ENG529 - Technology in Language Teaching (Quiz no. 1)

Question # 10 of 10 ( Start time: 01:59:48 PM, 30 April 2024 )

Having internet access in classroom opens up_____.

Select the correct option

- mind
- oblivion
- learning ✓
- exercise

opens up

7

The Internet, in particular, has become a social phenomenon that "pervades work, education, interpersonal communication" (Thorne, & Black, 2008), and having internet access in the classroom opens up learning to the real world, beyond the confines of the classroom.

For instance, the web can be an instant provider of information for the teacher, as it has fast become in the world outside the classroom. Rather than telling learners, you will give them the answer to a question later, you can look it up there and then. You can also show the learners how to use reference tools, such as dictionaries, concordancers, a thesaurus and phonemic charts. By helping them help themselves, you are promoting their autonomy, as learners and users. A teacher also has more choice with the Web-more ways to answer vocabulary questions, for example. As well as explaining something or providing a definition or translation, you can look for complete sentences, or show your learners a picture.

The Web is, of course, also a great source of listening. You can find video clips of people speaking countless varieties of English, as well as have access to songs, through sites such as

Question # 7 of 10 ( Start time: 01:58:27 PM, 30 April 2024 )

Learning becomes more durable because more _____ are involved in technology.

Select the correct option

- (●) senses
- ( ) insight
- ( ) judgement
- ( ) decision

involved in tec

**Benefits of Learning Technology**

7

Many classroom teachers using technology have anecdotal evidence of their l being motivated and engaged, and this is often a major reason for using learning technologies. There is also evidence that the use of technological tools empowers learners to transcend the traditional concept of the classroom (Drexler, 2010) and can lead to learners taking greater ownership of their learning (Terrell, 2011), especially through being actively involved together outside the classroom. Real language exposure has been transmitted to learners through technology.

Technology can be a highly engaging and interactive tool, providing a source of real language, both written and spoken, in the classroom, and motivating learners to produce more language than they otherwise might have done. More senses are involved in technology, so learning becomes durable and most penetrating into the slate of the brain.

A web 2.0 site allows to interact and collaborate as _____.

Select the correct option

- teachers
- artists
- creators
- actors

as crea

personalize listening tasks and choose a video clip to complement something in the syllabus. The Web can also be used for learners who are particularly interested in a specific topic, or a stimulus for speaking about a subject.

**Real Communication**

There has also been a clear shift in the role of the Internet, away from it being a huge resource library towards what has been called Web 2.0, where communication takes the lead, which has led to an increase in internet use. A Web 2.0 site allows users to interact and collaborate as creators of user-generated content in a virtual community.

Your learners can connect to other learners, or users of English, in real-time (synchronously), or at different times (asynchronously), thereby providing opportunities for authentic language practice (i.e. real communication), rather than the practice for practice's sake that usually takes place in the classroom.

autonomy

Lesson 3

## Technology in English Language Classroom

- Technology as an Effective Tool for Language Learning
- Use of Technology & Improvement of Language Teaching & Learner Learning
- The Outcome Dependent on the Language Teacher's Use of Technology
- Application of Technology & a Changed English Classroom
- Technology-embedded Classroom Develops Learners' Autonomy ✓
- Use of Technology Develops Learners' Higher Order Thinking

### Technology as an Effective Tool for Language Learning

Technology is an effective tool for learners. Learners must use technology as a significant part of their learning process. Teachers should model the use of technology to support the curriculum so that learnerscan increase the true use of technology in learning their language skills (Costley, 2014; Murphy, DePasquale, & McNamara, 2003). Learners' cooperation can be increased through technology. Cooperation is one of the important tools for learning. Learners cooperatively work together to create tasks and learn from each other through reading their peers' work (Keser, Huseyin, & Ozdamli, 2011).

### Use of Technology & Improvement of Language Teaching & Learner Learning

ENG529 - Technology in Language Teaching (Quiz no. 1)

Question # 4 of 10 ( Start time: 08:04:19 AM, 30 April 2024 )

By helping students to use technology, we can promote their _____.

Select the correct option

- mind
- health
- wealth
- autonomy ✓

autonomy

Lesson 3

## Technology in English Language Classroom

- Technology as an Effective Tool for Language Learning
- Use of Technology & Improvement of Language Teaching & Learner Learning
- The Outcome Dependent on the Language Teacher's Use of Technology
- Application of Technology & a Changed English Classroom
- Technology-embedded Classroom Develops Learners' Autonomy
- Use of Technology Develops Learners' Higher Order Thinking

### Technology as an Effective Tool for Language Learning

Technology is an effective tool for learners. Learners must use technology as a significant part of their learning process. Teachers should model the use of technology to support the curriculum so that learnerscan increase the true use of technology in learning their language skills (Costley, 2014; Murphy, DePasquale, & McNamara, 2003). Learners' cooperation can be increased through technology. Cooperation is one of the important tools for learning. Learners cooperatively work together to create tasks and learn from each other through reading their peers' work (Keser, Huseyin, & Ozdamli, 2011).

### Use of Technology & Improvement of Language Teaching & Learner Learning

ENG529 - Technology in Language Teaching (Quiz no. 1)

Question # 5 of 10 ( Start time: 08:04:48 AM, 30 April 2024 )

Learning becomes more durable because more _____ are involved in technology.

Select the correct option

- senses
- judgement
- decision
- insight

Click to So

are involved in

Many classroom teachers using technology have anecdotal evidence of their learners being motivated and engaged, and this is often a major reason for using learning technologies. There is also evidence that the use of technological tools empowers learners to transcend the traditional concept of the classroom (Drexler, 2010) and can lead to learners taking greater ownership of their learning (Terrell, 2011), especially through being actively involved together outside the classroom. Real language exposure has been transmitted to learners through technology.

Technology can be a highly engaging and interactive tool, providing a source of real language, both written and spoken, in the classroom, and motivating learners to produce more language than they otherwise might have done. More senses are involved in technology, so learning becomes durable and most penetrating into the slate of the brain.

ENG529 - Technology in Language Teaching (Quiz no. 1)

Question # 8 of 10 ( Start time: 08:06:24 AM, 30 April 2024 )

Having internet access in classroom opens up_____.

Select the correct option

- oblivion
- mind
- learning
- exercise

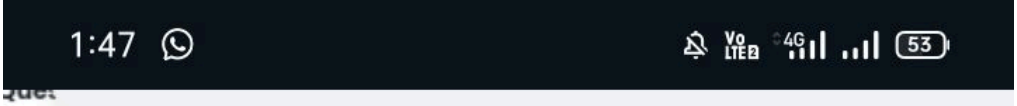

opens up

The Internet, in particular, has become a social phenomenon that "pervades work, education, interpersonal communication" (Thorne, & Black, 2008), and having internet access in the classroom opens up learning to the real world, beyond the confines of the classroom.

For instance, the web can be an instant provider of information for the teacher, as it has fast become in the world outside the classroom. Rather than telling learners, you will give them the answer to a question later, you can look it up there and then. You can also show the learners how to use reference tools, such as dictionaries, concordancers, a thesaurus and phonemic charts. By helping them help themselves, you are promoting their autonomy, as learners and users. A teacher also has more choice with the Web-more ways to answer vocabulary questions, for example. As well as explaining something or providing a definition or translation, you can look for complete sentences, or show your learners a picture.

The Web is, of course, also a great source of listening. You can find video clips of people speaking countless varieties of English, as well as have access to songs, through sites such as

The 'Hot Potatoes' is a _____ tool.
