

Topic- 073: Advantages and Limitations of True-False

True-False (Alternative Form) Questions

Alternative form of question requires students to select any one of the two given categories. The categories may be true-false, yes-no, correct-incorrect or fact-opinion. Alternative form of items is most suitable for measuring lower level learning outcomes. True-false items can be used in different forms

Advantages of Alternative Form (True-False)

True-false questions are well suited for testing lower level learning outcomes, like a student's ability to;

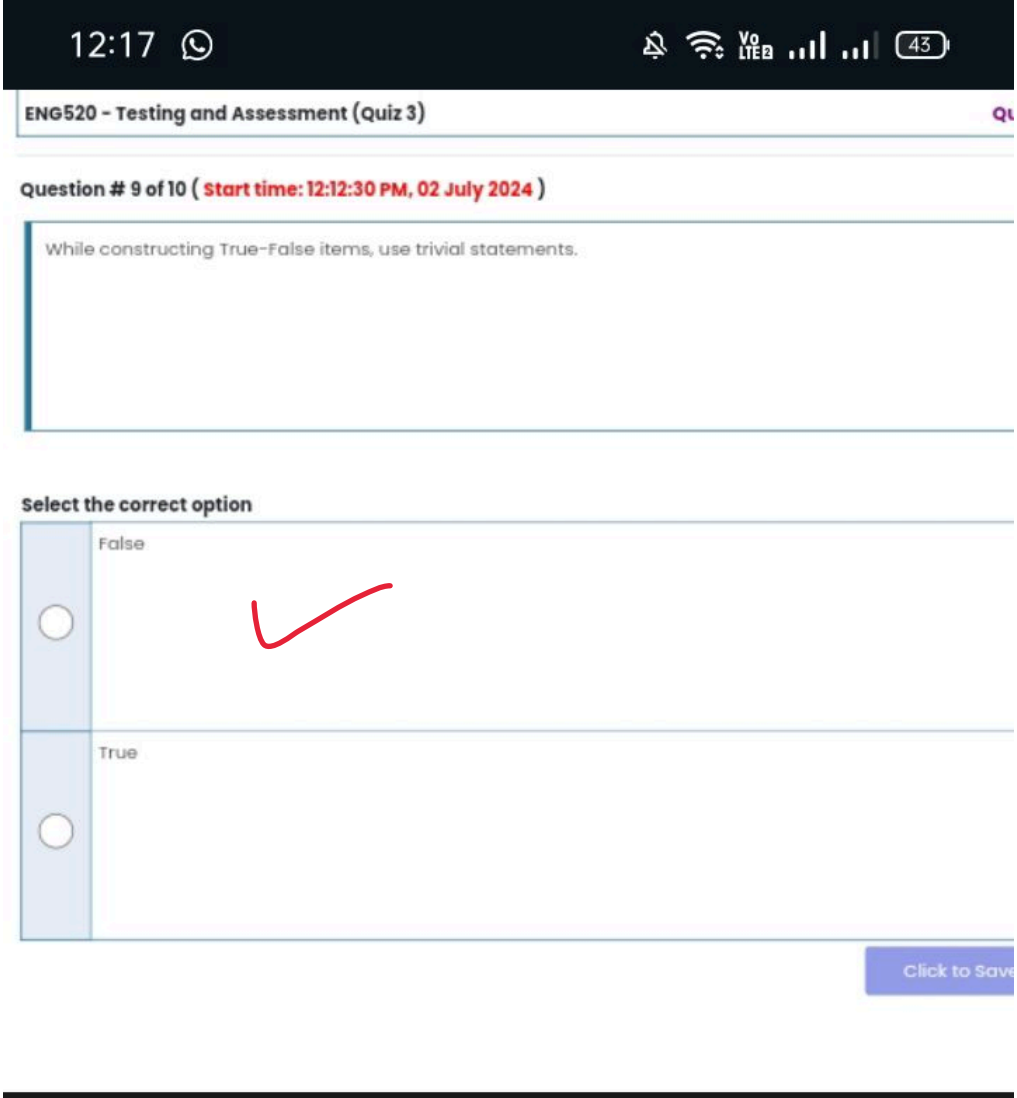

i. Identify the correctness of factual statements, e.g. Earth is a planet.
ii. Definition of terms e.g. Photosynthesis is the process by which leaves make food for plants.
iii. Statement of principles, e.g. Earth is revolving around the sun.
iv. Distinguish facts from opinion, e.g. Islam is the official religion of Pakistan.
v. Recognize cause-and-effect relationship

From a teacher's point of view alternative-form questions are very useful when;
A lot of content is to be covered in a fairly short amount of time.
The time available for scoring is very short.

Limitations of Alternative Form (True-False)

Most commonly observed limitations are:

i. All learning outcomes cannot be measured through alternative form questions. They are generally limited to lower level learning outcomes.
ii. Ease of guessing correct answers when the answer is not known. With only two choices\ (true or

learning outcomes

Topic- 074: Suggestions for Constructing True-False (Alternative Form) Items –I

Most important tsk in formulating statements is free from ambiguity and irrelevant clues. There are list of things to avoid when phrasing the statement.

1. Avoid broad general statements if they are to be judged true or false.

Explanation: Most broad generalizations are false unless qualified, and the use of qualifiers provides clues to the answer.

