structural as

Topic-163: Structural Syllabus

©Copyright Virtual University of Pakistan

Krahnke (1987) considers the structural syllabus as the most familiar syllabus type. It has a long history, and a major portion of language teaching has been carried out using some form of it. The structural syllabus is based on a theory of language that assumes that the grammatical or structural aspects of language form are the most basic or useful. He further holds that a structural (or formal) syllabus is one in which the content of language teaching is a collection of the forms and structure (usually grammatical) of the language being taught.

Rationales for the formal syllabus

Breen (1987) sets forth three rationales:

- The first argument is that it is well established and it is informed by a long tradition of linguistic analysis.
- The second major justification for the formal syllabus is that it presents learners with a subject matter which is systematic and rule-governed. When we learn something new, we can begin to see patterns and regularities within it and that will reduce the 'learning load' it (i.e. new learning) demands of us.
- A third justification for the formal syllabus is that because the linguistic system is analysable in certain ways, these analytical categories or schemas can be incorporated in a plan for teaching the system, and further it may be that the same analytical categories or schemas make it easier for the

ENG519 - Curriculum Design (Quiz No.3)

Question # 9 of 10 (Start time: 08:32:02 AM, 02 July 2024)

Who is at the center of writing-last and storyline solution in sequencing the activities?

Select the correct option

- Teacher
- Designer
- Syllabus
- Learner

writing-la

elements of a story line; emotion and character so that students do not feel detached from it. The focus of this approach is on form and meaning of the language.

Topic-179: Appropriate Design: Criticism on Materials

There is criticism leveled against writing-last and storyline solution approach. These approaches are primarily taken as learner-as-observer syndrome because learners are always at the center of it. For example, in writing-last solution, Low (2006) states that if learners are unable to relate what is presented in a unit, s/he can be suffering from language learning syndrome. Low has presented a solution for this problem. He projects to use models and simulations so that students can become more attached with what is being taught. The second approach that is used to sequence the activities of a unit is a stor situation. If the students are unable to identify strongly with the characters or the emotions, th important to use creative exploitation techniques or role-play exercises

Topic-180: Appropriate Design: Coherence of Course Units

Coherence is a systematic approach to aligning and sequencing specific ideas and the depth to which those ideas are examined, in order to help the development integrated understanding in learners. Coherence among course units while designing material is very important. Designing a balance between units is not straightforward; however, it is a blend of imagination, insight, understanding and analytical reasoning. A material designer has to be very critical and practical while designing material for a language course. Coherence among course units ensures more involvement of the students. A coherent curriculum should build ideas across time and disciplines by connecting ideas between relevant topics and by aligning the development of instructional materials, instruction, and assessment.

Topic-181: Beyond Language Learning: Perspectives on Materials Design Introduction

Material design is defined by Pardo and Tellez (2009) as: "It includes adaptation, creation of learning and teaching exercises; a task, an activity, a lesson, a unit or a module composed of several units." The main focus of material design is the outcome, i.e., how material affects learner's perceptions and perspective? It is important to keep in mind that how actual student will react to the material. It is

Question # 8 of 10 (Start time: 08:31:33 AM, 02 July 2024)

Which of the following syllabuses focuses on how syllabus is made instead what should be in it?

Select the correct option

- State Syllabus
- Un-negotiated Syllabus
- Negotiated Syllabus
- All of the given choices

Click to Save A

what shoul

Topic-170: Introduction to Negotiated Syllabus

A negotiated syllabus involves the teacher and the learners working together to make decisions at many levels of the curriculum design process. Negotiated syllabus is also called "process syllabus" (Breen, 1987). The word process in the term 'process syllabus' indicates that the important feature of this type of syllabus is that it focuses on how the syllabus is made rather than what should be in it.

Clarke (1991) sees the interest in negotiated syllabuses arising from humanistic methodologies like community language learning which are very learner-centered, needs analysis which focuses o learners' needs, work in individualization and learner autonomy, and learner strategy research which sees the learner playing a central role in determining how the language is learned. These are clearly strong reasons for having a negotiated syllabus. Breen and Littlejohn (2000) list situations where a negotiated syllabus is almost unavoidable:

- Where the teacher and students have different backgrounds.
- Where time is short and the most useful choices must be made.
- Where there is a very diverse group of students and there is a need to find common ground.
- Where initial needs analysis is not possible.
- Where there is no course book.
- Where the students' past experiences must be part of the course.
- Where the course is open-ended and exploratory.

Topic-171: An Example of a Negotiated Syllabus

The class is a group of adult graduate students preparing for post-graduate university study through the medium of English. They come from a wide variety of countries and will do their post-graduate study in a wide range of disciplines

ENG519 - Curriculum Design (Quiz No.3)

Question # 3 of 10 (Start time: 08:28:04 AM, 02 July 2024)

Material designer ensures a coherent connection between lessons and_____.

Select the correct option

- assessments
- exercises
- curriculum
- syllabus

material desig

education ministry, he might be more concerned about how course matches the syllabus. So the position of the material designer is very sensitive. Material designers are interested in two things: 1) What sort of activities are likely to promote effective performance and learning in language classroom? 2) How such activities might be constrained or elaborated, and organized in terms of a plausible course?

Topic-177: Appropriate Design: Feeding and Bleeding of Course Units

It is important to think about the term "course unit". What is the difference between course unit and lesson? What approaches are employed to structure a course unit? Course unit actually denotes to the learning tasks included in a particular language syllabus. There are various types of course units. Traditional unit structure employed quiet an orthodox approach towards the structure of course units.

Traditional unit structure:

