Q.1 Equivalence relation partitions the vertices into _____ classes of mutually reachable vertices and these are the strong components

A. Non equivalence

B. Variance

C. Non classes

D. Equivalence

Q.2 In Timestamped DFS-cycles lemma, if edge (u, v) is a back edge, then _____

A. {{f[u]}} {{f[v]}}

B. {{f[u]}} {{f[v]}}

C. {{f[u]}} > {{f[v]}}

D. {{f[u]}} < {{f[v]}}

Q.3 For _____ graphs, there is no distinction between forward and back edges.

A. large

B. directed

C. undirected

D. medium

Q.4 In computing the _____ components of a digraph, vertices of the digraph are partitioned into subsets.

A. worst

B. best

C. strongly connected

D. weakly connected

Q.5 In undirected graph, by convention all the edges are called _____ edges.

A. Both forward and back

B. Back

C. Forward

D. Cross

Q.6 We say that two vertices u and v are mutually _____ if u can reach v and vice versa.

A. Not Reachable

B. Reachable

C. Crossed

D. Forward

Q.7 In Timestamped DFS, If there is a back edge (u, v) then v is an ancestor of u and by following tree edge from v to u, we get _____.

A. a line

B. nothing

C. a cycle

D. a graph

Q.8 The _____ given by DFS allow us to determine whether the graph contains any cycles.

A. Topological sort

B. Time stamps

C. Order

D. BFS traversing

Q.9 A topological sort of a DAG is a _____ ordering of the vertices of the DAG such that for each edge (u, v), u appears before v in the ordering.

A. Linear

B. Non-Linear

C. Sequence

D. Parallel

Q.10 If you find yourself in maze the better traversel approach will be :

A. DFS

B. Level order

C. BFS

D. BFS and DFS both are valid
