Q.1 What is the purpose of Virtual switch in Server virtualization?

A. To manage virtual machine templates
B. To allocate virtual storage resources
C. To connect virtual machines to physical networks
D. To control virtual machine resource utilization

Q.2 Which technology is commonly used for server virtualization?

A. NIC
B. Driver
C. Hypervisor
D. Switch

Q.3 What is the benefit of server virtualization?

A. Improved disaster recovery capabilities
B. Increased physical server count
C. Increased hardware costs
D. Reduced energy consumption

Q.4 Remote debugging is possible in_____

A. University
B. Software Defined data center
C. Software house
D. Hardware Data center

Q.5 Which type of hypervisor runs directly on the host machine's hardware?

A. Type 1
B. Type 2
C. Oracle VirtualBox
D. VMware ESxi

Q.6 Which of the following best describes a data center?

A. A device used to store and retrieve data
B. A software program used for data analysis
C. A type of network topology used for data transfer
D. A facility that stores and manages large amounts of data

Q.7 Which of the following is not a part of an SDDC?

A. Virtualized servers
B. Software-Defined Networking (SDN) controller
C. Physical Switches
D. Software-Defined Storage (SDS) array

Q.8 What is the role of a hypervisor in virtualization?

A. Providing virtualization softwar
B. Implementing security protocols
C. Allocating hardware resources to virtual machines
D. Managing network connectivity

Q.9 Which of the following is not a component of a data center?

A. Office furniture

B. Security cameras

C. Network switches

D. Servers

Q.10 Which technology is used to achieve Application level virtualization?

A. Microsoft App-v

B. Microsoft Azure

C. Docker

D. Google Cloud Platform
