1. The test taker's motivation level cannot be judged, maintained, or enhanced, is disadvantage of which of the following test?
 - a) Individual tests
 - b) Aptitude test
 - c) Group test**
 - d) Speed tests
2. Goodenough – Harris Drawing Test is used to measure:
 - a) Intelligence**
 - b) Aptitude
 - c) Personality
 - d) Perception
3. At which stage of Illinois Test of Psycholinguistic Abilities (ITPA), analysis or processing of information is done?
 - a) Stage 1
 - b) Stage 3
 - c) Stage 2**
 - d) Stage 4
4. The concept of mental age was introduced in which of the following revision of Binet and Simon Scale?
 - a) 1905
 - b) 1906
 - c) 1916
 - d) 1937**
5. _____ of children refers to the understanding of the world as a function of age and experience.
 - a) Moral development
 - b) Cognitive development**
 - c) Main development
 - d) Social Development
6. When items are discriminating the two groups then they should be _____ in the test.
 - a) Improved
 - b) Deleted
 - c) Retained**
 - d) Discarded
7. The object permanence develops at which stage of cognitive development in children?
 - a) Concrete Operational
 - b) Sensorimotor**
 - c) Formal Operational
 - d) Preoperational
8. A process of validating a test on different samples is called:
 - a) Cross validation**
 - b) Different validation
 - c) Test validation
 - d) Between Validation
9. The Raven's test contains how many matrices with a missing part presented in graded difficulty?
 - a) 60**
 - b) 50
 - c) 40
 - d) 70
10. Who is the founder of Differential Psychology?

a) Francis Galton

- b) Alfred Alder
- c) Carl Rogert
- d) Jean Piaget

11. The ability to be original, to combine known fact in new ways, or to find new relationship between known fact called:

a) Learning

b) Creativity

- c) Memory
- d) Disability

12. At which stage of ITPA, analysis or processing of information is done?

- a) Fourth
- b) Third
- c) First

d) Second

13. According to Piaget's theory, development of conservation and mastery of concept of reversibility develops at which stage?

a) Sensorimotor stage

b) Concrete Operational stage

- c) Preoperational stage
- d) Formal Operational stage

14. The common item difficulty index range of test items is between_____.

a) .3 and .8

- b) .2 and .7
- c) .4 and .9
- d) .1 and .6

15. Which of the factor accounts for the ability that is common in all people?

- a) a-factor
- b) s-factor

c) g-factor

d) p-factor

16. Which of the following book deals with issues related to validity coefficients?

a) Standards of Professional and Psychological Assessment

b) Standards of Educational and Psychological Testing

- c) Standards of Educational and psychological Assessment
- d) Standards of Professional and Psychological Test

17. First formal measure of intelligence was developed by:

a) Alfred Binet and Charles Spearman

b) Alfred Binet and Theodore Simon – in 1905

- c) Alfred Binet and Lewis Terman
- d) Alfred Binet and Louis Thurston

18. _____ Developed the first formal intelligence test in 1905.

a) Alfred Binet

- b) Alfred Adler
- c) Jean Piaget
- d) Carl Rogers

19. In Heterogenous groups, the value of correlation will be _____ as compared to homogenous groups.

- a) Best
- b) Moderate

c) Higher

d) Lower

20. Kaufman Brief intelligence Test meant to be used with age ranges of:

- a) 50 to 90 years
- b) 10 to 90 years
- c) 80 to 90 years

d) 4 to 90 years

21. _____ refers to the ability to adopt, to reason, to solve problems, and think in an abstract manner.

- a) Capability
- b) Cleverness

c) Intelligence

d) Attitude

22. The value of item difficulty index may range from:

a) Zero to 2.5

b) Zero to 1

c) Zero to 2

d) Zero to 1.5

23. The s'' factor indicates:

- a) Superior intelligence
- b) Singular intelligence
- c) Special intelligence

d) Specific intelligence

24. The Woodcock – Johnson Psycho – Educational Battery – Revised is a commonly used measure of children's achievement measuring various aspect of _____ ability.

a) University

b) Scholastic

c) Academic

d) College

25. Mental processes that are involved in acquired knowledge and comprehension like problem solving and judging are called:

a) Cognition

b) Perception

c) Affection

d) Knowledge

26. Illinois Test of Psycholinguistic Abilities (ITPA) was designed for children with age ranges from:

a) 2-10 years

b) 2-11 years

c) 2-09 years

d) 2-12 years

27. _____ of children refers to the understanding of the world as a function of age and experience.

