Glossary

❖ Learning

Learning refers to changes in behaviours or knowledge as result of experience or practice. OR Relatively permanent change in behaviour is called as Learning. For Example: trying the shoelace or writing address on an envelope are learnt behaviours.

❖ Long Term Memory (LTM)

Long Term Memory is the phase or type of memory responsible for the storage of information for an extended period of time.

❖ Self-Regulation

Self regulation is the ability to monitor and control our own behaviour, emotions, thoughts and changing them according to the demand of situation. OR One's own behaviour without outside assistance or influence.

❖ Short Term Memory (STM)

Short Term Memory is the part of the memory system where information is stored for roughly 30 seconds. Information can be maintained longer with the use of such techniques as rehearsal. To retain the information for extended periods of time; it must be consolidated into long-term memory where it can then be retrieved.

❖ Spatial Reasoning

Spatial reasoning is a category of reasoning skills that refers to the capacity to think about objects in three dimensions and to draw conclusions about those objects from limited information. Someone with good spatial abilities might also be good at thinking about how an object will look when rotated.