Example: **Poor item**

The president of Pakistan is *usually* elected to his/her office.

Example: **Better item**

According to constitute of Pakistan, the president of Pakistan is elected by parliament.

Topic- 075: Suggestions for Constructing True-False Items –II

Avoid trivial statements.

Explanation: To obtain the statements that are clearly true and false, we turn to specific statements of fact that fits the criterion but have little significance from learning point of view.

Example: **Poor item**

Mamnoon Hussain is 12th president of Pakistan.

Example: **Poor item**

India declared war on Pakistan on September 3rd, 1965.

From a teacher's point of view alternative-form questions are very useful when;
A lot of content is to be covered in a fairly short amount of time.
The time available for scoring is very short.

Limitations of Alternative Form (True-False)

Most commonly observed limitations are:

i. All learning outcomes cannot be measured through alternative form questions. They are generally limited to lower level learning outcomes.
ii. Ease of guessing correct answers when the answer is not known. With only two choices\ (true or false) the student could expect to guess correctly on half of the items for which correct answers are not known.
iii. There is sometimes a tendency to take quotations from the text with a minor change in wording.
iv. There may also be a tendency to include trivial material from the text.
v. True-false items are prone to high guessing and can only be used for measuring lower level

incorrect op

3. Chance of guessing

Classical test theory is more focused on finding the true score of an individual on a test and called as true score theory

Observed Score= True score + Error

Item response theory is known as latent trait theory as its focus is to find the item characteristics as a function of ability

Topic- 105: Item Analysis: Information Provided by Item Analysis

In this phase statistical methods are used to identify any test items that are not working well.

If an item is too easy, too difficult, failing to show a difference between skilled and unskilled examinees, or even scored incorrectly, an item analysis will reveal it.

The two most common statistics reported in an item analysis are

1. Item difficulty (which is a measure of the proportion of examinees who responded to an item correctly).
2. Item discrimination (which is a measure of how well the item discriminates between examinees who are knowledgeable in the content area and those who are not).

An additional analysis that is often reported is the distractor analysis. The distractor analysis provides a measure of how well each of the incorrect options contributes to the quality of a multiple choice item. In Item Analysis, analyses are conducted for the purpose of providing information about the items, rather than the test takers.

Item analysis results can be presented graphically or numerically.

The graphic presentation consists of response curves showing the test taker's estimated probability of a particular response as a function of the test taker's score on a measure of the general type of skills or knowledge measured by the item.

The numerical presentation includes statistics that measure the difficulty of the item and the extent to which it discriminates between strong and weak test takers.

Topic- 106: Appropriate Time for Item Analysis

There are two stages at which items can be analyzed

- After administration, but before scoring
- After scores have been reported

After administration, but before scoring

Item analysis done at this stage of the process helps the test developers identify errors in the scoring key or serious defects in the items—errors or defects serious enough to exclude the item from scoring. The item analysis enables test developers to focus their attention on a relatively small subset

Lesson 23

CREATING FIXED-CHOICE TEST ITEMS: MATCHING EXERCISES-I

Topic- 081: Matching Exercises

The matching type exercises consist of two parallel columns, first column premises and the second one is responses and the directions for matching the two columns. Matching test items are also selection items specially used to measure a student's ability to identify the relationship between a set of similar items, each of which has two components. Such as words and their definitions, symbols and their meanings, dates and events, people and their accomplishments, etc.

Matching exercise is economical methods when used with content which has the sufficient homogeneous factual information. In developing matching items, there are two columns of material. Matching exercise is used when measuring a student's ability to identify the relationship between a set of similar items, each of which has two components.

Instructions: A list of premises includes a list of prominent Pakistanis and the list of responses give their reason of fame. Match the given names with their respective reason of fame. There can be more than one reason of fame listed for one name and any of the given names may not correspond to any of the reasons of fame.

List A (Premises)	List B (Responses)
Quaid-e-Azam	a. Player
Jahanger Khan	b. Prime Minister
Abul Qadeer Khan	c. Statesman
Parveen Shakir	d. Poet

level learning out

Topic- 073: Advantages and Limitations of True-False

True-False (Alternative Form) Questions

Alternative form of question requires students to select any one of the two given categories. The categories may be true-false, yes-no, correct-incorrect or fact-opinion. Alternative form of items is most suitable for measuring lower level learning outcomes. True-false items can be used in different forms

Advantages of Alternative Form (True-False)

True-false questions are well suited for testing lower level learning outcomes, like a student's ability to;