- Presentation
- Controlled exploitation
- Free exploitation
- Synthesis

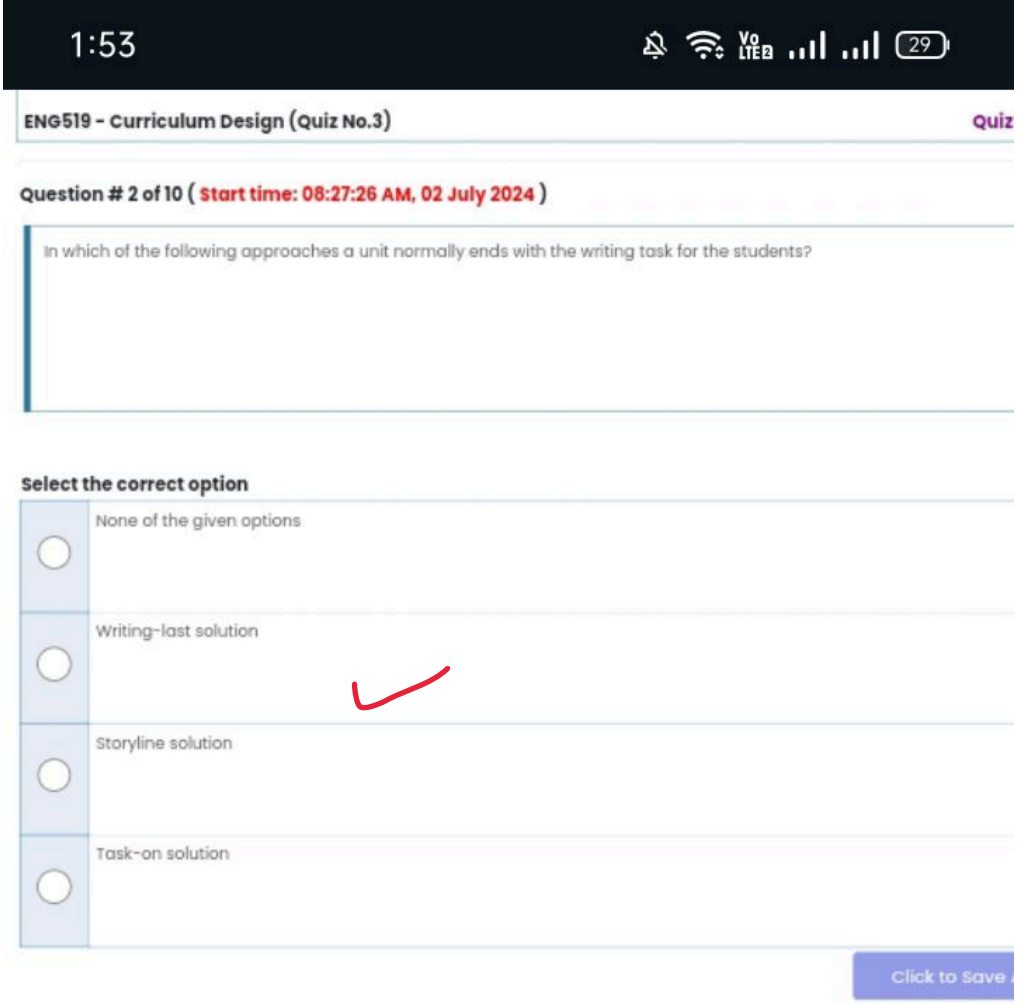

There is an important dimension to the relationship between presenting material and designing exercises. Material designers need to ensure that the exercises are presented in a manner that shows coherent connection between various lessons.

128

Topic-178: Appropriate Design: Sequences of Activities in Course Units

There are various approaches to sequence the activities in a language course. Graham Low (2006) suggests two key approaches towards sequencing the activities in a course. The first one is the *writing-last solution,* in which a unit normally ends with the writing task for the students. The emphasis of this approach is primarily on acquiring the grammatical items. There is a slight problem attached with this approach towards sequencing the activities in a course unit. If the unit ends with the writing task, then the importance of listening and speaking activity is ignored. The solution to this approach is multiple presentation designs which involve presenting the four strands of language learning that are reading, writing, listening and speaking. The second approach is *storyline solution,* which creates a harmony throughout the unit while sequencing the activities in storyline situation. It is important to be aware of the

Question # 1 of 10 (Start time: 08:26:43 AM, 02 July 2024)

Language Syllabus encompasses both _____ and functional aspects of the language.

Select the correct option

- grammatical
- situational
- notional
- structural

encompass

acquired by the learner must come from sources other than formal teaching (Lewis, 2002).

Cultural syllabus

Whether culture should be taught as a separate subject is a controversial issue in the field second language education. As it can be concluded that culture and language are inseparable and culture learning must be an integral part of language learning. Along the same line, Brown (2007) maintains that, "A language is part of a culture and culture is part of language; the two are intricately interwoven so that one cannot separate the two without losing the significance of either language or culture".

Stern (1983) proposes a four-dimensional model in which he integrates four major areas or "syllabi": 1) Language Syllabus encompassing both structural and functional aspects of the language 2) Communicative/Experiential Syllabus which specifies "fields of experience" for project-based language activities; 3) the Culture Syllabus that contains topics and applications for the development of socio-cultural knowledge and awareness. A cultural syllabus often addresses the non-verbal as well as the verbal components of language and how these may be incorporated into language lessons by teachers.

122

Merits

Fleet (2006) enumerates the benefits of a cultural syllabus as follows:

- It increases communicative competence. Culture, as a part of the language syllabus, is instrumental in enhancing communicative competence. Peterson and Coltrane (2003) assert that "in order for communication to be successful, language use must be associated with other culturally appropriate behaviour".

ENG519 - Curriculum Design (Quiz No.3)

Question # 9 of 10 (Start time: 09:58:00 AM, 02 July 2024)

Which of the following syllabuses does not start from the first day of class?

Select the correct option

- Content Syllabus
- State Syllabus
- Negotiated Syllabus
- Un-negotiated Syllabus

