ENG520 - Testing and Assessment (Quiz 4)

Question # 1 of 10 (Start time: 10:48:25 PM, 04 July 2024)

Synthesis and evaluation are the ___ level skills.

Select the correct option

- higher
- meta
- middle
- lower

synthesis and eva

Lesson 29

CREATING EXTENDED RESPONSE TEST ITEMS

Topic- 99: Extended Response Essay Type Items

Subjective test items (essay type)

It allows the students to determine the length and complexity of the response. This type of questions is most suitable for measuring higher level mental process skills like synthesis and evaluation.

Subjective type items can be used like:

Q1. Give examples to identify different forms of governments, which form of government is most suitable in the socio-economic and cultural context of our country? Keep your response limited to 5000-6000 words.

Some modifications can be made according to the age and grade of students to make the questions applicable to the level of the students. For example a question for students of grade V can be.

Example: What are the teachings of Islam about the respect of elders? How do these teachings help us to make a good society? Marks will be given for correct information, your own point of view.

Advantages of essay type items.

Extended response questions have following advantages over other types of question formats:

Effective for assessing higher order abilities: analyze, synthesize and evaluate.

It is comparatively less time consuming to develop such items.

Emphasizes essential communications skills

Guessing is eliminated.

Limitations of essay type items.

These advantages come with the following limitations:

1. The scoring is unreliable and time consuming.

ENG520 - Testing and Assessment (Quiz 4)

Question # 2 of 10 (Start time: 10:49:42 PM, 04 July 2024)

Essay type questions are divided into ____types.

Select the correct option

- two
- three
- five
- four

essay type q

Lesson 28

CREATING CONSTRUCTED RESPONSE TEST ITEMS

Topic- 097: Creating Constructed Response Test Items

Subjective test item

Restricted response essay type items

Subjective test items

Subjective test items (essay questions) are constructed response type questions that can be the best way to measure the students' higher order thinking skills. Such as applying, organizing, synthesizing, integrating, evaluating, or projecting while at the same time providing a measure of writing skills.

Essay items can vary from very lengthy (5-10 pages), open-ended to limited or restricted response (one page or less).

Essay type questions are divided into two types

1. Restricted Response Items
2. Extended Response Items

Pose a specific problem for which student needs to recall suitable information, organize it, derive a defensible conclusion, and express it within the given limits of the questions.

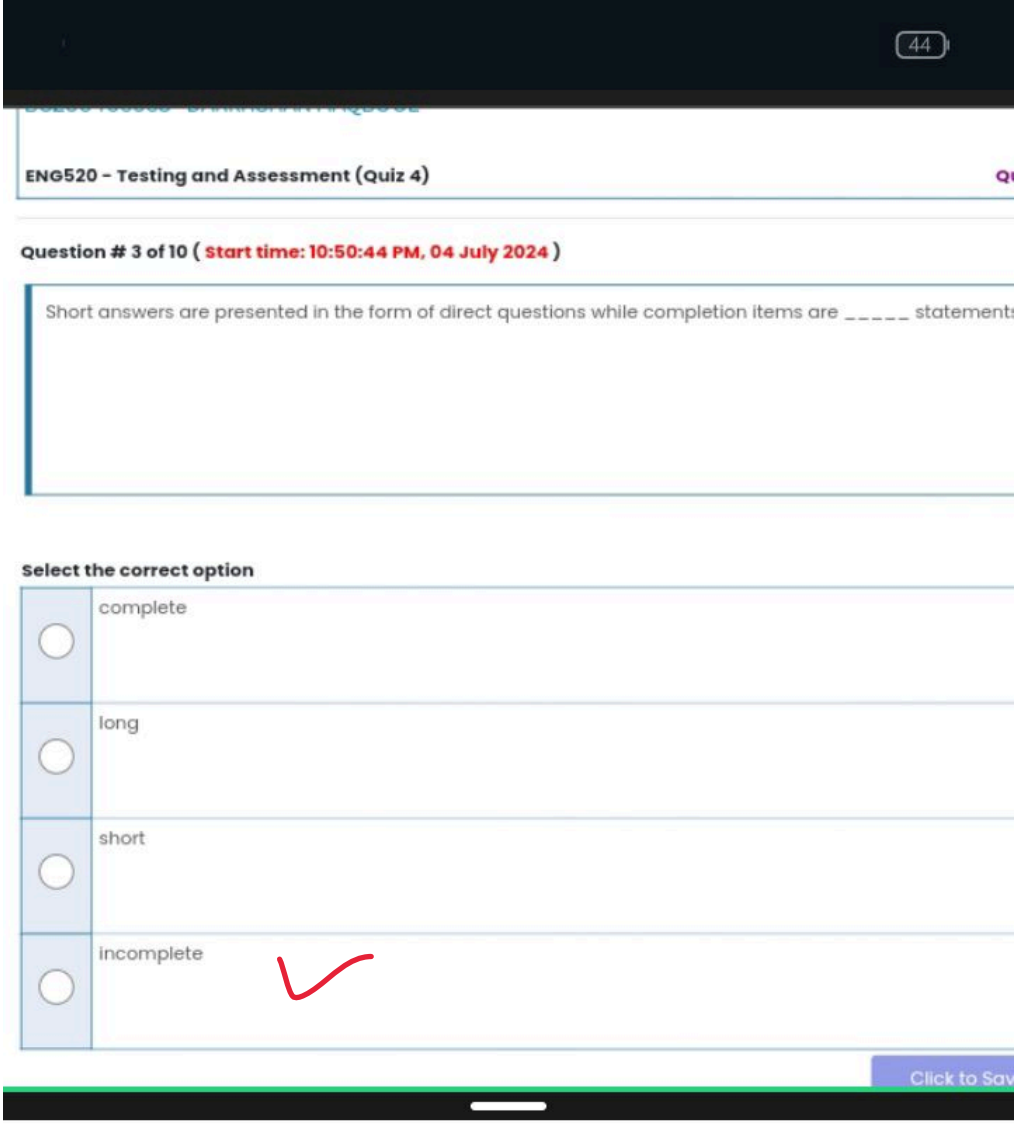

Example: List the similarities and differences in the process of cell division in meiosis and mitosis?