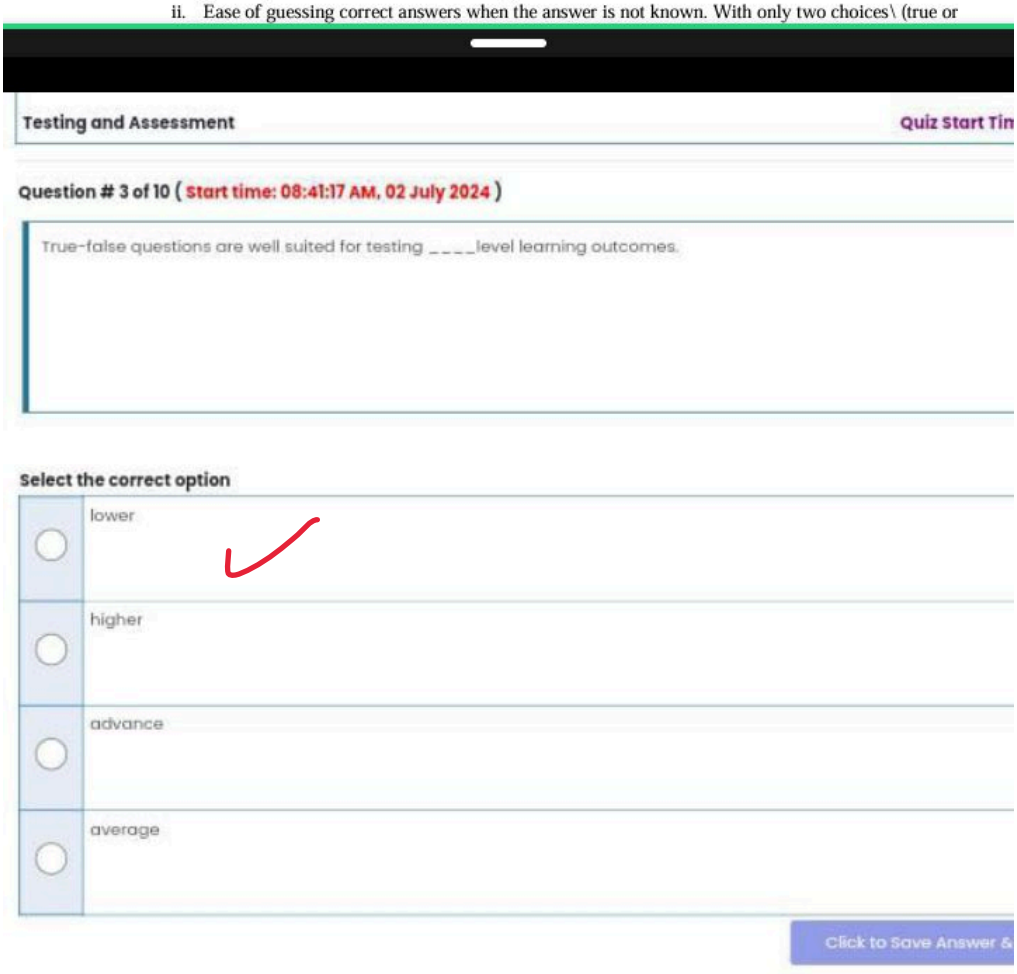

i. Identify the correctness of factual statements, e.g. Earth is a planet.
ii. Definition of terms e.g. Photosynthesis is the process by which leaves make food for plants.
iii. Statement of principles, e.g. Earth is revolving around the sun.
iv. Distinguish facts from opinion, e.g. Islam is the official religion of Pakistan.
v. Recognize cause-and-effect relationship

From a teacher's point of view alternative-form questions are very useful when;
A lot of content is to be covered in a fairly short amount of time.
The time available for scoring is very short.

Limitations of Alternative Form (True-False)

Most commonly observed limitations are:

i. All learning outcomes cannot be measured through alternative form questions. They are generally limited to lower level learning outcomes.
ii. Ease of guessing correct answers when the answer is not known. With only two choices\ (true or

10:05

in one

All the steps in the experiment were necessary.

Topic- 077: Suggestions for Constructing True-False Items –IV

Avoid long and complex sentences.

Explanation: A test item should indicate whether a student has achieved the knowledge or understanding being measured. Long, complex sentences tend also to measure the extraneous factor of reading comprehension. If avoiding long and complex statement is not possible then to may be necessary to change to another item form in order to avoid a complex sentence structure.

Example: **Poor item**

Despite the theoretical and experimental difficulties of determining the exact pH value of a solution, it is possible to determine whether a solution is acid by the red color formed on the litmus paper when it is inserted into the solution.

Example: **Better item**

Litmus paper turns red in an acid solution.

Topic- 078: Suggestions for Constructing True-False Items –V

Avoid including two ideas in one statement unless cause and effect relationship are being measured.

Explanation: Students can get confused and answer for only one statement. Other statement can have different answers. It is better to use two simple statements instead of including two ideas in one statement.

Example: **Poor item**

Pakistan could not qualify for world cup hockey because of poor resources, low talent and government support. (T)

Pakistan could not qualify for world cup hockey because of poor resources, low talent. (F)

Pakistan could not qualify for world cup hockey because of poor resources. (T)

Topic- 079: Suggestions for Constructing True-False Items –VI

Avoid using opinion that is not attributed to some source.

Explanation: A statement of the opinion cannot be marked true or false, and it is unfair to expect students to guess how the teacher will score such items, or to respond to opinion statements as statements of facts.

Example: **Poor item**

All anti-state activists should be hanged

Example: **Better item**

National action plan allows the justice system to give death penalty to anti-state activists if proven guilty

List A (Premises)	List B (Responses)
Quaid-e-Azam	a. Player
Jahanger Khan	b. Prime Minister
Abul Qadeer Khan	c. Statesman
Parveen Shakir	d. Poet
Benazir Bhutto	e. Scientist
	f. Civil Servant

Topic- 082: Uses of Matching Exercises

The typical matching exercise is limited to measuring factual information, based on simple associations. It is a compact and efficient method of measuring such simple knowledge outcomes. Examples of relationships considered important by teachers, in a variety of fields, including the following:

Persons	Achievements
Dates	Historical events
Terms	Definitions
Rules	Examples
Symbols	Concepts
Authors	Titles of books
Persons	Achievements
Foreign words	Local equivalents
Machines	Uses
Plants or animals	Classifications
Principles	Illustrations
Objects	Name of objects
	Functions

Testing and Assessment Quiz Start Time

Question # 6 of 10 (Start time: 08:43:19 AM, 02 July 2024)

The typical ____ exercise is limited to measuring factual information based on simple associations.

