**Q.1 _____ of reference is an important fact of current processor technology.**

A. Formality
B. Assigning
**C. Locality**
D. Defining

---

**Q.2 In plane sweep approach of solving geometric problems, a _____is swept across the plane.**

**A. Line**
B. Cube
C. Box
D. Plane

---

**Q.3 There are no hard formal rules to the syntax of the _____ code.**

A. Basic
B. Programming
C. Assembly
**D. Pseudo**

---

**Q.4 Merge sort is based on_____.**

A. Plan-sweep
**B. Divide and Conquer**
C. Brute-force
D. Axis-sweep

---

**Q.5 The Omega-notation allows us to state only the asymptotic _____bounds.**

A. Both lower & upper
B. Middle
C. Upper
**D. Lower**

---

**Q.6 Which of the following is calculated with Big Omega notation?**

A. Upper bounds
B. Medium bounds
C. Both upper and lower bounds
**D. Lower bounds**

---

VU TOOLKIT

**Q.7 To check whether a function grows faster or slower than the other function, we use some asymptotic notations, which is _____.**

A. Big-oh notation

B. Omega notation

C. Theta notation

**D. All of the given**

---

**Q.8 _____ is not a characteristic of Random Access Machine.**

A. Assigning a value to a variable

B. Single-Processor

C. Executing an arithmetic instruction

**D. Locality of reference**

---

**Q.9 The brute-force algorithm for 2D-Maxima runs in order O(___) time.**

A. n

B. n(log n)

C. n3

**D. n*n**

---

**Q.10 In 2d-maxima problem, a point is said to be _____if it is not dominated by any other point in that space.**

A. Member

B. Minimal

**C. Maximal**

D. Joint

---