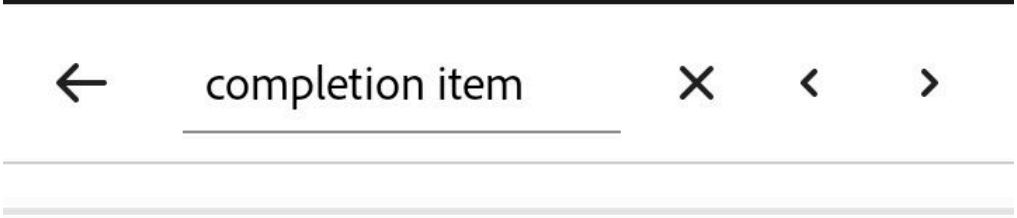

Variety of learning outcomes can be checked by using this format of essay question. Some of which are;

1. Analysis of relationship.
2. Compare and contrast positions.
3. Explain cause-effect relationship.
4. Organize data and support a viewpoint.
5. Formulate hypotheses.
6. Point out strengths and weaknesses.
7. Integrate data from various resources.

Teacher can use this type of questions under the following conditions when:

1. Supplying information is required instead of simple recognition.
2. Limited numbers of content areas are needed to be tested.

Lesson 25

CREATING FIXED-CHOICE TEST ITEMS: SHORT QUESTIONS-I

Topic- 088: Developing Short Answer/Completion Questions –I

There are two types of item formats which are included in the category of supply type: short answers and completion and fill in the blanks, under the range of objective test items. Both the short answers and completion items are forms of supply item that can be answered by a word, phrase, number or symbol. They only differ in form of presentation. Short answers are presented in the form of direct questions while completion items are incomplete statements. Both of them can be answered with a word, phrase, number, or symbol. Such items are frequently used for measuring knowledge of terminology, specific facts, principles and procedures etc.

Topic- 089: Developing Short Answer/Completion Questions –II

The short answer and completion items are forms of "supply" items both are supply type test items that can be answered by a word, phrase, number or symbol. Short answers are presented in the form of direct questions while completion items are incomplete statements.

Example:

Short Answer: What is the name of man who invented the light bulb? (Thomas Edison)

Completion: The name of the man who invented the light bulb is _____.

This category includes the problem in arithmetic, mathematics science and other areas whose solution must be supplied by the students.

Topic- 090: Uses of Short Answer/Completion Questions

The short answer test item is suitable for measuring a wide variety of relatively simple learning outcomes. The following outcomes and test items some of its common uses.

10:53

ENG520 - Testing and Assessment (Quiz 4)

Question # 4 of 10 (Start time: 10:52:06 PM, 04 July 2024)

In which of the following tests items teacher can control the possibility of the guessing?

Select the correct option

- ○ True/False
- ○ Short Questions
- ○ MCQs
- ○ Matching

possibility of g

Lesson 26

CREATING FIXED-CHOICE TEST ITEMS: SHORT QUESTIONS-II

Topic- 091: Advantages of Short Answer/Completion Questions

Advantages of short answer/completion questions

- Teacher wants students to complete a large number of items in a fairly short time (unless they involve working complex mathematical problems).
- Teacher wants to control the possibility of guessing. Since the student has to generate the answers.
- The possibility of guessing the correct answers to these questions is greatly reduced when compared with true-false questions.

Limitations of short answer/completion questions

- A potential problem with both short-answer and completion items is that difficult to frame questions for one specific answer unless the items are well written.
- Not usable to measure complex learning outcomes.