- a) Moral development
- b) Social development
- c) Moral development

d) Cognitive development

28. According to Piaget's theory, thought is systematic and logical, but only with regard to concrete objects. This concept is related to which of the following stage of cognitive development?

a) Sensorimotor Stage

b) Concrete Operational Stage

c) Formal Operational Stage

- d) Preoperational Stage
29. The s'' factor indicates:
- a) Superior intelligence
 - b) Special intelligence
 - c) Specific intelligence
 - d) Singular intelligence
30. In heterogenous groups, the value of correlation will be _____ as compared to homogenous groups.
- a) Best
 - b) Moderate
 - c) Higher
 - d) Lower
31. Item response theory is called:
- a) Chance response theory
 - b) Possibility response theory
 - c) Probability response theory
 - d) Item – Characteristic Curve Theory
32. Subtest including face recognition, hand movements, triangles, matrix analogies, spatial memory and photo series are included in following scales:
- a) Achievement
 - b) Sequential processing
 - c) Nonverbal
 - d) Mental processing composite
33. The original Binet – Simon intelligence test was comprised of _____ items arranged according to increasing order of difficulty.
- a) 35
 - b) 31
 - c) 32
 - d) 30
- a) The common item difficulty index range of test items is between _____.
- b) .4 and .9
 - c) .2 and .7
 - d) .1 and .6
 - e) .3 and .8
34. 100 students appeared in a test, 65% of high achievers selected a distractor which was actually a wrong answer. But only 10% of low achievers selected that distractor, that distractor should be _____ by the test developer.
- a) Excluded
 - b) Maintained
 - c) Retained
 - d) Improved
35. The use of individual or group test depends on the:
- a) Reliability of test
 - b) Purpose of the test
 - c) Validity of test
 - d) Level of the test
36. Item response theory is also called:
- a) Chance response theory
 - b) Possibility response theory
 - c) Probability response theory
 - d) Item – Characteristic Curve theory
37. _____ Test is used parallel to GRE in Pakistan?

- a) CAT
- b) MMRI
- c) GAT
- d) SAT**

38. Raven Progressive Matrices (RPM) is a non – verbal multiple – choice measure of:

- a) Crystal Intelligence
- b) Fluid Intelligence
- c) General Intelligence**
- d) Formal Intelligence

39. A process of validating a test and different sample is called:

- a) Cross validation**
- b) Between validation
- c) Different validation
- d) Test validation

40. A 50-minute verbal test that measure student's ability to find logical relationships for 100 different analogy problems is:

- a) Khulmann – Anderson Test
- b) The scholarstic Assessment Test
- c) Graduate Record Examination Aptitude Test
- d) Miller Analogies Test**

41. According to Piaget's theory, language acquisition and symbolic thinking develop of which stage?

- a) Sensorimotor stage
- b) Concrete Operational stage
- c) Formal Operational Stage
- d) Preoperational stage**

42. Item response theory is also called;

- a) Possibility response theory
- b) Item - Characteristic Curve theory**
- c) Chance response theory
- d) Probability response theory

43. The common item difficulty index range of test item is between _____.

- a) .4 and .9
- b) .3 and .8**
- c) .2 and .7
- d) .1 and .6

44. In heterogeneous groups, the value of correlation will be _____ as compared to homogenous groups.

- a) Moderate
- b) Lower
- c) Best
- d) Higher**

45. Which slope indicates that test is discriminating between the two groups well?

- a) Straight slope
- b) Curve slope
- c) Steep slope**
- d) Steady slope

46. Which of the following test has been developed specially for poor readers, poorly educated, and the ones who had English as a second language?

