Q.1 Registers are normally part of _____.

A. CPU

B. Hard disk

C. CPU and Cache

D. RAM

Q.2 "mov [bx], ax" moves the two bytes contents of the AX register to the address contained in BX register in the current _____.

A. Extra Segment

B. Code Segment

C. Data Segment

D. Stack Segment

Q.3 8088 is a _____ processor with its accumulator and all registers of _____.

A. 16 bit, 16 bits

B. 8 bit, 8 bits

C. 32 bit, 32 bits

D. 16 bit, 32 bits

Q.4 Which type of jump(s) cover the whole memory? I. Short II. Near III. Far

A. III

B. I and II

C. I

D. II

Q.5 Which of the following is an illegal instruction?

A. MOV AX, BX

B. Mov BX, 10

C. MOV AX, [BX+BP]

D. MOV AX, 65

Q.6 Call instruction changes the values of _____ and _____ registers.

A. IP, DX

B. IP, SP

C. IP, AX

D. IP, AL

Q.7 The intent of the processor is carried to the memory for read/write operations through the _____.

A. control bus

B. both data bus and address bus

C. address bus

D. data bus

Q.8 In _____, every bit moves one position to the right, and the bit dropped from the right is inserted at the left. The dropped bit is also copied into the carry flag.

A. Rotate through Carry Left (RCL)

B. Rotate Left (ROL)

C. Rotate Right (ROR)

D. Rotate through Carry Right (RCR)

Q.9 Which of the following bit is dropped into the carry flag after the execution of "Shift Logical Right" operation?

A. 1 bit

B. 0 bit

C. Right most bit

D. Left most bit

Q.10 Keeping in view the downward compatibility between the two systems, the codes written for the Intel 8088 are _____ on the Intel 386 processor.

A. control

B. altered

C. invalid

D. valid