Click to Save

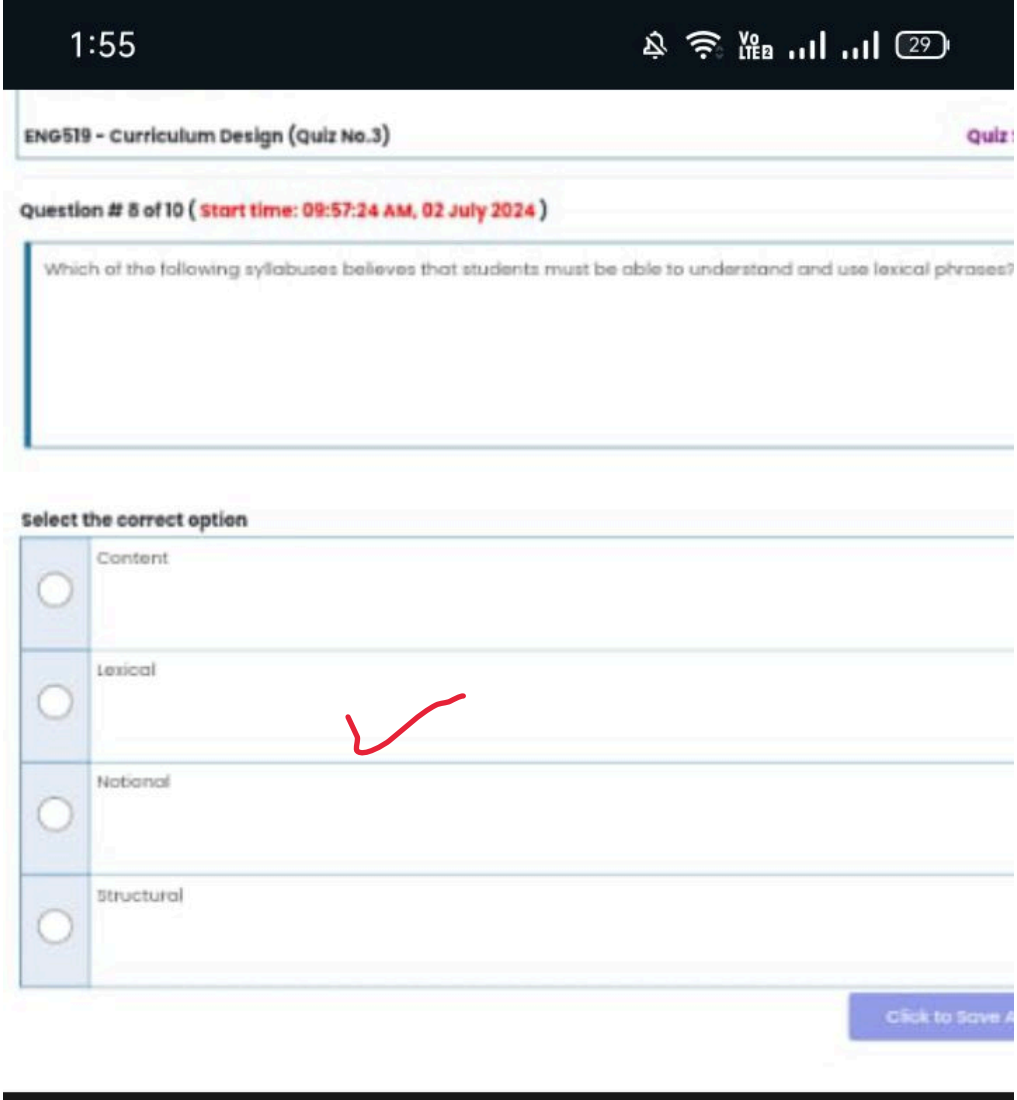

First day

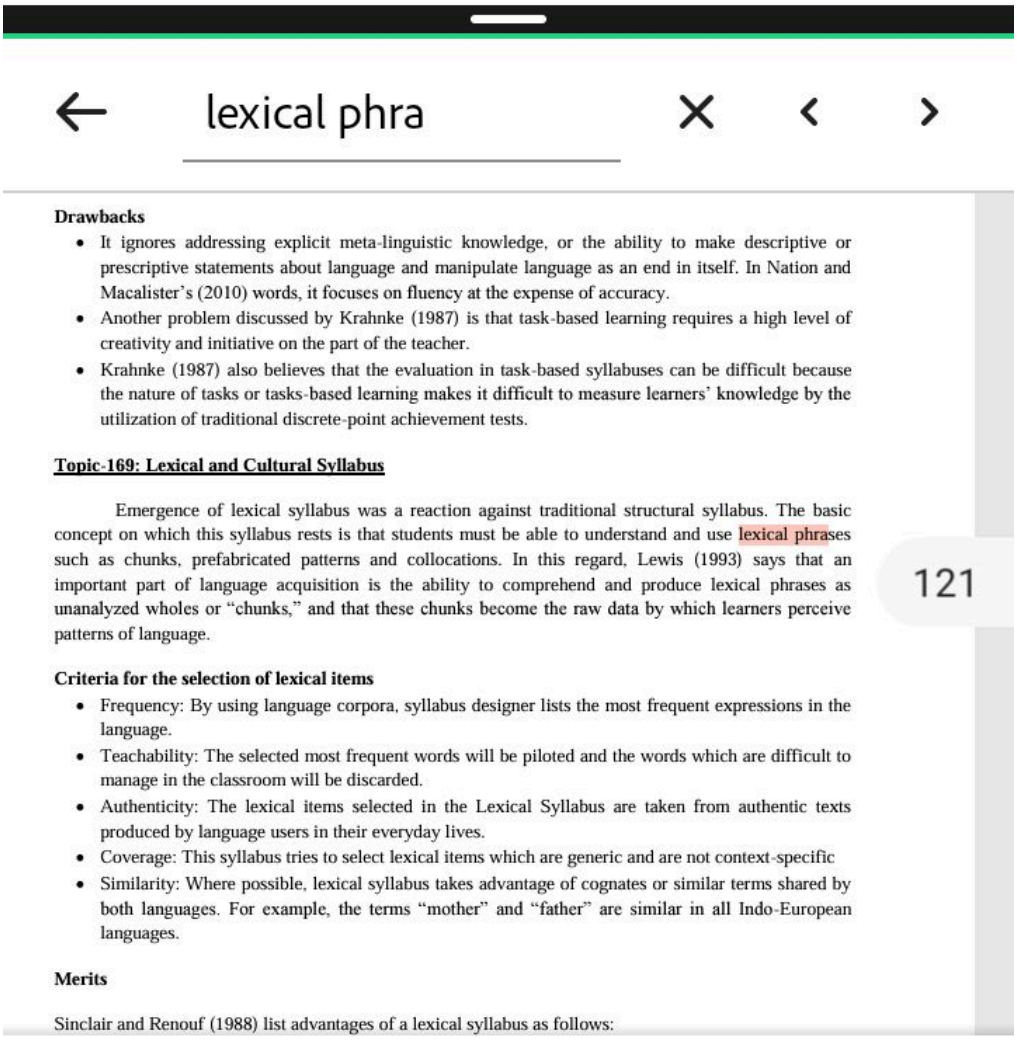

This is a somewhat conservative example of a negotiated syllabus. It is conservative or cautious because the class did not start with a negotiated syllabus from the very first day of class. There were several reasons for this. First, many of the learners came from backgrounds where teachers are highly respected and would feel very uncomfortable telling the teacher what to do. In the first two weeks the learners can come to realize that the teacher can be trusted and that it is reasonable to negotiate with hi Second, most of the learners had not experienced a pre-university course before and so the teacher wani to show them some of the range of goals and activities available, several of which might be new to them. This initial time of experience would inform and enrich the learners' later negotiations because they would have more to draw on. Third, the teacher wanted to show what he saw as important for the learners and what he taught well. This was partly with the hope of influencing the later negotiation. Fourth, the teacher wanted to develop credibility with the class before passing much of the control to them.

After much trial and error, negotiation of a MA teaching methodology course was best done by presenting course members with a draft syllabus in which some items were non-negotiable, but in which there were many items and procedures (methods of learning, assignments, etc.) that were negotiable. Adding to the draft necessarily involved removing something from it to provide a place for the new topic. This use of a draft syllabus satisfied course members who felt uncomfortable with a completely negotiated syllabus. It also made negotiation more focused and efficient, and dealt very effectively with the wide range of experience (or lack of it) that course members brought to the course.

Topic-172: Requirements for a Negotiated Syllabus

Breen (1987) describes the decisions to be negotiated in a negotiated (process) syllabus and the materials needed to make it work.

Drawbacks

- It ignores addressing explicit meta-linguistic knowledge, or the ability to make descriptive or prescriptive statements about language and manipulate language as an end in itself. In Nation and Macalister's (2010) words, it focuses on fluency at the expense of accuracy.
- Another problem discussed by Krahnke (1987) is that task-based learning requires a high level of creativity and initiative on the part of the teacher.
- Krahnke (1987) also believes that the evaluation in task-based syllabuses can be difficult because the nature of tasks or tasks-based learning makes it difficult to measure learners' knowledge by the utilization of traditional discrete-point achievement tests.

Topic-169: Lexical and Cultural Syllabus

Emergence of lexical syllabus was a reaction against traditional structural syllabus. The basic concept on which this syllabus rests is that students must be able to understand and use lexical phrases such as chunks, prefabricated patterns and collocations. In this regard, Lewis (1993) says that an important part of language acquisition is the ability to comprehend and produce lexical phrases as unanalyzed wholes or "chunks," and that these chunks become the raw data by which learners perceive patterns of language.

