software development paradigm affects: A) Coding only
    B) Testing only
    C) ✔ **Entire development process**
    D) Compilation only
19. Pseudocode is based on: A) Declarative paradigm
    B) ✔ **Imperative paradigm**
    C) Functional paradigm
    D) Logical paradigm
20. Imperative paradigm requires: A) Facts only
    B) No algorithm
    C) ✔ **Step-by-step instructions**
    D) Queries

Module 113 – Programming Languages :Declarative Paradigm

21. Declarative paradigm focuses on: A) Algorithms
    B) Commands
    C) ✔ **Problem description**
    D) Memory usage
22. Programmer describes: A) Steps
    B) Commands
    C) ✔ **What is required**
    D) Execution flow
23. Declarative systems use: A) User algorithms
    B) ✔ **Built-in problem solvers**
    C) Hardware logic
    D) Machine code
24. Early declarative languages were: A) General purpose
    B) ✔ **Special purpose**
    C) Machine dependent
    D) Procedural

25. Simulation languages are often: A) Imperative
    B) Functional
    C) ✔ **Declarative**
    D) Assembly based
26. Weather forecasting uses: A) Imperative logic
    B) Machine language
    C) ✔ **Declarative simulation**
    D) Binary logic
27. Declarative paradigm gained boost from: A) Algebra
    B) Geometry
    C) ✔ **Formal logic**
    D) Statistics
28. Logic programming belongs to: A) Imperative paradigm
    B) Functional paradigm
    C) ✔ **Declarative paradigm**
    D) Object-oriented paradigm
29. Declarative languages emphasize: A) How to compute
    B) Memory use
    C) ✔ **What to compute**
    D) Execution order
30. Declarative programming reduces: A) Code readability
    B) Abstraction
    C) ✔ **Algorithm design effort**
    D) Flexibility

Module 114 – Programming Languages : Functional Paradigm

31. Functional paradigm treats programs as: A) Commands
    B) Objects
    C) ✔ **Functions**
    D) Rules
32. Functional programming builds programs by: A) Writing loops
    B) Using commands
    C) ✔ **Combining functions**
    D) Writing procedures
33. LISP is a: A) Imperative language
    B) Object-oriented language
    C) ✔ **Functional language**
    D) Assembly language
34. Functional programs emphasize: A) State changes
    B) Variables
    C) ✔ **Input-output relationships**
    D) Memory storage
35. Nested functions mean: A) Parallel execution
    B) Looping
    C) ✔ **Functions inside functions**
    D) Recursion only
36. Functional paradigm avoids: A) Functions
    B) Expressions

C) ✔ **Intermediate storage**
D) Output

37. Imperative programs store: A) Nothing
B) Inputs only
C) ✔ **Intermediate results**
D) Outputs only
38. Functional approach is compared to: A) Warehouses
B) Loops
C) ✔ **Direct product shipping**
D) Databases
39. Functional paradigm improves: A) Hardware use
B) Syntax
C) ✔ **Efficiency**
D) Compilation speed
40. Functional paradigm is closer to: A) Assembly logic
B) Hardware logic
C) ✔ **Mathematical functions**
D) Machine code

Module 115 – Programming Languages :Object Oriented Paradigm

41. OOP views software as: A) Algorithms
B) Procedures
C) ✔ **Objects**
D) Rules
42. Objects consist of: A) Code only
B) Data only
C) ✔ **Data and methods**
D) Functions only
43. Methods are: A) Variables
B) Data types
C) ✔ **Functions of objects**
D) Operators
44. GUI icons are examples of: A) Variables
B) Arrays
C) ✔ **Objects**
D) Classes
45. Object-oriented programming emphasizes: A) Steps
B) Commands
C) ✔ **Interaction between objects**
D) Binary execution
46. A class is: A) An object
B) A function
C) ✔ **Blueprint of objects**
D) A variable
47. Objects created from a class are called: A) Copies
B) Functions
C) ✔ **Instances**
D) Modules

48. OOP promotes: A) Code repetition
    B) Complexity
    C) ✔ **Reusability**
    D) Hardware dependence
49. Sorting list in OOP means: A) Programmer sorts
    B) ✔ **Object sorts itself**
    C) Compiler sorts
    D) OS sorts
50. OOP is most prominent in: A) Early computing
    B) Assembly programming
    C) ✔ **Modern software development**
    D) Machine language

Module 116 – Programming Languages :Variables and Data Types

51. A variable refers to: A) Constant value
    B) Instruction
    C) ✔ **Memory location**
    D) Register only
52. Data type defines: A) Name only
    B) Location only
    C) ✔ **Encoding and operations**
    D) Memory size only
53. Integer data type stores: A) Characters
    B) Decimal numbers
    C) ✔ **Whole numbers**
    D) Strings
54. Float data type represents: A) Characters
    B) Integers
    C) ✔ **Real numbers**
    D) Boolean values
55. Two's complement is used for: A) Characters
    B) Floats
    C) ✔ **Integers**
    D) Strings
56. Python is: A) Statically typed
    B) ✔ **Dynamically typed**
    C) Assembly based
    D) Machine dependent
57. Boolean data type has values: A) 0 and 1
    B) Yes and No
    C) ✔ **True and False**
    D) On and Off
58. char data type stores: A) Numbers
    B) Logic
    C) ✔ **Symbols**
    D) Images
59. Primitive data types include: A) Images
    B) Audio

C) ✔ **Integer, float, char, Boolean**
D) Video

60. Variable declaration in C requires: A) Value only
B) ✔ **Data type**
C) Function
D) Loop

Module 117 – Programming Languages :Data Structures

61. Data structure defines: A) Data type only
B) ✔ **Arrangement of data**
C) Instructions
D) Algorithms
62. An array stores: A) Different types
B) Objects
C) ✔ **Same type elements**
D) Functions
63. Two-dimensional array has: A) One index
B) ✔ **Rows and columns**
C) Characters
D) Objects
64. C array indexing starts from: A) 1
B) ✔ **0**
C) −1
D) Any number
65. FORTRAN array indexing starts from: A) 0
B) −1
C) ✔ **1**
D) 2
66. Aggregate type is also called: A) Array
B) ✔ **Structure**
C) Pointer
D) Function
67. Structure elements can be: A) Same type only
B) ✔ **Different types**
C) Integers only
D) Characters only
68. Employee.Age refers to: A) Whole structure
B) ✔ **Field of structure**
C) Array index
D) Method
69. Arrays are: A) Heterogeneous
B) ✔ **Homogeneous**
C) Dynamic always
D) Objects
70. Structures group: A) Instructions
B) Functions
C) ✔ **Related data**
D) Algorithms

Module 118 – Programming Languages :Assignment Statement

71. Assignment statement: A) Compares values
    B) Declares variables
    C) ✔ **Stores value in variable**
    D) Loops code
72. Z = X + Y means: A) Comparison
    B) ✔ **Assignment**
    C) Declaration
    D) Function call
73. Right side of assignment is: A) Variable
    B) Constant
    C) ✔ **Expression**
    D) Operator
74. Semicolon in C is used to: A) End block
    B) ✔ **Separate statements**
    C) Start loop
    D) Declare variable
75. := operator is used in: A) C
    B) Java
    C) ✔ **Ada**
    D) Python
76. Assignment is: A) Declarative
    B) Functional
    C) ✔ **Imperative statement**
    D) Logical
77. Assignment evaluates: A) Left side
    B) Both sides
    C) ✔ **Right side first**
    D) None
78. Assignment changes: A) Code
    B) Type
    C) ✔ **Variable value**
    D) Syntax
79. Multiple assignments in one line: A) Not allowed
    B) ✔ **Language dependent**
    C) Always allowed
    D) Syntax error
80. Assignment statements are core of: A) Declarative paradigm
    B) Functional paradigm
    C) ✔ **Imperative paradigm**
    D) Logic paradigm

Module 119 – Programming Languages : Control Structures (if-statement)

81. Control structures alter: A) Syntax
    B) Data type

C) ✔ **Execution flow**
D) Memory size

82. if-statement is: A) Loop
B) Declaration
C) ✔ **Decision structure**
D) Assignment
83. Condition in if-statement must be: A) Integer
B) Float
C) ✔ **Boolean**
D) Character
84. else executes when: A) if is true
B) Always
C) ✔ **Condition is false**
D) Program ends
85. if-statement chooses between: A) Loops
B) Variables
C) ✔ **Alternatives**
D) Data types
86. marks >= 50 means: A) Assignment
B) Loop
C) ✔ **Comparison**
D) Declaration
87. if-else is part of: A) Data structures
B) ✔ **Control structures**
C) Variables
D) Data types
88. Control structures are: A) Optional
B) Rare
C) ✔ **Essential**
D) Hardware based
89. if-statement tests: A) Variable
B) Function
C) ✔ **Condition**
D) Loop
90. if-statement supports: A) Only one path
B) ✔ **Decision making**
C) Compilation
D) Interpretation

Module 120 – Programming Languages :if-statement Examples

91. CGPA >= 3.0 checks: A) Assignment
B) Loop
C) ✔ **Condition**
D) Declaration
92. Scholarship example uses: A) Integer
B) ✔ **Float**
C) Boolean
D) Char

93. cout is used for: A) Input
B) ✔ **Output**
C) Assignment
D) Loop
94. if condition true executes: A) else block
B) Both blocks
C) ✔ **if block**
D) None
95. else executes when: A) CGPA >= 3.0
B) ✔ **CGPA < 3.0**
C) Always
D) Never
96. Control statements help in: A) Data storage
B) ✔ **Decision making**
C) Compilation
D) Memory allocation
97. if-else structure belongs to: A) Functional paradigm
B) Declarative paradigm
C) ✔ **Imperative paradigm**
D) Logic paradigm
98. Scholarship decision is an example of: A) Loop
B) Assignment
C) ✔ **Conditional logic**
D) Declaration
99. if-statement without else: A) Is invalid
B) ✔ **Is allowed**
C) Always error
D) Must compile
100. Control structures improve: A) Hardware speed
B) ✔ **Program logic**
C) Memory size
D) Binary code

Cs101 final term preparation by Salar Sikander +92 314 0960590

Module 121 – Programming Languages: Control Structures (Loops)

101. A loop is a control structure that: A) Executes instructions once
B) Selects between alternatives
C) ✔ **Repeats a set of instructions**
D) Ends the program

---

102. Loop execution depends on: A) Compiler
B) Data type
C) ✔ **A condition**
D) Memory size

103. Printing numbers 1 to 5 using separate cout statements is: A) Efficient
B) Mandatory
C) ✔ **Less convenient than using a loop**
D) Faster

---

104. The variable used to control loop execution is called: A) Constant
B) Flag
C) ✔ **Loop control variable**
D) Pointer

---

105. In `while(i<=5)`, the condition is checked: A) After loop execution
B) At program end
C) ✔ **Before each iteration**
D) Only once

---

106. When does the loop terminate? A) When i = 5
B) When i = 1
C) ✔ **When condition becomes false**
D) When cout executes

---

107. How many times will the given loop execute? A) 4
B) ✔ **5**
C) 6
D) Infinite

---

108. When i becomes 6, the loop: A) Continues
B) Prints 6
C) ✔ **Terminates**
D) Restarts

Module 122 – Programming Languages :Programming Concurrent Activities

109. Executing multiple activities at the same time is called: A) Multiprogramming
B) Sequential processing
C) ✔ **Parallel (Concurrent) processing**
D) Batch processing

---

110. True parallel processing requires: A) One CPU
B) One program

C) ✔ **Multiple CPU cores**
D) One thread

---

111. Illusion of parallelism on a single CPU is achieved by: A) Multithreading
B) ✔ **Time sharing**
C) Compilation
D) Debugging

---

112. In Java, a concurrent activity is called: A) Task
B) Process
C) ✔ **Thread**
D) Job

---

113. In Ada, concurrent activities are called: A) Threads
B) Jobs
C) ✔ **Tasks**
D) Functions

---

114. Creating new concurrent executions is known as: A) Forking
B) Looping
C) ✔ **Spawning threads**
D) Linking

---

115. Shared data accessed by only one thread at a time is called: A) Public data
B) Global data
C) ✔ **Mutually exclusive data**
D) Static data

---

116. Preventing multiple threads from accessing shared data simultaneously is done by: A) Compilation
B) Scheduling
C) ✔ **Blocking other threads**
D) Looping

Module 123 – Arithmetic Operators Examples

117. The / operator with integer operands: A) Gives exact result
B) Rounds result
C) ✔ **Truncates decimal part**
D) Gives remainder

---

118. Result of `5/2` in C is: A) 2.5
B) 3
C) ✔ **2**
D) 1

---

119. Result of `5.0/2.0` is: A) 2
B) ✔ **2.5**
C) 3
D) 1

---

120. The modulus operator (%) is used to: A) Divide numbers
B) Multiply numbers
C) ✔ **Find remainder**
D) Add numbers

---

121. Result of `5 % 2` is: A) 0
B) 2
C) ✔ **1**
D) 2.5

Module 124 – Programming Languages : Relational Operators Examples

122. Relational operators are used to: A) Assign values
B) Perform arithmetic
C) ✔ **Compare values**
D) Store data

---

123. Result of a relational expression is: A) Character
B) Integer
C) ✔ **True or False**
D) Float

---

124. If a condition is true, an if-statement returns: A) 0
B) -1
C) ✔ **1**
D) Nothing

---

125. The operator != means: A) Equal
B) Greater
C) ✔ **Not equal**
D) Less

---

126. The operator == is used for: A) Assignment
B) Declaration
C) ✔ **Comparison**
D) Looping

Module 125 – Programming Languages :Logical Operators Examples

127. Logical operators are used when: A) One condition is tested
B) Arithmetic is needed
C) ✔ **Multiple conditions are compared**
D) Loop is required

---

128. The AND (&&) operator returns true when: A) Any condition is true
B) Both are false
C) ✔ **Both conditions are true**
D) One is false

---

129. The OR (||) operator returns false when: A) One condition is true
B) Both are true
C) ✔ **Both conditions are false**
D) One is false

---

130. The NOT (!) operator: A) Adds condition
B) Removes condition
C) ✔ **Inverts the condition**
D) Compares values

---

131. Logical operators belong to: A) Arithmetic operations
B) Assignment operations
C) ✔ **Conditional expressions**
D) Looping

Module 126 – Software Engineering: Software Engineering Discipline

132. Software engineering deals mainly with: A) Small programs
B) Hardware design
C) ✔ **Large and complex software systems**
D) Circuit design

---

133. One major difficulty in software engineering is: A) Software wears out
B) ✔ **Measuring software complexity**
C) Lack of computers
D) Lack of users

---

134. Software differs from mechanical systems because software: A) Breaks easily
B) ✔ **Does not wear out**
C) Needs oiling
D) Rusts

---

135. Lack of reusable components caused software systems to be: A) Cheap
B) Efficient
C) ✔ **Built from scratch**
D) Small

---

136. Quantitative measures used to evaluate software are called: A) Tools
B) Models
C) ✔ **Metrics**
D) Algorithms

---

137. CASE stands for: A) Computer Added Software Environment
B) ✔ **Computer-Aided Software Engineering**
C) Computer Assisted Software Execution
D) Centralized Application Software Engineering

---

138. IDEs provide: A) Only editors
B) Only compilers
C) ✔ **Integrated development tools**
D) Only documentation

---

139. Software engineering research is carried out by: A) Managers only
B) Users only

C) ✔ **Practitioners and theoreticians**
D) Testers only

Final term preparation By Salar Sikander +92 314 0960590 & Anayat Ali Khan

---

Module 127 – Software Engineering: Software Life Cycle

1. What is the most fundamental concept in software engineering?
A. Programming
B. Software life cycle ✔
C. Debugging
D. Documentation

---

2. After software is developed, it enters which cycle?
A. Disposal
B. Use and maintenance ✔
C. Compilation
D. Installation

---

3. In the software maintenance phase, what is mostly done?
A. Hardware repair
B. Correction and updating ✔
C. Formatting
D. Rewriting OS

---

4. Software enters the maintenance phase due to:
A. User boredom
B. Errors and changes ✔
C. Low speed
D. Virus only

---

5. The most difficult task during maintenance is:
A. Coding
B. Understanding the program ✔
C. Testing
D. Installing

---

6. Software is sometimes discarded during maintenance because:
A. Users are bored
B. Modifying it is harder than rebuilding ✔
C. Updates arrive
D. There is a virus

7. Small effort during the development phase mainly helps in:
A. Installation
B. Future modifications ✔
C. Marketing
D. Selling

Module 128 – Software Engineering: Requirement Analysis

8. What is the first phase of the software life cycle?
A. Design
B. Requirements analysis ✔
C. Testing
D. Maintenance

---

9. The main goal of requirements analysis is to:
A. Write code
B. Specify services ✔
C. Debug
D. Test

---

10. Who provides input during requirements analysis?
A. Programmer only
B. Stakeholders ✔
C. Tester
D. Computer

---

11. The document that records software requirements is called:
A. User guide
B. Software Requirements Specification (SRS) ✔
C. Design document
D. Source code

---

12. What is the purpose of the SRS document?
A. Advertisement
B. Written agreement ✔
C. Testing report
D. Installation guide

---

13. Poor communication and changing requirements mainly cause:
A. Faster delivery

B. Cost overruns ✔
C. Better design
D. Strong security

---

14. Customers often request software changes:
A. At the start
B. During development ✔
C. After completion
D. During maintenance

---

15. A market study is usually done in requirements analysis for:
A. Custom software
B. COTS (commercial off-the-shelf) software ✔
C. Embedded software
D. Military systems

Module 129 – Software Engineering:Design Phase

16. The design phase mainly focuses on:
A. Identifying the problem
B. Planning the solution ✔
C. Fixing errors
D. Testing

---

17. The output of the design phase is:
A. Code
B. Detailed system structure ✔
C. Test cases
D. Manual

---

18. The simple difference between design and requirements is:
A. What vs Where
B. What vs How ✔
C. How vs When
D. Code vs Test

---

19. In building construction, the design phase is equivalent to:
A. Painting
B. Blueprints ✔
C. Inspection
D. Repair

20. Design techniques are based on:
A. Guesswork
B. Models and diagrams ✔
C. Coding only
D. Testing

Module 130 – Software Engineering: Implementation Phase

21. The implementation phase mainly involves:
A. Analysis
B. Coding ✔
C. Design
D. Planning

---

22. Databases are created in which phase?
A. Design
B. Implementation ✔
C. Testing
D. Maintenance

---

23. The role of a software analyst is:
A. Only coding
B. Overall development ✔
C. Only testing
D. Hardware setup

---

24. The programmer is mainly responsible for:
A. Requirements analysis
B. Writing code ✔
C. Managing stakeholders
D. Approving design

---

25. Today, the roles of analyst and programmer:
A. Are strictly separate
B. Often overlap ✔
C. Are fixed
D. Are legally defined

Module 131 – Software Engineering: Testing Phase

26. Traditionally, testing meant:
A. Design check
B. Debugging ✔
C. Analysis
D. Maintenance

---

27. Modern testing focuses on:
A. Code only
B. Quality assurance ✔
C. Speed
D. Cost

---

28. Testing is not only performed on:
A. Programs
B. Intermediate products ✔
C. Documents
D. Designs

---

29. Testing is now considered:
A. A separate phase
B. An integrated process ✔
C. Optional
D. Only final step

---

30. Even after testing, errors may remain:
A. Until installation
B. Throughout the system's life ✔
C. Only during testing
D. After deployment

Module 132 – Software Engineering: Methodologies (I)

31. The waterfall model executes phases:
A. In parallel
B. Sequentially ✔
C. Randomly
D. Flexibly

---

32. The flow in the waterfall model moves:
A. Both ways
B. In one direction ✔

C. Circular
D. Zigzag

---

33. The incremental model develops software:
A. In one complete version
B. By adding features step by step ✔
C. Without testing
D. Without design

---

34. The iterative model focuses on:
A. Expansion
B. Refining each version ✔
C. Documentation
D. Freezing requirements

---

35. Who developed RUP?
A. Microsoft
B. Rational (IBM) ✔
C. Google
D. Oracle

---

36. The non-proprietary version of RUP is called:
A. XP
B. Unified Process ✔
C. Agile
D. Spiral

Module 133 – Software Engineering: Methodologies (II)

37. What is a prototype?
A. Final system
B. An incomplete version ✔
C. Test report
D. Design document

---

38. In evolutionary prototyping, the prototype:
A. Is discarded
B. Evolves into the final system ✔
C. Is only a test tool
D. Is ignored

39. Throwaway prototyping means:
A. Reuse
B. Discarding ✔
C. Deploying
D. Selling

---

40. The main purpose of rapid prototyping is:
A. To deliver final product
B. To clarify communication ✔
C. To debug
D. To test performance

---

41. Linux is an example of:
A. Waterfall development
B. Open-source development ✔
C. Proprietary software
D. Closed system

---

42. In open-source software, users can:
A. Only use
B. Modify and improve ✔
C. Sell
D. Lock

---

43. Agile methods focus on:
A. Rigid rules
B. Flexibility ✔
C. Heavy documentation
D. Fixed scope

---

44. In Extreme Programming (XP), the team is usually:
A. Large
B. Small ✔
C. Distributed
D. Remote

---

45. In XP, development cycles occur:
A. Monthly
B. Daily ✔
C. Yearly
D. One-time

Module 134 – Software Engineering: Modularity

46. Modularity means:
A. One big program
B. Dividing software into modules ✔
C. No functions
D. No objects

---

47. Modularity makes what easier?
A. Selling
B. Understanding ✔
C. Marketing
D. Installation

---

48. In the imperative paradigm, a module is usually:
A. Object
B. Function ✔
C. Class
D. Interface

---

49. In object-oriented programming, a module is:
A. Function
B. Object ✔
C. Loop
D. Variable

---

50. A main advantage of modularity is:
A. Increased complexity
B. Easier maintenance ✔
C. More errors
D. Slower performance

Cs101 Final Term Preparation By Salar Sikander & Anayat Ali Khan

---

Module 134 – Software Engineering: Software Engineering Methodologies (II)

1. To modify software, one must first:
A. Rewrite the program
B. Understand the program or relevant parts ✔
C. Test the hardware
D. Install updates

---

2. Modularity in software refers to:
A. Writing code in a single file
B. Dividing software into manageable units called modules ✔
C. Using global variables only
D. Skipping testing

---

3. In the imperative paradigm, modules usually appear as:
A. Functions ✔
B. Objects
C. Classes
D. Interfaces

---

4. In the object-oriented paradigm, modules usually appear as:
A. Functions
B. Objects ✔
C. Procedures
D. Loops

---

5. The purpose of identifying modules during design is to:
A. Increase code size
B. Represent the task as manageable units ✔
C. Avoid testing
D. Minimize the number of functions

---

6. In the tennis simulation example, the function `ControlGame` calls:
A. Only `Serve`
B. `Serve`, `Return`, `ComputePath`, and `UpdateScore` ✔
C. Only `UpdateScore`
D. Only `ComputePath`

---

7. A structure chart indicates:
A. How each function performs its task
B. Functions and dependencies among them ✔
C. User interface design
D. Hardware requirements

Module 135 – Software Engineering: Coupling

8. Minimizing linkage between modules is known as:
A. High cohesion

B. Low intermodule coupling ✔
C. Data encapsulation
D. Inheritance

---

9. Control coupling occurs when:
A. Two modules share data
B. One module passes execution control to another ✔
C. Functions are logically unrelated
D. Global variables are used

---

10. Data coupling refers to:
A. Functions calling each other
B. Modules sharing data ✔
C. Hardware-software interaction
D. UI and backend interaction

---

11. Passing data explicitly between functions is an example of:
A. Control coupling
B. Data coupling ✔
C. Logical cohesion
D. Functional cohesion

---

12. Using global data can be risky because:
A. It is faster
B. Modifying one module may affect others unknowingly ✔
C. It reduces memory usage
D. It enforces encapsulation

Module 136 – Software Engineering: Cohesion

13. Cohesion refers to:
A. Independence between modules
B. The internal binding or relatedness of a module's parts ✔
C. The number of functions in a module
D. The use of global variables

---

14. Weak cohesion is called:
A. Logical cohesion ✔
B. Functional cohesion
C. Data coupling
D. Control coupling

15. Functional cohesion means:
A. The module performs unrelated tasks
B. All parts of a module focus on a single activity ✔
C. Modules share data
D. Module calls external functions

---

16. In object-oriented designs, entire objects are usually:
A. Functionally cohesive
B. Logically cohesive ✔
C. Data-coupled
D. Globally dependent

---

17. Methods within an object should be:
A. Logically cohesive only
B. Functionally cohesive ✔
C. Globally accessible
D. Minimally documented

Module 137 – Software Engineering: Information Hiding

18. Information hiding refers to:
A. Using global variables for all data
B. Restricting information to a specific portion of a software system ✔
C. Hiding code from users
D. Writing comments in code

---

19. A key benefit of information hiding is:
A. Easier debugging of global variables
B. Modules do not have unnecessary dependencies ✔
C. Faster execution
D. Less code

---

20. Two goals of information hiding are:
A. Only design goal
B. Only implementation goal
C. Both design and implementation goals ✔
D. None of the above

---

21. Examples of information hiding in implementation include:
A. Global variables

B. Direct access to all modules
C. Local variables and encapsulation ✔
D. Ignoring control structures

---

22. The concept of a “black box” corresponds to:
A. Using global data
B. Ignoring testing
C. Information hiding and abstraction ✔
D. Writing fewer functions

Module 138 – Software Engineering: Components

23. Prefabricated “off-the-shelf” units in software are called:
A. Functions
B. Objects only
C. Components ✔
D. Procedures

---

24. Components can be:
A. Only single objects
B. Collections of objects functioning as a self-contained unit ✔
C. Only global variables
D. Only data files

---

25. Component assemblers:
A. Write all code manually
B. Select and connect prefabricated components ✔
C. Only debug
D. Only test

---

26. In smartphone systems, applications are usually:
A. Single monolithic programs
B. Sets of collaborating components ✔
C. Only user interfaces
D. Hardware-dependent

---

27. Integration between applications on smartphones is facilitated by:
A. Global variables
B. Component-based architecture ✔
C. Logical cohesion only
D. Random module calls

Module 139 – Software Engineering: Design Patterns

28. A design pattern is:
A. A user interface style
B. A pre-developed model for solving recurring software design problems ✔
C. Only a database template
D. A testing strategy

---

29. The Adapter pattern is used to:
A. Test components
B. Make a module's interface compatible with an application ✔
C. Create global variables
D. Increase control coupling

---

30. The Decorator pattern allows:
A. Static class creation
B. Different combinations of activities depending on the situation ✔
C. Direct memory access
D. Ignoring modularity

---

31. Design patterns help in:
A. Increasing coupling
B. Minimizing coupling and maximizing cohesion ✔
C. Slowing development
D. Avoiding abstraction

---

32. Many templates in Java or .NET are:
A. Testing files
B. Design pattern skeletons ✔
C. Random modules
D. Obsolete code

Module 140 – Software Engineering: Design Pattern Examples

33. Factory Design Pattern is mainly used to:
A. Test objects
B. Create loosely coupled instances and reuse them ✔
C. Increase global variables
D. Write monolithic programs

34. The Shopping Cart Design Pattern should be used when:
A. Only one product is sold
B. Users may buy multiple products and return later ✔
C. No interaction occurs
D. Payment is immediate and single

---

35. A design pattern is “creational” if it:
A. Only decorates objects
B. Helps in creating objects or instances ✔
C. Only deletes objects
D. Tests components

Module 141 – Software Engineering: Scope of Quality Assurance

36. Modern software quality assurance focuses on:
A. Only debugging errors
B. Procedures, standards, training, and documentation ✔
C. Ignoring standards
D. Hardware testing

---

37. SQA groups in organizations are responsible for:
A. Only writing code
B. Overseeing and enforcing quality control systems ✔
C. Only testing
D. Selling software

