Q.1 To construct a system model the engineer should consider one of the following restraining factors?

A. schedule and milestones
B. budget and expenses
C. assumptions and constraints
D. data objects and operations

Q.2 A Process in Data Flow Diagram (DFD) represents

A. Storage of data
B. Transformation of data
C. Flow of data
D. An external agent

Q.3 Requirement engineering mainly deals with the _____ of the system.

A. Definition Phase
B. Maintenance Phase
C. Development Phase
D. Vision Phase

Q.4 Which one of the following is the external quality of a software product?

A. Low Coupling
B. Cohesion
C. Correctness
D. Concision

Q.5 Software Engineering is the combination of tools, techniques and _____.

A. Testing
B. Maintenance
C. Processes
D. Design

Q.6 The system specification describes the

A. time required for system simulation
B. algorithmic detail and data structures
C. implementation of each allocated system element
D. function and behavior of a computer-based system

VU TOOLKIT

Q.7 The Use case diagram shows that which _____ interact with each use case.

A. Use case

B. Relation

C. Actor

D. Component

Q.8 _____ structure represents the internal organization of the various data and control items.

A. Data

B. Conceptual

C. Value

D. Information

Q.9 _____ component of software engineering framework provides automated or semi-automated support in a software development.

A. Tools

B. Processes

C. Methods

D. Quality Focus

Q.10 In use case diagram, an ellipse signifies a(n):

A. actor

B. class

C. system boundary

D. use case

VU TOOLKIT