Criteria for the selection of lexical items

- Frequency: By using language corpora, syllabus designer lists the most frequent expressions in the language.
- Teachability: The selected most frequent words will be piloted and the words which are difficult to manage in the classroom will be discarded.
- Authenticity: The lexical items selected in the Lexical Syllabus are taken from authentic texts produced by language users in their everyday lives.
- Coverage: This syllabus tries to select lexical items which are generic and are not context-specific
- Similarity: Where possible, lexical syllabus takes advantage of cognates or similar terms shared by both languages. For example, the terms "mother" and "father" are similar in all Indo-European languages.

Merits

Sinclair and Renouf (1988) list advantages of a lexical syllabus as follows:

1:55

content of the lang

- Another shortcoming can be ascribed to grading. White (1988) states that there are no clear-cut criteria for grading of functions and it mainly depends on the material designer's intuition.

Topic-166: Skill-based Syllabus

The skill-centered approach to course design has widely been applied in a number of countries, particularly in Latin America. Students in universities and colleges in Latin America have the limited but important need to read subject texts in English, because they are unavailable in their mother-tongue. As Richards (2001) puts it, in a "skill-based syllabus", the content of the language teaching is a collection of

©Copyright Virtual University of Pakistan 11

specific abilities that may play a part in using language. Skill-based syllabi group linguistic competencies (pronunciation, vocabulary, grammar, and discourse) together into generalized types of behavior, such as listening to spoken language for the main idea, writing well-formed paragraphs, giving effective oral presentations, and so on. The primary purpose of skill-based instruction is to learn the specific language skill. A possible secondary purpose is to develop more general competence in the language learning. Krahnke (1987) defines a skill as a specific way of using language that combines structural and functional ability but exists independently of specific settings or situations.

Underlying theories of skill-based syllabus

As Richards (2001) puts it "approaching a language through skills is based on the belief that learning is a complex activity such as " listening to a lecture" involves mastery of a number of individual skills or micro-skills that together make up the activity. Brown (1995) points out that the selection of skills is based on the authors' perception of their usefulness whereas the sequencing of skills is usually

1:57

Question # 3 of 10 (Start time: 09:54:06 AM, 02 July 2024)

Negotiation of _____ has direct effects on goals

Select the correct option

curriculum

syllabus

assessment

content

effects on go

Friday afternoon is used for activities that the learners and teacher have negotiated.

- One or more of the four types of decisions described above (participation, procedure, learning goals, evaluation) is open for negotiation. Clarke (1989) suggests that teachers should encourage learners to take over some of the assessment activity.
- The classes for one or more language skills, such as free-speaking activities, are planned through negotiation. For example, the learners negotiate the types of reading activities that they will do.
- One or more parts of the inner circle of the curriculum design diagram is open to negotiation.

Topic-174: Negotiating Assessment

Several of the reports focus on negotiation of assessment and evaluation, largely because this has direct effects on goals and ways of achieving these goals. Breen and Littlejohn (2000) point out that there are four major factors affecting feedback through assessment:

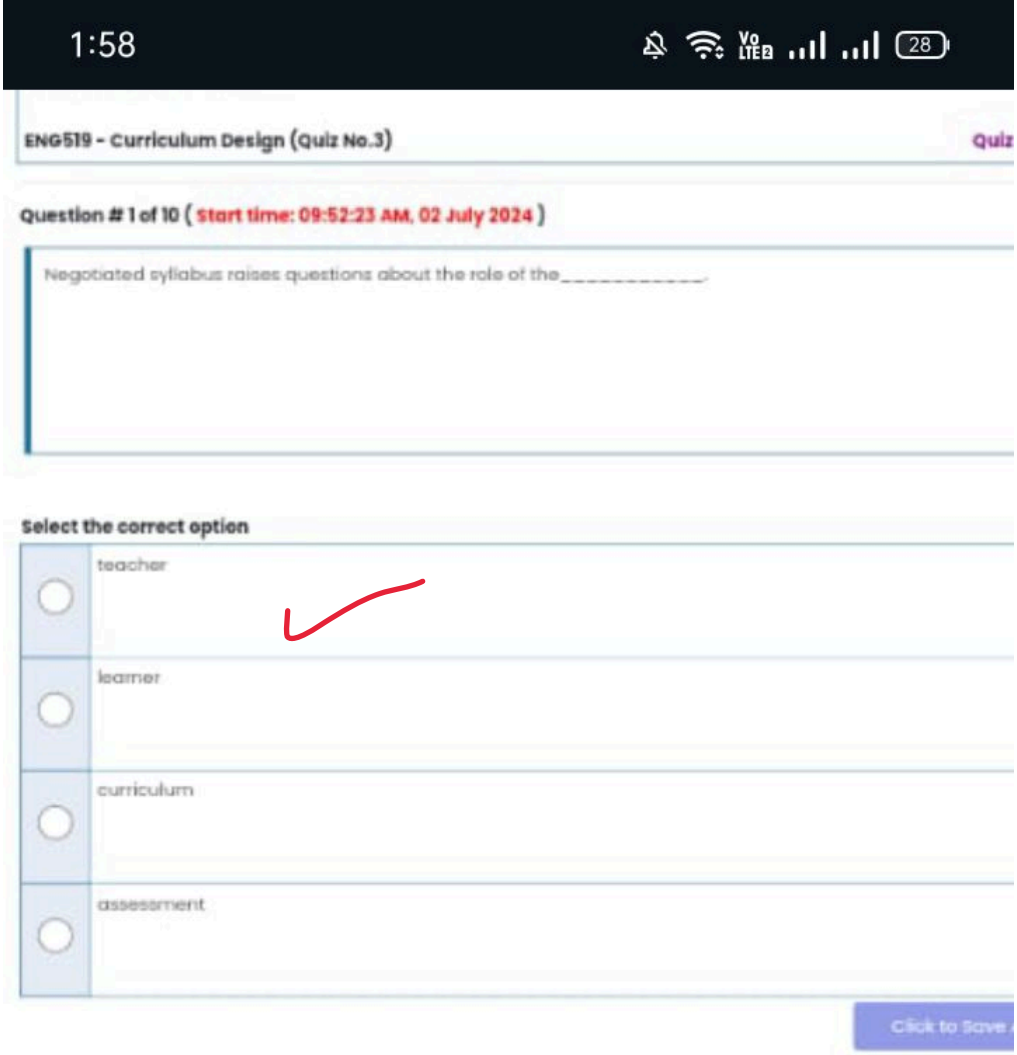

- The extent to which students are aware of the criteria being used.
- The relative emphasis given to what they have achieved as compared with what they have failed to achieve.
- The coincidence between what the feedback focuses upon and what the students themselves h recognised as particularly difficult for them.
- Whether or not they believe they can act on the basis of the feedback in a way that solves a recognised problem.

