Q.1 _____ is an abstraction of the solution.

A. Work Flow

B. Design

C. Blue Print

D. Flow Chart

Q.2 To maintain the inheritance relationship (in Vertical Mapping), Object ID of the parent class is inserted in the child classes as a _____.

A. surrogate key

B. primary key

C. unique key

D. foreign key

Q.3 An instance of the _____ cannot be created.

A. Super Class

B. Abstract Class

C. Sub Class

D. Control Class

Q.4 Structured design is a/an _____.

A. Medium level approach

B. Center level approach

C. Top down approach

D. Bottom up approach

Q.5 Object oriented design is a/an _____.

A. High level approach

B. Bottom up approach

C. Action oriented approach

D. Top down approach

Q.6 In Hierarchical Organization _____components may be composed of _____components.

A. Larger,Smaller

B. Small,Medium

C. Medium,Larger

D. Smaller,Larger

VU TOOLKIT

Q.7 The cardinality of Association relationship is _____.

A. 1:m only

B. 1:1 only

C. 1:1, 1:m and m:m

D. 1:1 and 1:m only

Q.8 Whole-part relationship exists in _____.

A. Association

B. Inheritance and Association

C. Inheritance

D. Composition

Q.9 Parent-child relationship exists in _____.

A. Inheritance

B. Association

C. Inheritance and Composition

D. Composition

Q.10 Following are the properties of the good design except:

A. Low coupling

B. Efficient code

C. Compact implementation

D. Most maintainable
