Q.1 Cross partial derivative of the function; MP_M = (\ln K).(\ln L) with respect to (\ln L) is:

A. (L)
B. (L) + (M)
C. (K)
D. (M)

Q.2 Which of the following is necessary for maximum level of profit?

A. Second order derivative of the profit function should be less than zero
B. First order derivative of the profit function should be less than zero
C. First order derivative of the profit function should be greater than zero
D. Second order derivative of the profit function should be greater than zero

---

Q.3 One of the major components of money supply is:

A. Bank deposits
B. Bank deposits
C. Bank deposits
D. Discount rate

Q.4 Which of the following shows the direct effect of the function y = f(g(w),w) ?

A. y = f(w)
B. y = f(x,w)
C. y = f(g(w))
D. x = g(w)

Q.5 F(U,x_1 ,x_2) = 0 shows:

A. Cubic function
B. Cubic function
C. Quadratic function
D. Implicit function

Q.6 2x + 3y = 20 is an example of:

A. Production function
B. Implicit function
C. Quadratic function
D. Cubic function

Q.7 Given the saving function S = 0.20Y + 3i; S_i = \frac{{\partial S}} {{\partial i}} is:

A. 0.20

B. 3.20

C. 3

D. 3/0.20

Q.8 Which of the following expression shows inverse demand function?

A. D^{ - 1} = f(P + 1)

B. P = f^{ - 1} (D)

C. P = f + D

D. D = f(P)

Q.9 Which of the following shows the differential of y = f(x) = Ax^\alpha + \beta ?

A. dy = Ax^{ - 1} .dx

B. dy = (+)Ax^{ - 1} .dx

C. dx = Ax^{ - 1} .dy

D. dy = Ax^{ - 1} .dx

Q.10 F(Q,K,L) = 0 shows:

A. Cubic function

B. Cost function

C. Implicit function

D. Quadratic function