This is a very insightful list and the teacher needs to keep these factors in mind when negotiating assessment. Smith (2000) describes a very effective way of negotiating assessment. The assessment is seen as including not only the results of tests and assigned tasks, but also participation in class, homework, and class projects

The idea of a negotiated syllabus raises questions about the role of the teacher and the role of the commercially produced text book (Richards, 1993).

Topic-175: Disadvantages and Advantages of a Negotiated Syllabus

The disadvantages of a negotiated syllabus are of two major types. The first is the result of a lack of knowledge or experience with such a syllabus. Learners may be reluctant to negotiate or to let their classmates negotiate because they feel it should be the teacher's expertise guiding the course. Gradual introduction of a negotiated syllabus can provide learner training to help overcome this problem. Learners may also not know enough of the range of options they could choose from and thus may make

The idea of a negotiated syllabus raises questions about the role of the teacher and the role of the commercially produced text book (Richards, 1993).

Topic-175: Disadvantages and Advantages of a Negotiated Syllabus

The disadvantages of a negotiated syllabus are of two major types. The first is the result of a lack of knowledge or experience with such a syllabus. Learners may be reluctant to negotiate or to let their classmates negotiate because they feel it should be the teacher's expertise guiding the course. Gradual introduction of a negotiated syllabus can provide learner training to help overcome this problem. Learners may also not know enough of the range of options they could choose from and thus may make unimaginative choices. Teachers may feel that using a negotiated syllabus removes too much of their power and status. Learners may find it difficult to reach agreement about what they should be doing. The second major disadvantage is that a fully negotiated syllabus requires considerable teacher skill and time in accessing and producing resources. Where there are several teachers with similar classes, this load can be partly shared.

ENG519 - Curriculum Design (Quiz No.3)

Question # 1 of 10 (Start time: 02:21:28 PM, 02 July 2024)

Language Syllabus encompasses both _____ and functional aspects of the language.

Select the correct option

- (●) situational
- ( ) grammatical
- ( ) structural
- ( ) notional

Click to Save

and functional as

- In lexical syllabus, grammar seems to be dealt with intuitively or decided by the words used. When it comes to the instruction from the teachers, aspects concerned with grammar are not an easy question.
- If learners need thousands discrete lexical items (each of which needs to be taught), it is impossible that every item needs to be formally taught in language classroom. The majority of language acquired by the learner must come from sources other than formal teaching (Lewis, 2002).

Cultural syllabus

Whether culture should be taught as a separate subject is a controversial issue in the field second language education. As it can be concluded that culture and language are inseparable and culture learning must be an integral part of language learning. Along the same line, Brown (2007) maintains that, "A language is part of a culture and culture is part of language; the two are intricately interwoven so that one cannot separate the two without losing the significance of either language or culture".

Stern (1983) proposes a four-dimensional model in which he integrates four major areas or "syllabi": 1) Language Syllabus encompassing both structural and functional aspects of the language 2) Communicative/Experiential Syllabus which specifies "fields of experience" for project-based language activities; 3) the Culture Syllabus that contains topics and applications for the development of socio-cultural knowledge and awareness. A cultural syllabus often addresses the non-verbal as well as the verbal components of language and how these may be incorporated into language lessons by teachers.

Merits

Fleet (2006) enumerates the benefits of a cultural syllabus as follows:

- It increases communicative competence. Culture, as a part of the language syllabus, is instrumental in enhancing communicative competence. Peterson and Coltrane (2003) assert that "in order for communication to be successful, language use must be associated with other culturally appropriate behaviour".

TYPES OF SYLLABI IN LANGUAGE TEACHING

Topic-163: Structural Syllabus

©Copyright Virtual University of Pakistan

Krahnke (1987) considers the structural syllabus as the most familiar syllabus type. It has a long history, and a major portion of language teaching has been carried out using some form of it. The structural syllabus is based on a theory of language that assumes that the grammatical or structural aspects of language form are the most basic or useful. He further holds that a structural (or formal) syllabus is one in which the content of language teaching is a collection of the forms and structure (usually grammatical) of the language being taught.

Rationales for the formal syllabus

Breen (1987) sets forth three rationales:

- The first argument is that it is well established and it is informed by a long tradition of linguistic analysis.
- The second major justification for the formal syllabus is that it presents learners with a subject matter which is systematic and rule-governed. When we learn something new, we can begin to see patterns and regularities within it and that will reduce the 'learning load' it (i.e. new learning) demands of us.
- A third justification for the formal syllabus is that because the linguistic system is analysable in

- Content based

around the con

©Copyright Virtual University of Pakistan

Content-based instruction refers to an approach in which teaching is organized around the content rather than around a linguistic syllabus (Richards & Rodgers, 2001). Krahnke (1987) defines content-based syllabus as the teaching of content or information in the language being learned with little or no direct or explicit effort to teach the language itself separately from the content being taught. Content-based syllabus is considered as a sub-category of process-oriented and an analytic syllabus (Nunan, 1988). While Ellis (2003) believes that content-based instruction is a kind of task-based approach, Nunan (1988) maintains that content-based syllabuses are unlike task-based syllabuses which are based on linguistic criteria, the experiential content is derived from subject area.

This content may come from other subjects on the school curriculum, such as science, history, environmental studies, or it might be generated from an analysis of students' interests and needs (Nunan, 2004). Snow (1988) believes that the rationale behind the integration of language and content is that language is learned most effectively for communication in meaningful, purposeful social and academic contexts. In real life, people use language to talk about what they know and what they want to know more about, not to talk about language itself. Another underlying rationale is that the integration of content with language instruction provides a substantive basis for language teaching and learning. Content can provide both a motivational and a cognitive basis for language learning.

Merits

In comparison with analytic syllabuses which are little more than random collection of tasks, content-based syllabuses enjoy a logical and coherent selection and grading content. Nunan (2004) sees the followings as the advantages of a content-based syllabus:

- Learners learn other aspects of school learning alongside language itself

use lexica

utilization of traditional discrete-point achievement tests.

Topic-169: Lexical and Cultural Syllabus

Emergence of lexical syllabus was a reaction against traditional structural syllabus. The basic concept on which this syllabus rests is that students must be able to understand and use lexical phrases such as chunks, prefabricated patterns and collocations. In this regard, Lewis (1993) says that an important part of language acquisition is the ability to comprehend and produce lexical phrases as unanalyzed wholes or "chunks," and that these chunks become the raw data by which learners perceive patterns of language.

Criteria for the selection of lexical items

- Frequency: By using language corpora, syllabus designer lists the most frequent expressions in the language.
- Teachability: The selected most frequent words will be piloted and the words which are difficult to manage in the classroom will be discarded.
- Authenticity: The lexical items selected in the Lexical Syllabus are taken from authentic texts produced by language users in their everyday lives.
- Coverage: This syllabus tries to select lexical items which are generic and are not context-specific

situational con

Topic-164: Situational Syllabus

Palmer and Hornby (1937) believed that a grammatical or structural syllabus was neither efficient nor effective for language learning. Since this model offers language samples outside their social and cultural contexts, it makes transfer of learning from the classroom to the real world quite difficult. The limitations attributed to the structural syllabus led to an alternative approach where the point of departure became situational needs rather than grammatical units.