Select the correct option

- fill in the blanks
- MCQs
- matching
- true/false

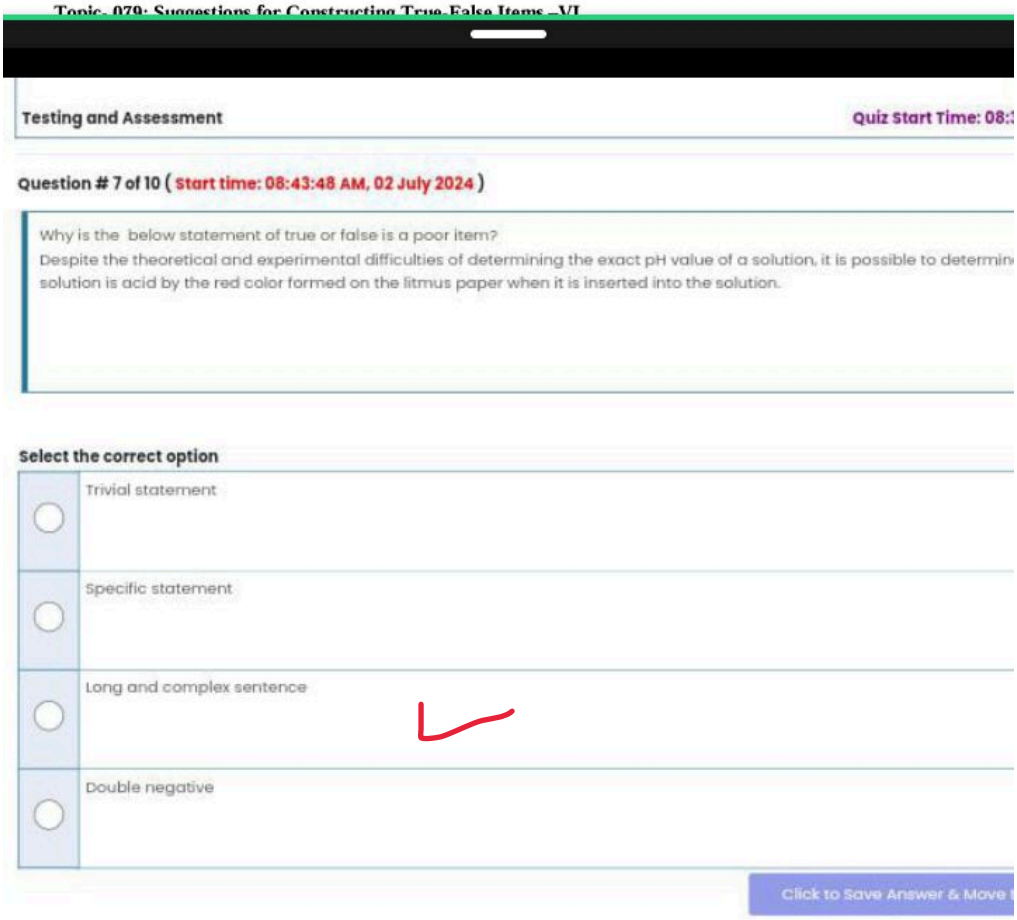

Click to Save Answer & N

Avoid the use of negative especially double negative statements.
Explanation: Students tend to overlook negative words such as no or not, and double negative contributes to statement's ambiguity. If absolutely necessary, it should be underlined or put in italic so that students do not overlook it.
Example: **Poor item**
None of the steps in the experiment was unnecessary.
Example: **Better item**
All the steps in the experiment were necessary.

Topic- 077: Suggestions for Constructing True-False Items –IV
Avoid long and complex sentences.
Explanation: A test item should indicate whether a student has achieved the knowledge or understanding being measured. Long, complex sentences tend also to measure the extraneous factor of reading comprehension. If avoiding long and complex statement is not possible then to may be necessary to change to another item form in order to avoid a complex sentence structure.
Example: **Poor item**
Despite the theoretical and experimental difficulties of determining the exact pH value of a solution, it is possible to determine whether a solution is acid by the red color formed on the litmus paper when it is inserted into the solution.

Avoid including two ideas in one statement unless cause and effect relationship are being measured.
Explanation: Students can get confused and answer for only one statement. Other statement can have different answers. It is better to use two simple statements instead of including two ideas in one statement.
Example: **Poor item**
Pakistan could not qualify for world cup hockey because of poor resources, low talent and government support. (T)
Pakistan could not qualify for world cup hockey because of poor resources, low talent. (F)
Pakistan could not qualify for world cup hockey because of poor resources. (T)

Topic- 079: Suggestions for Constructing True-False Items –VI

It is also being used with pictorial materials in relating pictures and words to identify positions on maps, charts and diagrams. Regardless of the dorm of presentation, the student's task is essentially to relate two things that have logical association. This restricts the use of matching exercise to small area of student's achievement.

