Q.1 Whenever we need access to a memory location whose address is not known until run-time we use _____.

A. Index Register

B. Destination Register

C. Accumulator Register

D. Counter Register

Q.2 Which of the following is the most illegal instruction?

A. Mov ax, [num1]

B. Mov al, ax

C. Mov ax, al

D. Mov al, [num1]

Q.3 A symbol associated to a point in the program is called a _____.

A. Stack

B. Subroutines

C. JUMP

D. Label

Q.4 To modify the processor's behavior, _____ instructions are used.

A. program control

B. data movement

C. arithmetic logic

D. special

Q.5 The _____ flag has a special role in debugging.

A. trap

B. parity

C. sign

D. zero

Q.6 The _____ flag sets if the last mathematical or logical instruction has produced a zero in its destination.

A. Trap

B. Interrupt

C. Zero

D. Sign

VU TOOLKIT

Q.7 In _____, a zero is inserted from the right and every bit moves one position to its left with the most significant bit dropped into the carry flag.

A. SAL

B. SAR

C. SHL

D. both SHL and SAL

Q.8 Which of the following register is used to hold address of the next instruction to be executed?

A. Program Counter

B. Index register

C. Counter register

D. Accumulator register

Q.9 What is the purpose of MOV AX, 0xFFFF?

A. Add 0xFFFF into AX

B. Copy 0xFFFE into AX

C. Move AX into 0xFFFF

D. Store 0xFFFF into AX

Q.10 By default, IP is associated with _____.

A. CX

B. BP

C. CS

D. SS
