Q.1 Many of the problems encountered in Software development are attributed to shortcoming in _____.

A. Maintenance

B. Requirement Gatherings

C. Coding

D. Testing

Q.2 Which of the given component of software engineering framework provides different techniques that can be used to perform a particular task?

A. Processes

B. Quality Focus

C. Methods

D. Tools

Q.3 The goal of _____ is to translate the customer's desire for a set of defined capabilities into a working product.

A. Hardware Engineering

B. Mechanical Engineering

C. Electrical Engineering

D. Product Engineering

Q.4 Include and extend relationship is used in UML notation of a/an _____.

A. Entity Relationship Diagram

B. Use Case Model

C. Activity Diagram

D. Data Flow Diagram

Q.5 The condition that must be met before the use case can be invoked, is called:

A. Pre-Condition

B. Pre-Assertion

C. Post-Condition

D. Post-Assertion

Q.6 In software engineering paradigm, any engineering approach must be founded on organizational commitment to _____.

A. Performance

B. Quality

C. Cost

D. Scheduling

Q.7 _____ component of software engineering framework provides automated or semi-automated support in a software development.

A. Tools

B. Quality Focus

C. Methods

D. Processes

Q.8 The Use case diagram shows that which _____ interact with each use case.

A. Component

B. Use case

C. Actor

D. Relation

Q.9 If you try to make software more user-friendly then the _____ may suffer.

A. Cost

B. Efficiency

C. Reliability

D. Software

Q.10 In _____ the analyst determines all the sources of requirements and where do these requirements consume

A. Source and Sink Analysis

B. Up Parsing

C. Data Flow Analysis

D. Down Parsing
