Q.1 Which type of virtualization allows multiple virtual servers to run on a single physical server, sharing the underlying hardware resources?

A. Application virtualization
B. Server virtualization
C. Storage virtualization
D. Network virtualization

Q.2 Which technology companies are known for operating massive data centers to support their services?

A. Microsoft and Apple
B. Twitter and LinkedIn
C. Amazon and Netflix
D. Facebook and Google

Q.3 The practice of hosting a desktop Operating system and applications together on remote host is called _____.

A. Application Virtualization
B. Desktop Virtualization
C. Data Virtualization
D. Storage Virtualization

Q.4 Which of the following is a common application of virtualization in modern IT infrastructure?

A. Replacing software with hardware
B. Enhancing physical cable bandwidth
C. Increasing CPU clock speed
D. Running multiple operating systems on a single physical machine

---

Q.5 Which type of virtualization allows applications to run on a virtualized operating system, separate from the host operating system?

A. Network virtualization
B. Storage virtualization
C. Server virtualization
D. Application virtualization

Q.6 Which type of virtualization pools storage resources from multiple physical devices into a single virtual storage device?

A. Network virtualization
B. Application virtualization
C. Server virtualization
D. Storage virtualization

Q.7 Which company designs its own custom servers and data centers as part of its infrastructure strategy?

A. Facebook
B. Airbnb
C. Spotify
D. TikTok

Q.8 Which type of virtualization creates virtualized versions of physical hardware devices, allowing multiple virtual devices to run on a single physical device?

A. Network virtualization
B. Server virtualization
C. Storage virtualization
D. Hardware virtualization

Q.9 Which type of organization offers data center services such as colocation, hosting, or cloud services?

A. Law Firms
B. Hospitals
C. Advertising Agencies
D. Data Center Service Providers

Q.10 Which technology provides the solution of Application level virtualization?

A. Google Cloud Platform
B. Docker
C. Microsoft Azure
D. Microsoft App-v
