Q.1 De-normalization may be in the form of, combining tables, adding data or _____.

A. Duplicating tables
B. Sharing tables
C. Deleting tables
D. Splitting tables

Q.2 The main goal of normalization is to eliminate _____.

A. Data sharing
B. Data consistency
C. Data security
D. Data redundancy

Q.3 This technique can be used when a column from one table is frequently accessed in a large scale join in conjunction with a column from another table.

A. Derived attributes
B. Horizontal splitting
C. Adding redundant column
D. Pre-joining

Q.4 Which of the following is not a technique of 'De-Normalization'?

A. ER Modeling
B. Splitting Tables
C. Pre-joining
D. Adding Redundant Columns

Q.5 For good decision making, one should be able to integrate data across the organization to give the _____ of organization.

A. Brief view
B. Partial view
C. Undermine view
D. Total view

Q.6 The relation R will be in 2nd Normal Form if

A. It is in 1NF and Primary key is composite.
B. It is in 1NF and each non key attribute is dependent upon entire primary key.
C. It is in 1NF and each non key attribute is dependent upon a single column of composite primary key.
D. It is in 1NF and each cell contains single value.

Q.7 Identify data warehouse query from the following:

A. Total number of students that have 3.5 CGPA

B. Factors which can affect students' performance

C. List of students belong to Lahore city

D. Number of students studying CS614 course

Q.8 Table collapsing technique is applied in case of:

A. Many-to-one relation

B. One-to-one relation or many-to-many relation

C. One-to-many relation

D. None of the given options

Q.9 _____ segregates data into separate partitions so that queries do not need to examine all data in the table.

A. Pre-joining technique

B. Collapsing tables technique

C. Vertical splitting technique

D. Horizontal splitting technique

Q.10 _____ can be used when some columns are rarely accessed rather than other columns or when the table has wide rows or header or both.

A. Derived attributes

B. Horizontal splitting

C. Pre-joining

D. Vertical splitting