- a) Henmon – Nelson Test (H-NT)
- b) Cognitive Abilities Test (COGAT)**
- c) Kuhimann – Anderson Test – 8th Edition (KAT)

- d) The scholastic Assessment Test
47. Item difficulty index is denoted by a lowercase italicized:
- a) a
 - b) q
 - c) r
 - d) p**
48. At which stage of Illinois Test of Psycholinguistic Abilities (ITPA), analysis or processing of information is done?
- 1) Stage 1
 - 2) Stage 4
 - 3) Stage 2**
 - 4) Stage 3
49. _____ refers to the lowest level or point where two consecutive items of approximately equal difficulty are passed.
- a) Mental age
 - b) Basal age**
 - c) Basic age
 - d) Chronological age
50. The Scholastic Assessment Test or SAT – I was previously known as:
- a) Scholastic Achievement Test
 - b) Scholastic Activity Test
 - c) Scholastic Academic Test
 - d) Scholastic Aptitude Test**
51. Subtest including face recognition, hand movement, triangles, matrix analogies, spatial memory and photo series are included in following scales:
- a) Nonverbal**
 - b) Achievement
 - c) Sequential processing
 - d) Mental processing composite
52. Which of the following test has been developed specially for poor leaders, poorly educated, and the ones who had English as a second language?
- a) Henmon – Nelson Test (H-NT)
 - b) The Scholastic Assessment Test
 - c) Kuhlmann – Anderson Test – 8th Edition (KAT)
 - d) Cognitive Abilities Test (COGAT)**
53. Which of the following theory takes into consideration the probability of answering, right or wrong, each individual item a test?
- a) Chance response theory
 - b) Item response theory**
 - c) Probability response theory
 - d) Possibility response theory
54. An item with difficulty index of _____ is also a bad item because it was correctly attempted by 100% test takers.
- a) 1.00**
 - b) 0.01
 - c) 2.00
 - d) 0.05
55. _____ refers to the ability to adapt, to reason, to solve problems, and think in an abstract manner.
- a) Cleverness
 - b) Attitude
 - c) Capability

d) Intelligence

56. According to Piaget's theory, development of conservation and mastery of concept of reversibility develops at which stage?

- a) Sensorimotor Stage
- b) Preoperational Stage
- c) Formal Operational Stage

d) Concrete Operational Stage

57. The value of item difficulty index may range from:

- a) Zero to 2.5
- b) Zero to 1.5
- c) Zero to 2

d) Zero to 1

58. Which of the following test is based on modern concepts of information processing?

a) Illinois Test of Psycholinguistic Abilities (ITPA)

- b) Torrance Test of Creative Thinking (TTCT)
- c) Memory for Designs Test (MTD)
- d) Benton Visual Retention TEST (BVRT)

59. The use of individual or group test depends on the:

- a) Level of the test
- b) Validity of test
- c) Reliability of test

d) Purpose of the test

60. When criterion – related validity is not the right choice for determining the validity of a test, a better option would be to use _____.

- a) Concurrent

b) Construct

- c) Face
- d) Content

61. The original Binet – Simon intelligence test was comprised of _____ items arranged according to increasing order of difficulty?

a) 30

- b) 32
- c) 31
- d) 35

62. According to which of the index, nobody can attempt the items correctly in a given test?

a) Zero item difficulty index

- b) Nil item difficulty index
- c) Multiple item difficulty index
- d) Multiple item difficulty index

63. Who argued that instead of only one g' factor there are a number of factors that can influence intelligence?

- a) Alfred Adler
- b) Carl Rogers
- c) Jean Piaget

d) Thorndike's Social Intelligence Scale

64. _____ scales include subtests of magic window, face recognition, Gestalt closure, triangles, matrix analogies, spatial memory and photo series.