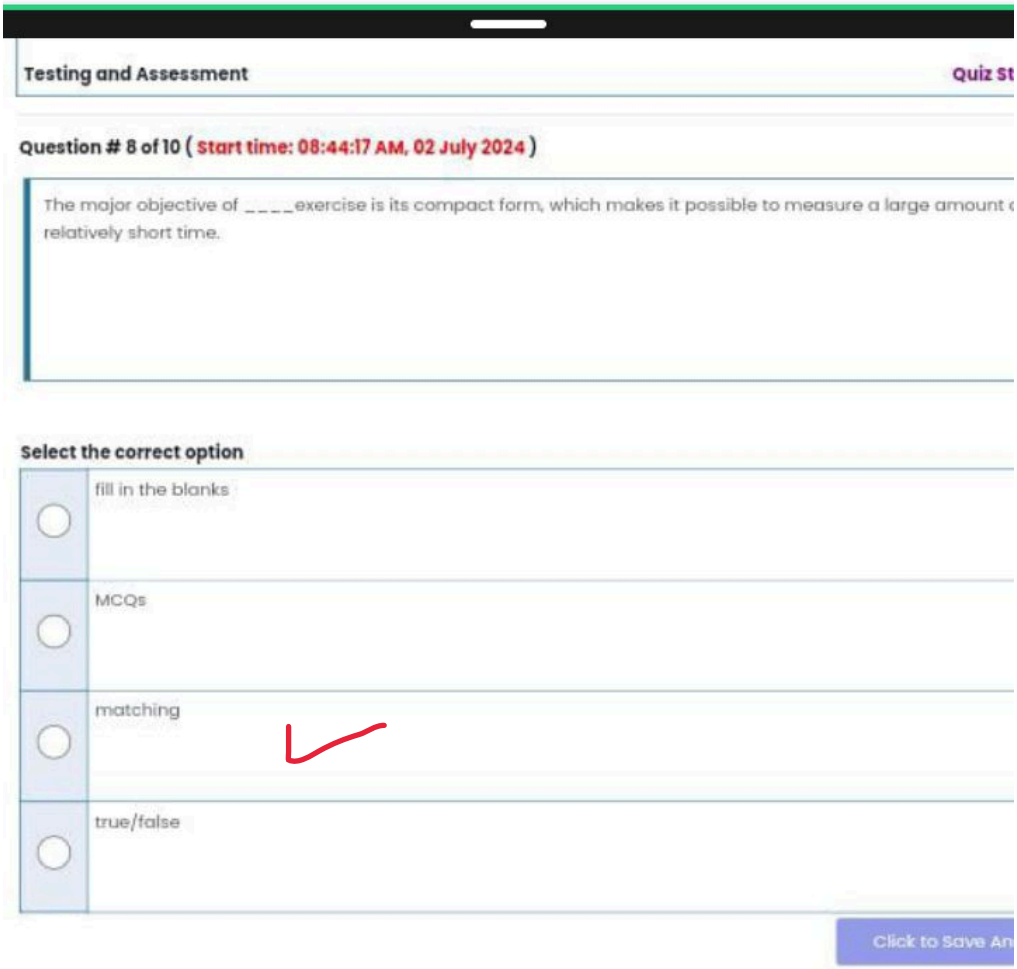

Topic- 083: Advantages and Limitations of Matching Exercises

Advantages of Matching Exercises

- The major objective of matching exercise is its compact form, which makes it possible to measure a large amount of related factual material in a relatively short time.
- Another advantage is ease of construction. Poor matching items can be rapidly constructed, but good matching item requires a high degree of skills.

Limitations of Matching Exercises

- It is restricted to the measurement of factual information, based on rote learning.
- It is highly susceptible to the presence of irrelevant clues.
- Difficulty of findings homogenous material that is significant from the viewpoint of our objectives and learning outcomes.

9:57

avoid

iii. There is sometimes a tendency to take quotations from the text with a minor change in wording.
iv. There may also be a tendency to include trivial material from the text.
v. True-false items are prone to high guessing and can only be used for measuring lower level learning outcomes

Topic- 074: Suggestions for Constructing True-False (Alternative Form) Items –I

Most important tsk in formulating statements is free from ambiguity and irrelevant clues. There are list of things to avoid when phrasing the statement.

1. Avoid broad general statements if they are to be judged true or false.

Explanation: Most broad generalizations are false unless qualified, and the use of qualifiers provides clues to the answer.

Example: **Poor item**

The president of Pakistan is *usually* elected to his/her office.

Example: **Better item**

According to constitute of Pakistan, the president of Pakistan is elected by parliament.

Topic- 075: Suggestions for Constructing True-False Items –II

Avoid trivial statements.

Example: **Poor item**
Pakistan could not qualify for world cup hockey because of poor resources, low talent and government support. (T)
Pakistan could not qualify for world cup hockey because of poor resources, low talent. (F)
Pakistan could not qualify for world cup hockey because of poor resources. (T)

Topic- 079: Suggestions for Constructing True-False Items –VI

Avoid using opinion that is not attributed to some source.