Topic- 092: Suggestions for Constructing Short Answer/Completion Questions –I

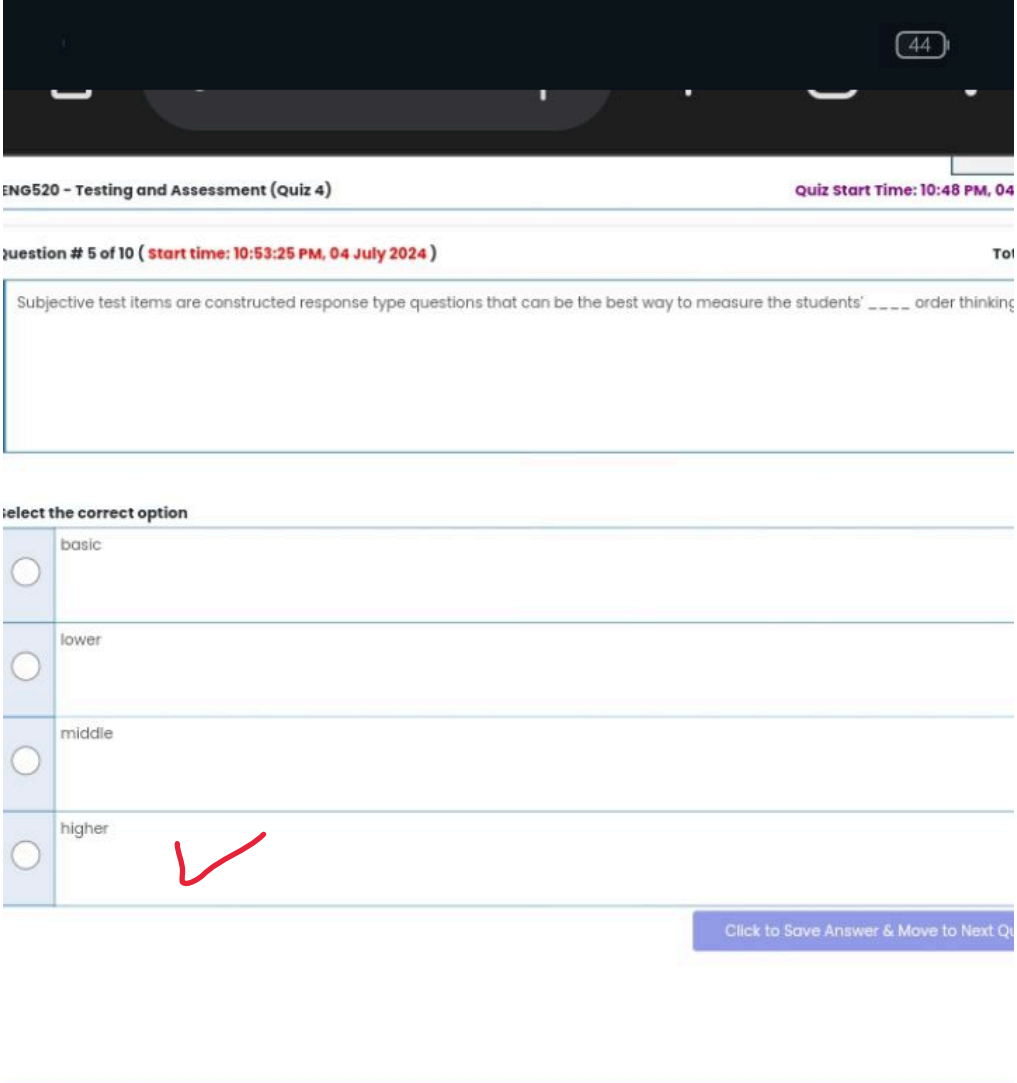

Word the item so that the required answer is both brief and specific.

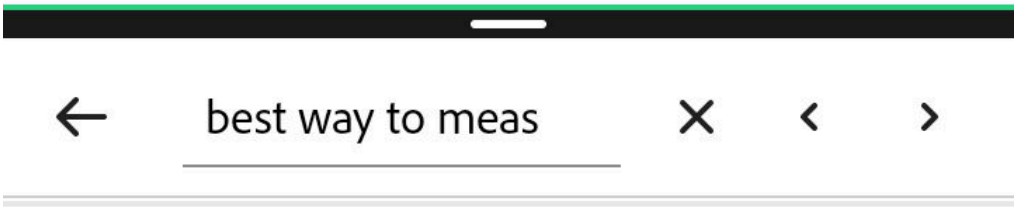

Example:
Poor: An animal that eats the flesh of other animals is? (Carnivorous)
Better: an animal that eats the flesh of other animals classified as (Carnivorous)

Topic- 093: Suggestions for Constructing Short Answer/Completion Questions –II

Do not take statements directly from textbooks to use as a basis for short answer items.

Example:
Poor: Chlorine is a _____. (Halogen)
Better: Chlorine belongs or a group of elements that combines with the metals to form salts. It is therefore called as_____. (Halogen)

Lesson 28

CREATING CONSTRUCTED RESPONSE TEST ITEMS

Topic- 097: Creating Constructed Response Test Items

Subjective test item

Restricted response essay type items

Subjective test items

Subjective test items (essay questions) are constructed response type questions that can be the best way to measure the students' higher order thinking skills. Such as applying, organizing, synthesizing, integrating, evaluating, or projecting while at the same time providing a measure of writing skills.

Essay items can vary from very lengthy (5-10 pages), open-ended to limited or restricted response (one page or less).

Essay type questions are divided into two types

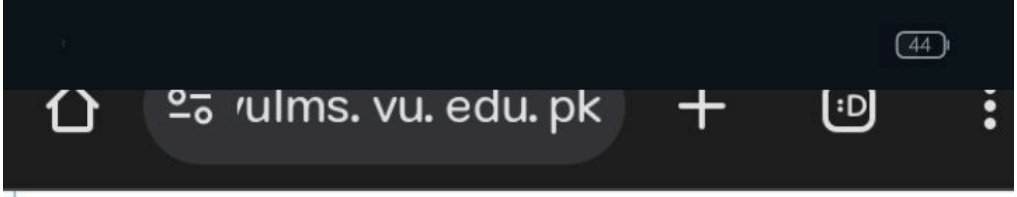

1. Restricted Response Items
2. Extended Response Items

Pose a specific problem for which student needs to recall suitable information, organize it, derive a defensible conclusion, and express it within the given limits of the questions.

Example: List the similarities and differences in the process of cell division in meiosis and mitosis?

Variety of learning outcomes can be checked by using this format of essay question. Some of which are;

1. Analysis of relationship.
2. Compare and contrast positions.
3. Explain cause-effect relationship.
4. Organize data and support a viewpoint.
5. Formulate hypotheses.
6. Point out strengths and weaknesses.
7. Integrate data from various resources.

ENG520 - Testing and Assessment (Quiz 4) Quiz Start Time: 10:

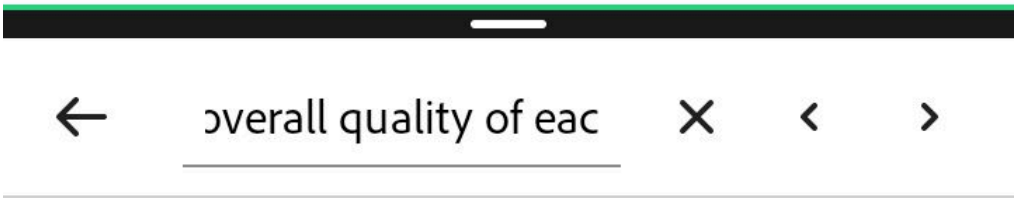

Question # 6 of 10 (Start time: 10:54:51 PM, 04 July 2024)

Which of the following rubrics requires making a judgment about the overall quality of each student's response to an item?

