Q.1 Which type of cipher uses a random key that is only used once?

A. Caesar cipher
B. Rail fence cipher
C. One-time pad cipher
D. Vigenere cipher

Q.2 What is the purpose of cryptography?

A. To provide entertainment to people
B. To provide a way to communicate without encryption
C. To provide a way to store data without encryption
D. To provide secure communications in the presence of an adversary/attacker

---

Q.3 Which type of attack involves using a pre-computed table to crack passwords?

A. Brute force attack
B. Rainbow table attack
C. Social engineering attack
D. Dictionary attack

Q.4 Which type of cipher uses a keyword to encrypt plaintext?

A. Vigenere cipher
B. One-time pad cipher
C. Rail fence cipher
D. Caesar cipher

Q.5 Which of the following is a common method for user authentication?

A. Password-based authentication
B. All of the given
C. Biometric authentication
D. Multi-factor authentication

Q.6 What does RBAC stand for?

A. Role-Based Authorization Control
B. Role-Based Access Control
C. Restricted-Budget Access Control
D. Resource-Based Access Control

Q.7 What is the minimum key length required for RSA encryption?

A. 1024 bits

B. 56 bits

C. 128 bits

D. 512 bits

Q.8 Which type of attack involves attempting to recover a password by trying all possible combinations?

A. Rainbow table attack

B. Replay attack

C. Brute force attack

D. Dictionary attack

Q.9 Which type of encryption uses the same key for both encryption and decryption?

A. Asymmetric encryption

B. Symmetric encryption

C. Steganography

D. Hashing

Q.10 Which type of cipher replaces each letter with another letter based on a fixed shift value?

A. Rail fence cipher

B. One-time pad cipher

C. Vigenere cipher

D. Caesar cipher
