Q.1 Which one is not a part of Software Development phase ?

A. Project Vision

B. Construction

C. Definition

D. Scope

Q.2 In Data Flow Diagram (DFD), data flow can:

A. Only originate from an external entity

B. Originate and terminate in an external entity

C. Either originate or terminate in an external entity but not both

D. Only terminate in an external entity

Q.3 Include and extend relationship is used in UML notation of a/an _____.

A. Use Case Model

B. Activity Diagram

C. Entity Relationship Diagram

D. Data Flow Diagram

Q.4 To construct a system model the engineer should consider one of the following restraining factors?

A. data objects and operations

B. assumptions and constraints

C. schedule and milestones

D. budget and expenses

Q.5 Use case construction is a technique used for:

A. requirements determination.

B. database design.

C. requirements structuring.

D. user interface design.

Q.6 _____ diagram does not capture control flow information, it just shows the flow of the data in a system.

A. Sequence

B. Data Flow

C. Activity

D. Class

Q.7 In software engineering paradigm, any engineering approach must be founded on organizational commitment to _____.

A. Scheduling

B. Quality

C. Cost

D. Performance

Q.8 More powerful hardware resulted into the development of _____ powerful and _____ software.

A. more, complex

B. less, complex

C. more, simple

D. less, simple

Q.9 The system specification describes the

A. function and behavior of a computer-based system

B. implementation of each allocated system element

C. time required for system simulation

D. algorithmic detail and data structures

Q.10 Arranging information in _____ form makes it easy to read, understand and comprehend as compared to streams of text.

A. Columns

B. Rows

C. Paragraph

D. Tabular