Select the correct option

- Extended
- Holistic
- Analytical
- Intensive

Click to Save Answer & Move

		phenomena
		Present solution
		Give well-reasoned conclusion
Decision making	Look for plausible alternatives to the conclusion drawn	Explore possibilities
		Formulate purposeful judgment
	Recognize and correct discrepancies	Reject the wrong answer and make correction

Topic- 103: Holistic Scoring Rubric

The holistic scoring rubric requires making a judgment about the overall quality of each student's response to an item. No need to mark each specific content element that a student included in the answer. Holistic rubric is probably more appropriate for extended response essay type items involving a student's abilities to synthesize and create and when no definite answer can be pre-specified. One way to implement holistic rubric is to decide beforehand on the number of quality categories into which you will sort the student's answers.

A second better way of using the holistic method is to craft a holistic rubric, which defines the qualities of paper that belong in each category. For example, defining what is in paper —A or in paper —B etc. A third refinement is to select specimen papers, which are good examples of each scoring category. Then you can compare the student's paper with the pre-specified specimens that define each category level. A fourth way of implementing holistic rubric is to read the answer completely and compare with another to decide which the best, the next best is and so on. This will result in the rough ranking of all the papers. This approach of holistic rubric cannot be applicable to a large number of papers.

Among these four approaches first three are consistent with a grading philosophy of criterion referenced or absolute quality standards. While the fourth one is consistent with the norm reference or relative standard grading philosophy

scoring of ess

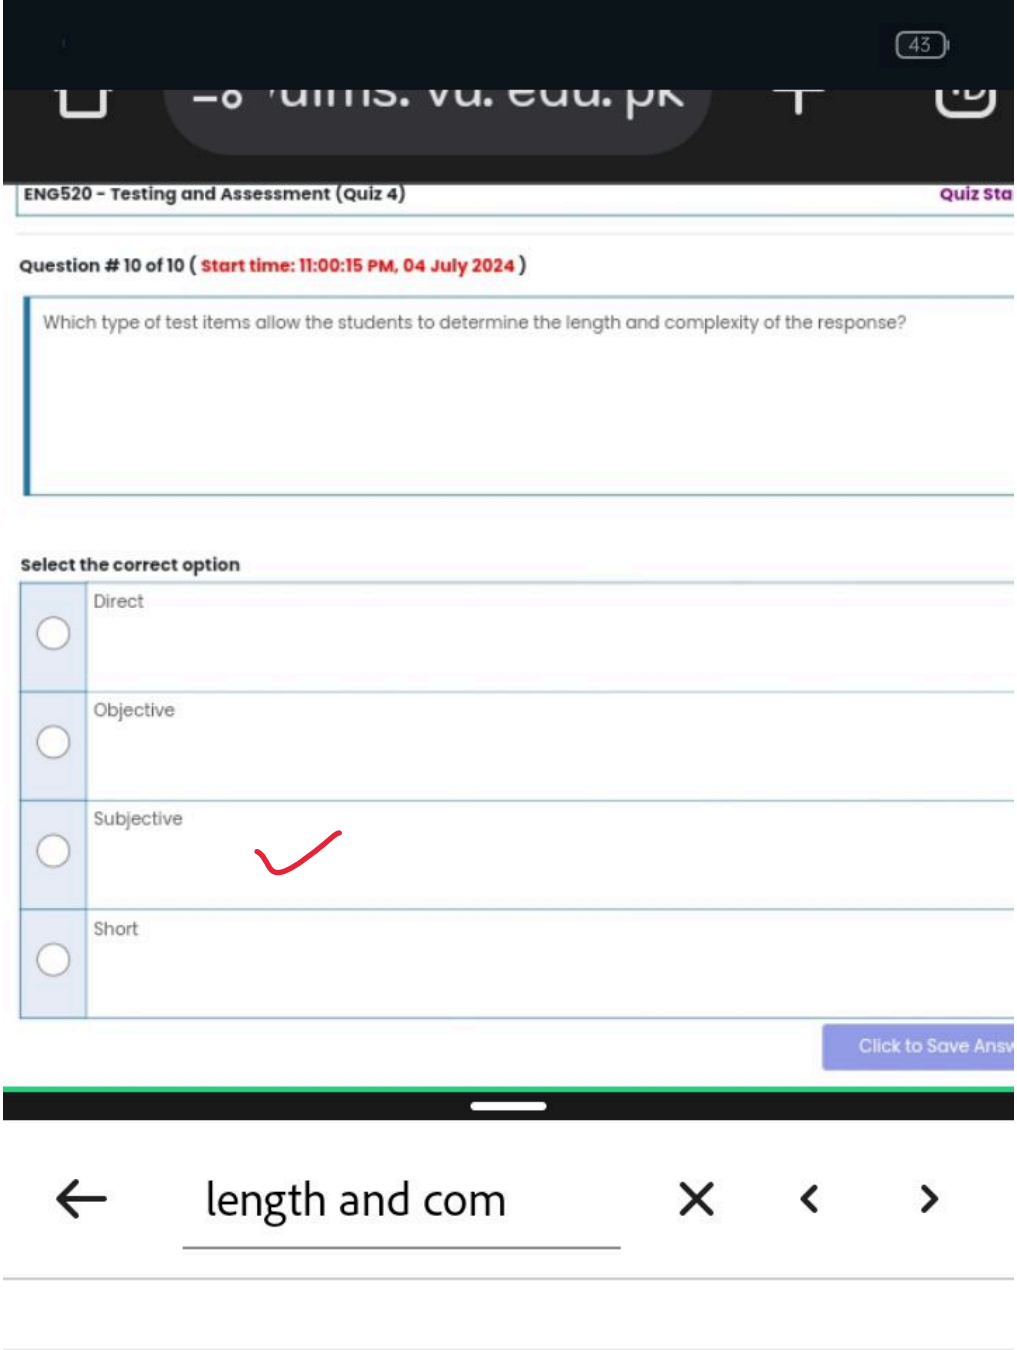

Topic- 100: Guidelines for Writing Essay Type Items

Following guidelines are for writing essay type items when developing a test.