- a) Mental processing composite

b) Simultaneous processing

- c) Achievement
- d) Sequential processing

65. Wechsler Adult intelligence scale, third edition meant to be used with age ranges of:

a) 16 to 89 years

b) 25 to 45 years

c) 20 to 60 years

d) 35 to 65 years

66. Kuhlmann – Anderson Test is an example of:

a) Speed Test

b) Individual Test

c) Aptitude Test

d) Group Test

67. The original Binet – Simon Intelligence test was comprised of _____ items arranged according to increasing order of difficulty.

a) 35

b) 31

c) 30

d) 32

68. An item with difficulty index of _____ is also a bad item because it was correctly by 100% test takers.

a) 2.00

b) 1.00

c) 0.01

d) 0.05

69. Goodenough Harris Drawing Test is used to measure:

a) Aptitude

b) Personality

c) Intelligence

d) Perception

70. At which stage of Illinois Test of Psycholinguistic Abilities (ITPA), analysis or processing of information is done?

a) Stage 3

b) Stage 1

c) Stage 4

d) Stage 2

71. The use of individual or group test depends on the:

a) Purpose of the test

b) Reliability of test

c) Validity of test

d) Level of the Test

72. _____ means the content of a test which represents the conceptual domain.

a) Criterion – related evidence

b) Predictive validity evidence

c) Content validity evidence

d) Construct validity evidence

73. Kuhlmann – Anderson Test is an example of:

a) Speed Test

b) Individual Test

c) Aptitude Test

d) Group Test

74. Illinois Test of Psycholinguistic Abilities (ITPA) was designed for children with age ranges from:

a) 2-11 Years

b) 2-12 Years

c) 2-09 Years

d) 2-10 Years

75. Sometimes the term _____ rather than difficulty index is used that refers to the percentage of responses to correct choices.

a) Facility index

b) Availability index

c) Choice index

d) Correct index

76. The common item difficulty index range of the test items is between _____.

a) .4 and .9

b) .3 and .8

c) .2 and .7

d) .3 and .6

77. According to Piaget's Theory, development of conservation and mastery of concept of reversibility develops at which stage?

a) Formal Operational Stage

b) Sensorimotor stage

c) Concrete Operational Stage

d) Preoperational Stage

78. A process of validating a test on different samples is called:

a) Cross validation

b) Between validation

c) Test validation

d) Different validation

79. The original Binet-Simon intelligence test was comprised of _____ - items arranged according to increasing order of difficulty.

a) 30

b) 32

c) 31

d) 35

80. When criterion – related validity is not the right choice for determining the validity of a test, a better option would be to use.

a) Face

b) Construct

c) Concurrent

d) Content

81. The basic in computation of person correlation coefficient is that the relationship between the test and the criterion is.

a) Nondirectional

b) Reverse

c) Opposite

d) Linear

82. Graduate Record Examination is an example of:

a) Class test

b) Speed test

c) Personality test

d) Aptitude test

83. _____ developed the first formal intelligence test in 1905.

a) Carl Rogers

b) Alfred Binet

c) Alfred Adler

d) Jean Piaget

84. A form of item analysis used to assess how difficult items are known as:
- a) Item analysis
 - b) Item difficulty**
 - c) Item assessment
 - d) Item discrimination
85. Item analysis is a set of methods that is used to evaluate which of the following?
- a) Test validity
 - b) Test items**
 - c) Test scores
 - d) Test objectives
86. A value of _____ is calculated from two sets of scores, the predictor and the criterion variable.
- a) Correlation**
 - b) Variance
 - c) ANOVA
 - d) Deviation
87. All the following are the advantages of Group Test Except:
- a) The personal touch and rapport is not found in group tests
 - b) Group tests are a good source of quick data collection for research projects
 - c) Group tests save time of administration
 - d) A large number of test takers can be examined simultaneously**
88. The Miller Analogies Test is one of the examples of:
- a) Speed test
 - b) Personality test
 - c) Aptitude test**
 - d) Class test
89. When every distracter appears to be the right or plausible answer to examinees who do not know the right answer, this would be an example of _____ multiple choice item.
- a) Good**
 - b) Discriminatory
 - c) Immoral
 - d) Bad
90. Identify the type of social intelligence which helps to cope with one's own and other's emotions.
- a) Moral intelligence
 - b) Fluid intelligence
 - c) Emotional intelligence**
 - d) Emotional intelligence**
91. The Differential Ability scale was developed by:
- a) Eliot**
 - b) Simon
 - c) Binet
 - d) Galton
92. The _____ section of GRE includes measurement of reasoning, antonyms, analogies and paragraph comprehension.
- a) Non-verbal
 - b) Analytical
 - c) Quantitative
 - d) Verbal**

Note: The three sections of GRE include verbal (GRE-V), quantitative (GRE-Q) and analytic (GRE-A). The verbal section includes measurement of reasoning, antonyms, analogies and paragraph comprehension.

