Q.1 Which one of the following word is not accepted by the given regular expression? (a+b)*(aaa+bbb)(a+b)*

A. abbaaabba
B. bababbbba
C. ababaaaab
D. baabaabba

Q.2 Two FAs are said to be equivalent, if they _____.

A. accept same language
B. none of the given options
C. accept different language
D. accept null string

Q.3 Reverse of string "YxwzYz" defined over Σ ={w,x,Y,z} is _____.

A. zYzxwY
B. zYzwYx
C. zYwzxY
D. zYzwxY

Q.4 If S = {a}, then S+ will be _____.

A. {a, aaa, aaaaa, aaaaaaa,...}
B. {a, aa, aaa, aaaa,...}
C. {a, aaa, aaaa, aaaaa,...}
D. {aa, aaaa, aaaaaa, aaaaaaaa,...}

Q.5 Which one of the following word is not accepted by the given regular expression? (a+b)*bba(a+b)*

A. babbba
B. aaababab
C. abbbbaa
D. bbabbbbaba

Q.6 In case of finite automaton there _____ be a transition on each _____ for every letter of the alphabet set.

A. may be, state
B. often, edge
C. must, state
D. must, edge

Q.7 Which one of the following is the RE for the language defined over Σ= {a, b} having all the words starting with a?

A. a*(a + b)

B. (a + b)*

C. aa(a + b)+

D. a(a + b)*

Q.8 The state where there is no way to leave after entry, is called _____.

A. Davey John locker

B. empty state

C. null state

D. delay state

Q.9 a(a+b)*b + b(a+b)*a is the regular expression of language defined over Σ={a,b} that is _____.

A. starting with a and ending in b

B. starting with b and ending in a

C. starting with a and ending in a

D. starting with a and ending in b or starting with b and ending in a

---

Q.10 Let S = {aa, bb}, then S* will have the _____ string.

A. bbaab

B. aabbbaa

C. Λ

D. abba