1. Frame questions so that the examinee's task is explicitly defined.
2. Specify the value and an approximate time limit for each question.
3. Do not employ optional questions.
4. Employ a larger number of questions that require relatively shorter answers rather than only a few questions that require long answers.
5. Verify a question's quality by writing a trial response to the question.
6. Prepare a tentative scoring key in advance of considering examinee responses.
7. Score all answers to one question before scoring the next question.
8. Make prior decisions regarding treatment of such factors as spelling and punctuation.
9. Evaluate essay responses anonymously.

Topic- 101: Scoring Rubrics for Essay Type Items

Scoring of essay items is a time consuming and difficult process. Reliability of the test demands that scoring should be consistent not only by the rater at different times, but by two independent raters as well. Scoring rubrics are descriptive scoring schemes that are developed by teachers or other evaluators to guide the analysis of writing products or processes of students' piece of writing or any performance.

Lesson 29

CREATING EXTENDED RESPONSE TEST ITEMS

Topic- 99: Extended Response Essay Type Items

Subjective test items (essay type)

It allows the students to determine the length and complexity of the response. This type of questions is most suitable for measuring higher level mental process skills like synthesis and evaluation.

Subjective type items can be used like:

Q1. Give examples to identify different forms of governments, which form of government is most suitable in the socio-economic and cultural context of our country? Keep your response limited to 5000-6000 words.

Some modifications can be made according to the age and grade of students to make the questions applicable to the level of the students. For example a question for students of grade V can be.

Example: What are the teachings of Islam about the respect of elders? How do these teachings help us to make a good society? Marks will be given for correct information, your own point of view.

Advantages of essay type items.

Extended response questions have following advantages over other types of question formats:

Effective for assessing higher order abilities: analyze, synthesize and evaluate.

It is comparatively less time consuming to develop such items.

Emphasizes essential communications skills

Guessing is eliminated.

Limitations of essay type items.

These advantages come with the following limitations:

1. The scoring is unreliable and time consuming.

ENG520 - Testing and Assessment (Quiz 4)

Question # 9 of 10 (Start time: 11:11:37 PM, 04 July 2024)

There are ___general methods for scoring subject-matter essays.

Select the correct option

- five
- four
- two ✓
- three

matter essay

evaluate group activities, extended projects and oral presentations.

Scoring Rubrics for Essay Type Items

Scoring rubrics provide at least two benefits in the evaluation process.
They support the examination to the extent to which the specified criteria has been reached.
They provide feedback to students concerning how to improve their performance.

Topic- 102: Types of Scoring Rubrics

There are two general methods for scoring subject-matter essays: the analytic (scoring key, point or rating) method and the holistic (also called global, sorting or rating) method.

Analytic Scoring Rubric

The analytic scoring requires developing a list of major elements that students are expected to include in an ideal answer of a question. Next, to decide the number of points awarded to students when they include each element. Analytic type of rubric is used to score an essay type question on different points and significantly it works best on the restricted response type essay question
In developing analytic rubric identify the certain elements of the answer which are more appropriate to the learning objectives of a course.
When assigning number to each element, be sure the total points should match with the essay's total value in relation to the overall number of points on test.

Question # 7 of 10 (Start time: 11:09:55 PM, 04 July 2024)

When completion items are used, ___ blank/s should be used in a stem.

Select the correct option

- four
- three
- single
- double

completion item

Topic- 095: Suggestions for Constructing Short Answer/Completion Questions –IV

If the answer is to be expressed in numerical units, indicate the type of answer.

Example:

Poor: if water melon weighs 1kg 200 grams each. How much 3 watermelons will weighs? (3.5kg and 100 grams or 3600 gram)

Better: if water melon weighs 1kg 200 grams each. How much 3 watermelons will weighs? (3.6kg)

Topic- 096: Suggestions for Constructing Short Answer/Completion Questions –V

When completion items are used, do not include too many blanks or start with a blank space. Also avoid asking trivial information in blank space.

Example:

Poor: (warm blooded) animals that are born (alive) and (suckle) their young are called (mammals).

Better: warm blooded animals that are born alive and suckle their young are called (mammals).

ENG520 - Testing and Assessment (Quiz 4)

Question # 9 of 10 (Start time: 11:09:43 PM, 04 July 2024)

Difficulty value of less than 0.20 means item is _____.

Select the correct option

- ○ difficult
- ○ acceptable
- ○ too easy
- ○ easy

0.20

For example, on a four-alternative, multiple-choice item, the random guessing level is 1.00/4 = 0.25; therefore, the optimal difficulty level is .25 + (1.00 - .25) / 2 = 0.62. P-values above 0.90 are very easy items and should be carefully reviewed based on the instructor's purpose.
For example, if the instructor is using easy —warm-upl questions or aiming for student mastery, P-values below 0.20 are very difficult items and should be reviewed for possible confusing language, removed from subsequent exams, and/or identified as an area for re-instruction.
If almost all of the students get the item wrong, the problem is either with the item or students were not able to learn the concept.
If an instructor is trying to determine the top percentage of students that learned a certain concept, this highly difficult item may be necessary.
The optimal item difficulty depends on the question-type and on the number of possible distractors. Many test experts believe that for a maximum discrimination between high and low achievers, the optimal levels (adjusting for guessing) are:
1. 2 alternatives true and false = 0.75

Completion: The name of the man who invented the light bulb is _____.
This category includes the problem in arithmetic, mathematics science and other areas whose solution must be supplied by the students.

Topic- 090: Uses of Short Answer/Completion Questions

The short answer test item is suitable for measuring a wide variety of relatively simple learning outcomes. The following outcomes and test items some of its common uses.

Simple interpretation of data.

i. How many syllables are there in word Argentina? (4)
ii. In the number 612, what value does the 6 represent? (600)
iii. If an airplane flying northwest made a 180 degree turn, what direction would it be heading? (Southeast)

More complex interpretations can be made when the short answers item is used to measure the ability to interpret diagrams, charts graphs and pictorial data. More notable exceptions to the general rule that short answer items are limited to measuring simple learning outcomes are found in the areas of mathematics and science.