93. The child can accurately search for the object at:

- a) 12-15 months
- b) 12-18 months**
- c) 10-18 months
- d) 18-12 months

94. Lewis Terman who gave the first Stanford revision of the Stanford – Binet Intelligence Scale on a sample of:

- a) Africans
- b) Australians
- c) Asians
- d) Americans**

Note: The American psychologist Terman gave the first Stanford revision of the scale in 1916.

95. The Kaufman Brief Intelligence Test yields three scores namely, verbal, non-verbal, and _____.

- a) Vocabulary
- b) Achievement
- c) Composite**
- d) Sequential Processing

96. Abstract and logical thought develops at:

- a) Formal Operational Stage**
- b) Sensorimotor Stage
- c) Concrete Operational Stage
- d) Preoperational Stage

97. Which of the following tests are used to assess and predict future behavior certain criterion?

- a) Personality tests
- b) Intelligence tests
- c) Performance tests**
- d) Achievement tests

98. The basic assumption in computation of Person correlation coefficient is that the relationship between the test and the criterion is _____.

- a) Opposite
- b) Linear**
- c) Reverse
- d) Nondirectional

99. A good item has a:

- a) Positive slope**
- b) Progressive slope
- c) Negative slope
- d) Straight slope

100. _____ is a measure of the difference between the high scorers and how answering the item correctly.

- a) None item difficulty index
- b) The item discrimination index**
- c) Multiple item difficulty index
- d) Zero item difficulty index

101. In a test, 65% achievers and 10% of low achievers selected a distractor which was the correct answer. That distractor can be considered:
- a) Very bad
 - b) Poor
 - c) Weak
 - d) **Very good**
102. Which of the following intelligence test has two sets of norms; grade-wise and age – wise?
- a) **Henmon-Nelson Test**
 - b) Kuhlmann-Anderson Test
 - c) Simon-Binet intelligence test
 - d) Stranford-Binet intelligence test
103. Who claimed that intelligence can be measured in terms of performance of a child?
- a) Alfred and Louis Thurston
 - b) Alfred Binet and Charless Spearman
 - c) Alfred Binet and Lewis Terman
 - d) **Alfred Binet and Theodor Simon**
104. _____ means to understand and comprehend ideas like algebra, mathematics, or intangible concepts.
- a) Fluid intelligence
 - b) **Abstract intelligence**
 - c) Critical intelligence
 - d) Crystal intelligence
105. If all distracters attract the _____ number of test takers, then they are very good response options.
- a) Different
 - b) Variable
 - c) Extra
 - d) **Same**
106. Henmon-Nelson Test (H-NT) is an example of:
- a) Personality test
 - b) Performance test
 - c) **Intelligence test or Mental ability**
 - d) Speed test
107. Kuhlmann-Anderson Test I primarily a:
- a) Verbal test
 - b) Speed test
 - c) **Non-Verbal test**
 - d) Personality test
108. Which of the following tests are designed in such a manner that a large number of test takers can do them simultaneously?
- a) Speed tests
 - b) Aptitude tests
 - c) **Group tests**
 - d) Individual tests
109. At which stage of ITPA, the response takes place?
- a) **Stage 3**
 - b) Stage 2
 - c) Stage 1
 - d) Stage 4

110. The item difficulty index of 60 means that the item was correctly attempted by _____ test takers.
- a) 15%
 - b) 25%
 - c) 30 %
 - d) 60%**
111. First formal measure of intelligence was developed in:
- a) 1904
 - b) 1906
 - c) 1905**
 - d) 1903