---

38. Reviews in software development help:
A. Slow down development
B. Avoid misunderstandings and correct errors early ✔
C. Only document user data
D. Replace testing

---

39. IEEE 1028 standard focuses on:
A. Coding style
B. Software reviews ✔
C. Global variables
D. Hardware setup

---

40. Record keeping in SQA is important because:
A. It increases coupling
B. It ensures documentation is accurate for future reference ✔
C. It reduces program speed
D. It replaces testing

Module 141: Software Engineering – Scope of Quality Assurance

1. What was the initial focus in the early years of computing regarding software quality?
   A. Improving training programs
   B. Establishing standards
   C. Removing programming errors ✔
   D. Software licensing
2. Which organizations have helped establish standards for assessing software quality?
   A. ISO, IEEE, ACM ✔
   B. FDA, WHO
   C. NASA, UN
   D. W3C, IETF
3. What is the purpose of a Software Quality Assurance (SQA) group?
   A. Designing user interfaces
   B. Overseeing and enforcing quality control systems ✔
   C. Writing code for software
   D. Conducting patent reviews
4. Which tool helps make updating documentation and diagrams easier in quality control?
   A. Compiler
   B. CASE tools ✔
   C. Debugger
   D. Text editor
5. Which IEEE standard addresses software reviews?
   A. IEEE 1028 ✔
   B. IEEE 9000
   C. IEEE 15504
   D. IEEE 1078

Cs101 final term preparation by Salar Sikander +92 314 0960590 & Anayat Ali Khna

---

Module 142: Software Engineering – Software Testing

6. What is a major challenge of software testing?
   A. It is always too fast
   B. Testing all possible paths in complex software is impossible ✔
   C. Testing never finds errors
   D. Testing is completely automated
7. What principle states that a small part of modules contains most errors?
   A. Pareto principle ✔
   B. Cohesion principle
   C. Coupling principle
   D. Black-box principle

8. What is basis path testing designed to ensure?
   A. Each module has only one function
   B. Each instruction is executed at least once ✔
   C. Each user receives documentation
   D. Each software feature is patented
9. What type of testing uses knowledge of internal software structure?
   A. Black-box testing
   B. White-box (glass-box) testing ✔
   C. Beta testing
   D. User acceptance testing
10. Which testing method involves a preliminary release to real users?
    A. Alpha testing
    B. Beta testing ✔
    C. Unit testing
    D. Regression testing

Module 143: Software Engineering – Documentation

11. What is the purpose of user documentation?
    A. Explain software features to users ✔
    B. Describe software's internal composition
    C. Describe how to install software
    D. Manage software licenses
12. What is system documentation primarily used for?
    A. Sales promotion
    B. Maintain software internally ✔
    C. Educate users
    D. Provide legal coverage
13. Which documentation type explains installation and servicing of software?
    A. User documentation
    B. System documentation
    C. Technical documentation ✔
    D. Marketing documentation
14. Why are naming and indentation conventions important in programming?
    A. Increase sales
    B. Ensure uniformity and simplify maintenance ✔
    C. Reduce file size
    D. Protect copyrights
15. Which documentation is mainly intended for system administrators?
    A. User documentation
    B. Technical documentation ✔
    C. Marketing documentation
    D. Source code comments

Module 144: Software Engineering – Human-Machine Interface

16. What is the main goal of human-machine interface design?
    A. Minimize cost
    B. Make software easy for humans to use ✔

C. Increase memory usage
D. Reduce programming time

17. What does ergonomics focus on?
A. Human mental abilities
B. Human physical abilities ✔
C. Programming speed
D. Software algorithms

18. What does cognetics focus on?
A. Computer hardware
B. Human mental abilities ✔
C. Network efficiency
D. Software debugging

19. What does the GOMS model analyze?
A. Programming languages
B. User tasks in terms of goals, operators, methods, selection rules ✔
C. Software licenses
D. System documentation

20. How many items can the human mind typically handle at once according to research?
A. 5
B. 7 ✔
C. 10
D. 12

Module 145: Software Engineering – Software Ownership and Liability

21. Which laws protect the ownership rights of software developers?
A. Tax laws
B. Patent and copyright laws ✔
C. Criminal laws
D. Consumer protection laws

22. What is the purpose of a software license?
A. Transfer ownership to users
B. Grant permission to use software without transferring ownership ✔
C. Provide free updates
D. Protect hardware

23. Which method prevents others from making, using, or selling an invention?
A. Trademark
B. Patent ✔
C. License
D. Beta testing

24. What is one drawback of software patents?
A. Too cheap
B. Time-consuming and expensive ✔
C. Immediately granted
D. No legal protection

25. How can software developers reduce liability claims?
A. Ignore standards
B. Apply sound software engineering principles ✔
C. Avoid documentation
D. Use global variables

Module 146 – Data Abstraction: Arrays and Aggregates

1. What is an array?
A. A collection of different types of data
B. A rectangular block of data of the same type ✔
C. A list of fields
D. A single variable

---

2. How is a one-dimensional array organized?
A. Multiple rows and columns
B. A single row of elements ✔
C. Random blocks
D. Hierarchical structure

---

3. In a two-dimensional array, elements are identified by:
A. Single index
B. Pair of indices ✔
C. Field name
D. None of the above

---

4. Which example represents a two-dimensional array?
A. List of numbers in a row
B. Monthly sales by each salesperson ✔
C. Employee name
D. Queue of people

---

5. What is an aggregate type?
A. Array with same type
B. List of numbers
C. Block of data items of different types ✔
D. Stack

---

6. Fields in an aggregate type are usually accessed by:
A. Numerical index
B. Field name ✔
C. Position only
D. Random selection

---

7. Which is an example of an aggregate type?
A. A single number

B. Employee record with name, age, and rating ✔
C. One-dimensional array
D. A stack of books

---

8. Which statement is correct about arrays vs aggregates?
A. Both store only same type
B. Arrays same type, aggregates different types ✔
C. Aggregates are smaller
D. Arrays have field names

---

9. How many elements does a 1D array with 26 elements hold?
A. 12
B. 20
C. 26 ✔
D. 30

---

10. Which type is better for storing a group of different data items?
A. Array
B. List
C. Aggregate ✔
D. Stack

Module 147 – Data Abstraction: Lists, Stacks, and Queues

11. What is a list in data structures?
A. Hierarchical collection
B. Sequential collection of entries ✔
C. Only numbers
D. Only arrays

---

12. The beginning of a list is called:
A. Tail
B. Head ✔
C. Top
D. Base

---

13. What is a stack?
A. Queue of elements
B. List where entries are inserted and removed at the head ✔
C. Array of numbers
D. Tree structure

14. Removing an entry from the top of a stack is called:
A. Pushing
B. Popping ✔
C. Enqueue
D. Dequeue

---

15. What does LIFO stand for?
A. Last-in, final-out
B. Last-in, first-out ✔
C. Left-in, first-out
D. List-in, first-out

---

16. A stack is ideal for:
A. Sequential processing
B. Backtracking ✔
C. Random access
D. Sorting

---

17. What is a queue?
A. Stack of items
B. List where entries are removed from head and inserted at tail ✔
C. Binary tree
D. Aggregate

---

18. What does FIFO stand for?
A. First-in, last-out
B. First-in, first-out ✔
C. Fast-in, first-out
D. Flow-in, flow-out

---

19. A queue is often used as the underlying structure for:
A. Array
B. Buffer ✔
C. Stack
D. Tree

---

20. In a queue, the first element inserted is:
A. Last to be removed
B. First to be removed ✔
C. Randomly removed
D. Never removed

Module 148 – Data Abstraction: Trees

21. A tree is a collection with:
A. Linear order
B. Hierarchical organization ✔
C. Same type elements
D. Stack behavior

---

22. What is the topmost node in a tree called?
A. Leaf
B. Root ✔
C. Parent
D. Child

---

23. Nodes at the other extreme of a tree are called:
A. Root nodes
B. Terminal or leaf nodes ✔
C. Parent nodes
D. Ancestor nodes

---

24. The number of nodes in the longest path from root to leaf is called:
A. Height
B. Depth ✔
C. Width
D. Branch

---

25. In a tree, a node immediately below another node is called:
A. Parent
B. Child ✔
C. Root
D. Ancestor

---

26. Nodes with the same parent are called:
A. Descendants
B. Siblings ✔
C. Ancestors
D. Leaves

---

27. A binary tree is a tree in which:
A. Each parent has any number of children

B. Each parent has no more than two children ✔
C. Each child has one parent
D. Each root has multiple roots

---

28. Any node in a tree with its descendants forms:
A. Branch
B. Subtree ✔
C. Leaf
D. Root

---

29. The left and right subdivisions of a binary tree are called:
A. Nodes
B. Left and right branches ✔
C. Parents
D. Children

---

30. The hierarchical tree structure is similar to:
A. Queue
B. Stack
C. Organization chart ✔
D. Array

---

31. The term “ancestor” in a tree refers to:
A. Root node only
B. Any node above a given node ✔
C. Child nodes
D. Leaf nodes

---

32. The parent of a node has:
A. No children
B. Immediate child nodes ✔
C. Only one leaf
D. Root node

---

33. Depth of a tree is determined by:
A. Number of nodes only
B. Number of horizontal layers ✔
C. Number of leaves only
D. Number of children

---

34. Terminal nodes are also called:
A. Root nodes
B. Leaf nodes ✔
C. Parent nodes
D. Sibling nodes

---

35. Each child node is the root of:
A. Leaf
B. Subtree ✔
C. Stack
D. Queue

---

36. Trees in which nodes have multiple children are called:
A. Binary trees
B. General trees ✔
C. Queues
D. Stacks

---

37. Trees are useful for representing:
A. Linear sequences
B. Hierarchical data ✔
C. Random numbers
D. LIFO structures

---

38. A leaf node has:
A. Parent
B. No children ✔
C. Two children always
D. Root

---

39. Binary trees are used in:
A. Queues only
B. Stack operations
C. Efficient searching ✔
D. Linear lists

---

40. The structure of trees ensures that:
A. Multiple parents possible
B. No node reports to more than one parent ✔
C. Random hierarchy
D. Circular reference

Module 149 – Data Abstraction: Pointers

41. What is a pointer in programming?
A. A variable that stores a character
B. A storage area that contains the address of data ✔
C. A type of array
D. A random number

---

42. How can a pointer help in moving data repeatedly?
A. By copying data to multiple arrays
B. By deleting old data
C. By storing the address of the data ✔
D. By sorting data

---

43. What does a pointer "point" to?
A. Only the first element of an array
B. Only leaf nodes
C. The location of the data ✔
D. The size of memory

---

44. Which CPU register acts as a pointer?
A. Stack pointer only
B. Program counter ✔
C. Instruction register
D. General purpose register

---

45. Another name for the program counter is:
A. Data pointer
B. Memory pointer
C. Instruction pointer ✔
D. Stack pointer

---

46. How can pointers link related data items?
A. By storing the items in sequence
B. By storing the address of other items ✔
C. By merging arrays
D. By copying data

---

47. Using pointers, novels by the same author can be:
A. Sorted alphabetically

B. Linked in a chain ✔
C. Stored in separate arrays
D. Deleted

---

48. Which of these is true about pointers in modern languages?
A. They are illegal
B. They can be declared, allocated, and manipulated like other types ✔
C. Only C language supports pointers
D. They cannot point to arrays

---

49. Why are pointers useful in data structures?
A. For printing values
B. For converting types
C. For recording the location of data ✔
D. For deleting data

---

50. What type of data can pointers hold?
A. Only integers
B. Only characters
C. Address of any data type ✔
D. Only arrays

Module 150 – Database Systems: Significance

51. What is a database?
A. A one-dimensional file
B. A collection of data with internal links ✔
C. A single spreadsheet
D. A programming language

---

52. How is a database different from a flat file?
A. Database is smaller
B. Database allows access from multiple perspectives ✔
C. Flat file is multidimensional
D. Database is slower

---

53. Which problem arises in traditional file systems?
A. Faster queries
B. Easier data integration
C. Duplication of information ✔
D. No access issues

54. Database systems emerged to:
A. Replace programming languages
B. Reduce memory size
C. Integrate information across an organization ✔
D. Increase hardware cost

---

55. Databases allow sales data to be used for:
A. Storage only
B. Reports, marketing, and bonuses ✔
C. Data deletion
D. Sorting only

---

56. What is a major benefit of database technology?
A. Reduces programming
B. Replaces CPU
C. Supports decision-making ✔
D. Eliminates users

---

57. How is a database used on web applications like Amazon?
A. It stores HTML only
B. Server queries database and returns results to client ✔
C. Only stores images
D. Only stores passwords

---

58. A database combined with a Web interface can:
A. Delete unrelated data
B. Store in one place
C. Become the company's product ✔
D. Replace staff

---

59. Data mining in databases helps:
A. Delete duplicates
B. Increase hardware
C. Extract useful information ✔
D. Prevent access

---

60. Which statement is correct about databases?
A. They store one type of information only
B. They organize large volumes of data for multiple uses ✔
C. They are slower than flat files
D. They are always one-dimensional

Module 151 – Database Systems: Role of Schema

61. What is a schema in a database?
A. User interface
B. Subset of data
C. Description of the entire database structure ✔
D. SQL query

---

62. A subschema provides:
A. Full access to all data
B. Access to only a portion of the database for a user ✔
C. Only metadata
D. Only structure

---

63. Why are schemas important?
A. To speed up programming
B. To control access and maintain the database ✔
C. To sort data
D. To delete old data

---

64. Which department would use a subschema showing faculty employment history?
A. Registrar
B. Payroll ✔
C. Student Affairs
D. Marketing

---

65. The registrar can view which information under their subschema?
A. Faculty salary
B. Faculty adviser links ✔
C. Inventory data
D. Sales data

---

66. Which is a disadvantage of uncontrolled database access?
A. Faster queries
B. Easier storage
C. Unauthorized access to sensitive data ✔
D. Improved security

---

67. Subschemas ensure that:
A. Users can see all data

B. Users can delete data
C. Users access only relevant portions ✔
D. Users bypass DBMS

---

68. Schema and subschema separation provides:
A. No advantage
B. Access control and data independence ✔
C. Slower queries
D. Only backup

---

69. What does the payroll department subschema allow?
A. Modify student records
B. Modify faculty salaries ✔
C. Access student-adviser links
D. Modify inventory

---

70. A schema includes:
A. Only table names
B. Only SQL commands
C. Structure of records and relationships ✔
D. Only user passwords

Module 152 – Database Systems: DBMS

71. How many layers are in a typical database application?
A. One
B. Two: application layer and DBMS layer ✔
C. Three
D. Four

---

72. The application layer handles:
A. Data storage
B. Database access only
C. User communication and complex processing ✔
D. Hardware allocation

---

73. Who actually manipulates the database?
A. User
B. Application layer
C. DBMS ✔
D. Server only

74. Adding or deleting data is done by:
A. User interface
B. DBMS ✔
C. Schema only
D. Subschema

---

75. Retrieving information from the database is performed by:
A. Application software
B. DBMS ✔
C. User manually
D. Internet browser

---

76. Separating application software and DBMS provides:
A. Slower access
B. Abstract tools and simplified design ✔
C. More errors
D. Larger code

---

77. What is data independence?
A. Users can write SQL
B. Change database organization without modifying applications ✔
C. DBMS deletes data
D. Application bypasses DBMS

---

78. If a new field is added to employee records, which layer handles it?
A. User layer
B. DBMS and schema ✔
C. Application layer only
D. Subschema only

---

79. Application software never directly manipulates:
A. Input devices
B. Database ✔
C. CPU
D. Memory

---

80. Subschemas ensure that changes in one user's needs:
A. Affect all users
B. Do not affect other users ✔
C. Delete data
D. Require hardware upgrade

Cs101 Final preparations By Salar Sikander

Module 152 to 185

Important 340 Mcqs

+92 314 0960590 (only WhatsApp)

Module 152: Database Management Systems

1. A typical database application is divided into how many major layers?
A) One
B) Two ✅
C) Three
D) Four

---

2. Which layer communicates directly with the user?
A) Storage layer
B) Hardware layer
C) Application layer ✅
D) DBMS layer

---

3. Which component actually manipulates the database?
A) User
B) Application software
C) Operating system
D) DBMS ✅

---

4. The application software uses DBMS as an:
A) Interpreter
B) Compiler
C) Abstract tool ✅
D) Hardware interface

---

5. Adding or deleting data is performed by:
A) Application layer
B) User

C) DBMS ✅
D) Network

---

6. Which advantage simplifies application software design?
A) Data redundancy
B) Data abstraction ✅
C) Data duplication
D) Data loss

---

7. Distributed database complexity is handled by:
A) User
B) Application software
C) DBMS ✅
D) Browser

---

8. Controlling access to database is the responsibility of:
A) User
B) Application software
C) DBMS ✅
D) Network protocol

---

9. Subschemas are enforced by:
A) Operating system
B) Application software
C) Compiler
D) DBMS ✅

---

10. Ability to change database structure without changing applications is called:
A) Data redundancy
B) Data security
C) Data independence ✅
D) Data recovery

Module 153: Relational Database Model

11. A conceptual view of database is called:
A) File system
B) Database model ✅
C) Schema
D) Subschema

12. Relational model represents data in form of:
A) Trees
B) Graphs
C) Tables ✅
D) Objects

---

13. Tables in relational model are called:
A) Entities
B) Files
C) Relations ✅
D) Records

---

14. A row in a relation is called:
A) Attribute
B) Column
C) Tuple ✅
D) Schema

---

15. A column in a relation is called:
A) Tuple
B) Attribute ✅
C) Relation
D) Entity

---

16. Attributes describe:
A) Rows
B) Tables
C) Characteristics ✅
D) Programs

---

17. Each tuple represents:
A) An attribute
B) A relationship
C) An entity instance ✅
D) A database

---

18. Relational model is similar to:
A) Word processor
B) Spreadsheet ✅
C) Compiler
D) Browser

---

19. Employee information is stored as:
A) Graph
B) Tree
C) Relation ✅
D) Object

---

20. Rectangular table structure belongs to:
A) Hierarchical model
B) Network model
C) Relational model ✅
D) Object model

Cs101 Final Term Preparation By Salar Sikander & Anayat Ali Khan

---

Module 154: Issues of Relational Design

21. Poor relational design leads to:
A) Abstraction
B) Efficiency
C) Redundancy ✅
D) Security

22. Repetition of data is called:
A) Normalization
B) Redundancy ✅
C) Abstraction
D) Projection

23. One tuple per job assignment causes:
A) Data loss
B) Data duplication ✅
C) Data security
D) Data independence

24. Deleting a tuple may cause:
A) Update anomaly
B) Insertion anomaly
C) Deletion anomaly ✅
D) Selection anomaly

25. Losing job information due to deletion is an example of:
A) Redundancy
B) Deletion problem ✅
C) Inconsistency
D) Data abstraction

26. Combining multiple concepts in one relation causes:
A) Efficiency
B) Abstraction

C) Problems ✅
D) Security

27. Employee personal data belongs to:
A) JOB relation
B) ASSIGNMENT relation
C) EMPLOYEE relation ✅
D) DEPT relation

28. Job details should be stored in:
A) EMPLOYEE
B) JOB ✅
C) ASSIGNMENT
D) SALARY

29. Relationship between employee and job is stored in:
A) JOB
B) EMPLOYEE
C) ASSIGNMENT ✅
D) DEPARTMENT

30. Breaking tables into smaller ones is known as:
A) Denormalization
B) Compilation
C) Normalization ✅
D) Projection

Module 155: Relational Operators

31. Extracting information from database requires:
A) Programs
B) Queries
C) Relational operators ✅
D) Compilers

32. Selecting certain rows from a relation uses:
A) PROJECT
B) JOIN
C) SELECT ✅
D) UNION

33. Result of relational operation is always a:
A) File
B) Program
C) Relation ✅
D) Object

34. Selecting employee by ID uses:
A) JOIN
B) PROJECT
C) SELECT ✅
D) MERGE

35. Selecting multiple tuples results in:
A) One tuple
B) One attribute
C) A relation ✅
D) A database

Module 156: SELECT Operation

36. SELECT operation extracts:
A) Columns
B) Rows ✅
C) Tables
D) Databases

37. SELECT creates a:
A) File
B) Database
C) New relation ✅
D) Object

38. Condition in SELECT is written using:
A) FROM
B) WHERE ✅
C) PROJECT
D) JOIN

39. SELECT is used when data is filtered by:
A) Column
B) Condition ✅
C) Table
D) Database

40. SELECT does not change the original relation.
A) True ✅
B) False

Module 157: PROJECT Operation

41. PROJECT operation extracts:
A) Rows
B) Columns ✅
C) Tuples
D) Relations

42. PROJECT reduces:
A) Number of rows
B) Number of columns ✅
C) Data size
D) Tables

43. PROJECT Name, Address FROM EMPLOYEE returns:
A) Full table
B) Two-column relation ✅
C) One tuple
D) Database

44. PROJECT can extract:
A) One column only
B) Multiple columns ✅
C) Rows only
D) Tuples only

45. PROJECT operation removes:
A) Duplicate rows
B) Duplicate columns
C) Unselected columns ✅
D) Tables

Module 158: JOIN Operation

46. JOIN operation combines:
A) Columns
B) Rows
C) Relations ✅
D) Attributes

47. JOIN result contains attributes from:
A) One relation
B) Both relations ✅
C) Database
D) Schema

48. Attribute names in JOIN are prefixed by:
A) Column name
B) Relation name ✅
C) Database name
D) User name

49. JOIN condition compares attributes using:
A) =
B) <
C) >
D) All of these ✅

50. Equi-join uses which condition?
A) <
B) >
C) = ✅
D) ≠

51. JOIN A and B where A.W = B.X is an example of:
A) Cartesian product

B) Natural join
C) Conditional join ✅
D) Projection

52. JOIN helps when data is spread across:
A) One table
B) One tuple
C) Multiple relations ✅
D) One attribute

53. Department of employee can be found using:
A) SELECT only
B) PROJECT only
C) JOIN ✅
D) INSERT

54. JOIN ASSIGNMENT and JOB uses:
A) EmplId
B) JobId ✅
C) Dept
D) SkillCode

55. JOIN produces a:
A) Database
B) Schema
C) New relation ✅
D) Subschema

Cs101 final term preparation by Salar Sikander +92 314 0960590 & Anayat Ali Khan

---

Module 159: Object-Oriented Databases

56. Object-oriented database is based on:
A) Relational paradigm
B) File system
C) Object-oriented paradigm ✅
D) Network model

57. Object-oriented database stores data as:
A) Tables
B) Files
C) Objects ✅
D) Tuples

58. Employee, Job, Assignment are examples of:
A) Attributes
B) Objects
C) Classes ✅
D) Tuples

59. Objects are connected through:
A) Tables
B) Columns
C) Links ✅
D) Files

60. Links represent:
A) Attributes
B) Relationships ✅
C) Programs
D) Queries

61. Finding all jobs of an employee is done by:
A) SELECT
B) PROJECT
C) Following links ✅
D) JOIN

62. Object links are maintained by:
A) Programmer
B) Compiler
C) DBMS ✅
D) OS

63. Objects stored permanently are called:
A) Transient
B) Temporary
C) Persistent ✅
D) Volatile

64. Objects destroyed after program termination are:
A) Persistent
B) Stored
C) Transient ✅
D) Linked

65. Persistent objects are stored in:
A) RAM only
B) Cache
C) Database ✅
D) Register

Final MCQs

66. Object-oriented DBMS supports:
A) Tables only
B) Permanent storage of objects ✅
C) Files only
D) Spreadsheets

67. Linked list is an example of:
A) Table structure

B) Link structure ✅
C) File system
D) Schema

68. Object-oriented databases reduce:
A) Abstraction
B) Paradigm mismatch ✅
C) Security
D) Storage

69. Relational databases are based on:
A) Objects
B) Classes
C) Tables ✅
D) Links

70. Object-oriented approach allows:
A) Mixed paradigms
B) Same paradigm across system ✅
C) No abstraction
D) No DBMS

71. DBMS hides internal complexities using:
A) Redundancy
B) Abstraction ✅
C) Duplication
D) Encryption

72. Database schema describes:
A) User view
B) Logical structure ✅
C) Physical storage
D) Application logic

73. Subschema defines:
A) Entire database
B) User-specific view ✅
C) Physical layout
D) Network

74. Data independence is achieved by:
A) Tight coupling
B) Separation of layers ✅
C) Redundancy
D) File systems

75. A well-designed DBMS reduces:
A) Performance
B) Security
C) Application complexity ✅
D) Storage

76. SELECT + PROJECT + JOIN are examples of:
A) SQL commands

B) Relational operators ✅
C) Programming statements
D) OS calls

77. JOIN without condition results in:
A) Selection
B) Projection
C) Cartesian product ✅
D) Intersection

78. Attribute uniqueness is ensured by:
A) Prefixing ✅
B) Renaming
C) JOIN
D) SELECT

79. TermDate = '*' indicates:
A) New employee
B) Fired employee
C) Currently employed ✅
D) Retired employee

80. Which is NOT a relational operator?
A) SELECT
B) PROJECT
C) JOIN
D) COMPILE ✅

81. Redesigning relations solves:
A) Redundancy
B) Anomalies
C) Data loss
D) All of these ✅

82. Multiple job history should be stored in:
A) EMPLOYEE
B) JOB
C) ASSIGNMENT ✅
D) DEPT

83. Removing unnecessary repetition improves:
A) Storage
B) Efficiency
C) Integrity
D) All ✅

84. Object-oriented databases store relationships as:
A) Foreign keys
B) Links ✅
C) Tables
D) Files

85. Persistent objects survive after:
A) Compilation

B) Execution
C) Program termination ✅
D) Linking

86. DBMS enforces access control using:
A) Hardware
B) Schema and subschema ✅
C) Browser
D) Compiler

87. Relational model was introduced to simplify:
A) Programming
B) Storage
C) User view ✅
D) Networking

88. Each column in relation represents:
A) Entity
B) Tuple
C) Attribute ✅
D) Object

89. Poor design causes deletion anomaly due to:
A) Redundancy ✅
B) Security
C) Indexing
D) Encryption

90. JOB and ASSIGNMENT relations are connected by:
A) EmplId
B) Dept
C) JobId ✅
D) SkillCode

91. JOIN is necessary when data is:
A) In one table
B) In files
C) Distributed across relations ✅
D) In RAM

92. Object-oriented DBMS handles links:
A) Manually
B) Automatically ✅
C) Through user
D) Through compiler

93. Relational database uses:
A) Classes
B) Objects
C) Tables ✅
D) Trees

94. Assignment object connects:
A) Employee and Job ✅

B) Employee and Dept
C) Job and Skill
D) Employee and Salary

95. Data abstraction improves:
A) Complexity
B) Maintainability ✅
C) Redundancy
D) Errors

96. SELECT operation is based on:
A) Rows ✅
B) Columns
C) Tables
D) Databases

97. PROJECT operation is based on:
A) Rows
B) Columns ✅
C) Conditions
D) Links

98. JOIN operation merges based on:
A) Attributes
B) Conditions
C) Keys
D) All ✅

99. Object-oriented DBMS is best when data is:
A) Simple
B) Highly interrelated ✅
C) Flat
D) Numeric

100. CS101 database concepts emphasize:
A) Programming
B) Theory only
C) Abstraction and design ✅
D) Hardware

CS101 FINAL TERM PREPARATION BY SALAR SIKANDER & ANAYAT ALI KHAN

Module 161: Commit / Rollback Protocol

1. A transfer of funds between bank accounts is an example of:

A) File operation
B) Transaction
C) Backup
D) Indexing

✅ **Correct Answer:** B) Transaction

---

2. A transaction usually consists of:

A) One step
B) Two steps
C) Multiple steps
D) No steps

✅ **Correct Answer:** C) Multiple steps

---

3. During a transaction, the database may temporarily be:

A) Secure
B) Consistent
C) Inconsistent
D) Empty

✅ **Correct Answer:** C) Inconsistent

---

4. DBMS maintains a permanent record of transactions in a:

A) Table
B) File
C) Log
D) Cache

✅ **Correct Answer:** C) Log

---

5. Transaction actions are first recorded in:

A) Database
B) Main memory
C) Log
D) Index

✅ **Correct Answer:** C) Log

---

6. The point where all steps of a transaction are recorded is called:

A) Checkpoint
B) Commit point
C) Rollback point
D) Backup point

✅ **Correct Answer:** B) Commit point

---

7. After commit point, DBMS becomes:

A) Free
B) Inactive
C) Responsible for transaction
D) Locked

✅ **Correct Answer:** C) Responsible for transaction

---

8. Transactions completed after last backup can be recovered using:

A) Cache
B) Log
C) Index
D) Table

✅ **Correct Answer:** B) Log

---

9. Undoing a partially executed transaction is called:

A) Commit
B) Backup
C) Rollback
D) Lock

✅ **Correct Answer:** C) Rollback

---

10. Rollback is used when a transaction is:

A) Completed
B) Committed
C) Incomplete
D) Successful

✅ **Correct Answer:** C) Incomplete

---

11. Rollbacks may also occur due to: hum

A) Deadlock
B) Authorization failure
C) Errors
D) All of these

✅ **Correct Answer:** D) All of these

---

12. Rolling back one transaction may force others to rollback is called:

A) Deadlock
B) Clustering
C) Cascading rollback
D) Logging

✅ **Correct Answer:** C) Cascading rollback

Module 162: Locking

13. Incorrect summary problem occurs due to:

A) Sequential access
B) Concurrent transactions
C) Hashing
D) Indexing

✅ **Correct Answer:** B) Concurrent transactions

---

14. Lost update problem occurs when:

A) Two transactions update same data
B) File is deleted
C) Index is missing
D) Disk fails