ENG520 - Testing and Assessment (Quiz 4)

Question # 1 of 10 (Start time: 11:02:54 PM, 04 July 2024)

Difficulty value of less than 0.20 means item is _____.

Select the correct option

- ○ acceptable
- ○ difficult ✓
- ○ easy
- ○ too easy

0.20

For example, on a four-alternative, multiple-choice item, the random guessing level is 1.00/4 = 0.25; therefore, the optimal difficulty level is .25 + (1.00 - .25) / 2 = 0.62. P-values above 0.90 are very easy items and should be carefully reviewed based on the instructor's purpose.
For example, if the instructor is using easy —warm-upl questions or aiming for student mastery, P-values below 0.20 are very difficult items and should be reviewed for possible confusing language, removed from subsequent exams, and/or identified as an area for re-instruction.
If almost all of the students get the item wrong, the problem is either with the item or students were not able to learn the concept.
If an instructor is trying to determine the top percentage of students that learned a certain concept, this highly difficult item may be necessary.
The optimal item difficulty depends on the question-type and on the number of possible distractors. Many test experts believe that for a maximum discrimination between high and low achievers, the optimal levels (adjusting for guessing) are:
1. 2 alternatives true and false – 0.75

ENG520 - Testing and Assessment (Quiz 4)

Question # 10 of 10 (Start time: 11:00:15 PM, 04 July 2024)

Which type of test items allow the students to determine the length and complexity of the response?

Select the correct option

- Direct
- Objective
- Subjective ✓
- Short

Click to

length and

Lesson 29

CREATING EXTENDED RESPONSE TEST ITEMS

Topic- 99: Extended Response Essay Type Items

Subjective test items (essay type)

It allows the students to determine the length and complexity of the response. This type of questions is most suitable for measuring higher level mental process skills like synthesis and evaluation.

Subjective type items can be used like:

Q1. Give examples to identify different forms of governments, which form of government is most suitable in the socio-economic and cultural context of our country? Keep your response limited to 5000-6000 words.

Some modifications can be made according to the age and grade of students to make the questions applicable to the level of the students. For example a question for students of grade V can be.

Example: What are the teachings of Islam about the respect of elders? How do these teachings help us to make a good society? Marks will be given for correct information, your own point of view.

Advantages of essay type items.

Extended response questions have following advantages over other types of question formats:

Effective for assessing higher order abilities: analyze, synthesize and evaluate.

11:25

ENG520 - Testing and Assessment (Quiz 4)

Question # 9 of 10 (Start time: 10:59:08 PM, 04 July 2024)

Scoring of essay items is a ____ process.

Select the correct option

- easy
- time saving
- simple
- difficult ✓

scoring of essa

6. Prepare a tentative scoring key in advance of considering examinee responses.
7. Score all answers to one question before scoring the next question.
8. Make prior decisions regarding treatment of such factors as spelling and punctuation.
9. Evaluate essay responses anonymously.

Topic- 101: Scoring Rubrics for Essay Type Items

Scoring of essay items is a time consuming and difficult process. Reliability of the test demands that scoring should be consistent not only by the rater at different times, but by two independent raters as well. Scoring rubrics are descriptive scoring schemes that are developed by teachers or other evaluators to guide the analysis of writing products or processes of students' piece of writing or any performance.

11:26

ENG520 - Testing and Assessment (Quiz 4)

Question # 8 of 10 (Start time: 10:57:44 PM, 04 July 2024)

The short answer test item is suitable for measuring a _____variety of outcomes.

Select the correct option

- small
- wide
- short
- narrow

suitable for mea

of direct questions while completion items are incomplete statements.
Example:
Short Answer: What is the name of man who invented the light bulb? (Thomas Edison)
Completion: The name of the man who invented the light bulb is _____.
This category includes the problem in arithmetic, mathematics science and other areas whose solution must be supplied by the students.