Explanation: A statement of the opinion cannot be marked true or false, and it is unfair to expect students to guess how the teacher will score such items, or to respond to opinion statements as statements of facts.
Example: **Poor item**
All anti-state activists should be hanged
Example: **Better item**
National action plan allows the justice system to give death penalty to anti-state activists if proven guilty

Topic- 080: Suggestions for Constructing True-False Items –VII

Avoid using true statements and false statements that are unequal in length.

Explanation: There is a natural tendency for true statements to be longer because such statements must be precisely phrased in order to be absolutely true. This can be overcome by lengthening the false statements through the use of qualifying phrase similar to those found in true statements.

Question # 3 of 10 (Start time: 09:22:48 AM, 02 July 2024)

Why is the given below statement of true or false is a poor item?
All anti-state activists should be hanged.

Select the correct option

- Opinion attributed to someone
- Specific statement
- Trivial statement
- Double negative

Click to Save

in length

All anti-state activists should be hanged
Example: **Better item**
National action plan allows the justice system to give death penalty to anti-state activists if proven guilty.

Topic- 080: Suggestions for Constructing True-False Items –VII

Avoid using true statements and false statements that are unequal in length.

Explanation: There is a natural tendency for true statements to be longer because such statements must be precisely phrased in order to be absolutely true. This can be overcome by lengthening the false statements through the use of qualifying phrase similar to those found in true statements.

Question # 4 of 10 (Start time: 09:23:20 AM, 02 July 2024)

While creating True/False questions one should avoid using the statements that are _____ in length.

Select the correct option

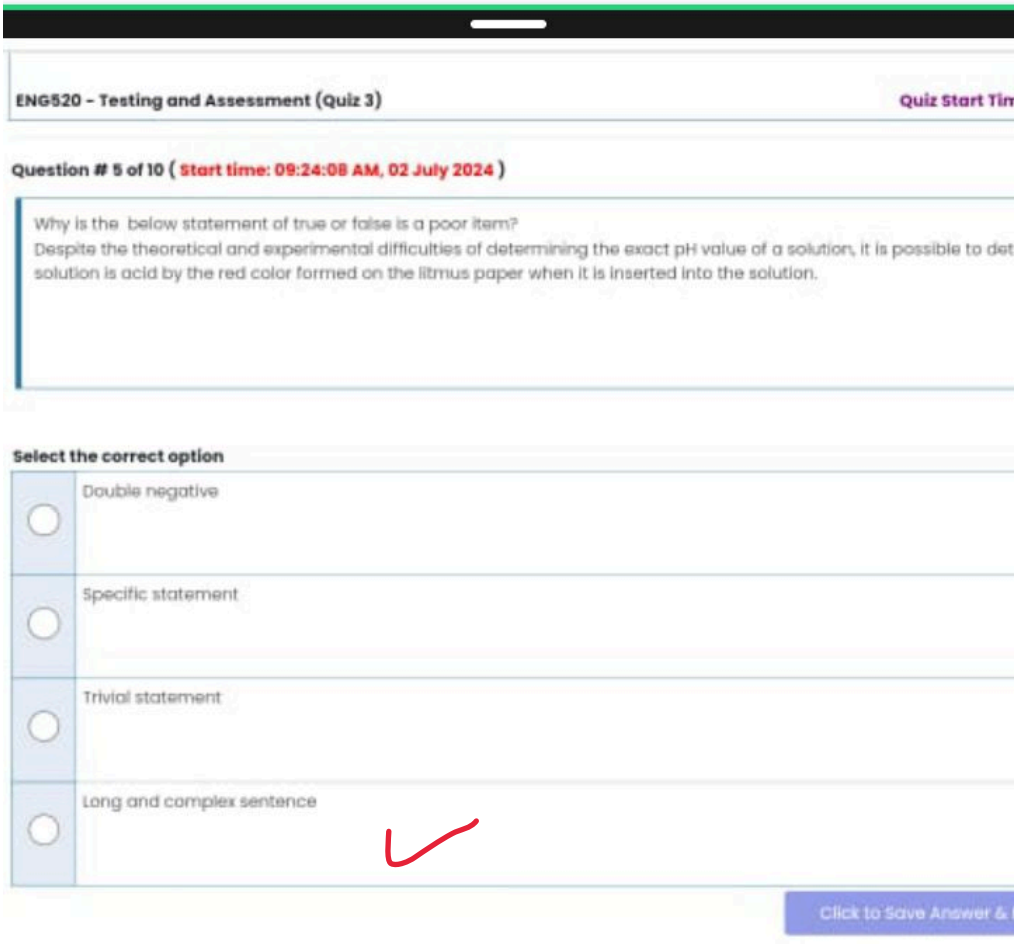

- equal
- unequal
- parallel
- identical

Click to Save Answer &

Explanation: Students tend to overlook negative words such as no or not, and double negative contributes to statement's ambiguity. If absolutely necessary, it should be underlined or put in italic so that students do not overlook it.
Example: **Poor item**
None of the steps in the experiment was unnecessary.
Example: **Better item**
All the steps in the experiment were necessary.

Topic- 077: Suggestions for Constructing True-False Items –IV
Avoid long and complex sentences.
Explanation: A test item should indicate whether a student has achieved the knowledge or understanding being measured. Long, complex sentences tend also to measure the extraneous factor of reading comprehension. If avoiding long and complex statement is not possible then to may be necessary to change to another item form in order to avoid a complex sentence structure.
Example: **Poor item**
Despite the theoretical and experimental difficulties of determining the exact pH value of a solution, it is possible to determine whether a solution is acid by the red color formed on the litmus paper when it is inserted into the solution.
Example: **Better item**
Litmus paper turns red in an acid solution.