✅ **Correct Answer:** A) Two transactions update same data

---

15. Executing transactions one-at-a-time causes:

A) Speed increase
B) Inefficiency
C) Deadlock
D) Accuracy

✅ **Correct Answer:** B) Inefficiency

---

16. Scheduler in DBMS is similar to:

A) Compiler
B) File manager

C) OS scheduler
D) Cache

✅ **Correct Answer:** C) OS scheduler

---

17. Locking protocol prevents:

A) Indexing
B) Errors
C) Anomalies
D) Backup

✅ **Correct Answer:** C) Anomalies

---

18. A marked data item is said to be:

A) Indexed
B) Locked
C) Hashed
D) Backed up

✅ **Correct Answer:** B) Locked

---

19. Shared lock allows:

A) Only one transaction
B) Multiple readers
C) Multiple writers
D) No access

✅ **Correct Answer:** B) Multiple readers

---

20. Exclusive lock allows:

A) Read only
B) Write only
C) Single transaction access
D) Multiple transactions

✅ **Correct Answer:** C) Single transaction access

---

21. A transaction altering data requires:

A) Shared lock
B) No lock
C) Exclusive lock
D) Temporary lock

✅ **Correct Answer:** C) Exclusive lock

---

22. Shared lock is denied if item has:

A) No lock
B) Shared lock
C) Exclusive lock
D) Index

✅ **Correct Answer:** C) Exclusive lock

---

23. Deadlock occurs when transactions:

A) Finish early
B) Wait for each other
C) Use shared locks
D) Commit

✅ **Correct Answer:** B) Wait for each other

---

24. Wound-wait protocol gives priority to:

A) Younger transactions
B) Random transactions
C) Older transactions
D) Failed transactions

✅ **Correct Answer:** C) Older transactions

---

25. In wound-wait, younger transaction is:

A) Allowed
B) Committed
C) Rolled back
D) Ignored

✅ **Correct Answer:** C) Rolled back

Module 163: Sequential Files

26. Sequential file is accessed:

A) Randomly
B) Backwards
C) Serially
D) Directly

✅ **Correct Answer:** C) Serially

---

27. Audio and video files are examples of:

A) Indexed files
B) Hash files
C) Sequential files
D) Object files

✅ **Correct Answer:** C) Sequential files

---

28. Text files usually store data using:

A) Binary
B) ASCII or Unicode
C) Hex
D) Octal

✅ **Correct Answer:** B) ASCII or Unicode

---

29. Logical record in a sequential file is:

A) Fixed-size block
B) Random data
C) Index
D) Bucket

✅ **Correct Answer:** A) Fixed-size block

---

30. End of sequential file is called:

A) EOF
B) BOF
C) EOR
D) EOL

✅ **Correct Answer:** A) EOF

31. A special record marking EOF is called:

A) Index
B) Sentinel
C) Bucket
D) Pointer

✅ **Correct Answer:** B) Sentinel

---

32. Payroll processing is an example of:

A) Indexed file use
B) Hashing
C) Sequential file processing
D) Locking

✅ **Correct Answer:** C) Sequential file processing

---

33. On magnetic disk, file order is maintained by:

A) User
B) DBMS
C) File manager
D) Cache

✅ **Correct Answer:** C) File manager

Module 164: Indexed Files

34. Indexed files are efficient for:

A) Sequential access
B) Random access
C) Backup
D) Logging

✅ **Correct Answer:** B) Random access

---

35. Index works like:

A) Dictionary
B) Table
C) Book index
D) Hash

✅ **Correct Answer:** C) Book index

---

36. Index contains:

A) Records
B) Keys and locations
C) Data only
D) Programs

✅ **Correct Answer:** B) Keys and locations

---

37. Index is usually stored as:

A) Same file
B) Separate file
C) Cache
D) Register

✅ **Correct Answer:** B) Separate file

---

38. Index is loaded into memory for:

A) Security
B) Speed
C) Backup
D) Storage

✅ **Correct Answer:** B) Speed

---

39. Employee record retrieval using ID is example of:

A) Sequential file
B) Indexed file
C) Hash file
D) Text file

✅ **Correct Answer:** B) Indexed file

---

40. Directory system in OS is an example of:

A) Hashing
B) Logging
C) Hierarchical index
D) Locking

✅ **Correct Answer:** C) Hierarchical index

Module 165: Hash Files

41. Hashing provides access using:

A) Index
B) Pointer
C) Key
D) Lock

✅ **Correct Answer:** C) Key

---

42. Storage sections in hashing are called:

A) Blocks
B) Records
C) Buckets
D) Tables

✅ **Correct Answer:** C) Buckets

---

43. Hash function converts key into:

A) Record
B) Address
C) Bucket number
D) Index

✅ **Correct Answer:** C) Bucket number

---

44. Hash file is stored in:

A) Main memory
B) Cache
C) Mass storage
D) Register

✅ **Correct Answer:** C) Mass storage

---

45. Hash table is stored in:

A) Disk
B) Cache
C) Main memory
D) ROM

✅ **Correct Answer:** C) Main memory

---

46. Major advantage of hashing is:

A) Simplicity
B) No index overhead
C) Sequential access
D) Backup

✅ **Correct Answer:** B) No index overhead

---

47. Uneven distribution of records is called:

A) Deadlock
B) Clustering
C) Rollback
D) Locking

✅ **Correct Answer:** B) Clustering

Module 166: Hash File Example

48. Hash example uses how many buckets?

A) 40
B) 41
C) 50
D) 32

✅ **Correct Answer:** B) 41

---

49. Employee ID is used as:

A) Record
B) Index
C) Key
D) Bucket

✅ **Correct Answer:** C) Key

---

50. Hash function used is based on:

A) Addition
B) Subtraction

C) Division remainder
D) Multiplication

✅ **Correct Answer:** C) Division remainder

---

51. Hashing distributes records to:

A) Tables
B) Files
C) Buckets
D) Directories

✅ **Correct Answer:** C) Buckets

---

52. To retrieve a record, first apply:

A) Lock
B) Index
C) Hash function
D) Rollback

✅ **Correct Answer:** C) Hash function

---

53. Searching within a bucket is usually:

A) Binary search
B) Linear search
C) Tree search
D) Index search

✅ **Correct Answer:** B) Linear search

---

54. Hashing is best when access is:

A) Sequential
B) Random
C) Ordered
D) Fixed

✅ **Correct Answer:** B) Random

---

55. Choosing prime number of buckets helps reduce:

A) Locking
B) Deadlock
C) Clustering
D) Rollback

✅ **Correct Answer:** C) Clustering

---

56. Hashing without index improves:

A) Storage size
B) Access speed
C) Security
D) Backup

✅ **Correct Answer:** B) Access speed

---

57. Hash file is mainly used for:

A) Sorted data
B) Random access
C) Sequential processing
D) Backup

✅ **Correct Answer:** B) Random access

---

58. Hashing avoids:

A) Logging
B) Locking
C) Index maintenance
D) Backup

✅ **Correct Answer:** C) Index maintenance

---

59. Hash bucket overflow occurs when:

A) Bucket is empty
B) Too many records hash to same bucket
C) Hash function fails
D) Disk crashes

✅ **Correct Answer:** B) Too many records hash to same bucket

---

60. Hashing technique converts:

A) Record to file
B) Key to location
C) File to table
D) Table to object

✅ **Correct Answer:** B) Key to location

61–100 (Rapid Revision MCQs)

61. Log is stored on nonvolatile storage → ✅ True
62. Commit ensures transaction permanence → ✅ True
63. Rollback undoes incomplete transactions → ✅ True
64. Shared locks allow reading only → ✅ True
65. Exclusive locks allow writing → ✅ True
66. Deadlock involves circular waiting → ✅ True
67. Sequential file is inefficient for random access → ✅ True
68. Indexed files improve search speed → ✅ True
69. Hashing uses bucket structure → ✅ True
70. Hash table is stored in memory → ✅ True
71. Cascading rollback is undesirable → ✅ True
72. Scheduler coordinates transactions → ✅ True
73. Sentinel marks file end → ✅ True
74. Index maps keys to records → ✅ True
75. Hash function should be uniform → ✅ True
76. Clustering reduces efficiency → ✅ True
77. Wound-wait prevents deadlock → ✅ True
78. Sequential access reads record-by-record → ✅ True
79. Indexed files need extra storage → ✅ True
80. Hash files avoid index overhead → ✅ True
81. Logging aids recovery → ✅ True
82. Lock removal occurs after use → ✅ True
83. Disk directories help maintain order → ✅ True
84. Hashing uses modulo operation → ✅ True
85. Random access favors hashing → ✅ True
86. Commit happens before database update → ✅ True
87. Rollback may affect other transactions → ✅ True
88. File manager maintains disk structure → ✅ True
89. Hash buckets hold multiple records → ✅ True
90. Index file stored separately → ✅ True
91. Deadlock reduces throughput → ✅ True
92. Hashing not suitable for range queries → ✅ True
93. Indexed files support sorted access → ✅ True
94. Sequential files are simplest → ✅ True
95. Locking ensures consistency → ✅ True
96. Log supports undo/redo → ✅ True
97. Hash collision occurs in same bucket → ✅ True
98. Commit makes transaction durable → ✅ True
99. Shared locks increase concurrency → ✅ True

100. Hash files support fast lookup → ✅ True

CS101 FINAL TERM PREPARATION BY SALAR SIKANDER & ANAYAT ALI KHAN

Module 168: Data Mining

1. Cluster analysis is used to discover:
A) Individual records
B) Groups or classes of data ✅
C) Errors in data
D) Sequential patterns

---

2. Cluster analysis differs from class description because it:
A) Describes known classes
B) Discovers new groupings ✅
C) Deletes data
D) Compresses data

---

3. Discovering properties of already known classes is called:
A) Association analysis
B) Class description ✅
C) Outlier detection
D) Sequential analysis

---

4. Association analysis focuses on:
A) Errors in data
B) Relationships between data groups ✅
C) Time-based data
D) Image processing

---

5. Buying chips with soda is an example of:
A) Cluster analysis
B) Association analysis ✅
C) Outlier analysis
D) Sequential mining

---

6. Outlier analysis is mainly used to:
A) Group customers
B) Find trends
C) Detect abnormal data ✅
D) Compress databases

7. Credit card fraud detection uses:
A) Cluster analysis
B) Association rules
C) Outlier analysis ✅
D) Data cubes

---

8. Sequential pattern analysis identifies:
A) Errors
B) Associations
C) Behavior over time ✅
D) Data redundancy

---

9. Economic market trends are discovered using:
A) Association analysis
B) Cluster analysis
C) Sequential pattern analysis ✅
D) Outlier detection

---

10. Data mining can be used to:
A) Only store data
B) Only delete data
C) Predict future behavior ✅
D) Replace databases

---

11. Data cubes allow data to be viewed:
A) Sequentially
B) From multiple perspectives ✅
C) Randomly
D) Linearly

---

12. Data mining and database technology are:
A) Unrelated
B) Opponents
C) Closely related ✅
D) Identical

Module 169: Social Impact of Databases

13. Automated library systems can track:
A) Book prices
B) Reading habits ✅
C) Internet speed
D) Software bugs

---

14. Retailers store records of:
A) Employees only
B) Customer purchases ✅
C) Computer viruses
D) Network logs

---

15. Search engines store records of:
A) Hardware use
B) User queries ✅
C) File systems
D) Compilers

---

16. Combining different databases can reveal:
A) Errors only
B) Hidden relationships ✅
C) Hardware faults
D) Viruses

---

17. Data collection is voluntary when:
A) Forced by law
B) Filled by choice (surveys) ✅
C) Mandatory forms
D) System errors

---

18. Recording credit card purchases is:
A) Direct data collection
B) Subtle data collection ✅
C) Illegal activity
D) Manual storage

---

19. Discount cards mainly help stores to:
A) Lose money
B) Reduce staff
C) Track customer purchases ✅
D) Increase theft

---

20. Value of data is increased by:
A) Manual records
B) Advanced database technology ✅
C) Paper files
D) Limited access

---

21. Privacy Act of 1974 aimed to:
A) Increase data selling
B) Protect citizens' data ✅
C) Promote hacking
D) Ban databases

---

22. Public opinion can stop database abuse because it affects:
A) Software speed
B) Storage size
C) Company profits ✅
D) Hardware cost

---

23. Privacy problems become severe when data is:
A) Accurate
B) Incorrect ✅
C) Small
D) Encrypted

---

24. Privacy loss is a side effect of:
A) Manual systems
B) Advancing technology ✅
C) Slow networks
D) Hardware failure

Module 170: Artificial Intelligence – Introduction

25. Artificial Intelligence aims to build:
A) Faster computers
B) Autonomous machines ✅
C) Databases
D) Networks

---

26. AI systems can operate:
A) Only with humans
B) Without human intervention ✅

C) Only offline
D) Only online

---

27. Robots shown in AI examples help in:
A) Programming
B) Medical assistance ✅
C) Accounting
D) Networking

---

28. Self-driving cars are an application of:
A) Databases
B) Operating systems
C) Artificial Intelligence ✅
D) Compilers

---

29. Medical robots can assist patients:
A) Once a day
B) Twice a day
C) Many times a day ✅
D) Never

Module 171: Intelligent Agents

30. An agent is a device that:
A) Stores data
B) Responds to stimuli ✅
C) Prints output
D) Deletes files

---

31. Sensors are used to:
A) Act
B) Receive data ✅
C) Store memory
D) Print results

---

32. Actuators are used to:
A) Sense environment
B) Affect environment ✅
C) Store data
D) Compile code

33. Intelligent behavior means:
A) Random actions
B) Rational responses ✅
C) Fixed output
D) Manual control

---

34. Reflex actions are:
A) Learned responses
B) Predefined responses ✅
C) Random decisions
D) Goal-based

---

35. Goal-directed behavior requires:
A) Random guessing
B) Planning actions ✅
C) Fixed rules only
D) Hardware upgrade

---

36. Learning “how” refers to:
A) Declarative knowledge
B) Procedural knowledge ✅
C) Static data
D) Memory loss

---

37. Learning “what” refers to:
A) Procedural learning
B) Declarative knowledge ✅
C) Random learning
D) Hardware sensing

---

38. Trial-and-error learning uses:
A) Compilation
B) Rewards and punishments ✅
C) Encryption
D) Backup

---

39. Understanding sensor input is called:
A) Acting
B) Perception ✅
C) Storage
D) Encoding

Module 172: AI Research Methodologies

40. AI research follows how many main paths?
A) One
B) Two ✅
C) Three
D) Four

---

41. Engineering track focuses on:
A) Theory only
B) Performance goals ✅
C) Human psychology
D) Philosophy

---

42. Theoretical track focuses on:
A) Products
B) Understanding intelligence ✅
C) Marketing
D) Hardware design

---

43. Simulation-oriented methodology emphasizes:
A) Output speed
B) Underlying process ✅
C) Profit
D) Memory size

---

44. Performance-oriented methodology emphasizes:
A) Theory
B) End results ✅
C) Ethics
D) Documentation

---

45. Linguistics mainly follows:
A) Engineering approach
B) Theoretical approach ✅
C) Hardware approach
D) Database approach

---

46. Natural language processing follows:
A) Simulation only
B) Engineering approach ✅
C) Manual approach
D) Ethical approach

---

47. Eight-puzzle problem is used to study:
A) Databases
B) Intelligent agents ✅
C) Networks
D) Graphics

---

48. Eight-puzzle contains how many tiles?
A) Seven
B) Eight ✅
C) Nine
D) Ten

---

49. Puzzle-solving agent must be able to:
A) Compile code
B) Perceive environment ✅
C) Store files
D) Print output

---

50. Camera in agent acts as:
A) Actuator
B) Sensor ✅
C) Compiler
D) Processor

---

51. Agent pushing tiles is an example of:
A) Sensing
B) Acting ✅
C) Learning
D) Storing

---

52. Speech generation relates to:
A) Sensors
B) Actuators ✅
C) Memory
D) Storage

---

53. Image understanding is part of:
A) Acting
B) Perception ✅
C) Compilation
D) Encryption

---

54. Combining multiple AI attributes leads to:
A) Simple agents
B) Intelligent agents ✅
C) Static systems
D) Manual machines

---

55. Rational agents aim to:
A) Randomly act
B) Maximize performance ✅
C) Minimize sensors
D) Avoid learning

---

56. AI agents improve over time by:
A) Restarting
B) Learning ✅
C) Deleting data
D) Formatting memory

---

57. Knowledge about environment helps agent to:
A) Ignore stimuli
B) Adjust actions ✅
C) Shut down
D) Freeze

---

58. Declarative knowledge stores:
A) Procedures
B) Facts ✅
C) Actions
D) Rewards

---

59. Procedural knowledge is learned by:
A) Reading
B) Practice ✅
C) Storage
D) Encryption

---

61. **Goal of AI research is to build agents that:**
A) Only store data
B) Only sense
C) Behave intelligently ✅
D) Only compute

Module 173 – Artificial Intelligence: The Turing Test

1. The Turing Test was proposed by:
A) John McCarthy
B) Joseph Weizenbaum
C) ✓ **Alan Turing**
D) Marvin Minsky

---

2. In which year was the Turing Test proposed?
A) 1945
B) ✓ **1950**
C) 1960
D) 1970

---

3. The main purpose of the Turing Test is to measure:
A) Processing speed
B) Memory capacity
C) ✓ **Machine intelligence**
D) Hardware efficiency

---

4. In the Turing Test, the human participant is called the:
A) Observer
B) Tester
C) ✓ **Interrogator**
D) Programmer

---

5. According to the Turing Test, a machine is intelligent if:
A) It gives correct answers
B) It works faster than humans
C) ✓ **It cannot be distinguished from a human**
D) It passes mathematical tests

---

6. How does the interrogator communicate with the test subject?
A) Voice communication
B) Video call
C) ✓ **Typewriter system (text-based)**
D) Physical interaction

7. Alan Turing predicted that by the year 2000 machines would have what chance of passing a five-minute test?
A) 10%
B) 20%
C) ✓ **30%**
D) 50%

---

8. Why is the Turing Test no longer considered a strong measure of intelligence?
A) It is too expensive
B) ✓ **Apparent intelligence can be easily simulated**
C) Machines always fail it
D) It requires special hardware

---

9. Which program demonstrated the ease of simulating intelligence?
A) Deep Blue
B) Watson
C) ✓ **DOCTOR (ELIZA)**
D) AlphaGo

---

10. The DOCTOR program was developed by:
A) Alan Turing
B) John McCarthy
C) ✓ **Joseph Weizenbaum**
D) Marvin Minsky

---

11. DOCTOR was designed to imitate which professional role?
A) Teacher
B) Doctor
C) ✓ **Rogerian psychotherapist**
D) Lawyer

---

12. Internally, the DOCTOR program mainly:
A) Analyzed emotions
B) Used artificial reasoning
C) ✓ **Rephrased user statements using rules**
D) Accessed a medical database

---

13. If DOCTOR failed to recognize sentence structure, it replied with phrases like:
A) “Try again”
B) “Incorrect input”

C) ✓ **“Go on” or “That’s very interesting”**
D) “System error”

---

14. The original goal of developing DOCTOR was to study:
A) Artificial reasoning
B) Machine learning
C) ✓ **Natural language communication**
D) Medical diagnosis

---

15. Some psychologists suggested using DOCTOR for:
A) Programming
B) Teaching
C) ✓ **Actual psychotherapy**
D) Game development

---

16. The strong illusion of understanding created by DOCTOR raised:
A) Hardware issues
B) Performance issues
C) ✓ **Ethical and technical issues**
D) Storage issues

---

17. Weizenbaum later became an advocate for:
A) Faster computing
B) Stronger AI
C) ✓ **Maintaining human dignity**
D) Fully automated therapy

---

18. Internet viruses may mimic intelligence to:
A) Improve security
B) Entertain users
C) ✓ **Trick humans into lowering defenses**
D) Teach programming

---

19. Chess-playing programs often give humans the impression of:
A) Random behavior
B) Hardware failure
C) ✓ **Creativity and personality**
D) Emotional intelligence

---

20. Toy robot dogs appear intelligent mainly because of:
A) Complex algorithms

B) Learning ability
C) ✓ **Physical movements like head tilting**
D) Voice recognition

Module 174 – Artificial Intelligence: Understanding Images

21. The first intelligent behavior required by the puzzle-solving machine is:
A) Moving tiles
B) Storing images
C) ✓ **Extracting information through vision**
D) Solving algorithms

---

22. The main challenge in image understanding is:
A) Taking photographs
B) Storing images
C) ✓ **Interpreting images meaningfully**
D) Displaying pixels

---

23. In the puzzle machine, images are encoded as:
A) Numbers
B) Characters
C) ✓ **Bits representing pixel brightness**
D) Sound waves

---

24. The template-matching approach works best when symbols have:
A) Random sizes
B) Different styles
C) ✓ **Uniform size, style, and orientation**
D) Multiple colors

---

25. Optical Character Readers mainly rely on:
A) Contextual guessing
B) Semantic rules
C) ✓ **Template matching**
D) Voice input

---

26. A major drawback of template matching is difficulty with:
A) Typed text
B) Printed text
C) ✓ **Handwritten characters**
D) Digital fonts

27. Feature-based character recognition focuses on:
A) Exact appearance
B) Pixel values
C) ✓ **Geometric characteristics**
D) Color depth

---

28. Recognizing a digit as a vertical line is an example of:
A) Template matching
B) Image storage
C) ✓ **Feature extraction**
D) Context analysis

---

29. Difficulty in distinguishing between ‘O’ and ‘C’ is due to:
A) Color difference
B) Lighting
C) ✓ **Minor image errors**
D) Resolution issues

---

30. General image understanding is difficult because objects may be:
A) Isolated
B) Clear
C) ✓ **Overlapping or partially hidden**
D) Uniform

---

31. Image understanding usually consists of how many steps?
A) One
B) ✓ **Two**
C) Three
D) Four

---

32. Identifying characteristics in an image is called:
A) Image analysis
B) Feature reasoning
C) ✓ **Image processing**
D) Context modeling

---

33. Determining the meaning of image components is known as:
A) Pixel encoding
B) Feature detection
C) ✓ **Image analysis**
D) Image smoothing

---

34. Edge enhancement attempts to:
A) Blur the image
B) Add colors
C) ✓ **Clarify boundaries**
D) Reduce resolution

---

35. Region finding identifies areas with common:
A) Shape only
B) Size only
C) ✓ **Brightness, color, or texture**
D) Distance

---

36. Smoothing is used to:
A) Increase noise
B) Add errors
C) ✓ **Remove image flaws**
D) Add texture

---

37. Excessive smoothing can result in:
A) Clearer images
B) Faster processing
C) ✓ **Loss of important information**
D) Better edges

Module 175 – Artificial Intelligence: Language Processing

38. Early AI researchers believed natural language understanding would be easy because of success in:
A) Image processing
B) Robotics
C) ✓ **Programming language translation**
D) Databases

---

39. Programming languages differ from natural languages because they:
A) Are ambiguous
B) Lack structure
C) ✓ **Have single meaning and structure**
D) Depend on context

---

40. Understanding natural language heavily depends on:
A) Syntax only
B) Grammar only
C) ✓ **Context and background knowledge**
D) Punctuation

---

41. Which sentence has multiple meanings due to context?
A) The sun rises
B) ✓ **Cinderella had a ball**
C) Water is wet
D) Birds fly

---

42. Parsing is mainly part of:
A) Semantic analysis
B) Contextual analysis
C) ✓ **Syntactic analysis**
D) Feature extraction

---

43. Identifying the agent and action in a sentence is done by:
A) Parsing
B) Syntax rules
C) ✓ **Semantic analysis**
D) Tokenization

---

44. Contextual analysis helps determine meaning in sentences like:
A) Mary runs
B) ✓ **The bat fell to the ground**
C) The sky is blue
D) Books are useful

---

45. Information retrieval mainly deals with:
A) Extracting meanings
B) Translating text
C) ✓ **Finding relevant documents**
D) Parsing sentences

---

46. XML is considered important for developing a:
A) Faster Web
B) Colorful Web
C) ✓ **Semantic Web**
D) Static Web

Module 176 – CS Impact: CS Impact on Society

47. One positive impact of Computer Science is:
A) Increased crime
B) Obesity
C) ✓ **Improved communication**
D) Social isolation

---

48. Access to education has increased mainly due to:
A) Television
B) Newspapers
C) ✓ **Internet**
D) Radio

---

49. Productivity has increased because computers:
A) Increase workload
B) Increase errors
C) ✓ **Reduce manual work**
D) Slow processes

---

50. A negative impact of CS related to health is:
A) Memory loss
B) Eye color change
C) ✓ **Obesity due to sitting**
D) Hearing loss

---

51. Exposure to inappropriate content occurs mainly through:
A) Books
B) Newspapers
C) ✓ **Internet**
D) Television

---

52. Hacking bank accounts is an example of:
A) Education misuse
B) Ethical use
C) ✓ **Cybercrime**
D) Automation

---

53. Over-dependence on technology has reduced:
A) Intelligence
B) Productivity

C) ✓ **Social interaction**
D) Internet speed

---

54. Faster response times are achieved using:
A) Postal mail
B) Fax
C) ✓ **Email and instant messaging**
D) Newspapers

---

55. Increased access to private information has led to:
A) Better security
B) More privacy
C) ✓ **Increased crime**
D) Ethical awareness

---

56. Computer Science has impacted society in how many major ways?
A) Only positive
B) Only negative
C) ✓ **Both positive and negative**
D) Neutral only

CS101 FINAL TERM PREPARATION BY SALAR SIKANDER & ANAYAT ALI KHAN

Module 177: CS Impact on Health

61. Online appointments are a
A) Negative impact
B) Positive impact ☑
C) Security issue
D) Privacy issue

---

62. Typing excessively can cause:
A) Eye disease
B) Computer wrists ☑
C) Radiation damage
D) Hearing loss

---

63. Looking at screens for long time mainly affects:
A) Bones
B) Eyesight ☑

C) Social life
D) Memory

---

64. Listening to loud music on computer can lead to:
A) Eyesight problems
B) Wrist pain
C) Hearing loss ✅
D) Posture issues