The underlying premise is that language is related to the situational contexts in which it occurs. The designer of a situational syllabus tries to predict those situations in which the learner will find him/herself, and applies these situations as a basis for selecting and presenting language content. Unlike structural/formal syllabus, situational syllabus offers the possibility of selecting and sequencing different real life situations rather than different grammatical items or vocabulary topics. In other words, it is designed in such a way as to provide realistic situation based on a communicative view of language and experimental theory of language learning.

Types of situational syllabus

Alexander (1976) differentiates three types of the situational syllabus based on type of information:

Which of the following syllabuses does not start from the first day of class?

Select the correct option

- ○ State Syllabus
- ○ Un-negotiated Syllabus
- ○ Content Syllabus
- ◉ Negotiated Syllabus

first day

This is a somewhat conservative example of a negotiated syllabus. It is conservative or cautious because the class did not start with a negotiated syllabus from the very first day of class. There were several reasons for this. First, many of the learners came from backgrounds where teachers are highly respected and would feel very uncomfortable telling the teacher what to do. In the first two weeks the learners can come to realize that the teacher can be trusted and that it is reasonable to negotiate with him. Second, most of the learners had not experienced a pre-university course before and so the teacher wanted to show them some of the range of goals and activities available, several of which might be new to them. This initial time of experience would inform and enrich the learners' later negotiations because they would have more to draw on. Third, the teacher wanted to show what he saw as important for the learners and what he taught well. This was partly with the hope of influencing the later negotiation. Fourth, the teacher wanted to develop credibility with the class before passing much of the control to them.

After much trial and error, negotiation of a MA teaching methodology course was best done by presenting course members with a draft syllabus in which some items were non-negotiable, but in which there were many items and procedures (methods of learning, assignments, etc.) that were negotiable.

ends with the

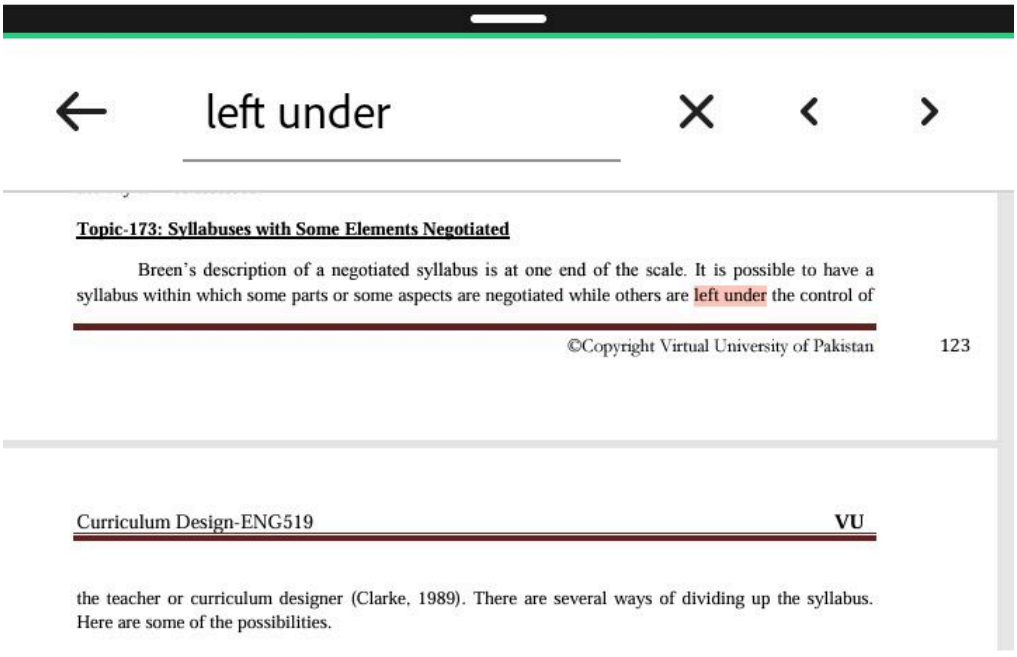

exercises. Material designers need to ensure that the exercises are presented in a manner that shows coherent connection between various lessons.

Topic-178: Appropriate Design: Sequences of Activities in Course Units

There are various approaches to sequence the activities in a language course. Graham Low (2006) suggests two key approaches towards sequencing the activities in a course. The first one is the *writing-last solution*, in which a unit normally ends with the writing task for the students. The emphasis of this approach is primarily on acquiring the grammatical items. There is a slight problem attached with this approach towards sequencing the activities in a course unit. If the unit ends with the writing task, then the importance of listening and speaking activity is ignored. The solution to this approach is multiple presentation designs which involve presenting the four strands of language learning that are reading, writing, listening and speaking. The second approach is *storyline solution*, which creates a harmony throughout the unit while sequencing the activities in storyline situation. It is important to be aware of the

ative functions of lan

write focused and natural dialogues.

- A third problem with authenticity in situational content is its tendency to become outdated.
- This syllabus may reflect unwanted foreign language values; in other words, it is not culture-free.
- Like structural syllabus, this syllabus also presents sequencing problem.

Topic-165: Functional/Notional Syllabus

A functional-notional syllabus is based on learning to recognize and express the communicative functions of language and the concepts and ideas it expresses. In other words, this kind of syllabus is based more on the purposes for which language is used and on the meanings the speaker wanted to express than on the forms used to express them. Hedge (2000) highlights how the 'communicative revolution' in the 1970s urged educators to go beyond structural analysis of language provided by linguists and start to consider what 'communicative ability' in a language entailed. It became apparent that developing such ability required a different view of language.

The solution to this approach is multiple presentation designs which involve presenting the four strands of language learning that are reading, writing, listening and speaking. The second approach is *storyline solution*, which creates a harmony

The advantages of a negotiated syllabus come largely from its responsiveness to the "wants" and the involvement of the learners.

Breen (1987) argues strongly that all courses have to adjust in some way to the reality of the teaching situation and the negotiated syllabus gives clear recognition to this. Involving the learners in shaping the syllabus has a strong effect on motivation, satisfaction and commitment to the course. It changes from being the teacher's course to the learners' course. The actual negotiation process has its benefits. If the negotiation is carried out in English, then this may be some of the most involving meaning-focused activity in the programme. The negotiation also develops learners' awareness of the goals of language-learning activities and how these goals can be achieved. This understanding may then make them better learners.

Question # 6 of 10 (Start time: 02:39:25 PM, 02 July 2024)

The main focus of material design is the _____.

Select the correct option

- learning
- teaching
- assessment
- outcome

main Focus of ma

reasoning. A material designer has to be very critical and practical while designing material for a language course. Coherence among course units ensures more involvement of the students. A coherent curriculum should build ideas across time and disciplines by connecting ideas between relevant topics and by aligning the development of instructional materials, instruction, and assessment.