Topic- 078: Suggestions for Constructing True-False Items –V
Avoid including two ideas in one statement unless cause and effect relationship are being measured.
Explanation: Students can get confused and answer for only one statement. Other statement can have different answers. It is better to use two simple statements instead of including two ideas in one statement.
Example: **Poor item**
Pakistan could not qualify for world cup hockey because of poor resources, low talent and government support. (T)
Pakistan could not qualify for world cup hockey because of poor resources, low talent. (F)
Pakistan could not qualify for world cup hockey because of poor resources. (T)

trivial

generally limited to lower level learning outcomes.

ii. Ease of guessing correct answers when the answer is not known. With only two choices\ (true or false) the student could expect to guess correctly on half of the items for which correct answers are not known.
iii. There is sometimes a tendency to take quotations from the text with a minor change in wording.
iv. There may also be a tendency to include trivial material from the text.
v. True-false items are prone to high guessing and can only be used for measuring lower level learning outcomes

Topic- 074: Suggestions for Constructing True-False (Alternative Form) Items –I

Most important tsk in formulating statements is free from ambiguity and irrelevant clues. There are list of things to avoid when phrasing the statement.

1. Avoid broad general statements if they are to be judged true or false.

Explanation: Most broad generalizations are false unless qualified, and the use of qualifiers provides to the answer.

Example: **Poor item**

The president of Pakistan is *usually* elected to his/her office.

Example: **Better item**

According to constitute of Pakistan, the president of Pakistan is elected by parliament.

Topic- 075: Suggestions for Constructing True-False Items –II

Avoid trivial statements.

Explanation: To obtain the statements that are clearly true and false, we turn to specific statements of fact that fits the criterion but have little significance from learning point of view.

Example: **Poor item**

Mamnoon Hussain is 12th president of Pakistan.

ENG520 - Testing and Assessment (Quiz 3)

Question # 7 of 10 (Start time: 09:25:33 AM, 02 July 2024)

While constructing True-False items, use trivial statements.

Select the correct option

- ○ True
- ○ False ✓

trivial

iii. Statement of principles, e.g. Earth is revolving around the sun.
iv. Distinguish facts from opinion, e.g. Islam is the official religion of Pakistan.
v. Recognize cause-and-effect relationship

From a teacher's point of view alternative-form questions are very useful when;
A lot of content is to be covered in a fairly short amount of time.
The time available for scoring is very short.

Limitations of Alternative Form (True-False)

Most commonly observed limitations are:

i. All learning outcomes cannot be measured through alternative form questions. They are generally limited to lower level learning outcomes.
ii. Ease of guessing correct answers when the answer is not known. With only two choices\ (true false) the student could expect to guess correctly on half of the items for which correct answ are not known.
iii. There is sometimes a tendency to take quotations from the text with a minor change in wording.
iv. There may also be a tendency to include trivial material from the text.
v. True-false items are prone to high guessing and can only be used for measuring lower level learning outcomes

Select the correct option

- True
- False ✓

Topic- 073: Advantages and Limitations of True-False

True-False (Alternative Form) Questions

Alternative form of question requires students to select any one of the two given categories. The categories may be true-false, yes-no, correct-incorrect or fact-opinion. Alternative form of ite suitable for measuring lower level learning outcomes. True-false items can be used in differen

Advantages of Alternative Form (True-False)

True-false questions are well suited for testing lower level learning outcomes, like a student's ability to;

i. Identify the correctness of factual statements, e.g. Earth is a planet.
ii. Definition of terms e.g. Photosynthesis is the process by which leaves make food for plants.
iii. Statement of principles, e.g. Earth is revolving around the sun.
iv. Distinguish facts from opinion, e.g. Islam is the official religion of Pakistan.
v. Recognize cause-and-effect relationship

Question # 9 of 10 (Start time: 09:26:42 AM, 02 July 2024)

The typical ____ exercise is limited to measuring factual information based on simple associations.