---

65. Using computers excessively can cause:
A) Better health
B) Social isolation ✅
C) Improved eyesight
D) Reduced hearing problems

---

66. Turning on airplane mode on mobile helps prevent:
A) Wrist pain
B) Posture issues
C) Eye diseases
D) Radiation damage ✅

---

67. Hospitals benefit from computer science by:
A) Increasing disease
B) Efficient management ✅
C) Radiation
D) Bone damage

---

68. Online health tips are a:
A) Risk factor
B) Positive impact ✅
C) Ethical issue
D) Security threat

---

69. Posture problems due to computer use can affect:
A) Hearing
B) Vision
C) Bones ✅
D) Speech

---

70. Receiving reports via email is:
A) Privacy violation

B) Positive impact ✅
C) Health hazard
D) Malicious activity

Module 178: CS Impact on Environment

71. Reading online instead of paper helps to:
A) Pollute more
B) Save trees ✅
C) Increase e-waste
D) Reduce energy

---

72. Computers are made from:
A) Wood and plastic
B) Heavy metals ✅
C) Organic materials
D) Glass only

---

73. E-waste burning releases:
A) Water
B) Oxygen
C) Hazardous smoke ✅
D) Safe gas

---

74. Energy usage increases because of:
A) Paperless work
B) Recycling
C) Computer use ✅
D) Tree planting

---

75. Americans use about how much paper per year?
A) 100 pounds
B) 680 pounds ✅
C) 1000 pounds
D) 50 pounds

---

76. E-waste sent to developing countries can cause:
A) Better jobs
B) Less pollution
C) Diseases ✅
D) Forest growth

---

77. Printing unnecessarily in offices is a:
A) Positive impact
B) Negative impact ✅
C) Security measure
D) Privacy concern

---

78. Online publishing reduces:
A) Pollution
B) Paper waste ✅
C) Internet speed
D) E-waste

---

79. Extracting metals from e-waste may cause:
A) Green energy
B) Health hazards ✅
C) Recycling profits
D) Reduced paper use

---

80. Computer science helps the environment by:
A) Burning trees
B) Increasing paper use
C) Reducing paper waste ✅
D) Increasing pollution

Module 179–181: Ethics, Licenses, IP

81. Privacy concerns in CS relate to:
A) Printing
B) Recycling
C) Personal data protection ✅
D) E-waste

---

82. COPPA gives control to:
A) Teachers
B) Government
C) Parents ✅
D) Schools

---

83. HIPPA ensures:
A) Employee privacy
B) Patient confidentiality ✅

C) Government data
D) Student records

---

84. Software licenses define:
A) Hardware limits
B) Usage rights and responsibilities ✅
C) Internet speed
D) Security levels

---

85. Open-source software allows:
A) No copying
B) Redistribution and modification ✅
C) Copyright violation
D) Patents

---

86. Copyright protects:
A) Inventions only
B) Literary, artistic, musical works ✅
C) Hardware
D) Database only

---

87. Patent duration is:
A) 10 years
B) 20 years ✅
C) 50 years
D) Unlimited

---

88. Trademark is protected for:
A) 10 years
B) 20 years
C) Unlimited (once registered) ✅
D) 25 years

---

89. Confidential information is:
A) Public knowledge
B) Secret knowledge ✅
C) Database only
D) Patent

---

90. Database rights last for:
A) 10 years

B) 20 years
C) 15 years ✅
D) Unlimited

Module 182–185: Security, Privacy, Social Issues, Filtering

91. Computer security ensures:
A) Fast internet
B) Protection from theft/damage ✅
C) Paperless office
D) Patent protection

---

92. Four main areas of computer security include:
A) Storage, CPU, GPU, RAM
B) LAN, WAN, Internet, Firewall
C) Confidentiality, Integrity, Availability, Authentication ✅
D) Software, Hardware, Network, Database

---

93. A firewall acts as a:
A) Antivirus
B) Database
C) Security guard between LAN and Internet ✅
D) Printer

---

94. Privacy is the right to:
A) Share data
B) Be let alone ✅
C) Hack others
D) Publish emails

---

95. Data sources for privacy concerns include:
A) Solar panels
B) Paper
C) Social sites, mobile networks, emails ✅
D) Hardware

---

96. EPIC focuses on:
A) Video games
B) Emerging privacy and human rights issues ✅
C) Patents
D) Database optimization

97. Social issues of IT include:
A) Faster computing
B) Cyberbullying, gaming addiction, defamation ✅
C) Hardware upgrades
D) Encryption

---

98. Identity theft happens via:
A) Paper mail
B) Personal meetings
C) Online data ✅
D) Forest data

---

99. Plagiarism is a concern because:
A) Internet is slow
B) Hardware issues
C) Students copy-paste online info ✅
D) E-waste

---

100. Content filtering mainly prevents:
A) Hardware damage
B) Access to harmful/executable content ✅
C) Paper waste
D) Patent infringement

Module 187: Word Processing – MS Word

1. Which of the following is an example of word processing software?
   A) Excel
   B) PowerPoint
   C) ✔ **MS Word**
   D) Paint
2. The colorful icon in the top left-hand corner of MS Word is called:
   A) Quick Access Toolbar
   B) Ribbon
   C) ✔ **Office Button**
   D) Font Panel
3. Clicking the Office Button opens:
   A) Only recent documents
   B) ✔ **A menu with commonly used commands and recent documents**
   C) The Ribbon only
   D) Mini Toolbar
4. The Ribbon in MS Word is divided into:
   A) Groups, Buttons, Panels

B) Tabs, Windows, Commands
C) ✔ **Tabs, Groups, and Commands**
D) Tabs, Commands, Menu

5. Dialog Expanders or Launchers in MS Word:
   A) Are always hidden
   B) Open Quick Access Toolbar
   C) ✔ **Open a Dialog box or Task pane with additional options**
   D) Maximize window
6. The main purpose of the Ribbon system is:
   A) Reduce computer speed
   B) Make commands colorful
   C) ✔ **Reduce mouse clicks to execute commands**
   D) Replace keyboard shortcuts
7. Simple buttons on the Ribbon:
   A) Open a menu
   B) Always remain orange
   C) ✔ **Work as toggles or on/off switches**
   D) Open another software
8. When a simple button is active, it appears:
   A) Blue
   B) ✔ **Orange**
   C) Gray
   D) Green
9. Drop-down menu buttons are indicated by:
   A) Circle on button
   B) ✔ **Down arrow on the right side**
   C) Ribbon color
   D) Highlighted text
10. If a command has both a simple button and a drop-down arrow, clicking the left button:
    A) Opens all options
    B) ✔ **Uses default value for the command**
    C) Cancels command
    D) Opens Quick Access Toolbar
11. The default value in a combination command:
    A) Always bold
    B) ✔ **Last used value of the command**
    C) First value in list
    D) Italic only
12. Example of a combination command in MS Word is:
    A) Copy
    B) Paste
    C) ✔ **Underline**
    D) Undo
13. Mini Toolbar appears:
    A) When Ribbon is clicked
    B) ✔ **When text is selected**
    C) Only in Excel
    D) Always on screen
14. Mini Toolbar contains:
    A) Only file commands
    B) ✔ **Common text formatting commands**
    C) Only print options
    D) Ribbon tabs

15. To use the Mini Toolbar:
    A) Type text and press Enter
    B) ✔ **Select text and click desired command on toolbar**
    C) Click Office Button
    D) Right-click Ribbon
16. To close the Mini Toolbar:
    A) Click text
    B) ✔ **Click anywhere outside the Mini Toolbar**
    C) Press Ctrl+C
    D) Press Alt+F4

Module 188: Quick Access Toolbar (QAT)

17. Quick Access Toolbar provides:
    A) Access to Ribbon tabs
    B) Only Font commands
    C) ✔ **Easy access to frequently used commands**
    D) Printing only
18. Default commands on the Quick Access Toolbar include:
    A) Bold, Italic
    B) Paste, Cut
    C) ✔ **Save, Undo, Redo/Repeat, Quick Print**
    D) New Document only
19. To reverse a command in QAT, you use:
    A) Ctrl+C
    B) ✔ **Undo button**
    C) Save button
    D) Print button
20. To reapply a reversed command, you use:
    A) Undo
    B) ✔ **Redo**
    C) Office Button
    D) Mini Toolbar
21. Keyboard shortcut for Undo is:
    A) Ctrl+y
    B) Ctrl+b
    C) ✔ **Ctrl+z**
    D) Ctrl+u
22. Keyboard shortcut for Redo is:
    A) Ctrl+z
    B) Ctrl+b
    C) Ctrl+u
    D) ✔ **Ctrl+y**
23. Using the QAT, you can undo multiple actions at once by:
    A) Clicking Office Button
    B) ✔ **Clicking down arrow next to Undo and selecting actions**
    C) Selecting text
    D) Pressing Ctrl+Alt+Del

Module 189: Home Ribbon

24. The Home Ribbon contains:
    A) Only File options
    B) ✔ **Clipboard, Font, Paragraph, Styles, and Editing groups**
    C) Quick Print only
    D) Office Button
25. The Home Ribbon is considered:
    A) Least used ribbon
    B) ✔ **Most important ribbon for Word formatting**
    C) Only for tables
    D) Only for headers
26. Which of the following is NOT a group in the Home Ribbon?
    A) Clipboard
    B) ✔ **References**
    C) Font
    D) Styles

Module 190: Clipboard Group

27. Clipboard group contains:
    A) Save, Undo, Redo
    B) ✔ **Cut, Copy, Paste, Format Painter**
    C) Bold, Italic, Underline
    D) Print only
28. Cut command:
    A) Deletes text permanently
    B) Copies text only
    C) ✔ **Removes text and stores it on Clipboard**
    D) Pastes text
29. Paste command:
    A) Copies selected text
    B) ✔ **Inserts text from Clipboard to document**
    C) Deletes text
    D) Formats text
30. Format Painter is used to:
    A) ✔ **Copy formatting from one text to another**
    B) Paint images
    C) Undo commands
    D) Save document
31. To cut text using Ribbon:
    A) Select text → Right-click
    B) ✔ **Select text → Home tab → Cut button in Clipboard group**
    C) Press Ctrl+C
    D) Click Office Button
32. The Office Clipboard stores:
    A) Only last copied item
    B) ✔ **Multiple items cut or copied**
    C) Only images
    D) Only text

Module 191: Font Group

33. The Font group in MS Word allows you to:
    A) Change document margins
    B) ✔ **Change font style, size, and effects**
    C) Insert tables
    D) Open the Office Button
34. Which of the following is NOT part of the Font group?
    A) Bold
    B) Italic
    C) ✔ **Page Layout**
    D) Underline
35. To make text bold using the Ribbon:
    A) Press Ctrl+U
    B) ✔ **Click Bold button or press Ctrl+B**
    C) Press Ctrl+I
    D) Click Font color
36. The Font dialog box can be accessed by:
    A) Right-clicking Ribbon
    B) ✔ **Clicking the Dialog Launcher (small arrow) in the Font group**
    C) Clicking Office Button
    D) Selecting Mini Toolbar
37. Changing the case of text is done via:
    A) Font Color
    B) Bold button
    C) ✔ **Change Case drop-down in Font group**
    D) Format Painter

Module 192: Paragraph Group

38. The Paragraph group in MS Word allows you to:
    A) Change text color
    B) ✔ **Align text, set indentation, and line spacing**
    C) Cut and Paste text
    D) Open Office Button
39. To align text center using the Ribbon:
    A) Press Ctrl+R
    B) ✔ **Click Center alignment button in Paragraph group**
    C) Press Ctrl+C
    D) Use Mini Toolbar
40. Line spacing in Word can be set from:
    A) Font group
    B) Clipboard
    C) ✔ **Paragraph group**
    D) Styles group
41. Indentation in paragraphs can be controlled by:
    A) Font color
    B) Bold
    C) ✔ **Paragraph group → Increase/Decrease Indent**
    D) Mini Toolbar
42. Bullets and numbering are part of which group?
    A) Clipboard

B) Font
C) ✔ **Paragraph**
D) Editing

Module 193: Styles Group

43. Styles group in Word is used to:
    A) Apply pre-defined formatting to text
    B) ✔ **Apply pre-defined formatting to text**
    C) Only change font size
    D) Paste text
44. Which of the following is NOT a style type?
    A) Heading 1
    B) Normal
    C) ✔ **Page Layout**
    D) Title
45. Quick Styles gallery is part of which Ribbon group?
    A) Clipboard
    B) Font
    C) ✔ **Styles**
    D) Paragraph
46. To modify a style, you:
    A) Click Font Color
    B) ✔ **Right-click the style and select Modify**
    C) Press Ctrl+B
    D) Select Mini Toolbar
47. Using Styles improves:
    A) Only text color
    B) Only font size
    C) ✔ **Document consistency and formatting efficiency**
    D) Printing speed

Module 194: Editing Group

48. The Editing group includes commands for:
    A) Changing fonts
    B) ✔ **Find, Replace, Select**
    C) Paragraph spacing
    D) Styles
49. Shortcut for Find command is:
    A) Ctrl+R
    B) Ctrl+H
    C) ✔ **Ctrl+F**
    D) Ctrl+P
50. To replace text in Word:
    A) Use Find only
    B) ✔ **Use Replace command in Editing group**
    C) Click Bold
    D) Press Ctrl+B

51. Select All command can be executed by:
    A) Ctrl+R
    B) Ctrl+S
    C) ✔ **Ctrl+A**
    D) Ctrl+P
52. Editing group commands help to:
    A) Paste images
    B) ✔ **Search, replace, and select content efficiently**
    C) Change text color
    D) Add headers

Module 195: Insert Tab – Tables

53. To insert a table in Word:
    A) Home → Styles
    B) ✔ **Insert → Table**
    C) Page Layout → Table
    D) Font → Table
54. Quick table insertion allows you to:
    A) Insert only 2x2 tables
    B) ✔ **Insert tables with pre-defined rows and columns**
    C) Change font
    D) Add images
55. Shortcut for inserting a table in Word is:
    A) Ctrl+T
    B) ✔ **Alt+N, T**
    C) Ctrl+I
    D) Ctrl+U
56. To adjust column width, you use:
    A) Font group
    B) ✔ **Table Tools → Layout → Cell Size**
    C) Paragraph group
    D) Styles group
57. Table borders can be modified from:
    A) Home → Font
    B) ✔ **Table Tools → Design → Borders**
    C) Paragraph group
    D) Quick Access Toolbar

Module 196: Insert Tab – Pictures and Shapes

58. To insert a picture from your computer:
    A) Home → Font
    B) ✔ **Insert → Pictures → Select file**
    C) Page Layout → Pictures
    D) Font → Shapes
59. To insert shapes like arrows and circles:
    A) Home → Paragraph
    B) ✔ **Insert → Shapes**

C) Font → Styles
D) Table → Insert Shape

60. To format a picture after insertion, you use:
A) Font group
B) ✔ **Picture Tools → Format**
C) Styles group
D) Editing group

61. Clip Art in Word 2007 is accessed via:
A) Font group
B) ✔ **Insert → Clip Art**
C) Paragraph group
D) Table group

62. The purpose of shapes in Word is:
A) Only decorate tables
B) ✔ **Illustrate concepts, diagrams, and visual effects**
C) Only print logos
D) Change font style

Module 197: Page Layout Tab

63. Page Layout tab allows you to:
A) Insert tables
B) ✔ **Set margins, orientation, size, columns**
C) Change font color
D) Format pictures

64. To change page orientation to Landscape:
A) Home → Paragraph
B) ✔ **Page Layout → Orientation → Landscape**
C) Font → Style
D) Insert → Page

65. Margins can be adjusted using:
A) Font group
B) ✔ **Page Layout → Margins**
C) Styles group
D) Paragraph group

66. Columns in Word are applied using:
A) Font group
B) ✔ **Page Layout → Columns**
C) Insert → Table
D) Styles group

67. Page Size is set from:
A) Home → Font
B) ✔ **Page Layout → Size**
C) Insert → Page
D) Paragraph → Spacing

Module 198: References Tab

68. To add a table of contents:
A) Home → Style

B) ✔ **References → Table of Contents**
C) Insert → Page
D) Font → Paragraph

69. Footnotes in Word are added via:
A) Home → Paragraph
B) ✔ **References → Insert Footnote**
C) Insert → Shapes
D) Page Layout → Margins

70. Endnotes differ from footnotes because:
A) Appear at the top
B) ✔ **Appear at the end of the document**
C) Are always bold
D) Cannot be formatted

71. Citations and Bibliography are managed from:
A) Home → Font
B) ✔ **References → Citations & Bibliography**
C) Page Layout → Columns
D) Insert → Shapes

72. Captions for figures and tables are added via:
A) Home → Styles
B) ✔ **References → Insert Caption**
C) Page Layout → Margins
D) Insert → Picture

Module 199: Mailings Tab

73. To create labels and envelopes:
A) Home → Clipboard
B) ✔ **Mailings → Labels / Envelopes**
C) Insert → Table
D) Page Layout → Size

74. Mail merge is used for:
A) Formatting text
B) ✔ **Sending letters/emails to multiple recipients**
C) Adding page numbers
D) Adding pictures

75. To preview mail merge results:
A) Home → Styles
B) ✔ **Mailings → Preview Results**
C) References → Table of Contents
D) Insert → Shape

76. Merge fields in mail merge are inserted via:
A) Font group
B) ✔ **Mailings → Insert Merge Field**
C) Page Layout → Columns
D) Styles group

77. The purpose of Mailings tab is to:
A) Print document only
B) ✔ **Manage mass communication documents like letters, envelopes, labels**
C) Add footnotes
D) Format tables

Module 200: Review Tab

78. Spelling & Grammar check in Word is accessed via:
    A) Home → Font
    B) ✔ **Review → Spelling & Grammar**
    C) Insert → Table
    D) Page Layout → Margins
79. To track changes in a document:
    A) Home → Styles
    B) ✔ **Review → Track Changes**
    C) References → Table of Contents
    D) Insert → Shapes
80. Comments in Word are added via:
    A) Font group
    B) ✔ **Review → New Comment**
    C) Paragraph group
    D) Page Layout → Margins
81. Compare two documents to see differences using:
    A) Home → Clipboard
    B) ✔ **Review → Compare**
    C) References → Citations
    D) Insert → Table
82. Protecting a document for editing is done via:
    A) Home → Font
    B) ✔ **Review → Protect Document**
    C) Page Layout → Orientation
    D) Styles → Apply

Cs101 Final Term Preparation By Salar Sikander & Anayat Ali Khan

---

Module 201 – Word Processing: MS Word (Comments, Header & Footer)

83. Where is the header located?
A) Left margin
B) Right margin
✔ **C) Top margin**
D) Center of the page

---

84. Where is the footer printed?
A) Top margin
✔ **B) Bottom margin**
C) Left side
D) Right side

---

85. Where does the header and footer content appear?
A) Only on the first page
✔ **B) Throughout the document**
C) Only on the last page
D) On the selected page

---

86. Which tab is used to insert a header?
A) Home
✔ **B) Insert**
C) Design
D) Review

---

87. When does the header edit mode open?
A) While saving the file
✔ **B) By clicking on the header area**
C) Before printing
D) On page break

---

88. What can be added in a header or footer?
A) Text only
B) Numbers only
✔ **C) Both text and graphics**
D) Images only

---

89. Which option is used to close the header?
A) Save Header
✔ **B) Close Header & Footer**
C) Exit Word
D) Page Layout

---

90. Header and footer formatting is applied to:
A) Selected paragraph
B) Selected page
✔ **C) Entire document**
D) Title page only

Module 202 – Word Processing: MS Word (Text Group – Part I)

91. From where can a Text Box be inserted?
A) Home tab
✔ **B) Insert tab**

C) Design tab
D) Review tab

---

92. What is the main purpose of a Text Box?
A) Spell checking
✔ **B) Graphical formatting**
C) Page numbering
D) Table creation

---

93. Where is the Draw Text Box option located?
A) Shapes menu
✔ **B) Text Box menu**
C) Font menu
D) Paragraph menu

---

94. How do you draw a Text Box?
A) Double click
✔ **B) Click and drag**
C) Right click
D) Scroll

---

95. In which version was Quick Parts introduced?
A) Word 2003
✔ **B) Word 2007**
C) Word 2010
D) Word 2016

---

96. What is Quick Parts used for?
A) Formatting
✔ **B) Saving reusable text or graphics**
C) Spell checking
D) Printing

---

97. What does Microsoft call Quick Parts?
A) Templates
✔ **B) Building Blocks**
C) Styles
D) Themes

---

98. What is the first step to save a Quick Part?
A) Open Insert tab

✔ **B) Select the text**
C) Save the file
D) Open print preview

---

99. Which button is clicked to insert a Quick Part?
A) Styles
✔ **B) Quick Parts**
C) WordArt
D) Symbols

---

100. WordArt is used for:
A) Tables
B) Images
✔ **C) Special text effects**
D) Equations

Module 203 – Word Processing: MS Word (Text Group Part II & Symbols)

101. What is a Drop Cap?
A) A bold letter
✔ **B) A large letter at the beginning of a paragraph**
C) Italic text
D) Underlined text

---

102. Where are Drop Caps commonly used?
A) Emails
✔ **B) Newspapers and books**
C) Spreadsheets
D) Forms

---

103. Which tab is used to insert a Drop Cap?
A) Home
✔ **B) Insert**
C) Design
D) View

---

104. How many Drop Cap styles are available in MS Word?
A) One
✔ **B) Two**
C) Three
D) Four

105. The Drop Cap effect is applied to:
A) Word
✔ **B) Paragraph**
C) Page
D) Line

---

106. Where is the Symbols group located?
A) Home tab
✔ **B) Insert tab**
C) Review tab
D) Layout tab

---

107. The Equation button is used for:
A) Charts
✔ **B) Mathematical equations**
C) Images
D) Headers

---

108. Which tab appears after inserting an equation?
A) Home
✔ **B) Equation Tools – Design**
C) View
D) Review

Cs101 final term preparation by Salar Sikander +92 314 0960590 & Anayat Ali Khan

---

109. Can a user create a custom equation?
A) No
✔ **B) Yes**
C) Only default equations
D) Symbols only

---

110. Symbols are used for:
A) Formatting
✔ **B) Special characters and equations**
C) Page layout
D) Themes

Module 204 – Word Processing: MS Word (Design Ribbon & Page Background)

111. What does the Design Ribbon control?
A) Printing
✔ **B) Overall document design**
C) Spell checking
D) Mail merge

---

112. What is the name of the default theme?
A) Metro
✔ **B) Office**
C) Apex
D) Civic

---

113. What do themes change?
A) Text only
✔ **B) Colors, fonts, and effects**
C) Page numbers
D) Margins

---

114. What is the function of Style Set?
A) Resize images
✔ **B) Change font and paragraph appearance**
C) Insert tables
D) Edit headers

---

115. From where can paragraph spacing be changed?
A) Home tab
✔ **B) Design tab**
C) Insert tab
D) Review tab

---

116. What is included in the Page Background group?
A) Header
B) Footer
✔ **C) Watermark, Page Color, Page Borders**
D) Font

---

117. What is the purpose of a watermark?
A) Decoration only
✔ **B) To show confidentiality or status**

C) Spell checking
D) Printing

---

118. From where is a custom watermark added?
A) Insert tab
✔ **B) Bottom of the Watermark gallery**
C) Review tab
D) View tab

---

119. Is the Picture watermark option available?
A) No
✔ **B) Yes**
C) Text only
D) Shapes only

---

120. The Washout option is used to:
A) Darken the image
✔ **B) Make text readable**
C) Remove borders
D) Bold the font

Extra MCQs (Complete Coverage)

121. The Fonts option changes:
A) Colors
✔ **B) Fonts**
C) Effects
D) Margins

---

122. The Colors option affects:
A) Text size
✔ **B) Theme colors**
C) Page size
D) Orientation

---

123. The Effects option is related to:
A) Tables
✔ **B) Visual effects of the theme**
C) Header
D) Footer

124. What is the use of Set As Default?
A) For current document
✔ **B) For new documents**
C) For printing
D) For sharing

---

125. Page Color is found in which tab?
A) Insert
✔ **B) Design**
C) Home
D) Review

---

126. What is the name of the Page Borders dialog box?
A) Page Setup
✔ **B) Border and Shading**
C) Margins
D) Layout

---

127. Where are built-in themes listed?
A) Home tab
✔ **B) Themes drop-down**
C) View tab
D) Review tab

---

128. What does “Reset to Theme from Template” mean?
A) Delete the theme
✔ **B) Restore the original theme**
C) Save the theme
D) Import a theme

---

129. Text Watermarks are used for:
A) Images
✔ **B) Words like “Confidential”**
C) Tables
D) Charts

---

130. What is the main focus of the MS Word Design Ribbon?
A) Editing
B) Typing
✔ **C) Document appearance**
D) Printing

Modules 205–206 (Page Setup & Paragraph)

131. What is the Page Setup group used for?

A) Spell checking
B) ✔ **Setting page margins and layout**
C) Adding comments
D) Translation

---

132. In which ribbon can text be displayed in columns in MS Word?

A) Home
B) Insert
C) ✔ **Page Layout**
D) Review

---

133. What is the default text format in MS Word?

A) Two columns
B) Three columns
C) ✔ **One column**
D) Table

---

134. How is the Paragraph dialog box opened?

A) By clicking Paragraph name
B) ✔ **Using the Dialog Box Launcher**
C) From the Status bar
D) From the Ribbon tab

---

135. What is the function of the Indent Left textbox?

A) Right margin control
B) ✔ **Change left indentation**
C) Line spacing
D) Alignment

Module 207 (Arrange Group)

136. In which contextual tab is the Arrange group also available?

A) Picture Tools – Design
B) ✔ **Drawing Tools – Format**
C) Review
D) View

---

137. What is the Wrap Text option used for?

A) Rotating an image
B) ✔ **Controlling the interaction between image and text**
C) Deleting an image
D) Cropping an image

---

138. Which option brings an object to the top?

A) Send Backward
B) ✔ **Bring Forward → Bring to Front**
C) Align
D) Rotate

---

139. What is the purpose of the Selection Pane?

A) Zoom control
B) ✔ **Managing and selecting objects**
C) Spell check
D) Comments

---

140. Which option is used to combine multiple objects into one unit?

A) Align
B) Rotate
C) ✔ **Group**
D) Wrap Text

Module 208 (References Ribbon)

141. What is the main purpose of a Table of Contents (TOC)?

A) Grammar check
B) ✔ **Providing an overview of the document**
C) Translation
D) Comments

---

142. Where can built-in TOC styles be found?

A) Add Text
B) ✔ **Table of Contents gallery**
C) Footnotes
D) Review tab

---

143. Which option is used to include a heading in the TOC?

A) Update Table
B) ✔ **Add Text**
C) Insert Endnote
D) Caption

---

144. What is the shortcut key to insert a footnote?

A) Ctrl + D
B) ✔ **Alt + Ctrl + F**
C) Shift + F2
D) Ctrl + Shift + E

---

145. Where are endnotes always placed?

A) Page bottom
B) Section start
C) ✔ **At the end of the document**
D) Header

Module 209 (Proofing Group)

146. In which ribbon is the Proofing group located?

A) Home
B) Insert
C) ✔ **Review**
D) View

---

147. What is the function of the Thesaurus?

A) Translation
B) ✔ **Providing synonyms**
C) Word count
D) Comments

---

148. What does the Word Count dialog box show?

A) Font style
B) ✔ **Document statistics**
C) Revisions
D) Language

Module 210 (Language Group)

149. Which command is used to translate selected text?

A) Translate Document
B) ✔ **Translate Selected Text**
C) Mini Translator
D) Proofing

---

150. Which dialog box opens when using Set Proofing Language?

A) Page Setup
B) ✔ **Language dialog box**
C) Font
D) Review

Module 211 (Comments Group)