Quiz 4

112. Woodworth Personal Data Sheet was developed by Woodworth during:
- a) Las World War
 - b) Second World War
 - c) Third World War
 - d) First World War**
113. _____ Is a projective test which is used to evaluate an individual and individual's thought patterns, observational capacity, and emotional responses with a help of abstract pictures.
- a) COPE
 - b) TAT**
 - c) MMPI
 - d) MRI
114. The JVIS was developed by:
- a) Michigan
 - b) Rosenzweig
 - c) Jackson**
 - d) Morgan
115. Bayley Scales of Infant Development is used to measure:
- a) Infants Cognitive and spatial functions
 - b) Infants cognitive and neural functions
 - c) Infants cognitive and social functions
 - d) Infants cognitive and motor functions**
116. The Hand Test was developed in 1983 by:
- a) Galton
 - b) Wanger**
 - c) Thompson and Sones
 - d) Rosenzweig
117. Jackson Vocational Interest Survey Contains _____ Statements about job-related activities.
- a) 288
 - b) 286
 - c) 287
 - d) 289**
118. Who directed the development of IPAT Culture Fair Intelligence Test?
- a) Watson
 - b) Freud
 - c) Cattell**

d) Binet

119. This 70-Item Desired Control Scale was developed

a) Sarason & Co-workers

b) Donovan & O'Leary

c) Saltzer

d) Reid and Zeigler

120. Uniformity of scoring across examiners is the _____ of objective type items.

a) Advantage

b) Nature

c) Disadvantage

d) Validity

121. Minnesota Multiphasic Personality Inventory is an example:

a) Subjective Test

b) Performance Test

c) Projective Test

d) Objective Test

122. The later version of the most widely used General Self-Efficacy (GSE) Scale is consisted of:

a) 12 Items

b) 10 Items

c) 15 Items

d) 18 Items

123. In SVIB, raw scores were converted in standard scores, with a mean of 50 and SD of:

a) 10

b) 20

c) 25

d) 15

124. J.L Holland developed which of the following scale?

a) The Care Assessment Inventory

b) The Jackson Vocational Interest Survey

c) The Minnesota Vocational Interest Inventory

d) The Self-Directed Search

125. Thematic Apperception Test was developed by:

a) Gill and Scholer

b) Morgan and Murray

c) Michigon and Wagner

d) Rosenzweig and Galton

126. _____ is a projective test which is used to evaluate and individuals' thought patterns, observational capacity, and emotional responses with a help of abstract pictures.

a) MMPI

b) COPE

c) TAT

d) MRI

127. The examiner can test in depth knowledge of the students is the _____ of subjective of descriptive items.

a) Advantage

b) Disadvantage

c) Validity

d) Nature

128. MMPI has been developed by Hathaway and:
- Gough
 - Mckinley**
 - KLaplan
 - Cattell
129. Bayley Scales of infant development is meant for children within age range of _____.
- 2-30 months**
 - 2-10 months
 - 2-40 months
 - 2-20 months
130. Ali is _____ because is very social and active boy.
- Agreeable
 - Extrovert**
 - Neurotic
 - Introvert
131. The Fear Survey Schedule was initially introduced by:
- Michigan
 - Jackson
 - Morgan
 - Akutagawa**
132. Which of the following scale was developed by Marthias Jerusalem and Ralph Schwarze in 1981?
- The House – Tree – Person Test
 - Emotional Intelligence Scale
 - Multidimensional Health Locus of Control (MHLC)
 - General Self-Efficacy (GSE) Scale**
133. Which of the following developed the Social Support Questionnaire (SSQ)?
- Donovan & O’Leary
 - Saltzer & Workers
 - Lazarus & Colleagues
 - Sarason & Co-workers**
134. _____ is a form of observation in which a person’s behavior is observed under specific circumstances.
- Situational observational Measure
 - Situational Performance Measure**
 - Situational Activity Measure
 - Situational Routine Measure
135. GRE measure’s general scholastic ability and contains three sections EXCEPT:
- Analytic
 - Quantitative
 - Societal**
 - Verbal
136. The first attempt of using words as projective measure was made by whom?
- Thompson and Sones
 - Rosenzweig
 - Galton**
 - Wagner
137. Salman is very moody, touchy and anxious boy. He is exhibiting which of the following personality trait?
- Introvert