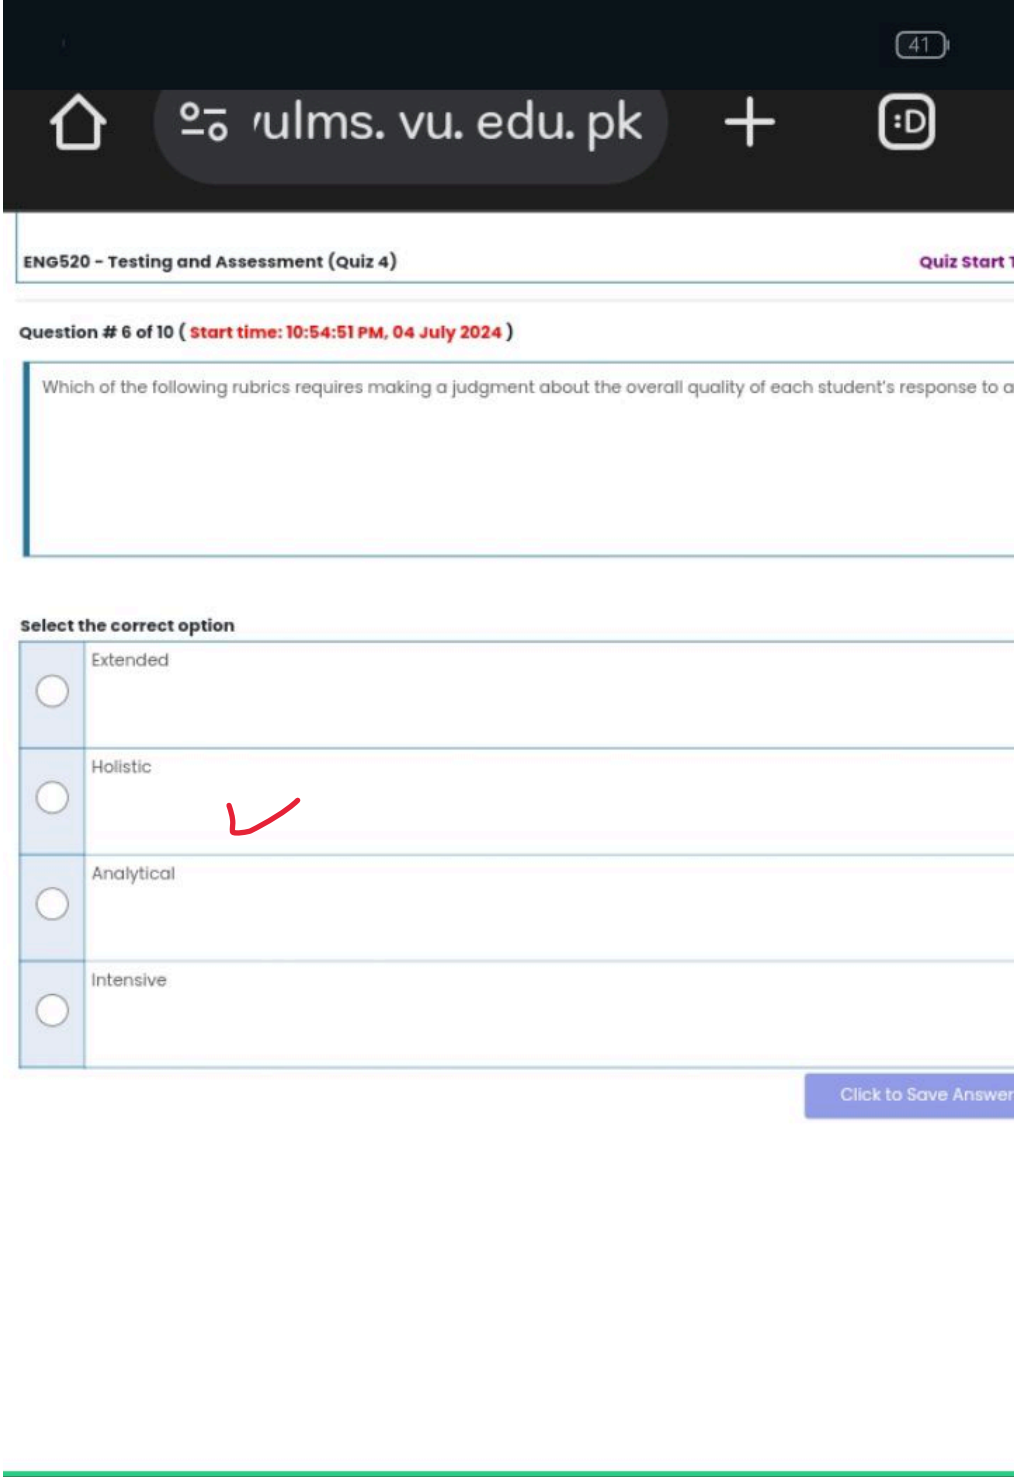

Topic- 090: Uses of Short Answer/Completion Questions

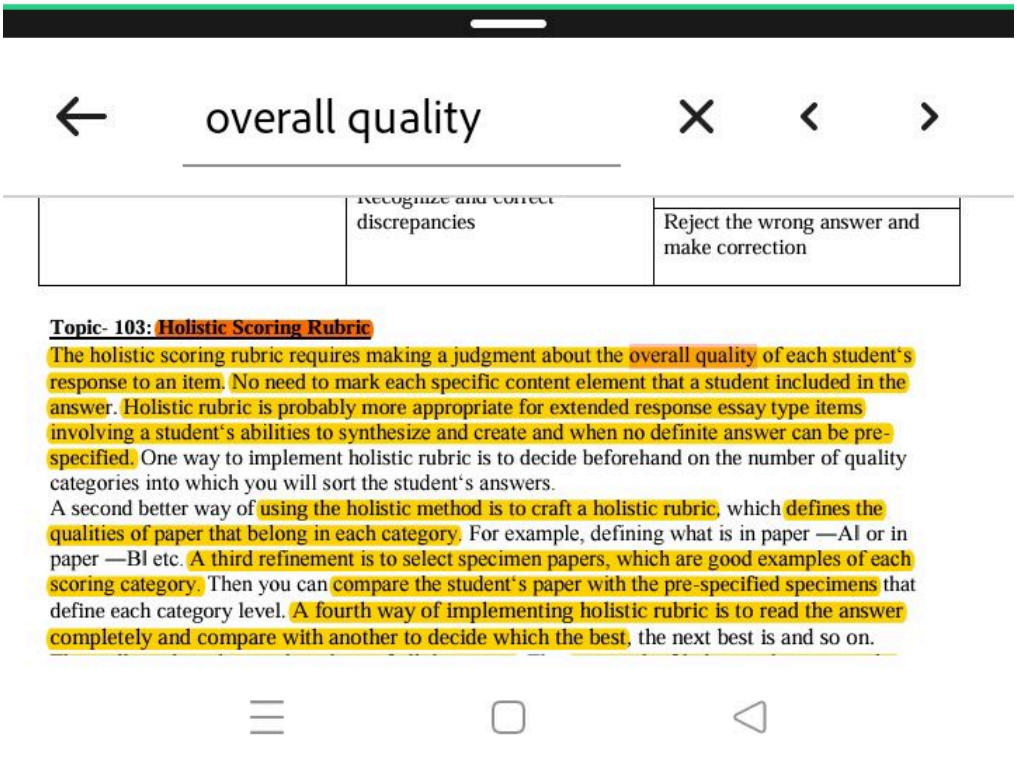

The short answer test item is suitable for measuring a wide variety of relatively simple learning outcomes. The following outcomes and test items some of its common uses.