Topic-181: Beyond Language Learning: Perspectives on Materials Design Introduction

Material design is defined by Pardo and Tellez (2009) as: "It includes adaptation, creation of learning and teaching exercises; a task, an activity, a lesson, a unit or a module composed of several units." The main focus of material design is the outcome, i.e., how material affects learner's perceptions and perspective? It is important to keep in mind that how actual student will react to the material. It is further important to see that how material actually demonstrates learner's needs. The six areas that are examined under this notion are:

- General or subject knowledge
- View of what knowledge is and how it is acquired
- View of what is involved in language learning
- Role relations
- Cognitive abilities

exposure of the lan

Curriculum Design-ENG519 VU

It is important to understand the term 'intake' and 'uptake' in language material design. It is observed that carefully selected material can contribute to learner's input intake and uptake. The term 'input' refers to the exposure of the language given to the students in the classroom through various sources, either written or spoken. There are various sources for delivering input in the classroom. Teacher is one of the primary sources to provide input to the students. The classroom environment, where students interact with each other also helps in establishing input. On the other hand, uptake refers to posing question to the students in order to assess what they have learned and internalized through the activities taking place in the classroom. Well-designed material exposes students to the modalities of the language. It not only enhances the input, but also the output; what students have actually learned from the particular activity or task. It also helps students to enhance the power of stimulation and reflection in learners. Materials are designed in a way that it makes students independent learners, who could think clearly and can question the knowledge acquired.

- The classes for one or more language skills, such as free-speaking activities, are planned through negotiation. For example, the learners negotiate the types of reading activities that they will do.
- One or more parts of the inner circle of the curriculum design diagram is open to negotiation.

Topic-174: Negotiating Assessment

Several of the reports focus on negotiation of assessment and evaluation, largely because this has direct effects on goals and ways of achieving these goals. Breen and Littlejohn (2000) point out that there are four major factors affecting feedback through assessment:

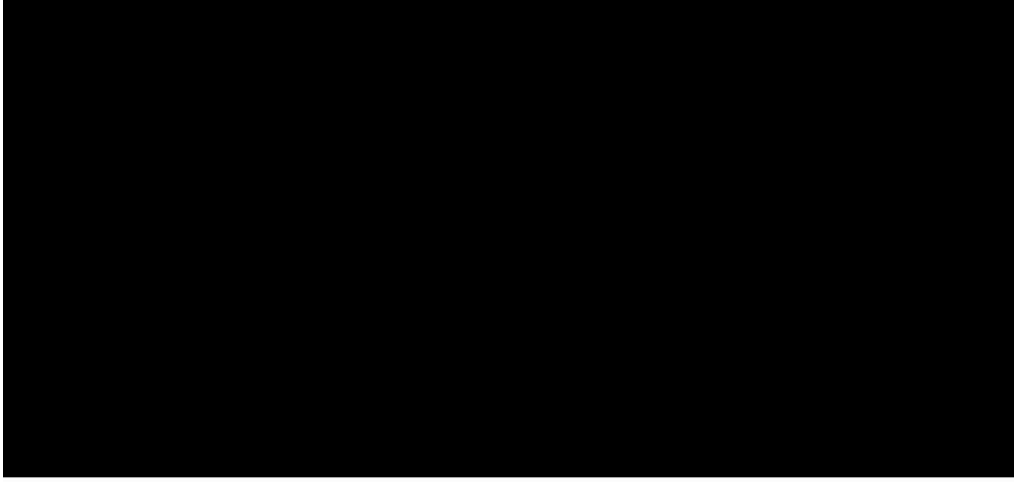

- The extent to which students are aware of the criteria being used.
- The relative emphasis given to what they have achieved as compared with what they have failed to achieve.
- The coincidence between what the feedback focuses upon and what the students themselves have recognised as particularly difficult for them.
- Whether or not they believe they can act on the basis of the feedback in a way that solves a recognised problem.

This is a very insightful list and the teacher needs to keep these factors in mind when negotiating assessment. Smith (2000) describes a very effective way of negotiating assessment. The assessment is seen as including not only the results of tests and assigned tasks, but also participation in class, homework, and class projects

The idea of a negotiated syllabus raises questions about the role of the teacher and the role of the commercially produced text book (Richards, 1993).

Topic-175: Disadvantages and Advantages of a Negotiated Syllabus

The disadvantages of a negotiated syllabus are of two major types. The first is the result of a lack of knowledge or experience with such a syllabus. Learners may be reluctant to negotiate or to let their

unicative language t

exposure to the language and participation in using it. Nunan (2001) also asserts that task-based syllabuses offer a specific realization of communicative language teaching and differs from the previously proposed syllabuses like structural, functional and notional syllabuses on the ground that task-based syllabuses start with needs analysis. This needs analysis results in a list of the target tasks that the learners need to carry out in real-life situations such as going through a job interview, completing a credit card application, and finding one's way from a hotel to a subway station.

Definition of a task

Skehan (2003) defines task as an activity in which: a) Meaning is primary. b) Learners are not given other peoples' meaning to repeat. c) There is some sort of relationship to comparable real world activities. d) Task completion has some sort of priority. e) The assessment of the task is in terms of outcome. Nunan (1988) cites Candlin (1987) who mentions the characteristics of a good task, some of which have been listed below. A good task should:

- Promote attention to meaning, purpose, negotiation.
- Encourage attention to relevant data.
- Draw objectives from the communicative needs of learners.
- Define a problem to be worked through by learners, centered on the learners but guided by the teacher; and provide opportunities for meta-communication and meta-cognition (i.e. provide opportunities for learners to talk about communication and about learning).

The psycholinguistic rationale for TBLT

what should be

Topic-170: Introduction to Negotiated Syllabus

A negotiated syllabus involves the teacher and the learners working together to make decisions at many levels of the curriculum design process. Negotiated syllabus is also called "process syllabus" (Breen, 1987). The word process in the term 'process syllabus' indicates that the important feature of this type of syllabus is that it focuses on how the syllabus is made rather than what should be in it.

Clarke (1991) sees the interest in negotiated syllabuses arising from humanistic methodologies like community language learning which are very learner-centered, needs analysis which focuses on learners' needs, work in individualization and learner autonomy, and learner strategy research which sees the learner playing a central role in determining how the language is learned. These are clearly strong reasons for having a negotiated syllabus. Breen and Littlejohn (2000) list situations where a negotiated syllabus is almost unavoidable:

- Where the teacher and students have different backgrounds.
- Where time is short and the most useful choices must be made.
- Where there is a very diverse group of students and there is a need to find common ground.
- Where initial needs analysis is not possible.
- Where there is no course book.
- Where the students' past experiences must be part of the course.
- Where the course is open-ended and exploratory.

Topic-171: An Example of a Negotiated Syllabus

The class is a group of adult graduate students preparing for post-graduate university study through the medium of English. They come from a wide variety of countries and will do their post-graduate study in a wide range of disciplines

Which of the following syllabuses is based on learning to recognize the communicative functions of language?

Select the correct option

- Situational
- Content
- Structural
- Notional

Click to Save Answer & M

nunicative functions

is not a reliable guide.