151. What is the shortcut key for adding a New Comment?

A) Ctrl + F2
B) Alt + F2
C) ✔ **Shift + F2**
D) Ctrl + Shift + F2

---

152. If a document has no comments, what is the status of the Previous and Next buttons?

A) Active
B) ✔ **Disabled**
C) Hidden
D) Deleted

Module 212 (Tracking & Changes)

153. What is the shortcut key for Track Changes?

A) Ctrl + E
B) ✔ **Ctrl + Shift + E**
C) Shift + F2
D) Ctrl + D

---

154. What is the purpose of the Reviewing Pane?

A) Spell check
B) ✔ **Displaying a summary of changes**
C) Translation
D) Zoom

---

155. What does Accept and Move to Next do?

A) Reject a change
B) ✔ **Accept a change and move to the next**
C) Protect the document
D) Compare documents

Module 213 (Compare & Protect)

156. What is the purpose of the Compare command?

A) Merge documents
B) ✔ **Compare two documents**
C) Printing
D) Translation

---

157. What is the Combine command used for?

A) Delete changes
B) ✔ **Combine revisions from multiple authors**
C) Protect document
D) Close review

---

158. What does Restrict Editing do?

A) Zoom control
B) ✔ **Restrict editing in the document**
C) Translation
D) Comments

Module 214 (View Ribbon)

159. What is the default document view in MS Word?

A) Draft
B) Web Layout
C) ✔ **Print Layout**
D) Read Mode

---

160. Which elements are not visible in Draft view?

A) Text
B) ✔ **Headers and Footers**
C) Paragraphs
D) Fonts

---

161. Which group in the View ribbon contains commands for different ways to view your document?

A) Show Group
B) Zoom Group
C) Windows Group
D) ✔ **Views Group**

---

162. What does Read Mode do in MS Word?

A) Displays the document as it would appear if printed
B) ✔ **Maximizes the window and removes toolbars for easy reading**
C) Displays the document in draft mode
D) Displays the document as a web page

---

163. Which view shows the document as it would appear if printed?

A) Read Mode
B) Draft
C) ✔ **Print Layout**
D) Outline

---

164. Which view is used to display the document as a web page?

A) Draft
B) ✔ **Web Layout**
C) Print Layout
D) Read Mode

---

165. Which view displays the document as an outline and shows the Outlining contextual tab?

A) Draft
B) Print Layout
C) ✔ **Outline**
D) Read Mode

---

166. What is not visible in Draft view?

A) Text
B) Paragraphs
C) ✔ **Headers and Footers**
D) Fonts

---

167. What does the Ruler command in the Show group do?

A) Displays the Navigation Pane
B) Toggles gridlines
C) ✔ **Toggles the display of ruler(s)**
D) Adjusts zoom level

---

168. What does the Navigation Pane command do?

A) Splits the window into two parts
B) ✔ **Toggles the display of the Find, Document Map, and Thumbnails**
C) Maximizes the document
D) Opens a new window

---

169. Which Zoom option adjusts the zoom to 100% of its normal size?

A) One Page
B) Page Width
C) Two Pages
D) ✔ **100%**

---

170. Which Zoom option adjusts the view so an entire page fits in the application window?

A) 100%
B) ✔ **One Page**
C) Two Pages
D) Page Width

---

171. Which Zoom option adjusts the view so two entire pages fit in the application window?

A) One Page
B) 100%
C) ✔ **Two Pages**
D) Page Width

---

172. Which Zoom option adjusts the view so the width of the page matches the width of the application window?

A) One Page
B) Two Pages
C) ✔ **Page Width**
D) 100%

---

173. What does the New Window command in the Windows group do?

A) Splits the current window
B) Arranges all windows
C) ✔ **Creates a new window of the active document**
D) Switches between documents

---

174. What is the function of the View Side by Side command?

A) Switches windows
B) Splits the window into two parts
C) ✔ **Displays two documents side by side for comparison**
D) Resets window position

---

175. When is Synchronous Scrolling enabled?

A) Always
B) When one document is open
C) ✔ **When two documents are displayed side by side**
D) When zoom is 100%

Module 215 (MS PowerPoint – Introduction)

176. What is Microsoft PowerPoint primarily used for?

A) Writing essays
B) ✔ **Developing presentations**
C) Database management
D) Spreadsheet calculations

---

177. How does PowerPoint help reduce speaking anxiety during presentations?

A) By replacing the speaker entirely
B) By automatically reading the slides
C) ✔ **By drawing attention to the screen instead of the speaker**
D) By controlling audience responses

---

178. Which of the following is true about PowerPoint?

A) It cannot be used for collaboration
B) It only works offline
C) ✔ **It is an easy-to-use and powerful presentation tool**
D) It replaces the need for speaking skills entirely

Module 216 (Slides Group on Home Ribbon)

179. What does the New Slide button do?

A) Deletes the current slide
B) ✔ **Inserts a new blank Title and Content slide**
C) Changes the slide design
D) Opens a new presentation

---

180. What types of slides can be inserted from the New Slide drop-down?

A) Only Title Slide
B) Only Content Slide
C) ✔ **Title Slide, Title and Content, Duplicate Slide, Slides from Outline, Reuse Slides**
D) Only Reuse Slides

---

181. What is the function of the Layout drop-down in the Slides group?

A) Deletes slides
B) Changes the theme of the presentation
C) ✔ **Changes the layout of the slide (e.g., Title Slide, Title and Content)**
D) Adds animations

---

182. What does the Reset button in the Slides group do?

A) Deletes the slide
B) Changes the slide theme
C) ✔ **Resets the position, size, and formatting of slide placeholders to default**
D) Inserts a new slide

---

183. What does the Delete button in the Slides group do?

A) Resets the slide layout
B) Changes the slide design
C) ✔ **Removes the currently selected slide(s)**
D) Duplicates the slide

Module 217 (Design Ribbon)

184. What is the primary purpose of the Design ribbon in PowerPoint?

A) Add animations
B) Add transitions
C) ✔ **Design and format slides**
D) Manage slides in outline mode

---

185. Which group in the Design ribbon allows you to choose a presentation theme?

A) Slides group
B) Layout group
C) ✔ **Themes group**
D) Transition group

---

186. What can you do after selecting a theme in the Design ribbon?

A) Only change text
B) ✔ **Try different themes and see the difference**
C) Only add animations
D) Only change slide order

---

187. Which options can you modify in the Design ribbon apart from Themes?

A) Slide size and background formatting
B) Only slide titles
C) Only transitions
D) Only animations

✔ **Correct Answer:** A

Module 218 (Transition Ribbon)

188. What is a slide transition in PowerPoint?

A) A way to add text
B) ✔ **A visual effect between slides**
C) A way to add a theme
D) A type of animation for objects

---

189. Which options are available when configuring a slide transition?

A) Sound, Duration, Apply to All, On Mouse Click
B) Only Sound
C) Only Duration
D) Only Apply to All

✔ **Correct Answer:** A

---

190. What does the Apply to All option do in the Transition ribbon?

A) Deletes all transitions
B) Applies a new theme to all slides
C) ✔ **Sets the transition effect to all slides in the presentation**
D) Splits the slides

Module 219 (MS PowerPoint – Animation Ribbon)

191. What is the difference between slide transitions and animations in PowerPoint?

A) There is no difference
B) ✔ **Transitions are effects between slides, animations are effects within a slide**
C) Transitions are for text only
D) Animations are only for themes

---

192. Which elements can be animated in a slide?

A) Only text
B) Only images
C) Only charts
D) ✔ **Text, images, shapes, graphs, or charts**

---

193. What is the main purpose of the Animation ribbon in PowerPoint?

A) Change slide layout
B) ✔ **Apply visual effects to objects within a slide**
C) Add headers and footers
D) Manage multiple slides

---

194. Animations within a slide can help:

A) Delete slide content
B) ✔ **Draw attention to specific content or make presentation dynamic**
C) Change slide size
D) Apply transitions to all slides

---

195. Which type of animation would you use to make a chart appear gradually on a slide?

A) Slide transition
B) ✔ **Entrance animation**
C) Exit animation
D) Motion path

Module 220 (MS Excel – Introduction & Cell Formatting)

196. What is a spreadsheet primarily used for?

A) Writing essays
B) ✔ **Organizing, storing, and manipulating data**
C) Making presentations
D) Managing emails

---

197. Which of the following is an example of an electronic spreadsheet application?

A) MS Word
B) ✔ **MS Excel**
C) PowerPoint
D) Notepad

---

198. What is the main benefit of using a spreadsheet program?

A) It automatically prints documents
B) It deletes old files
C) ✔ **Easily make changes, add, delete, format, and correct data**
D) It formats presentations

---

199. What is a spreadsheet grid made of?

A) Circles and lines
B) Shapes
C) ✔ **Columns and rows**
D) Slides and sections

---

200. How can row height be adjusted automatically in Excel?

A) Manually drag only
B) ✔ **Using AutoFit Row Height**
C) Using Zoom
D) Using a chart

---

201. What types of charts can Excel create?

A) Only column charts
B) Only line charts
C) ✔ **Column, Line, Pie, Bar, Area, Scatter, and more**
D) Only Pie charts

---

202. What is the first step in creating a chart in Excel?

A) Click Insert tab
B) ✔ **Select the cells containing the data to use in the chart**
C) Choose chart type directly
D) Adjust row height

---

203. After selecting data and chart type, what appears to show data visually?

A) A table
B) ✔ **A chart (e.g., bar chart)**
C) A text box
D) A slide

---

204. What does the Y-axis in a chart represent?

A) Categories
B) ✔ **Values or data amounts**
C) Slide numbers
D) Column names

---

205. How many components does a typical chart in Excel have?

A) One
B) ✔ **Four components (axes, bars, labels, legend)**
C) Two
D) Six

Module 221 (MS Excel – Functions)

206. What does a formula in Excel do?

A) Stores data only
B) ✔ **Performs calculations using a set of mathematical instructions**
C) Creates charts
D) Formats text

---

207. How does a formula in Excel start?

A) With a $ sign
B) With a # sign
C) ✔ **With an = sign**
D) With a % sign

---

208. What is a function in Excel?

A) A type of chart
B) ✔ **A built-in formula with a name and arguments**
C) A table
D) A text box

---

209. Which of the following is the correct use of the SUM function?

A) Finds the average of numbers
B) ✔ **Adds all the cells in the argument**
C) Counts the text entries
D) Finds the maximum value

---

210. What does the AVERAGE function do in Excel?

A) Adds all numbers
B) ✔ **Calculates the average of the cells in the argument**
C) Finds minimum value
D) Counts all cells

---

211. Which function finds the minimum value in a range?

A) Sum
B) Average
C) ✔ **Min**
D) Max

---

212. Which function counts the number of cells containing numerical values?

A) CountA
B) Max
C) ✔ **Count**
D) Min

---

213. How do you apply a function in a cell?

A) Type text only
B) ✔ **Click the cell → Insert Function → Choose function → Click OK**
C) Copy data only
D) Format the cell

Module 222–223 (Excel Application Scenarios)

214. Which scenario is used to practice Excel formulas in Modules 222–223?

A) Employee attendance
B) ✔ **Personal expense management**
C) School timetable
D) Presentation slides

---

215. How is the total expense for a month calculated in Excel?

A) By manually adding each value
B) ✔ **By using the SUM function on the selected cells**
C) By creating a chart
D) By formatting cells

---

216. In the student marks scenario, what is the purpose of the formula applied?

A) Find average marks
B) Format the cells
C) ✔ **Calculate total marks for each student**
D) Sort the data

Module 224 (Sorting & Filter)

217. What is the purpose of Sorting in Excel?

A) ✔ **Organize data in ascending or descending order**
B) Format the cells
C) Add charts
D) Apply animations

---

218. What are the two types of sorts in Excel?

A) Basic Sort and Conditional Sort
B) Filter Sort and Custom Sort
C) ✔ **Basic Sort and Custom Sort**
D) Manual Sort and Automatic Sort

---

219. How do you perform a basic ascending sort?

A) Click Insert → Chart
B) Click Format → Sort
C) ✔ **Highlight cells → Home → Sort & Filter → Sort Ascending (A-Z)**
D) Use formula =SORT

---

220. How is a custom sort executed in Excel?

A) Sort one column only
B) Apply formulas

C) ✔ **Sort by first column → Add Level → Sort by next column → Click OK**
D) Copy data to a new sheet

Module 225 (MS Access – Introduction)

221. What is a database in MS Access?

A) A type of spreadsheet
B) ✔ **A collection of files organized as tables containing fields and records**
C) A presentation tool
D) A chart

---

222. What does SQL stand for?

A) Standard Query List
B) ✔ **Structured Query Language**
C) System Quick Link
D) Sequential Query Logic

---

223. What is the main purpose of SQL?

A) Formatting tables
B) Creating charts
C) ✔ **Accessing and retrieving data from a database**
D) Printing data

---

224. In the office analogy, what represents the database?

A) The cleric
B) ✔ **The filing cabinet where information is stored**
C) The office desk
D) The printer

---

225. In the office analogy, what represents the DBMS?

A) The filing cabinet
B) The documents
C) ✔ **The office cleric who organizes and retrieves files**
D) The office manager

---

226. Which new tabs are added in MS Access compared to MS Word/Excel?

A) Home, Insert, View
B) ✔ **Create, External Data, Database Tools**
C) Format, Review, Data
D) Slides, Themes, Transitions

---

227. What is the function of the Navigation Pane in MS Access?

A) Shows only charts
B) ✔ **Displays all saved tables, forms, queries, and reports**
C) Opens Excel
D) Displays macros only

---

228. What is displayed on the right side of the Navigation Pane?

A) Zoom tools
B) ✔ **Working/view panel to see table data, query output, reports, and forms**
C) Ribbon menu
D) Slide sorter

---

229. What is the purpose of the External Data tab in MS Access?

A) Create new tables
B) ✔ **Import, export, collect, and share data between different databases**
C) Apply formulas
D) Design charts

Module 226 (MS Access – Creating and Managing Tables)

230. What does the Create Tab in MS Access allow you to do?

A) Print reports
B) ✔ **Quickly create tables, forms, reports, and queries**
C) Edit charts
D) Sort data

---

231. In MS Access, what is a column in a table called?

A) Record
B) ✔ **Field**
C) Row
D) Sheet

---

232. In MS Access, what is a row in a table called?

A) Column
B) Cell
C) ✔ **Record**
D) Field

---

233. How do you create a new table in MS Access?

A) File → Save
B) Insert → Chart
C) ✔ **Create tab → Table in Tables group**
D) View → Zoom

---

234. What is the purpose of Design View in a table?

A) Apply formulas
B) ✔ **Add fields, set data types, and define table structure**
C) Print the table
D) Sort data

---

235. How can you save changes after modifying a table in Design View?

A) Automatically saves
B) Press Ctrl + Z
C) ✔ **Click the Save button or select Yes in the popup dialog box**
D) Delete the table

Module 227 (MS Access – Creating Forms)

236. What is the main purpose of forms in MS Access?

A) Create charts
B) ✔ **Enter new records and navigate existing records easily**
C) Apply formulas
D) Sort data

---

237. How do you create a new form for a table?

A) Home → Sort & Filter
B) ✔ **Create tab → Forms group → Form**
C) Insert → Chart
D) Design → Table

---

238. How do you save a newly created form?

A) Automatically saves
B) File → Save As
C) ✔ **Ctrl + S or right-click form tab → Save**
D) Click outside the form

---

239. After saving a form, where can it be found?

A) Ribbon
B) ✔ **Navigation Pane**
C) Status bar
D) Report tab

---

240. What is the correct name for saving the form for the Student table?

A) StudentData
B) ✔ **studentForm**
C) Form1
D) ReportForm

Module 228 (MS Access – Creating Reports)

241. What is the main purpose of reports in MS Access?

A) Enter data
B) ✔ **Organize and summarize data for printing or analysis**
C) Create queries
D) Format cells

---

242. How do you create a report for a table?

A) Home → Sort & Filter
B) ✔ **Create tab → Reports group → Report**
C) Insert → Chart
D) Design → Form

---

243. How do you save a newly created report?

A) Automatically saved
B) File → Export

C) ✔ **Ctrl + S or right-click report tab → Save**
D) Click outside the report

---

244. After saving a report, where can it be accessed?

A) Ribbon
B) ✔ **Navigation Pane**
C) Status bar
D) Table view

---

245. What is the correct name for saving the report for the Student table?

A) StudentForm
B) ✔ **studentReport**
C) Report1
D) StudentData

Module 229 (MS Access – Query Wizard)

246. What is the main purpose of queries in MS Access?

A) Format tables
B) ✔ **Retrieve or fetch specific data from the database**
C) Print forms
D) Create charts

---

247. Which tab contains the Query Wizard?

A) Home
B) Insert
C) ✔ **Create → Query group → Query Wizard**
D) Design → Report

---

248. Which type of query is used to retrieve selected data?

A) Insert
B) Update
C) Delete
D) ✔ **Select**

---

249. What is the SQL syntax to select all fields from a table?

A) SELECT field1 FROM table_name;
B) ✔ **SELECT * FROM table_name;**
C) INSERT INTO table_name VALUES;
D) UPDATE table_name SET field1=value;

---

250. How do you create a query to show students in 3rd semester using Query Design?

A) Apply Sort A-Z
B) ✔ **Add WHERE clause with criteria "3rd semester"**
C) Delete other records
D) Use Form view

Module 230: Web Page Development (Notepad Editor)

251. What is a web page?

A) A spreadsheet file
B) ✔ **A file with .html or .htm extension displayed by a web browser**
C) A Word document
D) A PowerPoint slide

---

252. Which language is used to create web pages?

A) Python
B) Java
C) ✔ **HTML (HyperText Markup Language)**
D) C++

---

253. What is the role of a web browser?

A) Write code for HTML
B) ✔ **Interpret HTML documents and display them as web pages**
C) Store database files
D) Create spreadsheets

---

254. HTML files are displayed in a browser without showing:

A) Images
B) ✔ **HTML tags**
C) Paragraphs
D) Links

---

255. What do HTML elements form?

A) Database tables
B) ✔ **Building blocks of all websites**
C) PowerPoint slides
D) Excel charts

---

256. What is a block-level element in HTML?

A) Displayed inline with text
B) ✔ **Starts on a new line and content appears on the next line**
C) Only used for links
D) Only used for images

---

257. Which of the following is a block-level HTML element?

A) `<b>`
B) `<a>`
C) ✔ **`<h1>`**
D) `<img>`

---

258. What is an inline HTML element?

A) Always on a new line
B) ✔ **Displayed on the same line without starting a new line**
C) Cannot have attributes
D) Cannot display text

---

259. Which of the following is an inline HTML element?

A) `<p>`
B) `<ul>`
C) `<h1>`
D) ✔ **`<b>`**

---

260. What is the purpose of the `<html>` tag?

A) Display heading
B) ✔ **Marks the start and end of the web page**
C) Insert image
D) Add paragraph

---

261. What is the purpose of the `<body>` tag?

A) Add styles
B) ✔ **Contains the visible content of the web page**
C) Create database
D) Define links

---

262. Which tag is used for the first heading in HTML?

A) `<p>`
B) `<title>`
C) ✔ **`<h1>`**
D) `<body>`

---

263. Which tag is used for a paragraph in HTML?

A) `<div>`
B) `<h2>`
C) ✔ **`<p>`**
D) `<ul>`

---

264. How are multiple HTML elements nested?

A) Cannot nest elements
B) Only inline elements can nest
C) ✔ **Elements can contain multiple elements before their end tag**
D) Only block elements can nest

---

265. What is an HTML attribute?

A) A paragraph
B) ✔ **Additional information about an element placed in the start tag**
C) A heading
D) A new tag

---

266. Example of an HTML attribute in an image tag is:

A) `<img>`
B) ✔ **`<img src="VU logo.jpg" width="100" height="150">`**
C) `<p>`
D) `<h1>`

---

267. What does the `src` attribute in `<img>` tag define?

A) Image width
B) ✔ **Path of the image to be displayed**
C) Font size
D) Table width

---

268. What do width and height attributes in `<img>` tag control?

A) Text size
B) ✔ **Size of the image displayed**
C) Paragraph spacing
D) Table column width

---

269. Which elements are displayed inline by default?

A) `<h1>`, `<p>`
B) `<ul>`, `<table>`
C) ✔ **`<b>`, `<a>`, `<img>`**
D) `<div>`, `<p>`

---

270. What is the file extension of HTML files?

A) .docx
B) ✔ **.html or .htm**
C) .pptx
D) .xls

---

271. What is the main advantage of using HTML?

A) Create Excel charts
B) ✔ **Structure content for web pages with headings, paragraphs, and links**
C) Add slides
D) Organize database

---

272. Can HTML embed scripts like JavaScript?

A) No
B) Only CSS
C) Only XML
D) ✔ **Yes, to affect behavior of web pages**

---

273. What is the difference between a block and inline element?

A) Block elements have no content
B) Inline elements always create new line
C) ✔ **Block starts on new line; inline stays on same line**
D) There is no difference

---

274. Which of these is a block element?

A) `<b>`
B) `<i>`
C) ✔ **`<ul>`**
D) `<a>`

---

275. Which of these is an inline element?

A) `<h1>`
B) `<p>`
C) ✔ **`<a>`**
D) `<ul>`

---

276. What is the main purpose of HTML tags?

A) Store data
B) ✔ **Define the structure and content of a web page**
C) Execute programs
D) Create reports

---

277. Which of the following tags is self-closing?

A) `<p>`
B) `<h1>`
C) `<body>`
D) ✔ **`<img>`**

---

278. Can an HTML element have multiple attributes?

A) No
B) Only one attribute
C) Only for headings
D) ✔ **Yes, multiple attributes can be added in start tag**

---

279. Which HTML tag encloses the entire content of the page?

A) `<body>`
B) `<head>`
C) `<p>`
D) ✔ **`<html>`**

---

280. Which tag defines the visible content for the user?

A) `<html>`
B) `<title>`
C) ✔ **`<body>`**
D) `<head>`

---

281. What does `<h1>` represent in HTML?

A) Paragraph
B) Table
C) ✔ **First-level heading**
D) Image

---

282. Which tag is used for adding paragraphs in HTML?

A) `<div>`
B) `<h1>`
C) ✔ **`<p>`**
D) `<a>`

---

283. What is the purpose of `<ul>` tag?

A) Heading
B) Paragraph
C) ✔ **Create unordered list**
D) Insert image

---

284. Which tag is used to insert links in HTML?

A) `<p>`
B) `<img>`
C) ✔ **`<a>`**
D) `<h1>`

---

285. Which tag is used to display images in HTML?

A) `<a>`
B) `<p>`
C) ✔ **`<img>`**
D) `<h1>`

---

286. Which of the following is true about HTML?

A) Can only display text
B) Cannot display images
C) ✔ **Can embed images, objects, forms, and scripts**
D) Cannot have attributes

---

287. Which HTML element contains both start and end tags?

A) `<img>`
B) ✔ **`<p>`**
C) `<br>`
D) `<hr>`

---

288. Can HTML elements be nested?

A) No
B) Only block elements
C) Only inline elements
D) ✔ **Yes, elements can contain other elements before the end tag**

---

289. Which tag is used to define heading levels in HTML?

A) `<h>`
B) `<head>`
C) ✔ **`<h1>` to `<h6>`**
D) `<p>`

---

290. What is the purpose of HTML attributes?

A) Add new pages
B) ✔ **Provide additional information about elements**
C) Create headings
D) Insert tables

---

291. Example of setting width and height for an image in HTML is:

A) `<p width="100" height="100">`
B) ✔ **`<img src="logo.jpg" width="100" height="150">`**
C) `<a width="50" height="50">`
D) `<table width="200" height="200">`

---

292. Which of the following is an example of a block element?

A) `<b>`
B) `<a>`
C) ✔ **`<table>`**
D) `<img>`

---

293. Which of the following is an example of an inline element?

A) `<ul>`
B) `<table>`
C) `<p>`
D) ✔ **`<td>`**

---

294. HTML documents are interpreted by:

A) MS Word
B) Excel
C) ✔ **Web browsers**
D) PowerPoint

---

295. Which tag is used to start and end a web page?

A) `<body>`
B) `<title>`
C) ✔ **`<html>`**
D) `<head>`

---

296. The `<body>` tag contains:

A) CSS code
B) HTML attributes
C) ✔ **Visible content of the page**
D) Script only

---

297. Which tag represents the main heading of a page?

A) `<p>`
B) `<body>`
C) ✔ **`<h1>`**
D) `<img>`

---

298. What type of tag is `<img>`?

A) Block
B) Paragraph
C) ✔ **Inline/self-closing**
D) Heading

---

299. Can inline elements appear inside block elements?

A) No
B) Only text
C) Only images
D) ✔ **Yes**

---

300. Which HTML element allows you to embed scripts like JavaScript?

A) `<p>`
B) `<table>`
C) `<h1>`
D) ✔ **`<script>`**

Module 232–234: Web Page Development (Dreamweaver)

301. What is the first step before inserting a table in Dreamweaver?

A) Open CSS panel
B) ✔ **Save the HTML document**
C) Click Insert Image
D) Highlight text

---

302. After creating a new HTML document in Dreamweaver, what should you do next?

A) Insert Image
B) ✔ **Add HTML page**

C) Open Excel
D) Open Word

---

303. Why are tables used in web pages?

A) Store CSS
B) ✔ **Organize data in rows and columns**
C) Insert videos
D) Create animations

---

304. Which tab in Dreamweaver is mainly used to insert tables?

A) File
B) Edit
C) ✔ **Insert**
D) View

---

305. What is the main advantage of using tables on web pages?

A) Add scripts
B) ✔ **Present data in a structured and organized format**
C) Change font size
D) Create lists

---

306. How do you create a bulleted list in Dreamweaver?

A) Format → Paragraph
B) ✔ **Highlight text → Property Inspector → Unordered List**
C) Insert → Table
D) File → Save As

---

307. What is the main purpose of using lists on a web page?

A) Add images
B) ✔ **Present information in a readable and skimmable format**
C) Insert CSS
D) Animate text

---

308. What type of list uses bullet points?

A) Ordered List
B) ✔ **Unordered List**

C) Numbered List
D) Table

---

309. How do you create a numbered list in Dreamweaver?

A) File → Save
B) Highlight text → ✔ **Property Inspector → Ordered List**
C) Insert → Image
D) View → Code

---

310. Which menu allows you to change list properties in Dreamweaver?

A) File
B) Edit
C) ✔ **Format → List → Properties**
D) View

---

311. What option allows switching between bullets and numbers in lists?

A) Insert → Image
B) ✔ **List type drop-down in List Properties**
C) File → Save
D) Format → Table

---

312. How do you change the bullet shape in Dreamweaver?

A) Insert → Table
B) File → Open
C) ✔ **Style drop-down menu in List Properties**
D) View → Code

---

313. What bullet shape is used as default in Dreamweaver?

A) Square
B) ✔ **Circular**
C) Star
D) Triangle

---

314. What shape can bullets be changed to in Dreamweaver?

A) Triangle
B) Circle

C) ✔ **Square**
D) Hexagon

---

315. How do you insert an image into a Dreamweaver web page?

A) Format → List
B) ✔ **Insert tab → Image button**
C) File → Save As
D) View → Design

---

316. Where do you select the image to insert in Dreamweaver?

A) CSS panel
B) Property Inspector
C) ✔ **From your drive (local files)**
D) File menu

---

317. Which panel allows you to view and edit the inserted image properties?

A) CSS Panel
B) ✔ **Property Inspector**
C) Files Panel
D) Insert Panel

---

318. What is the purpose of inserting images on a web page?

A) Store tables
B) Add scripts
C) ✔ **Enhance visual content and engagement**
D) Create forms

---

319. Which button allows you to insert an unordered list?

A) Ordered List
B) Table
C) ✔ **Unordered List**
D) Image

---

320. Which button allows you to insert an ordered (numbered) list?

A) Unordered List
B) ✔ **Ordered List**

C) Image
D) Table

---

321. What does the Unordered List button do to selected text?

A) Adds images
B) Creates a table
C) ✔ **Indents text and adds bullets at the start of each line**
D) Changes font size