Select the correct option

- fill in the blanks
- MCQs
- true/false
- matching

measuring fac

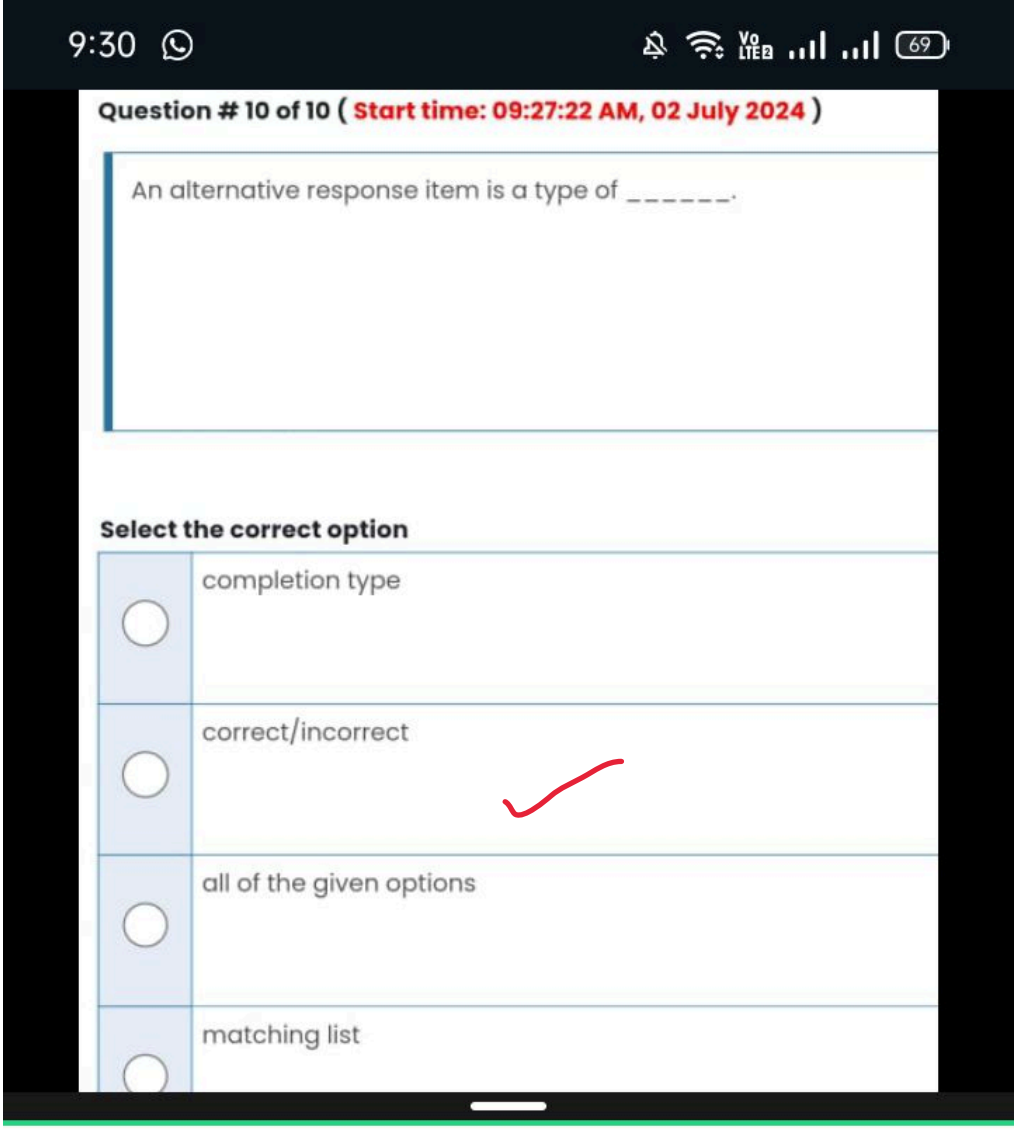

Instructions: A list of premises includes a list of prominent Pakistanis and the list of responses give their reason of fame. Match the given names with their respective reason of fame. There can be more than one reason of fame listed for one name and any of the given names may not correspond to any of the reasons of fame.

List A (Premises)	List B (Responses)
Quaid-e-Azam	a. Player
Jahanger Khan	b. Prime Minister
Abul Qadeer Khan	c. Statesman
Parveen Shakir	d. Poet
Benazir Bhutto	e. Scientist
	f. Civil Servant

Topic- 082: Uses of Matching Exercises

The typical matching exercise is limited to measuring factual information, based on simple associations. It is a compact and efficient method of measuring such simple knowledge outcomes. Examples of relationships considered important by teachers, in a variety of fields, including the following:

Persons	Achievements
Dates	Historical events
Terms	Definitions
Rules	Examples
Symbols	Concepts
Authors	Titles of books
Persons	Achievements
Foreign words	Local equivalents
Machines	Uses
Plants or animals	Classifications
Principles	Illustrations
Objects	Name of objects
	Functions

alternative

processes and mental level of the students. The format of the item necessarily proceeds from the test blueprint. The blueprint indicates the kinds of skills and the balance of test content to be measured
The format of the item necessarily proceeds from the test blueprint. The blueprint indicates the kinds of skills and the balance of test content to be measured.

The selection of item format should be based on the kinds of skills to be measured and not on some personal like or dislike for a particular item format. The use of multiple-choice questions may make sense for large group testing the knowledge of the mechanics of English. This type of item is not generally appropriate, though, as a direct measure of writing skill. If the intent is to determine whether an examinee can write a clear, coherent essay, then an essay or the free-response format is clearly more appropriate than a multiple-choice format. There is no inherent goodness or badness in any type of question format. The choice must be made on the basis of the behavior to be tested.

Types of Objective Type Items

1. Selection Type
2. Supply Type

In selection type, true-false or alternative form, matching exercises, and multiple choice items are included. Another category of objective type items that is supply type consisted of completion or fill in the blanks and short answer items. The selection of any one or combination of these is made on the basis of their suitability for measuring the desired learning outcome.

Topic- 056: Characteristics of MCQs

The multiple choice items are generally recognized as the most widely applicable and useful types of objective test items that can measure knowledge, comprehension and as well as application level learning outcomes.
Multiple choice items consist of two parts:

i. A Stem
ii. No. of options or alternatives

Stem

The problem may be stated as a direct question or an incomplete statement and is called the stem of the