b) Neurotic

- c) Extrovert
- d) Agreeable

138. California psychological inventory is an example of:

- a) Performance test
- b) Objective test

c) Subjective test

- d) Projective test

139. State-Trait Anxiety theory was given by

- a) Jackson

b) Speilberger

- c) Morgan
- d) Michigan

140. Is the sum of characteristic on the basic of which people can be differentiated from each other.

- a) Perception

b) Personality

- c) Attitude
- d) Aptitude

141. The Leiter International Performance Scale-Revised covers four domains EXCEPT:

a) Perception

- b) Visualization
- c) Attention
- d) Reasoning

142. Raven Progressive Matrices (RPM) have _____ matrices with a missing part presented in graded difficulty.

- a) 50
- b) 40

c) 60

- d) 70

143. Brazelton Neonatal Assessment Scale (BNAS) is used to measure:

a) Newborns Competence

- b) Edgerly Persons competence
- c) Adolescents' competence
- d) Adults Competence

144. The core features of _____ theory is its emphasis on 'person' or 'nonperson' orientation found in people.

- a) Osipow's
- b) Orlendo's
- c) Cattell's

d) Roe's

145. Uniformity of scoring across examiners is the _____ of objective type items.

- a) Disadvantage
- b) Validity

c) Advantage

- d) Nature

146. The Hand Test was developed in 1983 by:

- a) Galton
- b) Thompson and Sones
- c) Rosenzweig

d) Wagner

147. Which of the following theory stated that individual's personality is expressed through his/her interests?

- a) Vocational rank
- b) Vocational choice
- c) Vocational level

d) Vocational stage

148. Seashore Measure of Musical Talents was developed by:

- a) Jackson
- b) Speilberger
- c) Osipow

d) Lezak

149. In MMPI, paranoia is one of the clinical scales that is used to detect:

a) Suspicion and hostility

- b) Immaturity
- c) Masculine or feminine interests
- d) Authority conflict

150. Multidimensional Health locus of control scale follows;

- a) 7-point Likert response
- b) 5-point Likert response
- c) 3-point Likert response