---

322. How do you switch between ordered and unordered lists?

A) File → Open
B) Insert → Image
C) ✔ **List type drop-down menu in List Properties**
D) View → Design

---

323. Which menu allows you to modify bullet shape?

A) File
B) ✔ **Format → List → Properties → Style**
C) View
D) Insert

---

324. How do you add a new HTML document in Dreamweaver?

A) File → Open Word
B) Insert → Table
C) ✔ **Welcome Screen → New HTML Document**
D) Format → Paragraph

---

325. What is the first action after opening a new HTML document in Dreamweaver?

A) Insert Image
B) ✔ **Save the document**
C) Add CSS
D) Insert Table

---

326. Where do you click to add a bulleted list in Dreamweaver?

A) File menu
B) Insert → Table
C) ✔ **Property Inspector → Unordered List button**
D) Format → Paragraph

---

327. How do you highlight text to make it a list?

A) Click Insert → Image
B) ✔ **Click and drag over the text**
C) Press Enter
D) File → Save

---

328. Which menu provides access to List Properties dialog box?

A) Insert
B) ✔ **Format → List → Properties**
C) File
D) Edit

---

329. What are the two main types of lists in Dreamweaver?

A) Table and Image
B) ✔ **Ordered and Unordered**
C) Heading and Paragraph
D) Inline and Block

---

330. Which menu allows changing list bullet shape from circular to square?

A) Insert → Image
B) Format → Table
C) ✔ **Format → List → Properties → Style**
D) View → Design

---

331. To insert an image, which Dreamweaver tab is used?

A) File
B) Format
C) ✔ **Insert**
D) View

---

332. How do you select an image to insert from your system?

A) CSS Panel
B) Files Panel
C) ✔ **Browse from drive after clicking Image button**
D) Property Inspector

---

333. Which Dreamweaver feature is mainly used to organize lists?

A) Insert → Image
B) ✔ **Property Inspector**
C) Files Panel
D) CSS Panel

---

334. What is the purpose of an ordered list?

A) Add images
B) ✔ **Display items in a specific sequence using numbers**
C) Add bullets
D) Change font

---

335. How can bullets be customized in Dreamweaver?

A) Only font change
B) ✔ **List Properties → Style drop-down menu**
C) Insert → Table
D) File → Save

---

336. Which list type shows items with numbers by default?

A) Unordered List
B) ✔ **Ordered List**
C) Square List
D) Bulleted List

---

337. Which property in Dreamweaver allows switching bullet style from circular to square?

A) Insert → Table
B) File → Save
C) ✔ **List Properties → Style**
D) View → Design

---

338. Which is a default bullet shape in Dreamweaver for unordered lists?

A) Square
B) ✔ **Circle**
C) Star
D) Triangle

---

339. Which HTML element is created automatically when inserting a bulleted list?

A) `<ol>`
B) `<table>`
C) ✔ **`<ul>`**
D) `<img>`

---

340. Which HTML element is created automatically when inserting a numbered list?

A) `<ul>`
B) ✔ **`<ol>`**
C) `<li>`
D) `<p>`

Cs101 Past paper

1. ASCII WHITE is the fastest Super computer which can perform _____ calculations in one second.
   1.3 trillion
2. _____ consists of cells arranged in rows & columns
   Spreadsheets Software
3. Assignment operator in JavaScript is represented by:
   =
4. Instead of Full System, one can _____ results from part of a System
   Achieve
5. One can browse documents residing on a remote computer using _____ protocol.
   HTTP
6. There are _____ ways of calling functions.
   Two
7. JavaScript Variables are _____.
   Dynamically Typed
8. Word Processor is a _____
   Application Software
9. Tag used to make a Text Bold is _____
   <B></B>
10. Automatic machines performing various tasks that were previously done by humans, are called _____.
    Robotics
11. In tabular storage, fields placed in a particular row are strongly _____.
    Interrelated
12. The distance among families is _____ because of spending more time on internet.
    Increased
13. Distance learning has got a boost due to the _____.
    All of the given options

14. The _____ is becoming the preferred organizational structure.
    Network paradigm
15. _____ team is responsible for the development of detailed proposals for projects.
    Business Development
16. Sequence of steps that is taken to solve a problem is called _____.
    Algorithm
17. Interactive forms are always placed between ___ tag-set
    BODY
18. ___ attribute of FORM tag is used to mention a URL when the form is being submitted
    action
19. In JavaScript, each element of array can store data of type
    All of the given choices
20. Which is the user-friendly way of presenting data?
    Form
21. Currently the BlueRay DVD can store more than _____ of data.
    50 GB
22. Module level design and unit testing is the responsibility of _____.
    Developer
23. Symbol is used for
    Both connector and off page connector
24. In spreadsheet, which function is used to solve equation $3x^3 - 2x + 5 = 0$?
    GoalSeek
25. Which is NOT a security improvement technique?
    Metal detectors
26. Correct JavaScript statement to display Grade A:
    document.write("Grade A");
27. The _____ Processor is specially designed for PDA?
    StrongARM
28. Navigation should remain _____.
    Consistent
29. It represents the _____ flow chart element.
    Start or Stop
30. The interface that a website provides to access various parts is known as _____.
    Navigation
31. HTML tags are shown in _____ color by smart editors.
    Blue
32. _____ can be used for entering, editing, or viewing data, one record at a time.
    Forms
33. ____ is a field that uniquely identifies each record stored in a table.
    Primary key
34. What is the 2nd step of DoS attack?
    Arm
35. Spies monitoring competitors' network traffic is called _____.
    Industrial Espionage
36. The developer reports to ____ in a development team.
    Team Lead
37. Tasks performed to determine the existence of defects is called ____
    Testing
38. Software ownership stays with the _____.
    Ownership
39. Processed data is called _____.
    Information
40. A _____ translates a high-level language into machine language.
    Compiler

CS-101 Final Term Most Important MCQs

Question No: 1

Refers to distributed systems that are more loosely coupled than clusters but that still work together to accomplish large tasks.

A. Quantum computing
B. Parallel computing
✔ **C. Grid computing**
D. Cloud computing

Question No: 2

Which data compression technique is suitable for situation where the long sequence has same value?

A. Differential encoding
B. Relative encoding
✔ **C. Run length encoding**
D. Frequency dependent encoding

Question No: 3

The binary search algorithm uses_____.

A. Linear search
✔ **B. Divide and conquer method**
C. Bubble sort technique
D. Quick sort technique

Question No: 4

It is same as the addition in decimal system, you need to align the radix point and perform the addition.

A. Hexadecimal
B. Octal
C. Folic
✔ **D. Binary or Decimal system**

Question No: 5

Within a transfer category, which instruction is used to communicating with devices outside the CPU?

A. STORE instruction
B. COM instruction
✔ **C. I/O instruction**
D. LOAD instruction

Question No: 6

Computer science approaches some problems by establishing a well-defined set of building blocks. These building blocks are____

✔ **A. Primitive**
B. Non-Primitive
C. Scalar
D. Non-Scalar

Question No: 7

A clear flag state indicates that the resource is

✔ **A. Available**
B. Unavailable
C. Currently allocated
D. Ready

Question No: 8

VoIP consists of two processes on different machines transferring audio data via the model.

A. P2S
✔ **B. P2P**
C. P2Q
D. P2R

Question No: 9

<a> is called the____ tag in the HTML document.

A. Actor
✔ **B. Anchor**
C. Action
D. Alter

Question No: 10

Loop structure referred to as a post-test loop.

A. While
✔ **B. Repeat**
C. For
D. For Each

Question No: 11

Loop is executed in a repetitive fashion under the direction of some.

✔ **A. Control Process**
B. Sequence process
C. Halting process
D. Background knowledge

Question No: 12

SSDs stands for____.

A. Semantic state disk
✔ **B. Solid state disk**
C. Software state disk
D. Simple state disk

Question No: 13

Repeated erasing slowly ____ the silicon dioxide chambers.

✔ **A. Damages**
B. Enhance
C. Decrease

Question No: 14

Leibniz's machines were achieved by observing the ___ positions.

A. Third gear
B. First gear
✔ **C. Final gear**
D. Second gear

Question No: 15

If a client wants to execute scripts at server end blindly, this may cause:

✔ **A. Security concerns on both server and client side**
B. Ethical concerns on server
C. Ethical concerns on client
D. Ethical concerns on both sides

Question No: 16

The repetitive use of instructions is implemented through:

A. if else
✔ **B. Loop**
C. Class

Question No: 17

Bit patterns must move between CPU and main memory and controllers.

A. ROM
✔ **B. Main Memory**
C. Processor
D. Cache memory

Question No: 18

Phase 1 of problem-solving steps is ____

A. Formulate algorithm
B. Evaluate program
✔ **C. Understand the Problem**
D. Algorithmic idea

Question No: 19

What is the full form of PHP?

✔ **A. Personal Home Page**
B. Private Home Page
C. Protected Home Page
D. Public Home Page

Question No: 20

Scheduler maintains information of all processes in ____ table.

A. Mac
B. IP
✔ **C. Process**
D. ASCII

Question No: 21

TIFF is abbreviation of ___

A. Toggle Image File Format
B. Template Image File Format
C. Tagged Image File Frame
✔ **D. Tagged Image File Format**

Question No: 22

Connects computer over a large geographical area or world.

A. PAN
B. LAN
✔ **C. WAN**
D. MAN

Question No: 23

Correct sequence of network layers at sender side?

A. Link → Network → Transport → Application
B. Network → Link → Transport → Application
C. Application → Link → Network → Transport
✔ **D. Application → Transport → Network → Link**

Question No: 24

Fact-2 i=l; Fact=fact*l; i=i+l; print(fact).

A. 2
B. 3
C. 5
✔ **D. 7**

Question No: 25

A CPU consists of three parts

✔ **A. ALU, Control Unit, Register**
B. ALU / MJPEJ / CU
C. Circuit / MP3 ICU
D. RAM / Cache / D-RAM

Question No: 26

CPU designed to execute minimal set of instructions is called:

A. CISC
✔ **B. RISC**
C. ENVIAC
D. RISC / CISC

Question No: 27

Each sound has a ___

A. Pixel
B. Geometric Structures
✔ **C. Wave**
D. Scaling

Question No: 28

Which language is used for client-side scripting?

A. Python
✔ **B. JavaScript**
C. PHP
D. ASP.net

Question No: 29

Most codes used today are Huffman codes.

A. Relative encoding
✔ **B. Frequency Dependent**
C. Run-length encoding
D. Differential encoding

Question No: 30

Which one is a unary operator?

A. OR
B. AND
✔ **C. NOT**
D. EQUAL

Question No: 31

In _____ paradigm, task is to develop a precise problem statement rather than algorithm.

A. Imperative
B. Functional
✔ **C. Declarative**
D. Object-Oriented

Question No: 32

If the result after comparison of two variables is False, if statement returns:

✔ **A. 0**
B. 1
C. 2
D. 3

Question No: 33

We use _____ to reduce unnecessary dependencies.

A. Inheritance
B. Abstraction
C. Polymorphism
✔ **D. Information hiding**

Question No: 34

Syntax for using && is

A. cmd1 cmd2 &&
B. cmd1 & cmd2 &
C. && cmd1 cmd2
✔ **D. cmd1 && cmd2**

Question No: 35

Which one is not a valid data type?

A. Int
B. Float
C. Char
✔ **D. HTML**

Question No: 36

Control structure which iterates a set of instructions is called:

✔ **A. Loop**
B. Class
C. Function
D. Conditional

Question No: 37

A _____ is a storage area that contains an encoded address.

A. Tree
B. Array
C. Graph
✔ **D. Pointer**

Question No: 38

```
int sum = 7;
if (sum >= 20) cout << "You win";
if (sum < 20) cout << "You lose";
cout << "the prize.";
```

Output:

✔ **You lose the prize.**

Question No: 39

In Object Oriented Paradigm, each object will have its own collection of functions called:

A. Classes
B. Object
✔ **C. Method**
D. Element

Question No: 40

In C++, symbolic representation for 'Equal to' relational operator is:

A. &
B. =
C. !=
✔ **D. ==**

Question No: 41

In Structure Chart functions are represented by:

A. Circles
B. Arrows
C. Triangles
✔ **D. Rectangles**

Question No: 42

True parallel processing requires:

A. Single
✔ **B. Multiple**
C. None of these
D. Exact two cores

Question No: 43

How many choices are possible when using a single if-else statement?

A. 3
B. 4

✔ **C. 2**
D. 1

Question No: 44

The language understood by a computer without translation is known as:

A. High Level Language
B. Assembly language
✔ **C. Machine Language**
D. Command Language

Question No: 45

_____ phase of the Software Life Cycle tends to provide solution for the problem.

✔ **A. Implementation**
B. Testing
C. Coding

Question No: 46

To retrieve information about an employee, we must select the _____ with the appropriate identification attribute value from the EMPLOYEE relation.

A. Model
B. Table
✔ **C. Tuple**
D. Attributes

Question No: 47

In the case of _____ that are subject to heavy transaction loads, it is likely a random snapshot will find the database in middle of some transaction.

A. Small database
✔ **B. Large databases**
C. Web development
D. Object oriented programming

Question No: 48

In incremental model, prototypes evolve into the complete, final system, a process known as:

A. Agile method
B. Throwaway prototyping
C. None of these
✔ **D. Evolutionary prototyping**

Question No: 49

A stronger form of cohesion is also called as _____ cohesion.

A. Weak
✔ **B. Functional**
C. Independent
D. Non-functional

Question No: 50

In which paradigm, a program is constructed by connecting smaller predefined program units?

A. Imperative Paradigm
B. Declarative paradigm
C. Functional paradigm
✔ **D. Object oriented paradigm**

Question No: 51

Which symbol is used at the end of the line to separate statements in many imperative languages?

A. .
✔ **B. ;**
C. ,
D. *

Question No: 52

Which one of the following is the traditional approach of programming process?

✔ **A. Imperative Paradigm**
B. Declarative paradigm
C. Functional paradigm
D. Object oriented paradigm

Question No: 53

An alternative to translators:

A. Assembler
B. Compiler
✔ **C. Interpreter**
D. Mnemonics

Question No: 54

The sign of modulus is:

A. /
B. \
✔ **C. %**
D. -

Question No: 55

This ___ view of the database is called a database model.

A. theoretical
✔ **B. conceptual**
C. empirical
D. logic

Question No: 56

Which following is not a phase of SDLC?

A. Testing
B. Implementation
✔ **C. Problem identification**

Question No: 57

In modern computer applications, problems are more easily solved in context of:

✔ **A. Parallel processing**
B. Traditional context
C. Traditional processing

Question No: 58

5 % 2 would give:

A. 0
✔ **B. 1**
C. 2
D. 5

Question No: 59

Design phase is followed by ___

A. Requirement analysis
✔ **B. Implementation**
C. Testing
D. Maintenance

Question No: 60

In particular, the chart that indicates the entire game is overseen by a function named ___

A. objects
✔ **B. Control game**
C. function
D. forms
B.

Question No: 61

The simplest form of array is the ___ array.
✔ **A. One-dimensional**

Question No: 62

A specific example is the… series of standards, which address numerous industrial activities such as design, production, installation and servicing.
✔ **A. ISO 900**

Question No: 63

A paradigm works on object called
✔ **D. Object-oriented paradigm**

Question No: 64

An object is actually a special case of the general concept of a
✔ **D. Components**

Question No: 65

A significant example of iterative techniques is:

✔ **C. Rational Unified Process**

Question No: 66

If the result after comparison of two variables in relational operator is False, then if statement returns value

✔ **C. 0**

Question No: 67

The description of the object's properties is called

✔ **B. Class**

Question No: 68

A model which represents the shift away from strict adherence from the waterfall model is:

✔ **A. Incremental model**

Question No: 69

Second phase of the development phase of the software development life cycle is:

✔ **B. Testing**

Question No: 70

The set of instructions in a computer language, to get the desired result is known as:

✔ **A. A program**

Question No: 71

Which of the following language is related to functional paradigm?

✔ **LISP**

Question No: 72

SLDC =

✔ **SOFTWARE DEVELOPMENT LIFE CYCLE**

Question No: 73

Software engineering is an engineering discipline that is concerned with:

✔ **All aspects of software production**

Question No: 74

An object is actually a special case of the more general concept of a:

✔ **Component**

Question No: 75

The major steps in the traditional software development life cycle are:

✔ **Requirements**

Question No: 76

Which refers to tests that do not rely on knowledge of the software's interior composition?

✔ **black-box testing**

Question No: 77

How many choices are possible when using a single if-else statement?

✔ **2**

Question No: 78

Refer to functional paradigm:

✔ **Mathematicians**

Question No: 79

While and software license agreements provide legal avenues to inhibit outright copying and unauthorized use of software.

✔ **Copyrights**

Question No: 80

Which occurs when a module passes control of execution to another, as in a function call?

✔ **Control coupling**

Question No: 81

The Select Operation extracts from a relation:

✔ **Rows**

Question No: 82

The PROJECT operation extracts from a relation:

✔ **Columns**

Question No: 83

A program DOCTOR developed by Joseph Weizenbaum in the mid-1960s named as:

✔ **ELIZA**

Question No: 84

_____ is the field of engineering that deals with designing system's interfaces by considering human physical abilities.

✔ **Ergonomics**

Question No: 85

In context of health, computer science has impacts:

✔ **Both positive & negative**

Question No: 86

Usual way of protecting software is:

✔ **Copyright**

Question No: 87

American throws away pieces of paper each year which is equal to:

✔ **1 Billion Trees**

Question No: 88

Which of the following is a robot used in medical field?

✔ **Belgian robot**

Question No: 89

Robots identify veins by:

✔ **Image processing**

Question No: 90

Act that ranges government restrictions on wire taps to include transmissions of data is:

✔ **ECPA**

Question No: 91

Act that mandates about financial institutions dealing with private information of individuals:

✔ **Gramm-Leach-Bliley**

Question No: 92

What will be the output of the following statement? `int a = 3.5 + 4.4;`

✔ **7**

Question No: 93

Is based on real time factory concept:

✔ **Factory Pattern**

Question No: 94

Which of the following data type will be used for a variable having string of symbols and alphabets?

✔ **Character**

Question No: 95

Page group includes options:

✔ **Cover Page**

Question No: 96

A mark or any other distinctive sign associated with products is called:

✔ **Trademark**

Question No: 97

We can customize indentation with:

✔ **Ruler**

Question No: 98

Retailers manage record of their customers:

✔ **Purchases**

Question No: 99

Social sites include:

✔ **Twitter**

Question No: 100

Computer science has made hacking bank account:

✔ **Possible**

Question No: 101

Turing gave a percentage of a machine that will have a chance to pass Turing test in year:

✔ **2000**

Question No: 102

Paste option is a part of home ribbon group called:

✔ **Clipboard**

Question No: 103

The communication between people because of computer science has:

✔ **Improved**

Question No: 104

Eye for long amount of time is not meant to look:

✔ **2D**

Question No: 105

Home ribbon contains groups:

✔ **All of these**

Question No: 106

We can highlight a text from group:

✔ **Font**

Question No: 107

Microsoft Office includes:

✔ **Word**

Question No: 108

MS Word is an example of:

✔ **Word processor**

Question No: 109

Content filters are part of Internet:

✔ **Firewalls**

Question No: 110

The default theme of MS-Word document is:

✔ **Office**

Question No: 111

Table group is a part of ribbon:

✔ **Insert**

Question No: 112

We can decrease indent from group:

✔ **Paragraph**

Question No: 113

Insert tab can have group:

✔ **Pages**

Question No: 114

If we want to end a page at a specific point and move to the next page we can use:

✔ **Page break**

Question No: 115

Access to the forbidden literature because of:

✔ **Computer**

Question No: 116

Style groups in MS Word can have:

✔ **Shading**

Question No: 117

Gaming addiction can cause problems:

✔ **Financial**

Question No: 118

Content filtering is serving for purpose of:

✔ **All of these**

Question No: 119

The style group in the home ribbon is the:

✔ **Fourth group**

Question No: 120

We can set line spacing from group:

✔ **Paragraph**

Question No: 121

Self-driven cars are example of:

✔ **AI**

Question No: 122

Legal notations to control digital ownership are:

✔ **Copyrights**

Question No: 123

The fifth group in the home ribbon is the:

✔ **Editing**

Question No: 124

Find option includes:

✔ **All of these**

Question No: 125

Shortcut key to select whole text in a document:

✔ **Ctrl + A**

Question No: 126

The Turing test result of program DOCTOR developed by Joseph Weizenbaum was:

✔ **Passed**

Question No: 127

With computer science the access to private information has:

✔ **Increased**

Question No: 128

Pre-written mathematical expressions or formulas are called:

✔ **Symbol**

Question No: 129

The field of linguistic tends towards which direction:

✔ **Theoretical**

Question No: 130

CAN-SPAM Act applies in:

✔ **US**

Question No: 131

Data mining is practiced on data collections called data warehouses:

✔ **Static**

Question No: 132

Theoretical track is a part of:

✔ **AI domain**

Question No: 133

The approach leads to a simulation-oriented methodology:

✔ **Theoretical**

Question No: 134

The approach leads to a performance-oriented methodology:

✔ **Engineering**

Question No: 135

Displays the document as it would appear if printed and is the default view:

✔ **Print Layout**

Question No: 136

Maximizes the Word window and removes toolbars to allow easy reading:

✔ **Read Mode**

Question No: 137

A specially formatted letter at the beginning of a paragraph is called:

✔ **Drop Cap**

Question No: 138

Are a way to keep track of reading:

✔ **Bookmarks**

Question No: 139

American throws away pieces of paper each year:

✔ **1 billion trees**

Question No: 140

A device that responds to stimuli from its environment:

✔ **Agent**

Question No: 141

Ethical issues are related to:

✔ **Moral principles**

Question No: 142

We can increase the size of text from home ribbon group:

✔ **Font**

Question No: 143

Different types of effects on text can be applied with:

✔ **Word Art**

Question No: 144

Begins the paragraph with a large letter that spills down into the text:

✔ **Drop Cap**

Question No: 145

Ethics and legality are essential in many industries including:

✔ **All of these**

Question No: 146

Language group is in which ribbon of MS Word:

✔ **Review**

Question No: 147

Rapidly expanding subject closely associated with database technology:

✔ **Data Mining**

Question No: 148

A charity organization of London is:

✔ **PI**

Question No: 149

Footer is printed in the:

✔ **Bottom margin**

Question No: 150

Change case control is an example of:

✔ **Drop-down menu**

Question No: 151

Turing test was proposed in:

✔ **1950**

Question No: 152

Most famous word processor is:

✔ **Word Processor**

Question No: 153

Americans use about 680 pounds of paper per year:

✔ **Per person**

Question No: 154

Which of the following is social issue:

✔ **All of these**

Question No: 155

Information technology has overarching standardization in place:

✔ **No**

Question No: 156

We can encrypt:

✔ **Emails**

Question No: 157

A style option includes font:

✔ **All of these**

Question No: 158

Quick Access Toolbar by default includes:

✔ **All of these**

Question No: 159

USA passed legislation allowing monitoring in the name of:

✔ **National security**

Question No: 160

Requiring uniformity of symbols is a:

✔ **Disadvantage**

Question No: 161

IPR stands for:

✔ **Intellectual Property Rights**

Question No: 162

Technique that allows record location by key value:

✔ **Hashing**

Question No: 163

Index of a file is stored as a separate file on same storage device as:

✔ **Indexed file**

Question No: 164

Data storage space sections are called:

✔ **Buckets**

Question No: 165

Conversion from key values to bucket numbers is called a:

✔ **Hash function**

Question No: 166

To link two sections of same document we use:

✔ **Hyperlink**

Question No: 167

Refers to identifying characteristics of an image:

✔ **Image processing**

Question No: 168

Page Setup group is in which ribbon of MS Word?

✔ **Page Layout**

Question No: 169

Robots identify veins by:

✔ **Image processing**

Question No: 170

Simplest predetermined response to input data is:

✔ **Reflex action**

Question No: 171

Image analysis is also known as:

✔ **Region finding**

Question No: 172

Refers to identifying documents that relate to the topic at hand:

✔ **Information retrieval**

Question No: 173

Sophisticated software packages designed for software engineering:

✔ **IDE**

Question No: 174

Pre-written code to solve specific engineering problems is:

✔ **Software library**

Question No: 175

Which type of control ensures tasks follow correct sequence?

✔ **Process control**

Question No: 176

A command that allows user to see all files in directory:

✔ **DIR**

Question No: 177

Shortcut key to copy selected text:

✔ **Ctrl + C**

Question No: 178

Shortcut key to cut selected text:

✔ **Ctrl + X**

Question No: 179

Shortcut key to paste copied/cut text:

✔ **Ctrl + V**

Question No: 180

Communication between people because of computer science has:

✔ **Improved**

Question No: 181

Insert tab can have group:

✔ **Pages**

Question No: 182

If we want to end a page at a specific point and move to next page we can use:

✔ **Page break**

Question No: 183

Access to forbidden literature because of:

✔ **Computer**

Question No: 184

Style groups in MS Word can have:

✔ **Shading**

Question No: 185

Gaming addiction can cause problems:

✔ **Financial**

Question No: 186

Content filtering is serving for purpose of:

✔ **All of these**

Question No: 187

The style group in the home ribbon is the:

✔ **Fourth group**

Question No: 188

We can set line spacing from group:

✔ **Paragraph**

Question No: 189

Self-driven cars are example of:

✔ **AI**

Question No: 190

Legal notations to control digital ownership are:

✔ **Copyrights**

Question No: 191

The fifth group in the home ribbon is the:

✔ **Editing**

Question No: 192

Find option includes:

✔ **All of these**

Question No: 193

Shortcut key to select whole text in a document:

✔ **Ctrl + A**

Question No: 194

The Turing test result of program DOCTOR developed by Joseph Weizenbaum was:

✔ **Passed**

Question No: 195

With computer science the access to private information has:

✔ **Increased**

Question No: 196

Pre-written mathematical expressions or formulas are called:

✔ **Symbol**

Question No: 197

The field of linguistic tends towards which direction:

✔ **Theoretical**

Question No: 198

CAN-SPAM Act applies in:

✔ **US**

Question No: 199

Data mining is practiced on data collections, called data warehouses:

✔ **Static**

Question No: 200

Theoretical track is a part of:

✔ **AI domain**

Question No: 201

The approach leads to a simulation-oriented methodology:

✔ **Theoretical**

Question No: 202

The approach leads to a performance-oriented methodology:

✔ **Engineering**

Question No: 203

Displays the document as it would appear if printed and is the default view:

✔ **Print Layout**

Question No: 204

Maximizes Word window on screen and removes all toolbars:

✔ **Read Mode**

Question No: 205

A specially formatted letter at the beginning of a paragraph is:

✔ **Drop Cap**

Question No: 206

Way to keep track of reading:

✔ **Bookmarks**

Question No: 207

American throws away pieces of paper each year:

✔ **1 Billion Trees**

Question No: 208

A device that responds to stimuli from environment:

✔ **Agent**

Question No: 209

Ethical issues are related to:

✔ **Moral principles**

Question No: 210

We can increase the size of text from home ribbon group:

✔ **Font**

Question No: 211

Different types of effects on text can be applied with:

✔ **Word Art**

Question No: 212

Begins paragraph with a large letter that spills down:

✔ **Drop Cap**

Question No: 213

Ethics and legality are essential in many industries including:

✔ **All of these**

Question No: 214

Language group is in which ribbon of MS Word?

