1. Which of the following is not feasible in large networks?

A. Routing Information Protocol
B. Static routing
C. Dynamic routing
D. Open Shortest Path First

---

2. _____ selects the best path for packet delivery from source to destination

A. Hub
B. Amplifier
C. Router
D. Repeater

---

3. In _____ routing technique, network parameters and environment are expected to remain constant

A. Passive
B. Alternative
C. Static
D. Dynamic

---

4. In _____ routing, there is no bandwidth usage between routers

A. Passive
B. Alternative
C. Static
D. Dynamic

---

5. Which of the following is a routing protocol?

A. IP
B. SMTP
C. FTP
D. OSPF

---

6. _____ protocols determine the method of packet delivery

A. Rated
B. Routing
C. Routed
D. Rolling

VU TOOLKIT BY PARADOXCIAL

7. Which of the following address is used to deliver the packet from a router to the correct destination host?

A. Logical

B. IP

C. Port

D. Hardware

---

8. In _____routing all jobs are done automatically by routing protocol

A. Dynamic

B. Auto

C. Static

D. Direct

---

9. Which of the following address is used to get packets from a network?

A. Logical

B. Port

C. Physical

D. Hardware

---

10. In _____ routing, there is no overhead on the router CPU

A. Static

B. Passive

C. Alternative

D. Dynamic