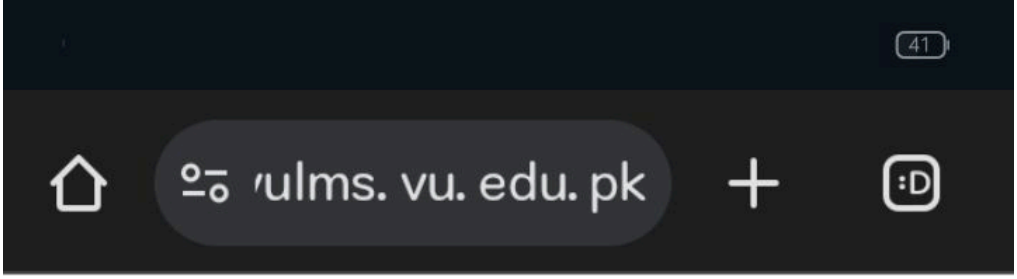

Simple interpretation of data.

i. How many syllables are there in word Argentina? (4)
ii. In the number 612, what value does the 6 represent? (600)
iii. If an airplane flying northwest made a 180 degree turn, what direction would it be heading? (Southeast)

More complex interpretations can be made when the short answers item is used to measure the abil to interpret diagrams, charts graphs and pictorial data. More notable exceptions to the general rule that short answer items are limited to measuring simple learning outcomes are found in the areas o

Question # 6 of 10 (Start time: 10:54:51 PM, 04 July 2024)
Which of the following rubrics requires making a judgment about the overall quality of each student's response to a
Select the correct option
Extended
Holistic
Analytical
Intensive
Click to Save Answer

overall quality
discrepancies
Reject the wrong answer and make correction
Topic- 103: Holistic Scoring Rubric
The holistic scoring rubric requires making a judgment about the overall quality of each student's response to an item. No need to mark each specific content element that a student included in the answer. Holistic rubric is probably more appropriate for extended response essay type items involving a student's abilities to synthesize and create and when no definite answer can be pre-specified. One way to implement holistic rubric is to decide beforehand on the number of quality categories into which you will sort the student's answers.
A second better way of using the holistic method is to craft a holistic rubric, which defines the qualities of paper that belong in each category. For example, defining what is in paper —AI or in paper —BI etc. A third refinement is to select specimen papers, which are good examples of each scoring category. Then you can compare the student's paper with the pre-specified specimens that define each category level. A fourth way of implementing holistic rubric is to read the answer completely and compare with another to decide which the best, the next best is and so on.

ENG520 - Testing and Assessment (Quiz 4) Quiz Start Time: 1

Question # 5 of 10 (Start time: 10:53:25 PM, 04 July 2024)

best way

Lesson 28

CREATING CONSTRUCTED RESPONSE TEST ITEMS

Topic- 097: Creating Constructed Response Test Items

Subjective test item

Restricted response essay type items

Subjective test items

Subjective test items (essay questions) are constructed response type questions that can be the best way to measure the students' higher order thinking skills. Such as applying, organizing, synthesizing, integrating, evaluating, or projecting while at the same time providing a measure of writing skills.

Essay items can vary from very lengthy (5-10 pages), open-ended to limited or restricted response (one page or less).

Essay type questions are divided into two types

1. Restricted Response Items
2. Extended Response Items

Pose a specific problem for which student needs to recall suitable information, organize it, derive a defensible conclusion, and express it within the given limits of the questions.

Question # 4 of 10 (Start time: 10:52:06 PM, 04 July 2024)

In which of the following tests items teacher can control the possibility of the guessing?

Select the correct option

- ○ True/False
- ○ Short Questions
- ○ MCQs
- ○ Matching

Click

guessing

Lesson 26

CREATING FIXED-CHOICE TEST ITEMS: SHORT QUESTIONS-II

Topic- 091: Advantages of Short Answer/Completion Questions

Advantages of short answer/completion questions

- Teacher wants students to complete a large number of items in a fairly short time (unless they involve working complex mathematical problems).
- Teacher wants to control the possibility of guessing. Since the student has to generate the answers.
- The possibility of guessing the correct answers to these questions is greatly reduced when compared with true-false questions.

Limitations of short answer/completion questions

- A potential problem with both short-answer and completion items is that difficult to frame questions for one specific answer unless the items are well written.
- Not usable to measure complex learning outcomes.

CREATING FIXED-CHOICE TEST ITEMS: SHORT QUESTIONS-I

Topic- 088: Developing Short Answer/Completion Questions –I

There are two types of item formats which are included in the category of supply type: short answers and completion and fill in the blanks, under the range of objective test items. Both the short answers and completion items are forms of supply item that can be answered by a word, phrase, number or symbol. They only differ in form of presentation. Short answers are presented in the form of direct questions while completion items are incomplete statements. Both of them can be answered with a word, phrase, number, or symbol. Such items are frequently used for measuring knowledge of terminology, specific facts, principles and procedures etc.

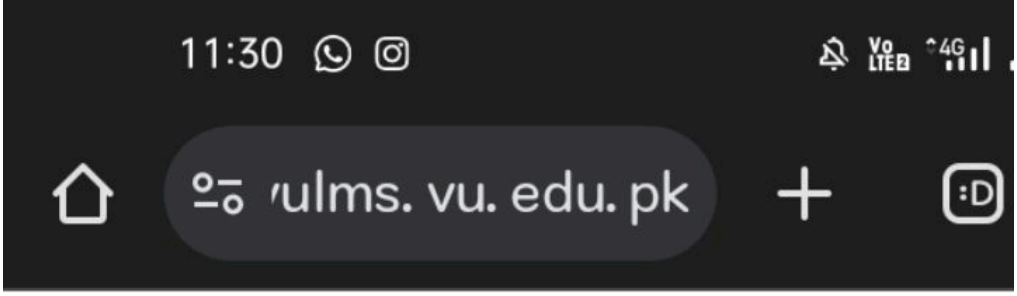

Topic- 089: Developing Short Answer/Completion Questions –II

The short answer and completion items are forms of "supply" items both are supply type test items that can be answered by a word, phrase, number or symbol. Short answers are presented in the form of direct questions while completion items are incomplete statements.

Example:

Short Answer: What is the name of man who invented the light bulb? (Thomas Edison)

Completion: The name of the man who invented the light bulb is _____.