✔ **Review**

Question No: 215

Rapidly expanding subject associated with database technology:

✔ **Data Mining**

Question No: 216

Charity organization of London is:

✔ **PI**

Question No: 217

Footer is printed in:

✔ **Bottom margin**

Question No: 218

Change case control is an example of:

✔ **Drop-down menu**

Question No: 219

Turing test was proposed in:

✔ **1950**

Question No: 220

Most famous word processor is:

✔ **Word Processor**

Question No: 221

Americans use about 680 pounds of paper per year:

✔ **Per person**

Question No: 222

Which of the following is social issue:

✔ **All of these**

Question No: 223

Information technology has overarching standardization in place:

✔ **No**

Question No: 224

We can encrypt:

✔ **Emails**

Question No: 225

A style option includes font:

✔ **All of these**

Question No: 226

Quick Access Toolbar by default includes:

✔ **All of these**

Question No: 227

USA has passed legislation allowing government to monitor citizens in the name of:

✔ **National security**

Question No: 228

Requiring uniformity of style, size, and orientation of symbols is:

✔ **Disadvantage**

Question No: 229

IPR stands for:

✔ **Intellectual Property Rights**

Question No: 230

Technique that allows record to be located by key value:

✔ **Hashing**

Question No: 231

A file's index is normally stored as a separate file on same mass storage device as:

✔ **Indexed file**

Question No: 232

Data storage space is divided into several sections, called:

✔ **Buckets**

Question No: 233

Conversion from key values to bucket numbers is called:

✔ **Hash function**

Question No: 234

If we want to link two sections of same document we generally use:

✔ **Hyperlink**

Question No: 235

Refers to identifying characteristics of the image:

✔ **Image processing**

Question No: 236

Page Setup group is in which ribbon of MS Word?

✔ **Page Layout**

Question No: 237

Robots identify veins by:

✔ **Image processing**

Question No: 238

Simplest predetermined response to input data:

✔ **Reflex action**

Question No: 239

Image analysis is also known as:

✔ **Region finding**

Question No: 240

Refers to identifying documents that relate to the topic at hand:

✔ **Information retrieval**

Question No: 241

Sophisticated software packages primarily designed for software engineering:

✔ **IDE**

Question No: 242

Pre-written code to solve specific engineering problems is called:

✔ **Software library**

Question No: 243

Which type of control ensures tasks follow correct sequence?

✔ **Process control**

Question No: 244

A command that allows user to see all files in a directory:

✔ **DIR**

Question No: 245

Shortcut key to copy selected text:

✔ **Ctrl + C**

Question No: 246

Shortcut key to cut selected text:

✔ **Ctrl + X**

Question No: 247

Shortcut key to paste copied/cut text:

✔ **Ctrl + V**

Question No: 248

Communication between people because of computer science has:

✔ **Improved**

Question No: 249

_____ are sophisticated software packages primarily designed for software engineering:

✔ **IDE**

Question 250

The location that is used to temporarily store the information that has been cut from somewhere:

✔ **Clipboard**

Question 251

A sequential file is a file that is accessed in a serial manner from its beginning to its end:

✔ **Sequential file**

Question 252

Arrange Group is in which ribbon of MS Word?

✔ **Page Layout**

Question 253

Justify option is used to give spaces to the paragraph on left and right side equal:

✔ **Paragraph**

Question 254

Shortcut to insert a new comment in MS Word:

✔ **Shift+F2**

Question 255

The people present around the e-waste gain diseases:

✔ **True**

Question 256

The field of Artificial Intelligence is being pursued along paths:

✔ **2**

Question 257

People are working in sitting position and thus have more chance to develop:

✔ **Obesity**

Question 258

Privacy is the "right to be let alone" is written by:

✔ **Samuel D. Warren**

Question 259

The shortcut key for Track Changes:

✔ **Ctrl+Shift+E**

Question 260

Information that was once buried in arcane records has become accessible:

✔ **Database**

Question 261

In the United States, the Privacy Act of 1974 protects citizens from abusive use of databases:

✔ **Government**

Question 262

Want to reapply a command, you can use:

✔ **Redo**

Question 263

Displaying text in two columns feature is in which tab of MS Word?

✔ **Page Layout**

Question 264

There are many types of sensors:

✔ **All of these (microphones, cameras, range sensors)**

Question 265

Matching geometric characteristics techniques of recognizing images is used in:

✔ **Optical imaging recognition**

Question 266

Electronic Theft includes:

✔ **Online scam**

Question 267

How many common forms of data mining?

✔ **2 (class description and class discrimination)**

Question 268

Act that gives parents control over what information websites can collect from kids:

✔ **COPPA**

Question 269

Text files in which each logical record is a single symbol encoded using ASCII or Unicode:

✔ **Sequential files**

Question 270

Actions according to environment knowledge:

✔ **Intelligent action**

Question 271

Ribbon has types of commands:

✔ **Three**

Question 272

Plagiarism is a major problem in:

✔ **Education**

Question 273

Data comes from:

✔ **All of the above**

Question 274

Acts as a security guard between the Internet and your local area network:

✔ **Firewall**

Question 275

Ctrl+Y is used for:

✔ **Redo**

Question 276

Ctrl+Z is used for:

✔ **Undo**

Question 277

Process of understanding the characteristics of images is step two:

✔ **Image analysis**

Question 278

Researchers are trying to develop systems that exhibit intelligent behavior in track:

✔ **Engineering**

Question 279

The option of justify is in group:

✔ **Paragraph**

Question 280

The option of bullets is in group:

✔ **Paragraph**

Question 281

The option of strike through is in group:

✔ **Font**

Question 282

Hyperlinks have by default color:

✔ **Blue**

Question 283

Format painter is in group of:

✔ **Clipboard**

Question 284

Process of understanding what the characteristics of images means refers to:

✔ **Image analysis**

Question 285

Undo is used by:

✔ **Ctrl+Z**

Question 286

In Belgian Pepper Robot works in:

✔ **Hospitals**

Question 287

The part where different bullets options are given is called:

✔ **Bullet library**

Question 288

Software licenses are:

✔ **All of these (proprietary, free, open source)**

Question 289

Proofing Group is in which ribbon of MS Word?

✔ **Review**

Question 290

Word provides you preformatted text boxes through:

✔ **Text box**

Question 291

A program DOCTOR developed by Joseph Weizenbaum in the mid-1960s named as:

✔ **ELIZA**

Question 292

The amount of paper Americans use in a year is:

✔ **85 million tons**

Question 293

One method that got on social media is the idea of a parent/child cell phone:

✔ **Contract**

Question 294

Pages is an option in the ribbon:

✔ **Insert**

Question 295

When we draw a table in MS Word, the table has initial column(s):

✔ **One**

Question 296

A patent can last:

✔ **20 years**

Question 297

Content filtering works by matching:

✔ **Characters strings**

Question 298

Procedural knowledge is learning:

✔ **“How”**

Question 299

Declarative knowledge is learning:

✔ **“What”**

Question 300

We can add charts in MS Word from group:

✔ **Illustration**

Question 301

Illustration is part of ribbon:

✔ **Insert**

Question 302

Shortcut to insert end note:

✔ **Ctrl+Shift+D**

Question 303

Shortcut to insert footnote:

✔ **Alt+Ctrl+F**

Question 304

Major component of syntactic analysis is:

✔ **Parsing**

Question 305

Command that can immediately go to a page or any marked location within your document:

✔ **Go to**

Question 306

The test that matches will have a chance to pass Turing was of:

✔ **5 minutes**

Question 307

Each statement in a natural language can have multiple meanings:

✔ **True**

Question 308

Shortcut key of paste is:

✔ **Ctrl+V**

Question 309

Act that mandates about financial institutions must deal with the private information of individuals:

✔ **Gramm-Leach-Bliley Act**

Question 310

Meaning of a statement in natural language depends on its context:

✔ **True**

Question 311

Copyright can be applied on:

✔ **All of these (dramatic works, artistic and musical works)**

Question 312

Content Risks include:

✔ **Harmful Advice**

Question 313

Information security Risks include:

✔ **Malicious code**

Question 314

Sequential files are ideal for storing data that will be processed in the order in which the file's entries are stored:

✔ **True**

Question 315

To select shapes that are hidden or behind the text we can click:

✔ **Select objects**

Question 316

We have paste options:

✔ **Multiple**

Question 317

Reports can be received at home through email because of investment in:

✔ **Computer Science**

Question 318

Font group includes options:

✔ **All of these (Typefaces, Highlight, Font size)**

Question 319

Attacks can be made to prevent access to websites by crashing:

✔ **Servers**

Question 320

Meaning of a statement in natural language depends on the manner in which it is:

✔ **Communicated**

Question 321

Paragraph group have option:

✔ **Shading**

Question 322

Arial is a famous type of:

✔ **Font family**

Question 323

Option in MS Word prevent others from making changes to the selected text:

✔ **Block Authors**

Question 324

Sometimes when a device is continuously running it damages us by:

✔ **Radiations**

Question 325

Usual way of protecting software is:

✔ **Copyright**

Question 326

When we apply header it is shown at:

✔ **Every page of the document**

Question 327

Programming languages are well-designed so that each statement has meaning:

✔ **Only one**

Question 328

AI is helping to make:

✔ **Robots**

Question 329

Act that ranges government restrictions on wire taps to include transmissions of data is:

✔ **ECPA**

Question 330

We have to write an equation with 2 as a number and 3 as its power. Which option can be used for this purpose:

✔ **Superscript**

Question 331

In context of environment, computer science has impacts:

✔ **Both positive & negative**

Question 332

Shortcut key of Cut is:

✔ **Ctrl+X**

Question 333

Turing gave a percentage of a machine that will have a chance to pass Turing test in year:

✔ **2000**

Question 334

Paste option is a part of home ribbon group called:

✔ **Clipboard**

Question 335

The communication between people because of computer science has:

✔ **Improved**

Question 336

Eye for long amount of time is not meant to look:

✔ **2D**

Question 337

Home ribbon contains groups:

✔ **All of these (Paragraph, Font, Clipboard)**

Question 338

We can highlight a text from group:

✔ **Font**

Question 339

Microsoft Office includes:

✔ **Word**

Question 340

MS Word is an example of:

✔ **Word processors**

Question 341

Content filters are part of Internet:

✔ **Firewalls**

Question 342

The default theme of MS Word is:

✔ **Office**

Question 343

Table group is a part of _ ribbon:

✔ **Insert**

Question 344

We can decrease indent from group:

✔ **Paragraph**

Question 345

Insert tab can have group:

✔ **Pages**

Question 346

If we want to end a page at a specific point and move to the next page we can use:

✔ **Page break**

Question 347

Computer science helps in faster response times through:

✔ **All of the given (emails, instant messaging, chat)**

Question 348

Access to forbidden literature because of:

✔ **Computer**

Question 349

Style groups in MS Word can have:

✔ **Shading**

Question 350

Data can come from:

✔ **All of these (Emails, Personal software, Passwords)**

Question 351

Gaming addiction can cause problems:
✔ **Financial**

Question 352

Content filtering is serving for purpose of:
✔ **All of these (Security, Socialism, Transaction)**

Question 353

The style group in the home ribbon is the:
✔ **Fourth group**

Question 354

We can set line spacing from group:
✔ **Paragraph**

Question 355

Self-driven cars are example of:
✔ **AI**

Question 356

Legal notations to control digital ownership are:
✔ **Copyrights**

Cs101 final term preparation by Salar Sikander +92 314 0960590 & Anayat Ali Khan

---

Short Revision Mcqs By Salar Sikander

1. How many choices are possible when using a single if-else statement? → **2** ✔
2. Which one is a unary operator? → **not** ✔
3. Contrast of declarative paradigm? → **Object Oriented Paradigm** ✔

4. Traditional approach of programming process? → **Imperative Paradigm** ✔
5. Data items that can take only true or false? → **Boolean** ✔
6. Functions in object-oriented paradigm? → **Method** ✔
7. Writing programs in machine language requires? → **Debugging** ✔
8. `5 % 2` gives? → **1** ✔
9. Converts high-level language instructions into machine language? → **Interpreter** ✔
10. Alters execution sequence of program? → **Control statement** ✔
11. Page group includes options? → **Cover page** ✔
12. Mark associated with products? → **Trademark** ✔
13. Customize indentation with? → **Ruler** ✔
14. Retailers manage records of customers? → **Purchasers** ✔
15. Social sites include? → **Twitter** ✔
16. Hacking bank accounts? → **Possible** ✔
17. Attacks to prevent website access? → **DDOS** ✔
18. Software licenses allow multiple copies without violating copyrights → **True** ✔
19. Learning procedural knowledge involves? → **Trial-and-error** ✔
20. Medical robot? → **Belgian robot** ✔
21. Shortcut to select all text? → **Ctrl+A** ✔
22. Editing group commands? → **3** ✔
23. Matching geometric technique cannot read? → **Handwritten material** ✔
24. Content filtering implements company policies. → ✔
25. Temporary storage for cut information? → **Clipboard** ✔
26. Sequential file accessed serially → **Sequential File** ✔
27. Arrange Group is in? → **Page Layout Ribbon** ✔
28. Justify option → **Equal spacing left and right** ✔
29. Shortcut to insert new comment → **Shift+F2** ✔
30. Displaying text in two columns → **Page Layout Tab** ✔
31. Style group in Home Ribbon → **Fourth group** ✔
32. Line spacing → **Paragraph Group** ✔
33. Table group → **Insert Ribbon** ✔
34. Decrease indent → **Paragraph Group** ✔
35. Insert tab groups → **Pages** ✔
36. End page at specific point → **Page Break** ✔
37. Highlight text → **Font Group** ✔
38. Paste → **Ctrl+V** ✔
39. Cut → **Ctrl+X** ✔
40. Copy → **Ctrl+C** ✔
41. Redo → **Ctrl+Y** ✔
42. Undo → **Ctrl+Z** ✔
43. Format Painter → **Clipboard Group** ✔
44. Bullet options → **Bullet Library** ✔
45. Font group includes → **Typefaces, Highlight, Font Size** ✔
46. Proofing Group → **Review Ribbon** ✔
47. Text Boxes → **Insert Ribbon** ✔
48. Drop Cap → **Specially formatted letter** ✔
49. Bookmarks → **Track reading** ✔
50. Superscript → **Equation for 2^3** ✔
51. Self-driven cars → **AI** ✔

52. Medical robot can assist a person → **40 times/day** ✔
53. Robots take blood more accurately than humans → ✔
54. Theoretical track → **AI Domain** ✔
55. Simulation-oriented methodology → **Theoretical** ✔
56. Performance-oriented methodology → **Engineering** ✔
57. Security between Internet & LAN → **Firewall** ✔
58. Content Filters → **Internet Firewalls** ✔
59. CAN-SPAM Act applies in → **US** ✔
60. COPPA → **Parental control online** ✔
61. Gramm-Leach-Bliley Act → **Protects private info in financial institutions** ✔
62. ECPA → **Restrictions on wire taps & data transmissions** ✔
63. Access to private information increased due to computer science → ✔
64. Pre-written mathematical expressions → **Symbol** ✔
65. Data mining uses → **Data Warehouses (Static)** ✔
66. Sequential files → **Ideal for ordered processing** ✔
67. Column in a relation → **Attribute** ✔
68. Row identification in Excel → **Numbers** ✔
69. Sorting in Excel on multiple columns → **Basic Sort** ✔
70. Storing program in main memory → **Stored Program Concept** ✔
71. Software validation → **Evaluation process** ✔
72. Imperative paradigm → **Procedural Paradigm** ✔
73. Computer translator → **System Software** ✔
74. Typical software analyst → **Involved in analysis & design** ✔
75. Stepwise refinement → **Top-down approach** ✔
76. Software design importance → **Efficiency/Quality** ✔
77. Recurrent problems handled by pre-developed modules → **Design Pattern** ✔
78. Structure chart functions → **Arrows** ✔
79. Loosely coupled systems → **Factory Design** ✔
80. True parallel processing → **Multiple CPU cores** ✔
81. Booting → **Loading OS from mass storage to main memory** ✔
82. HTML → **HyperText Markup Language** ✔
83. XML → **Extensible Markup Language** ✔
84. Not an inline element → `<ul>` ✔
85. GIF encodes → **256 colors** ✔
86. HTTP transfers → **Browser & Web Server** ✔
87. Cyber Bullying → **Anonymous platform attacks** ✔
88. ICANN → **Internet Corporation for Assigned Names and Numbers** ✔
89. Fetal Therac-25 → **X-ray radiation software failure** ✔
90. Belgian Pepper Robot works in → **Hospitals** ✔
91. AI helps to make → **Robots** ✔
92. Easy access to online health centers → **Computer Science** ✔
93. Gaming addiction problem → **Financial** ✔
94. Eye strain from long screen exposure → **2D focus issue** ✔
95. Access to forbidden literature → **Computer** ✔
96. Social media parent/child contract → **Contract** ✔
97. Turing test result of ELIZA program → **Passed** ✔
98. Home Ribbon groups include: Paragraph, Font, Clipboard, Styles, Editing → ✔
99. Shortcut key to bold text: Ctrl + B → ✔
100.

101. Page layout options include: Margins, Orientation, Size, Columns, Breaks, Line Numbers → ✔
102. File tab contains: Save, Save As, Open, Close, Info → ✔
103. Quick Access Toolbar can be customized → ✔
104. Ruler helps in adjusting margins and indents → ✔
105. Paragraph alignment options: Left, Center, Right, Justify → ✔
106. Bullets and Numbering are in Paragraph group → ✔
107. Page break ends a page at a specific point → ✔
108. Insert tab includes Pages, Tables, Illustrations, Links, Header & Footer → ✔
109. Illustrations include Pictures, Shapes, SmartArt, Chart → ✔
110. Header & Footer group allows insertion of page numbers, header, footer → ✔
111. References tab includes Table of Contents, Footnotes, Citations & Bibliography → ✔
112. Review tab includes Proofing, Comments, Track Changes, Language → ✔
113. View tab includes Print Layout, Read Mode, Web Layout, Outline, Draft → ✔
114. Shortcut key to copy: Ctrl + C → ✔
115. Shortcut key to paste: Ctrl + V → ✔
116. Shortcut key to cut: Ctrl + X → ✔
117. Ctrl + Z is Undo → ✔
118. Ctrl + Y is Redo → ✔
119. Ctrl + A selects all text → ✔
120. Ctrl + F opens Find → ✔
121. Ctrl + H opens Replace → ✔
122. Superscript is used for powers in equations → ✔
123. Subscript is used for chemical formulas → ✔
124. Styles help to maintain consistent formatting → ✔
125. Drop cap is a large letter at the beginning of a paragraph → ✔
126. Bookmarks help track reading positions → ✔
127. Text box allows custom text layout → ✔
128. Conditional statements with another inside are called Nested Conditional Statements → ✔
129. Single if-else statement has 2 choices → ✔
130. Unary operator example: not → ✔
131. Declarative paradigm contrasted with: Object-oriented paradigm → ✔
132. Traditional programming approach: Imperative paradigm → ✔
133. Boolean refers to data items with true/false values → ✔
134. Object-oriented objects have their own collection of functions called methods → ✔
135. Writing programs in machine language requires debugging → ✔
136. 5 % 2 gives 1 → ✔
137. Converts high-level language to machine language: Interpreter → ✔
138. Alters execution sequence of a program: Control statement → ✔
139. Page group options include Cover Page → ✔
140. Trademark: distinctive mark of a product → ✔
141. Indentation can be customized using Ruler → ✔
142. Retailers manage customer records: Purchasers → ✔
143. Social sites include Twitter → ✔
144. Computer science made hacking bank accounts possible → ✔
145. Attack to prevent website access: DDOS → ✔

146. Software licenses allow legal copies → ✔
147. Learning procedural knowledge: Trial-and-error → ✔
148. Medical robot example: Belgian Robot → ✔
149. Shortcut to select all text: Ctrl + A → ✔
150. Editing group has 3 commands → ✔
151. Geometric characteristic matching cannot read handwritten material → ✔
152. Content filtering implements company policies → ✔
153. Matching geometric techniques used in Optical Image Recognition → ✔
154. Electronic theft includes online scam → ✔
155. Common forms of data mining: 2 (class description, class discrimination) → ✔
156. COPPA: controls kids' online data → ✔
157. Text files encoded in ASCII or Unicode: Sequential files → ✔
158. Actions based on environment knowledge: Intelligent action → ✔
159. Ribbon has 3 types of commands → ✔
160. Plagiarism is a major problem in Education → ✔
161. Data comes from All of the above → ✔
162. Security guard between internet & LAN: Firewall → ✔
163. Ctrl + Y: Redo → ✔
164. Ctrl + Z: Undo → ✔
165. Step 2 in understanding image characteristics → ✔
166. Intelligent systems research: Engineering track → ✔
167. Justify option: Paragraph group → ✔
168. Bullets option: Paragraph group → ✔
169. Strike-through option: Font group → ✔
170. Hyperlink default color: Blue → ✔
171. Format Painter is in Clipboard group → ✔
172. Understanding image characteristics → Image analysis → ✔
173. Undo → Ctrl + Z → ✔
174. Belgian Pepper Robot works in Hospitals → ✔
175. Bullet options → Bullet Library → ✔
176. Software licenses → Proprietary, Free, Open Source → ✔
177. Proofing group → Review Ribbon → ✔
178. Preformatted text boxes → Text Box (Insert Ribbon) → ✔
179. DOCTOR program by Joseph Weizenbaum → ELIZA → ✔
180. Paper used by Americans/year → 85 million tons → ✔
181. Parent/child phone contract → Contract → ✔
182. Pages option → Insert Ribbon → ✔
183. Initial column(s) in MS Word table → One → ✔
184. Patent duration → 20 years → ✔
185. Content filtering matches character strings → ✔
186. Procedural knowledge → learning "How" → ✔
187. Declarative knowledge → learning "What" → ✔
188. Charts in MS Word → Illustration group, Insert Ribbon → ✔
189. Shortcut to insert end note → Ctrl + Shift + D → ✔
190. Shortcut to insert footnote → Alt + Ctrl + F → ✔
191. Main component of syntactic analysis → Parsing → ✔
192. Command to go immediately to a page → Go To → ✔
193. Turing test for ELIZA → 5 minutes → ✔

194. Each natural language statement can have multiple meanings → ✔
195. Shortcut for paste → Ctrl + V → ✔
196. Gramm-Leach-Bliley Act → financial institutions must protect private info → ✔
197. Meaning of a statement depends on context → ✔
198. Copyright applies to → Dramatic, Artistic, Musical works → ✔
199. Content Risks include → Harmful Advice → ✔
200. Information security Risks → Malicious Code → ✔
201. Sequential files → ideal for ordered processing → ✔
202. Selecting hidden shapes → Select Objects → ✔
203. Multiple paste options exist → ✔
204. Reports received at home via email → Computer Science → ✔
205. Font group includes → Typefaces, Highlight, Font Size → ✔
206. Attacks to prevent website access → Servers → ✔
207. Statement meaning depends on communication manner → ✔
208. Paragraph group option → Shading → ✔
209. Arial → famous Font Family → ✔
210. Prevent others from editing → Block Authors → ✔
211. Continuous device use can cause → Radiation → ✔
212. Data collection can be subtle or obvious → ✔
213. Software protection → Copyright → ✔
214. Header is applied → Every page → ✔
215. Each programming statement has → Only one meaning → ✔
216. AI helps to make → Robots → ✔
217. Government restrictions on wiretaps → ECPA → ✔
218. Equation 2^3 → use Superscript → ✔
219. Computer science impacts environment → Positive & Negative → ✔
220. Shortcut for Cut → Ctrl + X → ✔
221. Turing gave a percentage of machine to pass Turing test → 2000 → ✔
222. Paste option → Home Ribbon, Clipboard group → ✔
223. Communication improves → With computer science → ✔
224. Eyes not meant for long → 2D focus → ✔
225. Home Ribbon groups → Paragraph, Font, Clipboard → ✔
226. Microsoft Office includes → Word → ✔
227. MS Word is an example of → Word processor → ✔
228. Content filters are part of → Internet Firewalls → ✔
229. Default MS Word theme → Office → ✔
230. Table group → Insert Ribbon → ✔
231. Decrease indent → Paragraph group → ✔
232. Insert tab groups → Pages → ✔
233. End page at specific point → Page Break → ✔
234. Computer science improves faster response times → Emails, Messaging, Chat → ✔
235. Access to forbidden literature → Computer → ✔
236. Style groups in MS Word → Shading → ✔
237. Data sources → Emails, Personal software, Passwords → ✔
238. Gaming addiction causes → Financial problems → ✔
239. Content filtering serves → Security, Social, Transaction → ✔
240. Style group in Home Ribbon → Fourth group → ✔

241. Line spacing → Paragraph group → ✔
242. Self-driven cars → AI → ✔
243. Legal notations for digital ownership → Copyrights → ✔
244. Fifth group in Home Ribbon → Editing → ✔
245. Find option includes → Find, Advance Find, Go To → ✔
246. Shortcut to select all → Ctrl + A → ✔
247. Turing test result for DOCTOR program → Passed → ✔
248. Pre-written math expressions → Symbol → ✔
249. Collected information potentially available to → Marketing firms, Political parties, Employers → ✔
250. Linguistic field direction → Theoretical → ✔
251. CAN-SPAM Act applies in → US → ✔
252. Data mining uses → Static data warehouses → ✔
253. Easy access to online health centers → Computer Science → ✔
254. Theoretical track is part of → AI Domain → ✔
255. Simulation-oriented methodology → Theoretical → ✔
256. Style group in Home Ribbon → Fourth group → ✔
257. Line spacing → Paragraph group → ✔
258. Self-driven cars → AI → ✔
259. Legal notations → Copyrights → ✔
260. Fifth group in Home Ribbon → Editing → ✔
261. Find option includes → Find, Advance Find, Go To → ✔
262. Shortcut to select all → Ctrl + A → ✔
263. Turing test result of DOCTOR → Passed → ✔
264. Access to private info → Increased → ✔
265. Pre-written math expressions → Symbol → ✔
266. Collected info potentially available to → Marketing, Political, Employers → ✔
267. Linguistic field → Theoretical → ✔
268. CAN-SPAM Act → US → ✔
269. Data mining on data warehouses → Static → ✔
270. Easy access to online health centers → Computer Science → ✔
271. Theoretical track → AI domain → ✔
272. Simulation-oriented methodology → Theoretical → ✔
273. Performance-oriented methodology → Engineering → ✔
274. Default document view → Print Layout → ✔
275. Read Mode → Maximizes window, removes toolbars → ✔
276. Drop Cap → Specially formatted letter → ✔
277. Bookmarks → Track reading → ✔
278. Text box used for → Performing text layout → ✔
279. Join → Combine different relations → ✔
280. Push → Insert at top of stack → ✔
281. Nesting conditional statements → Conditional inside another conditional → ✔
282. Machine chance to pass Turing test → 30% → ✔
283. Internet processes can interact as → Client, Server, Peer → ✔
284. Not an inline element of HTML → `<ul>` → ✔
285. Adaptive dictionary encoding → Dynamic dictionary encoding → ✔
286. NOT of OR operation → NOR → ✔
287. Importance of software design → Efficiency → ✔

288. GIF encodes → 256 colors → ✔
289. Stage where system interacts with outside → Requirement Analysis → ✔
290. Rational Unified Process created by → IBM → ✔
291. HTTP transfers → Browser & Web Server → ✔
292. Anonymous attacks → Cyber Bullying → ✔
293. Content Risk → Illegal Content → ✔
294. Software licensing terms include → All (Fair Use, Limitations of Liability, Warranties & Disclaimers) → ✔
295. Conserves battery power → Embedded System → ✔
296. Recursion level to find 899 in array (2,5,7,99,899) → Level 1 → ✔
297. Tracks in mass storage → Outer → ✔
298. Sort on multiple columns in Excel → Basic Sort → ✔
299. Excel formula output → 8 → ✔
300. Software validation → Evaluation process → ✔