d) 6-point Likert response

151. The Picture Story Test was developed by whom?

- a) Rosenzweig
- b) Michigan

c) Symonds

- d) Morgan

152. SVIB test comprised of:

- a) 398 items

b) 399 items

- c) 397 items
- d) 400 items

153. Multicultural testing is also known as:

a) Transcultural Testing

- b) Traditional Testing
- c) National Testing
- d) Cultural Testing

154. This 70-Items Desired Control Scale was developed by:

- a) Sarason & Co-workers

b) Reid and Zeigler

- c) Saltzer
- d) Donovan & O'Leary

155. The Education Apperception Test was developed by:

- a) Gill and Schafer
- b) Rosenzweig and Galton

c) Thompson and Sones

- d) Michigan and Wagner

156. In MMPI, paranoia is one the clinical scale that is used to detect:

- a) Immaturity
- b) Authority Conflict

c) Suspicion and hostility

- d) Masculine or feminine interests

157. Children's Apperception Test (CAT) was developed for children within age ranges from:
- a) 3-14 years
 - b) 3-12 years
 - c) 3-10 years**
 - d) 3-15 years
158. The Goodenough-Harris Drawing Test is nonverbal test for measuring:
- a) Aptitude
 - b) Attitude
 - c) Personality
 - d) Intelligence**
159. The original version of the most widely used General Self—Efficacy (GSE), was in which of the following language:
- a) English
 - b) German**
 - c) Latin
 - d) French
160. Vineland Social Maturity scale by
- a) Edger Doln**
 - b) Robert Rison
 - c) Woodworth
 - d) Karl Pearson
161. When every option appears to be the right answer, it means MCQ is a:
- a) Good item**
 - b) Ambiguous item
 - c) Bad item
 - d) Vague item
162. Which of the following is a verbal test that measures students' ability to find logical relationships for 100 different analogy problems?
- a) Scholastic Performance Test
 - b) Scholastic Assessment TEST(SAT)
 - c) Graduate Record Examination Aptitude Test (GRE)
 - d) Miller Analogies Test (MAT)**
163. Which of the following scale is an age scale that uses the concept of mental age and IQ and is designed after the Binet Scale?
- a) Cattell Infant Intelligence Scale**
 - b) Gesell developmental Schedules
 - c) Bayley Scales of Infant Development
 - d) Vineland Adaptive Behaviour Scales
164. In which of the following test, the subject is shown the stimulus card and then asked as to what the figures represent to them?
- a) Make a picture story method
 - b) Michigan picture test
 - c) Rorschach inkblot test**
 - d) Thematic apperception test
165. The Scholastic Aptitude Test-I, has which of the following two parts?
- a) Arithmetic & Digit span
 - b) Verbal Reasoning and Mathematical Reasoning**
 - c) Vocabulary & Similarities
 - d) Writing and Comprehension & Mathematical Reasoning
166. IPAT is an example of culture fair:
- a) Personality test

- b) Aptitude test
 - c) Attitude test
 - d) Intelligence test**
167. The response format of General Self-Efficacy (GSE) Scale is:
- a) 7-point Likert response
 - b) 6-point Likert response
 - c) 4-point Likert response**
 - d) 3-point Likert response
168. The cognitive-behavioral testing is based on:
- a) Cognitive-Social approach
 - b) Cognitive-testing approach
 - c) Cognitive-situational approach
 - d) Cognitive-behavioral approach**
169. Who directed the development of IPAT Culture Fair Intelligence Test?
- a) Watson
 - b) Freud
 - c) Cattell**
 - d) Binet
170. Hypochondriasis is an example of clinical scale in MMPI that is used for detecting:
- a) Authority Conflict
 - b) Anxiety
 - c) Immaturity
 - d) Physical complaints**
171. Miller Analogies Test (MAT) is one of the most widely used:
- a) Scholastic Aptitude Test**
 - b) Scholastic Performance Test
 - c) Scholastic Capacity Test
 - d) Scholastic Ability Test
172. Irrational Beliefs Test contains how many items?
- a) 155 items
 - b) 100 items**
 - c) 101 items
 - d) 115 items
173. _____ is an approach in which the subject keeps a record of her own behavior as it happens.
- a) Systematic desensitization
 - b) Contingency management
 - c) Self-monitoring**
 - d) Self-mirroring
174. Bayley Scales of Infant Development is meant for children within age range of _____.
- a) 2-20 months
 - b) 2-30 months**
 - c) 2-10 months
 - d) 2-40 months
175. Main goal of MMPI is to differentiate:
- a) Rebellious from normal
 - b) Mentally retarded from normal
 - c) Abnormal persons from normal**
 - d) Autistic from normal
176. The Strong-Campbell Interest Inventory comprised of:

a) 325 Items

b) 323 Items

c) 324 Items

d) 326 Items

177. Who among the following is best known for the use of trait factor approach for job decision making?

a) Spielberger

b) Jackson

c) Osipow

d) Michigan

178. Vineland Social Maturity Scale was developed by:

a) Edger Doln

b) Robert Rison

c) Woodworth

d) Kart Peatson

179. A tendency to react favorably or unfavorably towards a designated class of stimuli is called:

a) Insight

b) Coping

c) Attitude

d) Perception

180. In Multidimensional Health Locus of Control (MHLC), following three scales are included EXCEPT:

a) Chance Health Locus of Control (CHLC)

b) External Health Locus of Control (EHLC)

c) Powerful Others Health Locus of Control (PHLC)

Internal Health Locus of Control (IHLC)

181. Which of the following term is used for mentally retarded child?

a) Special child

b) Autistic child

c) Agonist child

d) Distinct child

182. Cognitive and behavior strategies for coping with stress are known as:

a) Emotion – focused strategies

b) Support – focused strategies

c) Problem – focused strategies

d) Avoidant – focused strategies