- In addition, even when accurate native speaker norms are available, it's extremely difficult to write focused and natural dialogues.
- A third problem with authenticity in situational content is its tendency to become outdated.
- This syllabus may reflect unwanted foreign language values; in other words, it is not culture-free.
- Like structural syllabus, this syllabus also presents sequencing problem.

Topic-165: Functional/Notional Syllabus

A functional-notional syllabus is based on learning to recognize and express the communicative functions of language and the concepts and ideas it expresses. In other words, this kind of syllabus is based more on the purposes for which language is used and on the meanings the speaker wanted to express than on the forms used to express them. Hedge (2000) highlights how the 'communicat revolution' in the 1970s urged educators to go beyond structural analysis of language provided linguists and start to consider what 'communicative ability' in a language entailed. It became appare that developing such ability required a different view of language.

116

Underlying theories

©Copyright Virtual University of Pakistan

The notional-functional approach draws on theories and descriptions of language that emphasize the functional and social aspects of competence. These syllabuses consist of a list of functions (e.g. apologizing and requesting) and notions (e.g. past time and possibility) together with the linguistic

Question # 4 of 10 (Start time: 02:59:00 PM, 02 July 2024)

Which of the following term refers to posing question to the students to assess what they have learned?

Select the correct option

- Output
- Task
- Uptake
- Input

Click to Save Answer & M

posing

It is important to understand the term 'intake' and 'uptake' in language material design. It is observed that carefully selected material can contribute to learner's input intake and uptake. The term 'input' refers to the exposure of the language given to the students in the classroom through various sources, either written or spoken. There are various sources for delivering input in the classroom. Teacher is one of the primary sources to provide input to the students. The classroom environment, where students interact with each other also helps in establishing input. On the other hand, uptake refers to posing question to the students in order to assess what they have learned and internalized through the activities taking place in the classroom. Well-designed material exposes students to the modalities of the language. It not only enhances the input, but also the output; what students have actually learned from the particular activity or task. It also helps students to enhance the power of stimulation and reflection in learners. Materials are designed in a way that it makes students independent learners, who could think clearly and can question the knowledge acquired.

- ◉ Skill based
- ○ Task based
- ○ Content based

e language teaching

based on the formal structures of language, but they are arranged based on the functions. For this reason, it is difficult to use them for the creation of new sentences.

- Another shortcoming can be ascribed to grading. White (1988) states that there are no clear-cut criteria for grading of functions and it mainly depends on the material designer's intuition.

Topic-166: Skill-based Syllabus

The skill-centered approach to course design has widely been applied in a number of countries, particularly in Latin America. Students in universities and colleges in Latin America have the limited but important need to read subject texts in English, because they are unavailable in their mother-tongue. As Richards (2001) puts it, in a "skill-based syllabus", the content of the language teaching is a collection of

©Copyright Virtual University of Pakistan

specific abilities that may play a part in using language. Skill-based syllabi group linguistic competencies (pronunciation, vocabulary, grammar, and discourse) together into generalized types of behavior, such as listening to spoken language for the main idea, writing well-formed paragraphs, giving effective oral presentations, and so on. The primary purpose of skill-based instruction is to learn the specific language skill. A possible secondary purpose is to develop more general competence in the language learning. Krahnke (1987) defines a skill as a specific way of using language that combines structural and functional ability but exists independently of specific settings or situations.

Underlying theories of skill-based syllabus

As Richards (2001) puts it "approaching a language through skills is based on the belief that learning is a complex activity such as " listening to a lecture" involves mastery of a number of individual skills or micro-skills that together make up the activity. Brown (1995) points out that the selection of

Question # 6 of 10 (Start time: 03:00:24 PM, 02 July 2024)

Which of the following syllabuses assumes that grammatical or structural aspects of language are the most basic or us

Select the correct option

- Notional
- Structural
- Situational
- Content

Click to Save Answer & M

most basic

Krahnke (1987) considers the structural syllabus as the most familiar syllabus type. It has a long history, and a major portion of language teaching has been carried out using some form of it. The structural syllabus is based on a theory of language that assumes that the grammatical or structural aspects of language form are the most basic or useful. He further holds that a structural (or formal) syllabus is one in which the content of language teaching is a collection of the forms and structure (usually grammatical) of the language being taught.

Rationales for the formal syllabus

Breen (1987) sets forth three rationales:

- The first argument is that it is well established and it is informed by a long tradition of linguistic analysis.
- The second major justification for the formal syllabus is that it presents learners with a subject matter which is systematic and rule-governed. When we learn something new, we can begin to see patterns and regularities within it and that will reduce the 'learning load' it (i.e. new learning) demands of us.
- A third justification for the formal syllabus is that because the linguistic system is analysable in certain ways, these analytical categories or schemas can be incorporated in a plan for teaching the system, and further it may be that the same analytical categories or schemas make it easier for the learner to uncover how the new language works.

Merits

Karanke (1987) mentions the positive characteristics of structural syllabus. Structure or grammar is the most general component of communicative competence.

- Its content is relatively easy to describe. Noun, verb, imperative, plural, and gerund are terms that are generally shared within the language profession, and there is general agreement about what they

Question # 7 of 10 (Start time: 03:01:54 PM, 02 July 2024)

Negotiation of _____ has direct effects on goals

Select the correct option

- (●) assessment
- ( ) syllabus
- ( ) curriculum
- ( ) content

direct effects on

Here are some of the possibilities.

- A fixed lesson or time of the day is set aside for negotiated activities. For example, an hour each Friday afternoon is used for activities that the learners and teacher have negotiated.
- One or more of the four types of decisions described above (participation, procedure, learning goals, evaluation) is open for negotiation. Clarke (1989) suggests that teachers should encourage learners to take over some of the assessment activity.
- The classes for one or more language skills, such as free-speaking activities, are planned through negotiation. For example, the learners negotiate the types of reading activities that they will do.
- One or more parts of the inner circle of the curriculum design diagram is open to negotiation.

Topic-174: Negotiating Assessment

Several of the reports focus on negotiation of assessment and evaluation, largely because this has direct effects on goals and ways of achieving these goals. Breen and Littlejohn (2000) point out that there are four major factors affecting feedback through assessment:

- The extent to which students are aware of the criteria being used.
- The relative emphasis given to what they have achieved as compared with what they ha achieve.
- The coincidence between what the feedback focuses upon and what the students themselves have recognised as particularly difficult for them.
- Whether or not they believe they can act on the basis of the feedback in a way that solves a recognised problem.

This is a very insightful list and the teacher needs to keep these factors in mind when negotiating assessment. Smith (2000) describes a very effective way of negotiating assessment. The assessment is seen as including not only the results of tests and assigned tasks, but also participation in class, homework, and class projects

The idea of a negotiated syllabus raises questions about the role of the teacher and the role of the commercially produced text book (Richards, 1993).

Topic-175: Disadvantages and Advantages of a Negotiated Syllabus

The disadvantages of a negotiated syllabus are of two major types. The first is the result of a lack of knowledge or experience with such a syllabus. Learners may be reluctant to negotiate or to let their classmates negotiate because they feel it should be the teacher's expertise guiding the course. Gradual