---

301. Imperative paradigm → Procedural Paradigm ✔
302. Computer translator → System Software ✔
303. Medical robot assists person → 40 times/day ✔
304. Robots take blood more accurately than humans ✔
305. HTML → Hyper Text Markup Language ✔
306. XML → Extensible Markup Language ✔
307. MS Access form provides → Enter new record & navigate existing ✔
308. IP address length → 32-bits ✔
309. Stored program concept → Program in main memory ✔
310. Software analyst → Involved in requirements & design ✔
311. Symbol used for grouping in pseudo code → () ✔
312. Computer science allows hospitals to be managed → Efficiently ✔
313. Message passes through → Two-layer architecture ✔
314. EPIC research center → Non-profit ✔
315. USB & FireWire → Short-distance high-speed data transfer ✔
316. Steps that define a task → Algorithm ✔
317. Home tab in Excel & PowerPoint → Similar ✔
318. Valid sort in Excel → Basic Sort ✔
319. Equally spaced paragraph → Justify ✔
320. Max points per slide → 3 ✔
321. Not a page margin type → Centre ✔
322. Table templates → Insert Table ✔
323. Add Shapes → Illustration group ✔
324. Commit point → Transaction log step ✔
325. Columns in a relation → Attributes ✔
326. Stepwise refinement → Top-down approach ✔
327. Equation in Word → A=r^2 ✔
328. Page group options → Page Break ✔
329. Rows in Excel → Numbers ✔
330. Modify a style → Settings ✔
331. Secure data can be accessed via → Email ✔
332. Act prevents wrongful disclosure → Video Privacy Protection ✔

333. Booting → OS loaded from mass storage to main memory ✔
334. Importance of software design → Quality ✔
335. Therac-25 → X-ray software failure ✔
336. Symbol << → Operator Extraction ✔
337. MS Access forms → Enter new record & navigate existing ✔
338. LISP statement `List atom` output → (depends on atom test) ✔
339. ICANN → Internet Corporation for Assigned Names and Numbers ✔
340. False relational comparison → 0 ✔
341. How many types executed → 5 ✔
342. Not SDLC phase → Problem Identification ✔
343. Software engineering concerns → All aspects of software production ✔
344. Stakeholders → Government agencies ✔
345. Object properties → Class ✔
346. Alternative to translator → Interpreter ✔
347. Recurring problems handled by pre-developed modules → Design Pattern ✔
348. Structure chart functions → Arrows ✔
349. Loosely coupled systems → Factory design system ✔
350. True parallel processing → Multiple CPU cores ✔
351. Invalid data type → HTML ✔
352. Incremental model → Iterative model ✔
353. Control structure iterates instructions → Loop ✔
354. Initialize 3-element integer array → `int arr[3]={1,2,3}` ✔
355. Structure chart functions → Arrows ✔
356. Object-oriented object functions → Method ✔

Most Important Quiz Mcqs

---

1. Style groups in MS-Word can have:
Functions ✔

---

2. Control structure iterates a set of instructions based on the provided condition is called:
Conditional ✔

---

3. Information security risks include:
Online scam ✔

---

4. In Ada, the term used for parallel processing is:
Thread ✔

---

5. The option of bullets is in group:
Paragraph ✔

---

6. An analogy to the fact that the development process was allowed to flow in only one direction is called:
Waterfall model ✔

---

7. Content filtering is used to implement company policies related to usage of:
Information system ✔

---

8. 5%2 would give:
1 ✔

---

9. Which symbol is used at the end of the line to separate statements in many imperative languages?
; ✔

---

10. Privacy as "the right to be let alone" was written by:
Samuel D. Warren ✔

---

11. "Displaying Text in Two Columns" feature is in which tab of MS Word?
Page Layout ✔

---

12. _____ refers to data items that can take on only the values true or false:
Boolean ✔

---

13. If we want to end a page at a specific point and move to the next page we can use:
Page break ✔

14. AI is helping to make:
Robots ✔

15. The contrast of the Declarative paradigm is:
Imperative paradigm ✔

16. Table group is a part of _____ ribbon:
Insert ✔

17. Attacks can be made to prevent access to websites by crashing:
Servers ✔

18. Which statement is used for output in C++?
cout<< ✔

19. A model which represents the shift away from strict adherence to the waterfall model is:
Iterative model ✔

20. A rapidly expanding subject closely associated with database technology, which consists of techniques for discovering patterns in collections of data is:
Data mining ✔

21. In the case of highly standardized languages, compiler designers often provide features sometimes called:
Language extension ✔

22. The system's interface should be designed for:
All of above ✔

23. Which might be used to convert high-level language instructions into machine language?
An interpreter ✔

24. True parallel processing requires:
Multiple CPU cores ✔

---

25. Which technique is used in software testing that examines functionality without peering into internal structures?
Black box testing ✔

---

26. Which robot is used in the medical field?
Belgian robot ✔

---

27. In modern computer applications, problems are more easily solved in the context of:
Technology ✔

---

28. Turing gave a percentage of a machine that will have a chance to pass the Turing test in year:
2000 ✔

---

29. In Belgian Pepper Robot works in:
Hospitals ✔

---

30. Meaning of a statement in natural language depends on its:
Style ✔

---

31. Shortcut to insert an endnote in MS Word is:
Alt + Ctrl + D ✔

---

32. Stakeholders can be:
Government agencies ✔

---

33. Gaming addiction can cause problems:
Environmental ✔

---

34. Illustration is a part of ribbon:
Insert ✔

35. DBMS stands for:
Database management system ✔

---

36. Output of the following code?

```
int main() {
  int x = 9;
  while(x>0)
    x = x-1;
  cout << x;
  return 0;
}
```

0 ✔

---

37. In context of health, computer sciences have impacts:
Both positive & negative ✔

---

38. If the result after comparison of two variables in relational operators is False, then if statement returns value:
0 ✔

---

39. If the result after comparison of two variables is True, then if statement returns value:
1 ✔

---

40. A mnemonic system for representing programs is collectively called:
Machine language ✔

---

41. Second phase of the development phase of the software development life cycle is:
Bb ✔

---

42. Software testing methodology to develop test data ensuring each instruction is executed at least once is:
White-box testing ✔

---

43. Each statement in natural language can have:
AA ✔

44. Find option includes:
All of above ✔

45. A device that responds to stimuli from its environment is called:
Agent ✔

46. Format painter is in group of:
Design ✔

47. In particular, the chart that indicates the entire game is overseen by a function named:
Control Game ✔

48. The description of the object's properties is called:
Class ✔

49. Editing group has commands:
5 ✔

50. Which one is a unary operator?
NOT ✔

51. Quick Access Toolbar by default includes:
All of these ✔

52. The option of strike through is in group:
Font ✔

53. Equal to sign is:
= ✔

54. Actions according to environment knowledge are:
Reflex action ✔

55. To retrieve information about an employee, we must select the _____ with the appropriate identification attribute value from the EMPLOYEE relation:
Table ✔

56. How many common forms of data mining?
Two ✔

57. The result of _____ step in the entire development process should be tested for accuracy:
Each intermediate step ✔

58. From a lay-person's perspective, design is often equated with:
How ✔

59. The amount of paper Americans use in a year is:
85 million tons ✔

60. Insert tab can have group:
Pages ✔

61. Writing programs in a machine language is a tedious task that often leads to errors that must be located and corrected is called:
Debugging ✔

62. We have paste options:
Multiple ✔

63. A significant example of iterative techniques is:
Rational unified process ✔

64. A software license is a _____ between the owner and user of a software product that grants the user certain permissions without transferring ownership rights to the intellectual property:
Legal agreement ✔

65. Page group includes options:
Cover page ✔

---

66. The syntax for using && is:
Cmd1 && cmd2 ✔

---

67. SmartArt was introduced in MS Word version:
2007 ✔

---

68. When we apply a header, it is shown at:
Start page of document ✔

---

69. A translator which takes assembly language program as input & produces machine language code as output is known as:
Assembler ✔

---

70. Theoretical track is a part of:
Declarative knowledge ✔

---

71. In MS-Word different type of effects on text can be applied with:
All of given ✔

---

72. While _____ and software license agreements provide legal avenues to inhibit copying and unauthorized use:
Copyrights ✔

---

73. Social sites include:
Twitter ✔

---

74. Correct syntax of an if-else statement is:
If (condition) Statement A Else Statement B ✔

---

75. There we found that a register called a _____ is used to hold the address of the next instruction to be executed:
program counter ✔

---

76. Software Engineering is an engineering discipline concerned with:
All aspects of software production ✔

---

77. Microsoft Office includes:
Word ✔

---

78. In some cases, the data collection process is readily apparent; in others it is:
Subtle ✔

---

79. Access to forbidden literature is because of:
Computer ✔

---

80. _____ are ideal for storing data that will be processed in the order in which the file's entries are stored:
Sequential files ✔

---

81. Change case control is an example of:
Dropdown menu ✔

---

82. A program DOCTOR developed by Joseph Weizenbaum in the mid-1960s is named as:
Eliza ✔

---

83. Information that was once buried in arcane records has become accessible because of:
Database ✔

---

84. Meaning of a statement in natural language depends on the manner in which it is:
Style ✔

---

85. Programming languages are well-designed so that each statement has:
Only ✔

86. _____ is based on real-time factory concept:
Factory pattern ✔

---

87. The fifth group in the Home ribbon is:
Eliding ✔

---

88. Retailers maintain record of their customers:
Purchases ✔

---

89. USA has passed legislation allowing the government to actively monitor citizens in the name of:
National security ✔

---

90. Data mining is practiced on _____ data collections called data warehouses:
static ✔

---

91. The links between _____ in an object-oriented database are normally maintained by the DBMS:
Objects ✔

---

92. In which paradigm is a program constructed by connecting smaller predefined program units?
Functional paradigm ✔

---

93. Int i=1; While(i<=5) { cout<<i; i=i+1; } How many times will the loop execute?
5 ✔

---

94. Paste option is a part of Home ribbon group called:
Clipboard ✔

---

95. Editing group has commands:
3 ✔

---

96. People working in sitting position due to computer science have more chance to develop:
Obesity ✔

---

97. The style group in the Home ribbon is the:
Fourth group ✔

---

98. The sign of modulus is:
% ✔

---

99. _____ deals with designing systems that harmonize with the physical abilities of humans:
Ergonomics ✔

---

100. The communication between people because of computer science has:
Improved ✔

---

101. Content filtering works by matching _____ of characters:
Strings ✔

---

102. Easy access to online health centres is because of:
Database ✔

---

103. A _____ is a collection whose entries have a hierarchical organization similar to that of an organization chart of a typical company:
Tree ✔

---

104. Sophisticated packages designed primarily for the software engineering environment are known as:
DIES ✔

---

105. The default theme of MS Word document is:
Office ✔

---

106. While _____ and software license agreements provide legal avenues to inhibit outright copying and unauthorized use of software:
Copyrights ✔

---

107. The option of justify is in group:
Paragraph ✔

---

108. _____ stages are about developing a solution to the problem:
Design ✔

---

109. A _____ is a description of only that portion of the database pertinent to a particular user's needs:
Subschema ✔

---

110. Which is Boolean operator for logical AND?
& ✔

---

111. Content Risks include:
Harmful Advice ✔

---

112. One operation we might want to perform on a relation is to select _____ possessing certain characteristics and place these selected _____ in a new relation:
tuple, tuple ✔

---

113. In the case of highly standardized languages, compiler designers often provide features sometimes called:
Language extension ✔

---

114. We can add charts in MS Word from group:
Table ✔

---

115. Turing test was proposed in:
1950 ✔

---

116. Act that ranges government restrictions on wiretaps to include transmissions of data is:
ECPA ✔

---

117. Computer science helps in faster response times through:
All of given ✔

---

118. In _____ software tester is aware of the interior structure of the software and uses this knowledge when designing the test:
White-box testing ✔

---

119. The field of artificial intelligence is being pursued along paths:
3 ✔

---

120. Software licenses are:
All of these ✔

---

121. Requiring certain degree of uniformity of the style, size and orientation of symbols is a(n):
CCCC ✔

---

122. The term programming paradigm is a misnomer. A more realistic term would be:
Nontraditional paradigms ✔

---

123. In turn the collected information is potentially available to:
All of these ✔

---

124. Major component of syntactic analysis is:
DD ✔

---

125. We can set line spacing from group:
Paragraph ✔

---

126. In assembly language, instructions like MOV or ADD are called:
OP-Code ✔

127. We have to write an equation with 2 as a number and 3 as its power. Which option can be used for this purpose?
BB ✔

---

128. The imperative paradigm, also known as the Particular machine:
Procedural paradigms ✔

---

129. Third generation language attributes refer to:
Particular machine ✔

---

130. Computer security is also known as:
Cyber-security ✔

---

131. In _____ if two modules interact with the same item of data, then modifications made to one module may affect the other:
Data coupling ✔

---

132. Retailers maintain record of their customers:
Purchases ✔

---

133. Each programming language tends to approach the parallel processing paradigm and have different terminology. In Ada we use term:
Task ✔

---

134. A specific example is the _____ series of standards, which address numerous industrial activities such as design, production, installation, and servicing:
ISO 9000 ✔

---

135. In Object Oriented Paradigm, each object will have its own collection of functions which is known as:
Classes ✔

---

136. Pages is an option in the ribbon:
Insert ✔

137. Learning procedural knowledge usually involves a process:
Trial-and-error ✔

138. A model which represents the shift away from strict adherence to the waterfall model is:
Iterative model ✔

139. Distinction between software engineering and other engineering disciplines is the lack of quantitative techniques, called:
Metrics ✔

140. The term cohesion refers to this:
logical cohesion ✔

141. Ethical issues are related to:
Moral principles ✔

142. Modules come in a variety of:
Forms ✔

143. _____ begins the paragraph with a large letter that spills down into the text:
Drop cap ✔

144. Plagiarism is a major problem in:
Education ✔

145. Shortcut key of cut is:
Ctrl+x ✔

146. Which intermodule coupling occurs when a module passes control of execution to another, as in a function call?
control coupling ✔

147. Process of understanding what the characteristics of images means refers to:
Analysis ✔

---

148. This _____ view of the database is called a database model:
Conceptual ✔

---

149. If we want to end a page at a specific point and move to the next page we can use:
Page end ✔

---

150. A file's _____ is normally stored as a separate file on the same mass storage device as the _____:
index, indexed file ✔

---

151. Declarative paradigms system is designed for:
All of these ✔

---

152. A _____ is a pre-developed model for solving a recurring problem in software design:
Design pattern ✔

---

153. The conceptual shape or arrangement of data is known as:
Data structure ✔

---

154. Which of the following languages is related to functional paradigm?
Python ✔

---

155. This conceptual view of the database is called a _____ model:
Database ✔

---

156. Electronic Theft includes:
Cyber bullying ✔

---

157. Control structure iterates a set of instructions based on the provided condition called:
Loop ✔

158. Shortcut key of paste is:
Ctrl+v ✔

159. Which of the following is not a relational operator?
!= ✔

160. We can highlight a text from group:
Font ✔

161. Reports can be received at home through email because of advancement in:
Artificial intelligence ✔

162. CAN-SPAM Act applies in:
US ✔

163. In particular, the chart that indicates the entire game is overseen by a function named:
Controlgame ✔

164. A translator which takes assembly language program as input & produces machine language code as output is known as:
Assembler ✔

165. Which of the following is a social issue?
All of given ✔

166. A rapidly expanding subject that is closely associated with database technology is _____, which consists of techniques for discovering patterns in collections of data:
Data mining ✔

167. Assignment statement is:
= ✔

168. The term _____ refers to a collection of data that is multidimensional in the sense that internal links between its entries make the information accessible from a variety of perspectives:
Database ✔

---

169. The statement `z = x + y` shows:
The sum of X and Y is assigned to the variable Z ✔

---

170. The Turing test result of program DOCTOR developed by Joseph Weizenbaum was:
Ambiguous ✔

---

171. A process which is used by the software industry to design, develop and test high-quality software is known as:
Software life cycle ✔

---

172. Shortcut key to select the whole text in a document:
Ctrl+a ✔

---

173. In the case of the incremental model, these prototypes evolve into the complete, final system, a process known as:
Evolutionary prototyping ✔

---

174. Microsoft Office includes:
Word ✔

---

175. Design ribbon can have:
Page border ✔

---

176. The option of strike through is in group:
Font ✔

---

177. The field of artificial intelligence is being pursued along paths:
2 ✔

---

178. Design phase is followed by:
Implementation ✔

---

179. The point at which all the steps in a transaction have been recorded in the log is called the:
Commit point ✔

---

180. "Displaying Text in Two Columns" feature is in which tab of MS Word?
Page Layout ✔

---

181. Command that can immediately go to a page or any marked location within your document:
Go to ✔

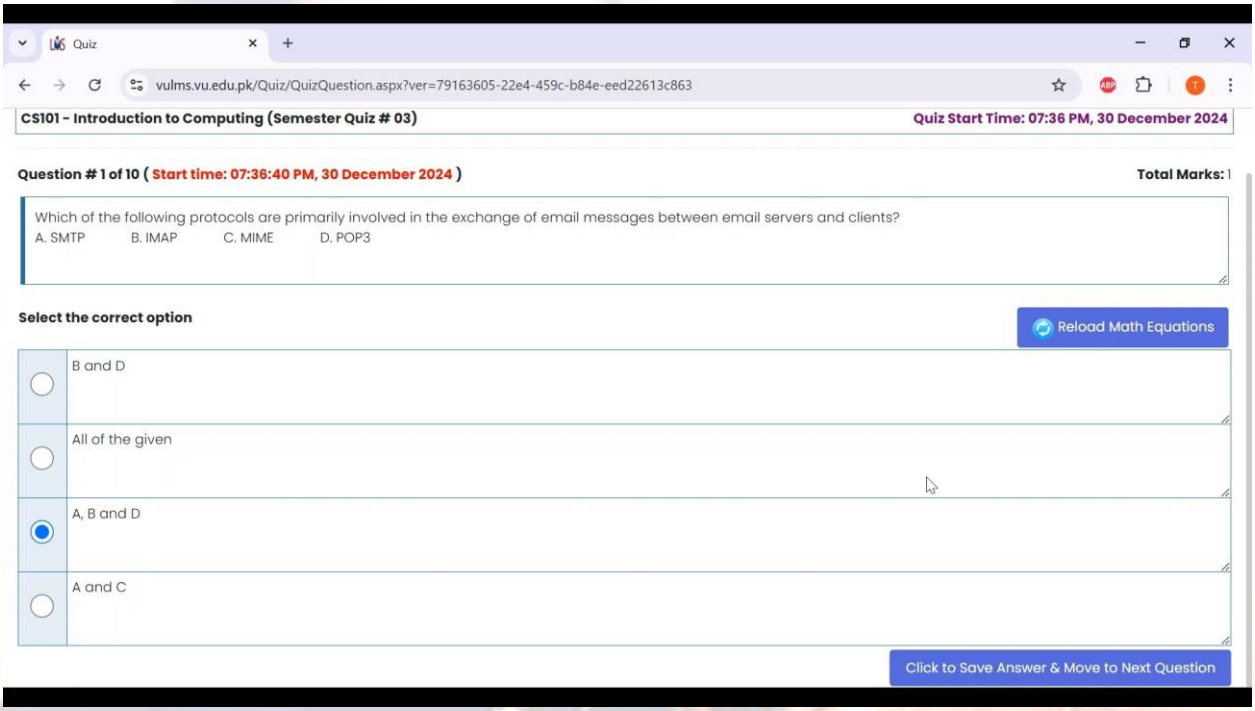

---

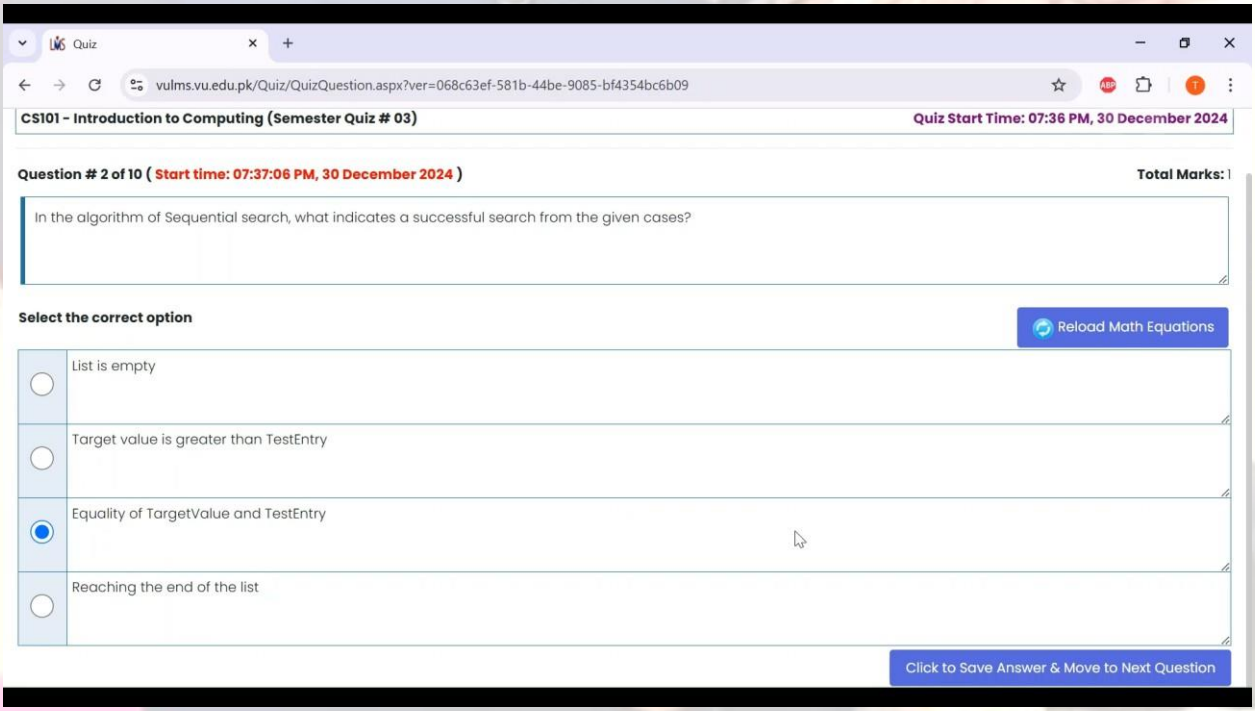

182. We can customize indentation with:
Paragraph group ✔

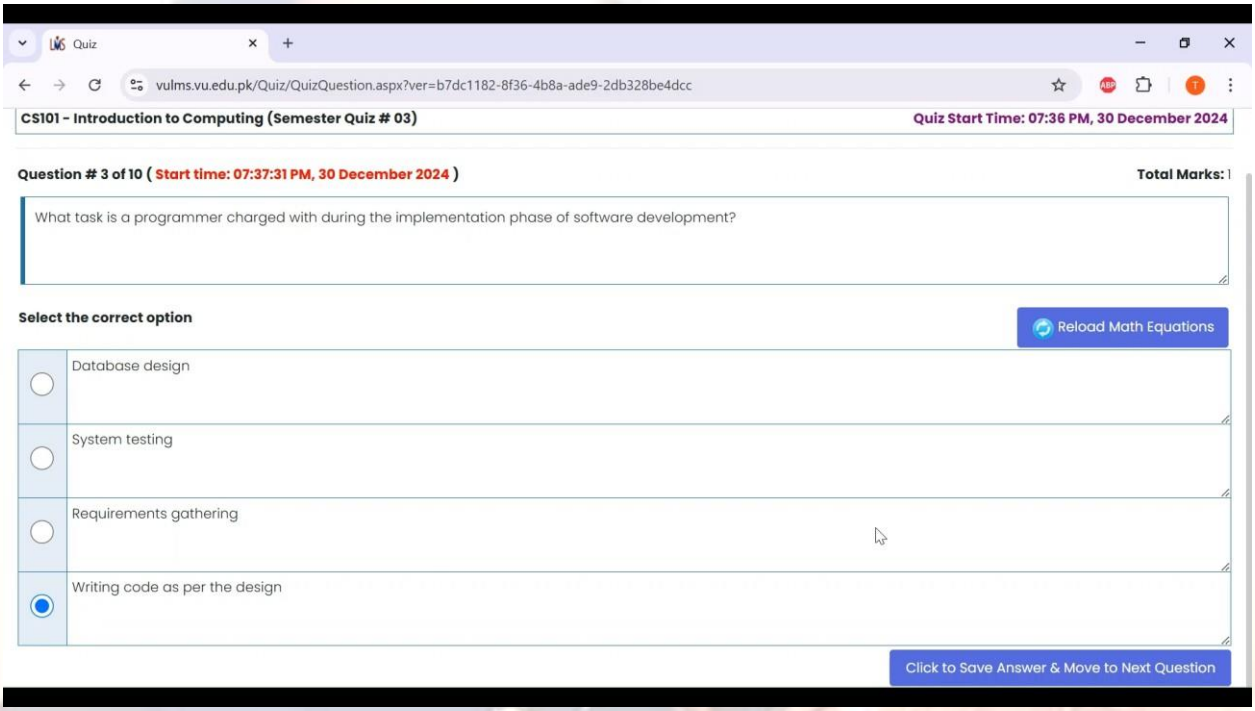

---

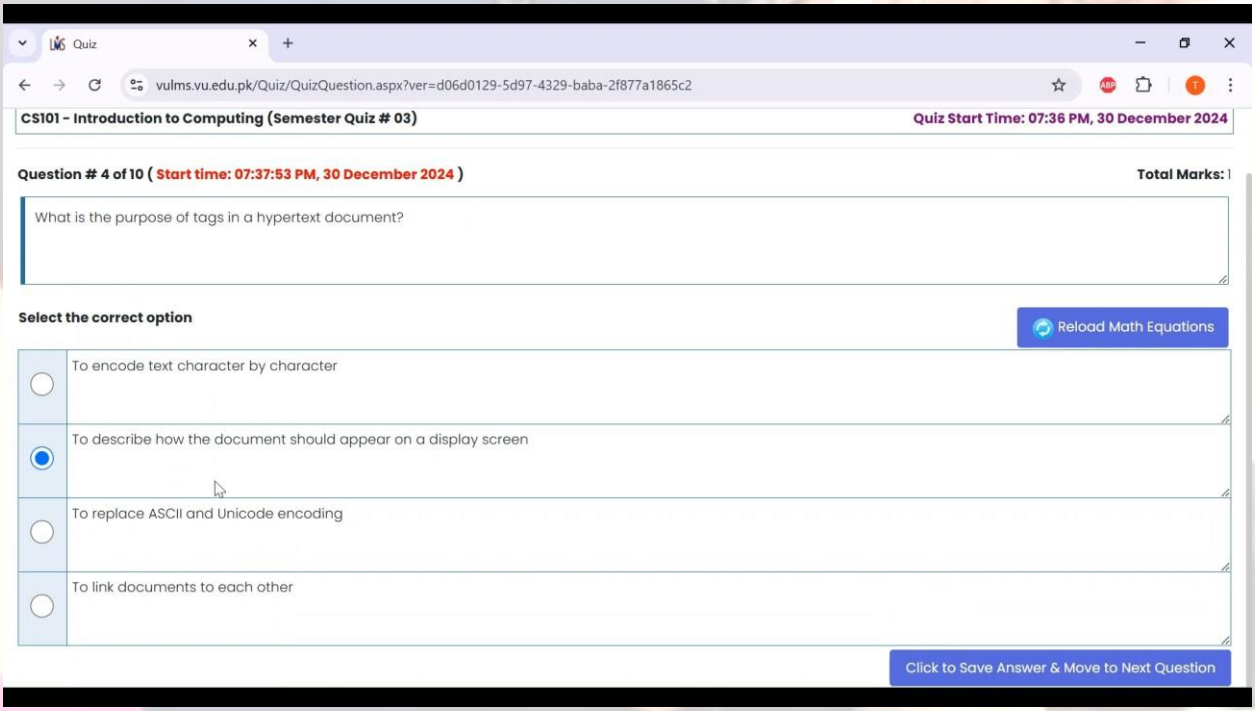

183. Ctrl+y is used for:
Redo ✔
