CS505P - Quiz No.2

Date: 06 November 2025

Q.1 Which statement is incorrect in case of Applications Virtualization?

A. Applications installed locally on client machine

B. Applications cost reduced

C. Run cross-platform applications

D. Application are independent of underlying OS

Q.2 Which type of virtualization allows applications to run on a virtualized operating system, separate from the host operating system?

A. Storage virtualization

B. Network virtualization

C. Server virtualization

D. Application virtualization

Q.3 Which feature allows multiple virtual machines to access a shared storage system concurrently while maintaining data integrity?

A. Storage area network (SAN)

B. Storage virtualization

C. Distributed file system

D. Network-attached storage (NAS)

Q.4 What is the benefit of using virtual hard disks in a virtual data center?

A. Improved network connectivity and lower latency

B. Increased physical storage capacity and faster data access

C. Reduced hardware costs and better resource utilization

D. Enhanced data security and encryption capabilities

Q.5 Which architectural component of a Virtual Data Center enables the migration of virtual machines between physical hosts without service interruption?

A. Live Migration Manager

B. Load Balancer

C. Hypervisor

D. Virtual Switch

Q.6 What is the primary advantage of a Hardware-Defined Data Center (HDDC)?

A. Lower hardware costs

B. Simplified management and reduced complexity

C. Higher performance and lower latency

D. Enhanced scalability and flexibility

Q.7 Which technology provides the solution of Application level virtualization?

A. Microsoft App-v

B. Google Cloud Platform

C. Microsoft Azure

D. Docker

Q.8 What is the primary advantage of a Software-Defined Data Center (SDDC)?

A. Improved security
B. Enhanced scalability and flexibility
C. Faster data processing speed.
D. Reduced hardware costs.

Q.9 Which component of an SDDC is responsible for managing and orchestrating virtual machines?

A. Software-Defined Networking (SDN)
B. Hypervisor
C. Virtual Machine Manager (VMM)
D. Software-Defined Storage (SDS)

Q.10 Which of the following is a common application of virtualization in modern IT infrastructure?

A. Running multiple operating systems on a single physical machine
B. Replacing software with hardware
C. Increasing CPU clock speed
D. Enhancing physical cable bandwidth
