CS403P - Quiz No.9

22 December 2025

1 **A relation is in third normal form if _____.**

A. It has a transitive dependency
B. It has a partial dependency
C. It has multivalued attributes
D. **It is already in second normal form**

2 **A table is in third normal form if it is in second normal form and there is no _____.**

A. Consistency
B. **Transitive dependency**
C. Full functional dependency
D. Partial dependency

3 **Consider the following relation: STD(stId, stName, stAdr, prName, prCrdts) stId → stName, stAdr, prName, prCrdts prName → prCrdts Which of the following dependency exist in above relation?**

A. Terminal dependency
B. Reflexive dependency
C. **Transitive dependency**
D. Composite dependency

4 **If a relation is not in third normal form, then anomalies are due to _____.**

A. Reflexive dependency
B. Partial dependency
C. Full functional dependency
D. **Transitive dependency**

5 **A transitive dependency occurs when _____.**

A. Primary key attribute is dependent on non-key attribute
B. Non-key attribute is not dependent on another non-key attribute
C. **Non-key attribute is dependent on another non-key attribute**
D. Part of the key is dependent on key attribute

6 **The anomalies caused by transitive dependency in a relation are removed by _____.**

A. Changing primary key
B. Reducing number of columns
C. **Breaking down the relation**
D. Reducing number of rows

CS403P - Quiz No.9

22 December 2025

7 **From the following options, Choose the correct statement for the third normal form.**

A There is partial dependency in the relation

B **No non key attribute is dependent on another non key attribute**

C Non key attribute is dependent on another non key attribute

D There is redundant data in the relation
