Q.1 Dotted decimal represents each octet in _____ and uses a dot to separate octets.

A. Octal

B. decimal

C. hexadecimal

D. binary

Q.2 In the IP address _____ identifies the physical network to which the computer is attached.

A. Mux

B. Prefix

C. Suffix

D. Demux

Q.3 _____ field of header indicates whether a datagram is a fragment or a complete datagram.

A. FRAGMENT OFFSET

B. IDENTIFICATION

C. FLAGS

D. None of the given

Q.4 IP datagram can contains _____ octets.

A. 1-65,535

B. 1-65,536

C. 0-65,535

D. none of the given

Q.5 _____ contains all information needed to deliver datagram to the destination.

A. Data Area

B. Identifier

C. Header

D. none of the given

Q.6 Every hardware technology specification includes the definition of the maximum size of the frame data area, which is called the _____ Transmission Unit.

A. Fragment

B. Frame

C. Maximum

D. Least

Q.7 _____ is a technique used to Limit datagram size to small MTU of any network

A. Encapsulation

B. Fragmentation

C. none of the given

D. Segmentation

Q.8 _____ Serve Same purpose in Internet as frames on LAN

A. Virtual Frames

B. Packets

C. Virtual Packets

D. Both b and c

Q.9 MTU Stands for _____

A. None of the given

B. Multicast transmission unit

C. Minimum transmission unit

D. Maximum transmission unit

Q.10 End to End delivery Service of IP datagram is ____

A. Connection oriented

B. Connectionless

C. none of the given

D. both a and b
